(8) *Consultation and review with appropriate Federal, State and local agencies and others.* This section will briefly describe the overall processes of consultation and coordination with interested agencies, groups, and individuals during the environmental assessment and planning process. A listing of agencies and groups requested to review the draft EIS should be included in this section of the draft EIS. This section should be expanded in the final EIS to provide a response to significant environmental concerns and comments received on the draft EIS and indicate where revisions were made in the EIS.

(9) *Appendices.* The draft and final EIS's should contain appropriate appendices, as necessary, to assist the decision maker in understanding the environmental conditions and impacts regarding the proposed action.

§ 650.9 EIS distribution and comment.

(a) *Draft EIS's.* The following steps will be taken in filing and distributing draft EIS's for review and comment:

(1) *CEQ and others.* Five copies of the draft EIS's will be sent to CEQ by the RFO. At the same time the RFO will send copies to:

(i) *Federal agencies* who have jurisdiction by law or special expertise with respect to any environmental impact involved.

(ii) *State and local agencies.* OMB Circular No. A-95 (Revised) through its system of State and areawide clearinghouses provides a means for obtaining the views of State and local environmental agencies which can assist in the preparation and review of EIS's.

(iii) *Organizations, groups, and individuals.* A copy of the draft EIS will be sent to the appropriate official of each organization or group and each individual who has requested a copy. A charge may be made for multiple copy requests.

(2) *Time period for comment.* The time period for review ends 45 days after the date CEQ publishes the notice of public availability of the draft EIS in the FEDERAL REGISTER. A 15-day extension of time for review and comment will be considered by the RFO when such requests are submitted in writing. If neither comments nor a request for an extension is received at the end of the 45-day period it will be presumed that the agency or party from whom comments were requested has no comments to make.

(3) *News releases.* In addition to the CEQ FEDERAL REGISTER notice of availability, the RFO shall announce the availability of the draft EIS in a newspaper(s) serving the area.

(4) *Revising a draft EIS.* If significant changes in the proposed action are made as a result of comments on the draft EIS, a revised draft EIS may be necessary. The revised draft EIS will be recirculated for comment in the same manner as a draft EIS.

(b) *Final EIS's.* After the review period for the draft EIS, the RFO will prepare a final EIS, making adjustments where necessary by taking into consideration and responding to significant comments and opposing viewpoints received on the draft EIS. The following

steps will be taken in filing and distributing final EIS's:

(1) Letters of comment will be appended to the final EIS. If numerous repetitive responses are received, summaries of the repetitive comments and a list of the commentators may be appended in lieu of the actual letter.

(2) The RFO shall send five copies of the final EIS to CEQ and a copy of the final EIS to each State and Federal agency, organization, group, and individual who furnished comments on the draft EIS. Single copy requests for copies of the final EIS will be provided. A charge may be made for multiple copy requests.

(c) *Supplements to EIS's.* (1) If SCS determines that it is necessary to clarify or amplify a point of concern raised after the final EIS is filed with CEQ, appropriate clarification or amplification will be sent to CEQ with informational copies furnished to those who received copies of the final EIS. The waiting periods are not applicable.

(2) If the RFO determines that the final EIS previously filed becomes inadequate due to a major change in the plan for the proposed action which significantly affects the quality of the human environment, a new EIS will be prepared, filed, and distributed as provided in paragraphs (a) and (b) of this section.

(d) *Administrative action.* The RFO will take no administrative action sooner than 30 days after the final EIS has been made available to the public and the notice of availability of the final EIS has been published in the FEDERAL REGISTER by CEQ.

(e) *Expedited procedures.* When unusual circumstances make it necessary to take action with significant impact on the quality of the human environment without observing the review provisions of paragraphs (a), (b), and (c) of this section, the STC shall request the Administrator to consult with CEQ concerning alternative arrangements.

Subpart B—Related Environmental Concerns

§ 650.20 Reviewing and commenting on EIS's prepared by other agencies.

(a) *SCS employees assigned to review and comment* on EIS's prepared by other agencies are to be familiar with SCS policies and guidelines contained in this part, and NEPA.

(b) *EIS's received for review by SCS for which SCS has expertise or interest* shall be responded to promptly. Comments are to be objective with the intent to offer suggestions to help minimize adverse impacts of the proposed action to ensure the health and welfare of the agricultural community. Comments are to be based on knowledge readily available. Field office technical guides, soil surveys, field investigation reports, and other resource data and reference materials developed by SCS and other agencies should be used and cited. It is not intended that special surveys or investigations be conducted to acquire additional information for use in preparing comments.

(c) *The SCS reviewer should consider the following kinds of concerns*—(1) *The suitability or limitations of the soils for the proposed action.* Would an alternative route, location, or layout minimize land use problems and adverse environmental impacts?

(2) *Provisions for control of erosion and management of water during construction.* Are there resources downstream that would be affected by sediment from the construction area, and does the statement provide for adequate control measures? Will lack of erosion control cause air pollution? Is the stockpiling of topsoil for future use considered in the EIS?

(3) *Provisions for soil and water conservation management measures on project lands, rights-of-way, access roads, and borrow areas.* Does the statement indicate that enduring soil and water practices are to be installed and maintained?

(4) *The effect of water discharges from project lands or rights-of-way onto other properties.* Will discharges cause erosion or flooding on other lands? Will discharges affect water quality?

(5) *The effects of disruption of the natural drainage patterns and severance of private land units.* Does the statement indicate that natural drainage patterns will be maintained? Will bridges, culverts, and other water control structures be located to ensure that adjacent lands are not flooded or otherwise restricted in use? Does the EIS describe the effects of severance on private land ownerships?

(6) *The impact on existing soil and water conservation management systems.* To what extent will conservation systems be altered, severed, or suffer blocked outlets? Will land use or cover be affected?

(7) *Impacts on prime and unique farmland.* Would an alternative location or route require less prime farmland? Does the EIS consider secondary effects on prime farmland? What benefits are foregone if prime farmland is taken?

(8) *Impacts on ecosystems.* Does the EIS describe impacts on major plant communities, and terrestrial and aquatic ecosystems?

(9) *Impacts on SCS-assisted projects.* Does the statement reflect the effect of the proposed action on present or planned SCS assisted projects?

(d) *EIS's referred to SCS for departmental comments.* EIS's referred by the USDA Coordinator for Environmental Quality Activities to the SCS national office may designate SCS as the lead agency for preparing comments for USDA. In this case, the SCS national office determines whether inputs from STC's and other USDA agencies are needed. If so, STC's and other USDA agencies are requested to forward comments to the Environmental Services Division for use in preparing the USDA response.

(e) *EIS's referred to SCS for agency comments.* EIS's received by the SCS national office are screened by the Director, Environmental Services Division to determine which office within SCS will prepare comments. If the proposed action is within one State, the draft EIS will be forwarded to the appropriate STC and he will reply directly to the agency requesting the comments. If the proposed action involves more than one State, one STC will be designated to forward SCS comments directly to the agency requesting the comments. In some cases, the action may be national or regional in scope, and require inputs from several offices within SCS. In this instance, comments will be assembled in the Environmental Services Division for preparation of a response to the agency requesting comments. A copy of each response prepared by a STC should be sent to the Director, Environmental Services Division.

(f) *EIS's sent to SCS offices other than the national office.* If a STC receives an EIS from another agency, he is to respond to the initiating agency. A copy of his comments should be sent to the Director, Environmental Services Division.

(1) *EIS's addressed to SCS area or field offices.* If an EIS is received by a field or area office of SCS, the STC will coordinate the response.

(2) *EIS's submitted to conservation districts.* SCS may furnish needed soil, water, and related resource information to the district for their use in preparing comments.

(g) *Distribution of SCS comments on other agencies' draft EIS's.* Five copies of review comments made by SCS on draft EIS's prepared by other Federal agencies are to be sent to CEQ.

(h) *Third party requests for a copy of SCS comments on another* agency's EIS will be filled after SCS has forwarded copies of its letter of comments to CEQ.

[FR Doc.77-22522 Filed 8-5-77;8:45 am]

DEPARTMENT OF AGRICULTURE

Soil Conservation Service

WATER RESOURCES PROJECT TYPE ACTIVITIES

Channel Modification Guidelines

AGENCY: Soil Conservation Service (Department of Agriculture) and Fish and Wildlife Service (Department of the Interior).

ACTION: Notice of Proposed Guidelines for Use of Channel Modification as a Means of Water Management in water resource project type activities of the Soil Conservation Service (SCS). The guidelines are not intended to have the force of rules or regulations, but are published for the information of the interested public.

SUMMARY: Stream channel modifications can both (1) protect, restore, or bring new farmland into production by removing surface and subsurface water from such lands, and (2) destroy productive wetlands and aquatic habitats which have value to fish, wildlife, and other environmental resources .This situation has resulted in confrontations between agricultural and environmental interests on proposed SCS projects where channel modifications have been planned. The draft guidelines set forth conditions under which channel modifications can be considered acceptable (or unacceptable) in such projects by planners of the Soil Conservation Service and the U.S. Fish and Wildlife Service (FWS).

An earlier version of the guidelines was tested on SCS projects in North Dakota and Louisiana. They apply only to flood prevention projects, small watershed projects, and resource conservation and development projects of the SCS.

The guidelines document discusses their background, describes the types of channel modifications, sets out the draft guidelines themselves, prescribes a procedure for coordinated planning, and outlines a method of resolving issues between SCS and FWS.

The guidelines would restrict the planning of channel modifications which would jeopardize endangered or threatened species, or drain or alter productive wetlands. They also would prohibit such modifications unless they can be accomplished with "little or no" adverse effect on (1) streams which are or may become wild and scenic rivers or which flow through parks, wilderness areas or refuges, or (2) "important fish and wildlife values" after providing appropriate mitigation or protective measures.

DATES: Comments of agencies and the interested public are invited and should be received by no later than September 15, 1977.

ADDRESSES: Comments should be addressed to the following: Lynn Greenwalt, Director, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240, or R. M. Davis, Administrator, Soil Conservation Service, U.S. Department of Agriculture, P.O. Box 2890, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Dr. F. Eugene Hester, Associate Director, U.S. Fish and Wildlife Service, (202-343-5715).

Mr. Joseph W. Haas, Assistant Administrator for Water Resources, Soil Conservation Service (202-447-4527).

Accordingly, the following proposed guidelines are published for informational purposes.

Dated: August 2, 1977.

LYNN G. GREENWALT,
Director,
Fish and Wildlife Service.

B. M. DAVIS,
Administrator,
Soil Conservation Service.

DRAFT CHANNEL MODIFICATION GUIDELINES

Prepared by U.S. Department of the Interior, Fish and Wildlife Service; U.S. Department of Agriculture, Soil Conservation Service

JUNE 1, 1977

CHANNEL MODIFICATION GUIDELINES

TABLE OF CONTENTS

I. Introduction.
A. Purpose.
B. Policy.
C. Applicability.
II. Background.
III. Guidelines.
A. Alternatives.
B. Types of channel modification.
C. Channel modification as an alternative.
IV. Coordination and interaction.
V. Resolution of issues.

CHANNEL MODIFICATION GUIDELINES

I. INTRODUCTION

A. *Purpose.* These guidelines are promulgated by the Soil Conservation Service (SCS) and Fish and Wildlife Service (FWS) to guide their personnel in identifying when and where channel modification may be used as a technique for implementing water and related land resource projects. They will be used in the planning of all SCS projects or measures which qualify for either technical, financial, and/or credit assistance under the authorities for flood prevention projects, small watershed projects, and resource conservation and development projects. These program authorities contain provisions for maintaining and enhancing fish and wildlife resources as well as achieving other water management objectives.

B. *Policy.* It is the policy of the SCS and FWS that care and effort will be made to maintain and restore streams, wetlands, and riparian vegetation as functioning parts of a viable ecosystem upon which fish and wildlife resources depend.

It is also the policy of SCS and FWS to use an interdisciplinary planning process which will permit a balancing of the need to maintain a viable naturally functioning ecosystem and projected food and fiber, economic, and social needs.

The application of these guidelines, the resource inventory, interpretation, and planning assistance provided by the SCS and FWS will insure identification and consideration of alternatives to channel modification.

C. *Applicability.* These guidelines are effective on the date signed by both the SCS and FWS and will be used for all new planning starts, and other projects in the planning phase as determined to be practical by the SCS after consultation with the FWS. The guidelines are not to be applied retroactively to projects approved for construction except when preparing supplements or revisions which result in increases in the amount of channel modification and/or type of channel modification which increases the potential adverse environmental impact (re: section III B.).

After the guidelines have been used for a reasonable length of time, one year or more, their applicability and effectiveness will be reviewed. Subsequently changes will be made as determined necessary or these guidelines may be terminated at the request of either agency.

II. BACKGROUND

Congress has recognized that erosion, floodwater, and sediment can cause damage in the watersheds of the rivers and streams of the United States. It has found that loss of life and damage to property constitutes a menace to the national welfare and that the Federal Government should cooperate with states and their political subdivisions for the purposes of preventing such damages and of furthering the conservation, development, utilization, and disposal of water. In so doing this action will also preserve, protect, and improve the Nation's land and water resources and the quality of the environment.

Congress has also recognized that rivers and streams, wetlands, and riparian vegetation constitute a valuable resource which is vital to the public interest in naturally functioning ecosystems, water transport, and maintenance of fish and wildlife populations Dependent upon the situation, wetlands can serve as (1) natural flood detention areas; (2) sediment and debris traps; (3) water purifiers and in recycling nutrients; (4) groundwater recharge areas; (5) nursery areas for aquatic animal species; (6) important habitats for a wide variety of plant and animal species, some of which have been depleted to the point that their continued survival is endangered; and (7) areas which produce highly valuable crops of timber, fish and wildlife.

High flows in rivers and streams and periodic overflow have significant value in maintaining meandering channels and in cleansing and redistributing substrates. This action by water provides riffle pool or other habitat for fish spawning and rearing, production of aquatic invertebrates. It also provides diverse plant successional areas and other types of shoreline habitat that fulfill fish and wildlife food and cover requirements. However, it is also recognized that many areas adjacent to streams and wetlands are well suited for and have a long history of agricultural and urban uses.

Channel modification, used in a sensitive manner, is one method that can be utilized in solving specific water management problems. It may be needed to restore a water course impaired or damaged naturally or through man's unwise use or management of adjacent or upstream lands. It may also be needed to provide a safe and healthy environment and for the maintenance of existing agricultural productivity However, channel modification can cause serious damage to fish and wildlife resource values. In addition to the direct impacts on the stream and immediate environs, the practice has on occasion, led directly or indirectly to major drainage of wetlands, clearing of bottomland forests for intensive agriculture and increased flooding and siltation in downstream areas. Channel modification for flood control, drainage, and irrigation projects has often resulted in severe conflict with the function of the associated ecosystems, changing or reducing both the variety and abundance of fish and wildlife resources.

Because of the variety of values associated with water, it is incumbent upon the SCS and FWS to continue to share their technical expertise to help insure decisions which will result in the maximum benefits to assure long-term agricultural productivity and optimum environmental quality.

III. GUIDELINES

A. *Alternatives.* The guidelines for channel modification will be used when formulating alternative plans under the Water Resources Council's Principles and Standards. The planning process will include an inventory of resources, including fish and wildlife habitats and its geographic delineation. It will also identify appropriate means for minimizing adverse impacts on habitat values. Measurement of habitat values will be determined on a case-by-case basis in accordance with general procedures to be promulgated by the FWS and developed in consultation with the SCS.

Alternative plans will be formulated to (1) emphasize environmental quality; (2) optimize national economic development; and (3) provide varying mixes of the components of the environmental quality and national economic development objectives. For each alternative plan, there will be a display or accounting of relevant beneficial and adverse effects. A comparison of the displays will identify trade-offs between the environmental quality and economic development objectives. Within this framework and in consideration of the requirements of the National Environmental Policy Act, equal consideration will be given to environmental, and economic and technical aspects in the decisionmaking process.

In compliance with the mandates in NEPA and the Water Resources Council's Principles and Standards, the Fish and Wildlife Service will assist the Soil Conservation Service develop, evaluate, and recommend alternatives, if any, to channel modification when it is expected to cause, directly or indirectly, measurable losses of fish and wildlife resources. The alternatives will be recommended when they meet all the following tests; (1) are consistent with the Water Resources Council's Guidelines for Principles and Standards; (2) make a significant contribution to project objectives; and (3) result in less damage to fish and wildlife habitat. The following three broad types of alternatives will be considered singly or in combination:

1. *Soil and water conservation practices.*

2. *Nonstructural.*—Nonstructural measures may include, but are not limited to land use regulation, land acquisition, providing for the maintenance of aquatic areas, flood plain zoning, flood proofing existing buildings, flood forecasting, flood warning, providing flood hazard information, flood insurance, tax adjustments, emergency assistance, and relocation of properties and people.

3. *Structural.*—Structural alternatives to channel modification include but are not limited to reservoirs, flood ways, dikes, levees (including set back levees), flood walls, pumping plants, diversions, and wetland development and restoration.

B. *Types of channel modification.* Channel modification is defined in these guidelines to include actions, such as riprapping, selective snagging, clearing and snagging, widening, deepening, realignment and lining, listed generally in order of ascending impact on fish and wildlife resources.

1. *Riprapping.* The placement of irregular permanent material such as rock in critical areas along the watercourse to protect the earth materials against excessive erosive forces.

2. *Selective Snagging.* The selective removal of obstructions from a channel to increase its capacity to convey water. This includes, but is not limited to, the removal of downed timber, and accumulations of debris or obstructions.

3. *Clearing and snagging.* The removal of obstructions from the channel and stream banks, including the removal of vegetation and accumulations of bedload material to increase its capacity to convey water. It may include the removal of sediment bars, drifts, logs, snags, boulders, piling, piers, headwalls, and debris.

4. *Widening.* The overall widening of a channel to restore or increase its capacity to convey water. This usually involves clearing, snagging, and excavation of a portion of the channel side slope(s). Where practical, widening is performed on one side only with appropriate consideration given to alternating from one side to the other.

5. *Deepening.* The overall deepening of a channel to increase its capacity to convey water and/or provide drainage. Deepening usually involves clearing or snagging and excavation of a portion of the channel bottom and the channel side slope(s).

6. *Realignment.* The construction of a new channel, or a new alignment, and may involve the clearing, snagging, widening and/or deepening of the existing channel where the new alignment coincides with the existing channel. It may include straightening the alignment to restore or increase the capacity of the echannel to convey water.

7. *Lining.* Placement of a nonvegetative smooth protective lining over all or part of the perimeter of a channel to prevent erosion or to increase the capacity of the channel to convey or conserve water.

C. *Channel modification as an alternative.* The following criteria will be utilized in the planning process for determining when channel modification can be considered an alternative. If used, channel modification will be the minimum required, either alone or in combination with other measures. It will be accomplished using the lease damaging construction techniques and equipment in order to retain as much of the existing characteristics of the channels riparian habitat as possible. Construction practices may include, but are not limited to, such things as seasonal construction, minimum clearing, reshaping spoil, limiting excavation to one bank (on alternating sides where appropriate), and prompt vegetation of disturbed areas.

Channel modification may be considered as an alternative for project purposes for which the SCS is currently authorized by law and which are in conformance with agency (SCS) policy and regulations: *Provided*, The modification is designed to resolve specific problems and would not cause, directly or indirectly, any of the following to occur.

1. Jeopardize the continued existence of endangered species and threatened species designated or formally proposed[1] or result in the destruction or modification of habitat of such species which is determined to be critical under the Endangered Species Act of 1973, or species similarly classified under law of the state(s) in which the project is located.

2. Result in restricted access to use of streams or stream-segments developed specifically for recreation or fish and wildlife use by the general public where monetary benefits based on such use are used in the project evaluations.

[1] Applicable only during a six month period immediately following the date a proposal is published in the FEDERAL REGISTER by the FWS in compliance with the Endangered Species Conservation Act of 1973.

3. The intent or purpose is to drain or Ifoah
otherwise alter wetland types 3 through 20,[2] or the result of the modification would be to indirectly alter wetlands types 3 through 20 and provisions for appropriate mitigation or compensation by establishment of similar habitat values in the project area is not provided. Wetland types 1 and 2 with important fish and wildlife habitat values will be treated in accordance with item 3 below, and their preservation will be strongly recommended when they are adjacent to types 3 through 20 or are needed to maintain a balanced aquatic or simiaquatic ecosystem.

Also, Channel modification will not be considered as an alternative unless it can be accomplished with little or no direct or indirect adverse[3] effect on:

1. Stream or stream segments now designated or undergoing study under the Wild and Scenic Rivers Act or officially designated pursuant to other Federal or state(s) legislative actions for their important natural, esthetic, or recreational values.

2. Streams located in or flowing through or contiguous to established wilderness areas, parks, refuges, or other areas set aside pursuant to Federal or state(s) legislative actions for fish and wildlife esthetic, or recreational values.

3. Important fish and wildlife habitat values in the project impact area, state, or nation after providing for all appropriate mitigation, compensation, or preservation measures. (Measurement of habitat values will be determined on a case-by-case basis in accordance with general procedures to be promulgated by the FWS and developed in consultation with the SCS.)

IV. COORDINATION AND INTERACTION

The FWS and SCS recognize that the application of the above guidelines can most effectively be accomplished through cooperative effort during all planning phases of a water resource project. The FWS and the SCS will work cooperatively with state fish and wildlife agencies to inventory and assess the fish and wildlife resources and to plan alternatives, enhancements, replacement or necessary mitigation measures and be involved as requested throughout the planning process.

The level of effort to be devoted by FWS to each watershed project will be proportional to the value of the resources and expected impact on fish and wildlife resources. If FWS determines at any stage of planning that it cannot, for any reason, participate, it will so notify SCS in writing stating reasons for discontinued participation.

Even though FWS discontinues participation in planning they will eventually, as prescribed by law, become involved with reviewing and commenting on the completed watershed plan. In such instances, FWS will not oppose the project plan on the basis of channel modifications unless it is clearly evident that the plan is not in conformance with the provisions of these guidelines after consultation with SCS determining this to be the case.

The following procedures will be used in the planning of future water resource projects. The coordination identified is between the field levels of the FWS and SCS; however, both agencies recognize that planning will always involve state fish and wildlife agencies, as well as the interested public and sponsoring agencies at all stages throughout the planning process.

[2] Wetland types as described in FWS circular No. 39 or subsequent publications.

[3] Rule of reason must be used in applying these guidelines and determining the actual net effects and their significance at the field level considering the value of the resource and importance of the project objectives.

Coordination of field level planning[1]

Process	SCS action	FWS action
Preapplication...	Potential application under consideration. Notifies FWS that potential application is being considered and issues invitation to meetings.	Participate in meetings.
	Assists sponsors in developing information when appropriate. (Normally requires from one to several days.) Request from FWS available fish and wildlife information and viewpoints concerning potentials for and impacts of a probable project.	Furnishes available information and FWS viewpoint concerning potentials for and impacts of a probable project. If requested, participates jointly with SCS and State fish and wildlife agency in any preliminary fish and wildlife studies needed and report findings as may be required. (Field level letter.)
Application...	Receives application. Notifies FWS in writing that application has been received and when field examination is to begin. Issues invitation to FWS to participate in all meetings and in study and evaluation of available information. (Field examination may require a few days to several weeks.)	Participates in meetings.
	Initiates field examination and assembles available information, coordinates study and evaluation of available information and data. Begins environmental assessment.	Participates in field examination. Assembles and furnishes available fish and wildlife information and data. Participates in study and evaluation of available information and data and in identification of problems and study needs and potential solutions worthy of further study.
	Identifies problems and needs, potential solutions, and broad alternatives worthy of further study. Request FWS to work cooperatively with SCS and State fish and wildlife agency in any special studies required in this step.	Works cooperatively with SCS and State fish and wildlife agency in any special studies required and in preparing an appropriate report.
	Prepares field examination report (includes pertinent fish and wildlife information from FWS) and provides copy to FWS.	Provides inputs (letter report) for the field examination report.
	Requests FWS to participate in developing a plan of study. Prepares the study plan.	Participates with SCS in developing a plan of study. FWS will advise as to scope and detail of specific studies needed, capability of FWS to perform studies and its desire to participate in design of any contracts to secure necessary information.
	Requests planning authority (submits views of FWS with request for planning authorization.)	
Planning.....	Receives notice of planning authorization. Notifies FWS in writing. Initiates and coordinates preliminary investigation (PI) and continues environmental assessment. Notifies FWS in writing. (PI may require from several weeks to 2 yr.)	Participates in meetings and preparation of joint FWS-State fish and wildlife agency-SCS fish and wildlife inventory, assessment, base line data, and report.
	SCS initiates preparation of PI report and update of the study plan. Requests FWS participation in PI and update of plan of study.	Furnishes additional inputs to problems, needs, alternatives and impacts as the PI process progresses and jointly makes recommendations for mitigation, compensation, and enhancement. Furnishes inputs for the PI report and updating of study plan.
	Sends PI report to FWS and others.....	Participates with SCS to review the PI report with the public.
Detailed planning.	Coordinates the detailed planning stage and continuation of the environmental assessment. Notifies FWS that detailed planning is to commence and issues invitation to participate in detailed planning and in meetings.	Participates with SCS and others in detailed planning of alternatives and their components. Works cooperatively with State fish and wildlife agency and SCS to formulate the alternatives and to assess fish and wildlife impacts. Works cooperatively with SCS and State in preparation of recommendations for mitigation, compensation, and enhancement for initial draft plan and, when prepared, an EIS. Participates in meetings. Provides detailed report in accordance with Fish and Wildlife Coordination Act and sec. 12 of Public Law 83-566.
	Prepares initial draft plan and, when required, an EIS. Initiates local field review and issues invitation to FWS to participate in this review. Provides FWS with initial draft plan and an EIS, if prepared.	Provides review comments on initial draft and participates in local field review.
Review (formal)..	Prepares a draft plan and EIS, if required, and circulates for interagency review.	Provides comments to Interior and works with SCS in an attempt to resolve issues, if warrented.
	SCS prepares final plan and EIS, if required. Forwards plan and EIS through system for approval and authorization.	Review plan and EIS according to FWS and Interior instructions.
Operations.....	Receives notice of authorization for installation. Notifies FWS. (Regional and area offices.) Prepares construction plans and invites FWS to review them.	Reviews pertinent construction plans.
	Notifies FWS of supplement when the channel modification guidelines are applicable. (See page 2.) Prepares supplemental plans when necessary and circulates for local field review.	Participates in formulating supplemental plan when the channel modification guidelines are applicable. Same involvement as in planning and provides inputs for supplemental plan. Also provides comments on supplemental plan when circulated for local field review.
	Forwards supplemental plan for approval. Provides FWS copy to supplemental plan.	
Maintenance.....	Advises FWS and State fish and wildlife agency of regularly scheduled maintenance inspections with project sponsors during the life of the project.	Participates in maintenance inspections at FWS discretion. If appropriate, makes recommendations for changes in O&M agreement if necessary to insure that proper maintenance is accomplished.

[1] All steps apply to planning for small watershed projects. Appropriate steps will be followed for Public Law 534 and resource conservation and development measures planning.

NOTES.—1. SCS notifies FWS when planning is suspended, project action terminated, or other stop actions are taken.

2. The level of effort to be devoted by FWS to each watershed project will be proportional to the value of the resources and expected impact on fish and wildlife resources. If FWS determines at any stage of planning that it cannot, for any reason, participate, it will so notify SCS in writing stating reasons for discontinued participation.

V. RESOLUTION OF ISSUES

General

It is recognized that issues may develop which cannot be resolved at the field level. When issues arise, it will be the practice of the FWS and SCS to refer such cases and issues to the next higher respective administrative level for resolution and ultimately, if necessary, to the Secretaries of Agriculture and Interior. The Secretary of Agriculture will seek the advice and counsel of the Secretary of the Interior in reaching his decision. Consultation between the two agencies will, at each level, occur throughout the decision process.

Procedure

1. Most of the problems in applying the guidelines will be identified at the field planning level. When this occurs, the SCS Planning Staff Leader will consult directly with the FWS Field Supervisor (Ecological Services), and attempt to resolve the issue.

2. Should the SCS Planning Staff Leader and FWS Area of Field Supervisor be unable to reach agreement, the issue should be referred and coordinated as follows:

USDA:

In consultation with USDI

State conservationist, SCS.	Regional director and/or area manager, FWS as appropriate.
Administrator, SCS.	Director, FWS.
Assistant Secretary for Conservation, Research and Education.	Assistant Secretary, Fish and Wildlife and Parks.
Secretary of Agriculture.	Secretary of the Interior.

The decision on whether channel modification will be part of a project plan shall rest with the Secretary of Agriculture. If disagreement still exists at the Secretary's level, the FWS views and recommendations will be appended to the project plan.

At all levels in the decision process the desires and needs of the local sponsors, environmental groups, state and federal agencies, and interested public will be taken fully into account.

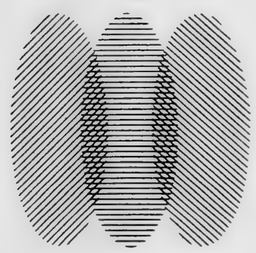
Soil Conservation Service

GUIDE FOR ENVIRONMENTAL ASSESSMENT

General Procedures

Agency: Soil Conservation Service, USDA.
Action: Notice.
Summary: This document provides a general guide for environmental assessment for the use of Soil Conservation Service (SCS) personnel in providing resource conservation planning assistance.

The guide establishes a systematic interdisciplinary assessment process to insure that all significant environmental factors will be considered in the process of making planning decisions. This document was originally published as a field guide in March 1977, and is now in use by SCS personnel.



The purpose of publishing this notice in the FEDERAL REGISTER is to inform public interest groups and other organizations of the overall process being used by SCS personnel in conducting technical analyses of the environment as an integral part of planning.

Following is a full copy of the SCS, "Guide for Environmental Assessment."

Dated: August 2, 1977.

B. M. DAVIS,
Administrator, Soil Conservation Service.

GUIDE FOR
ENVIRONMENTAL
ASSESSMENT

Foreword

This guide was prepared as part of an overall SCS effort to refine and systematize the assessment part of planning. The material presented here is a generalized guide for conducting environmental assessment. An introduction to selected analytical assessment techniques is also included. Evaluation criteria, detailed procedures, and technical standards were intentionally omitted. SCS technical specialists establish these items for regional and local geographic areas in keeping with national standards for each technical field.

This guide represents the combined thinking of many individuals and groups within SCS. The guide was developed under the leadership of Gerald R. Lowry of the Environmental Services Division, Washington, D.C. Parts of the material were adapted from Environmental Assessment Procedure, SCS, USDA, Washington, D.C., May 1974. Comments by James Cooley, Frank Busby, and other persons at the University of Georgia and Utah State University were helpful in organizing the contents. R. C. Solomon, U.S. Corps of Engineers, Vicksburg, Mississippi, provided comments. SCS technical personnel at the Washington office, the four TSC's, and state offices provided much useful review and comment towards refining the guide.

March 1977

SCS GUIDE FOR ENVIRONMENTAL ASSESSMENT

I. Introduction
   A. NEPA
   B. Philosophy

II. Initial phase of assessment
   A. Counsel sponsors
   B. Identify study needs
   C. Establish interdisciplinary team
   D. Obtain resource data
   E. Make field examination
   F. Summarize initial assessment

III. Detailed phase of assessment
   A. Develop strategy for detailed assessment
   B. Describe present conditions
   C. Predict future conditions
   D. Calculate impacts
   E. Summarize detailed assessment

IV. Supplemental phase of assessment

V. Appendixes
   A. Selected assessment references
   B. An example of an environmental matrix
   C. An example of a network analysis
   D. An example of a checklist evaluation system

I. INTRODUCTION

This publication is a general guide for environmental assessment for Soil Conservation Service personnel to use in resource planning. Detailed procedures for assessment within each technical field are provided by specialists at Washington, TSC, and state office levels.

Environmental assessments and impact statements (EIS's) have become a central part of resource planning and an important basis from which an organization's technical capabilities and resource ethics are viewed. EIS's reflect the assessments on which they are based. Accordingly, it is imperative that we maintain high standards for conducting environmental assessments and selecting and training personnel who do this work.

A. The National Environmental Policy Act (NEPA) of 1969 requires all agencies of the federal government to:
   1. Use a systematic interdisciplinary approach in planning and decisionmaking that may have an impact on man's environment.
   2. Identify and develop methods and procedures for environmental assessment in consultation with the Council on Environmental Quality.
   3. Include with reports on proposed major federal actions significantly affecting the human environment detailed statements of environmental impact, adverse impacts that cannot be avoided, alternatives to the proposed action, relationships between short-term and long-term productivity, irreversible or irretrievable commitments of resources, and the comments of other organizations with jurisdiction by law or special expertise.
   4. Utilize ecological information in planning and developing resource-oriented projects.

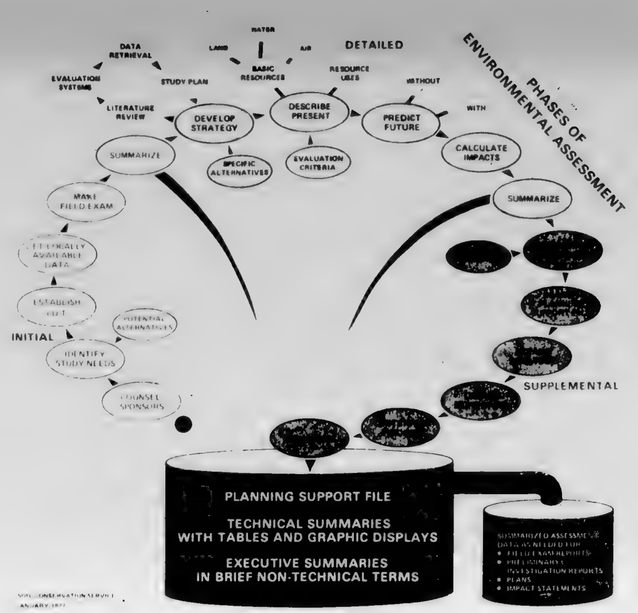
   Additional information about NEPA, environmental impact statements, and environmental assessment in planning is contained in SCS Environment Memoranda and 7 CFR 650.

B. Philosophy and Guidelines
   1. Environmental assessment is that integral part of planning that identifies and estimates the potential effects of alternative solutions on the environment. Assessments document existing environmental conditions and predict probable conditions for selected alternative futures. Environment is defined as the complex of circumstances, objects, and conditions that surround and significantly influence organisms, individuals, or communities. Environmental assessment recognizes the reality that our cultural system is based on, linked to, and part of nature.

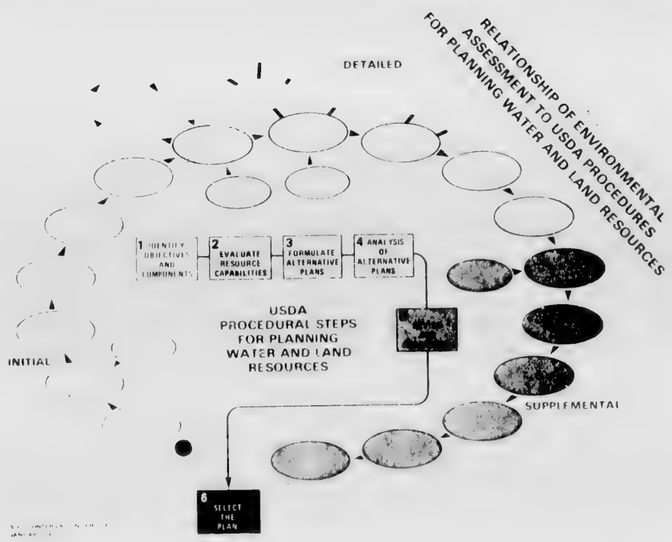
   The immediate purpose of assessment is to display the environmental consequences of different alternative futures to expedite decisionmaking. Such displays minimize the risk of having unanticipated consequences during plan implementation. An ultimate objective of environmental assessment is to aid the long-term optimization of resource use mandated by Section 101 of NEPA.
   2. The most important characteristics of a good assessment are objectivity, reliability of data base, and accuracy of impact predictions. Environmental assessment in planning is based on the ecological principle that "everything affects everything," but it immediately recognizes that we cannot afford to consider all causes or measure all effects. In practice, it is necessary to be reasonable, use commonsense and be professional in identifying major, operationally significant properties and potential effects. Equally important, the results must be condensed into clear, objective summaries and displays to aid decisionmaking by sponsors, agency managers, and concerned publics. Readability and good illustrations are important.
   3. Although environmental assessments are part of all resource planning projects, the scale, scope, and intensity should vary in proportion to the complexity of the project and the importance of the potential impacts. SCS relies primarily on interdisciplinary teams (IDT's) to determine the intensity and extent of assessment efforts.
   4. Strategy for environmental assessments must be specific to the situation. There is no standard method. Persons making assessments must follow the technical literature and adapt new methods of making assessments as rapidly as better techniques become available. The material in this guide must also be adapted to individual planning programs and resources areas on a case-by-case basis. Technical specialists with training in ecology are needed as key members of assessment teams.
   5. The objective of environmental assessment is to provide adequate environmental information to decision makers, not to provide all-inclusive data bases on complex environments. Adequacy means that the support file and reports contain enough environmental data for sound resource planning.
   6. Environmental assessment information must be readily available to decision makers and interested public groups throughout planning. This is done by establishing a reviewable record in the form of correspondence, technical summaries, reports, and all other significant environmental data. This should be retained in the planning support file (the same support file established for other planning activities). The support file should be organized systematically for easy retrieval of data. The reviewable record of planning is needed during later stages of planning and for

postconstruction evaluations. The support file is documentation of compliance with NEPA and other environmental laws. This material also becomes part of an increasingly extensive resource planning data base for other uses.

7. An extensive body of literature is available on the subject of environmental assessment. A list of references that provides an introduction to this literature is included in Appendix A. At appropriate points in this guide, useful references are cited.
8. A schematic diagram can be used to illustrate a generic SCS environmental assessment process (figure 1). Note that the diagram is divided into three major phases: initial, detailed, and supplemental. Within each phase, individual steps or tasks are depicted separately. The same sequential pattern is reflected in the organization of this guide and provides an expanded explanation of assessment.
9. Figure 2 illustrates the general relationship of assessment to the six steps of the USDA Procedures for Planning Water and Related Land Resources. Although the material in this guide generally applies to the full spectrum of resource planning actions, it is especially suited to project planning, such as watershed projects and RC&D measures. Careful study of the RC&D and PL-566 planning handbooks, precedence diagrams, and planning flow charts will help in understanding the relation of assessment tasks to other items in planning.



II. INITIAL PHASE OF ASSESSMENT



A. Counsel sponsors

Assessment activities should begin with environmental counseling in response to requests for assistance. Sponsors should be encouraged to think about environmental factors as they formulate and specify objectives for the proposed action. These objectives eventually are refined as part of the component needs and provide essential guidance for designing and focusing assessment. Tell sponsors about SCS planning constraints, NEPA, and other environmental considerations, especially the NEPA requirement for considering a variety of planning alternatives. Help the sponsors recognize the many public interest groups that are concerned about changes in the natural resource base.

B. Initial identification of study needs

Some combination of district conservationists, RC&D coordinators, area conservationists, resource conservationists, watershed staff leaders, and sponsor representation may perform this task. Size, complexity, and diversity of resources and potential effects determine the extent of this activity. On complex planning actions (such as a watershed project), an initial assessment conference can be held to accomplish the following:

1. On the basis of the original request for assistance and the sponsors' broad policy decisions, identify objectives and set broad boundaries for technical assessment that encompass the goals.
2. Identify the potential alternatives or range of alternatives likely to be considered, the probable zones of project influence (impact zones), and list the technical specialists needed. These estimates are the basis for initial assessment efforts and will be refined as planning proceeds. Identification of impact zones is important since they influence the extent and intensity of subsequent assessment efforts. These zones vary considerably according to the kind of effect being assessed.
3. Identify concerned public interest groups who should participate in or be informed about assessment activities. Do this early so that such groups actively participate and are consulted throughout assessment.
4. Identify and briefly document initial study needs as the beginning of the support file for each action. Also, include aerial photos, soil surveys and interpretations, copies of the request for assistance, and other readily available data.

C. Establish the interdisciplinary team

1. On the basis of the initial identification of study needs, assemble an interdisciplinary team (IDT). The IDT is the critical link in the assessment process. The IDT is a constantly evolving group of resource experts who interact with one another and the public to provide technical planning information to project decision makers. The task of the IDT is to provide information on present and alternative future environments as a rational basis for selecting plans. The IDT is the core group that assists sponsors with other phases of planning, including public participation. Ordinarily, the IDT core is of fewer persons during initial and supplemental assessment than are needed during the detailed phase.

Designate an IDT leader to be responsible for managing assessment and establishing a workable record. The team leader is central to the successful accomplishment of the assessment part of planning. He/she is responsible for coordinating and synthesizing team efforts. This individual may be at the field, area, or State office level of SCS, depending on the scale and scope of the action.

2. As the IDT performs its work, periodically reexamine the possible need for additional experts on the IDT. Such action does not mean that all members participate in each activity, task, or stage. Members participate when their skills can have a significant effect on the assessment effort. People in other agencies and educational institutions, members of special interest groups, and consultants are sources of additional expertise.

postconstruction evaluations. The support file is documentation of compliance with NEPA and other environmental laws. This material also becomes part of an increasingly extensive resource planning data base for other uses.

7. An extensive body of literature is available on the subject of environmental assessment. A list of references that provides an introduction to this literature is included in Appendix A. At appropriate points in this guide, useful references are cited.
8. A schematic diagram can be used to illustrate a generic SCS environmental assessment process (figure 1). Note that the diagram is divided into three major phases: initial, detailed, and supplemental. Within each phase, individual steps or tasks are depicted separately. The same sequential pattern is reflected in the organization of this guide and provides an expanded explanation of assessment.
9. Figure 2 illustrates the general relationship of assessment to the six steps of the USDA Procedures for Planning Water and Related Land Resources. Although the material in this guide generally applies to the full spectrum of resource planning actions, it is especially suited to project planning, such as watershed projects and RC&D measures. Careful study of the RC&D and PL-566 planning handbooks, precedence diagrams, and planning flow charts will help in understanding the relation of assessment tasks to other items in planning.

II. INITIAL PHASE OF ASSESSMENT

A. Counsel sponsors
Assessment activities should begin with environmental counseling in response to requests for assistance. Sponsors should be encouraged to think about environmental factors as they formulate and specify objectives for the proposed action. These objectives eventually are refined as part of the component needs and provide essential guidance for designing and focusing assessment. Tell sponsors about SCS planning constraints, NEPA, and other environmental considerations, especially the NEPA requirement for considering a variety of planning alternatives. Help the sponsors recognize the many public interest groups that are concerned about changes in the natural resource base.

B. Initial identification of study needs
Some combination of district conservationists, RC&D coordinators, area conservationists, resource conservationists, watershed staff leaders, and sponsor representation may perform this task. Size, complexity, and diversity of resources and potential effects determine the extent of this activity. On complex planning actions (such as a watershed project), an initial assessment conference can be held to accomplish the following:

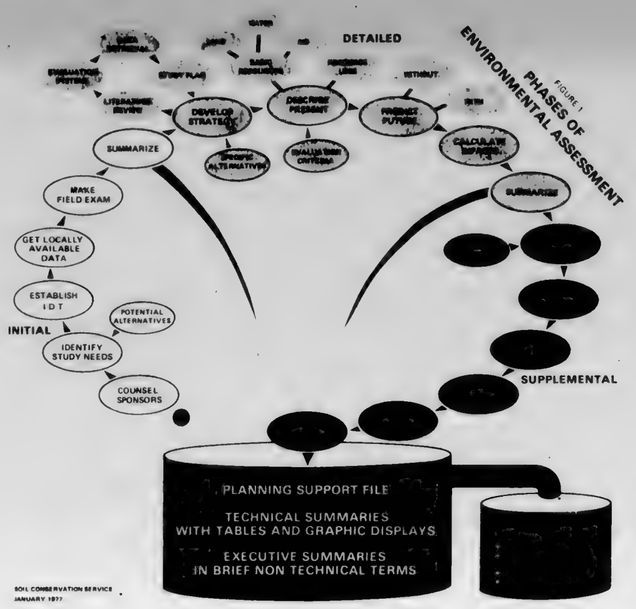


FIGURE 1
PHASES OF ENVIRONMENTAL ASSESSMENT

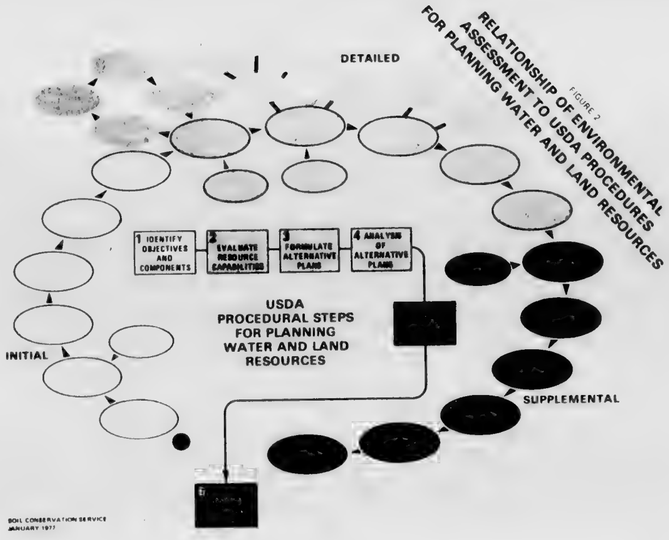

FIGURE 2
RELATIONSHIP OF ENVIRONMENTAL ASSESSMENT TO USDA PROCEDURES FOR PLANNING WATER AND LAND RESOURCES

1. On the basis of the original request for assistance and the sponsors' broad policy decisions, identify objectives and set broad boundaries for technical assessment that encompass the goals.
2. Identify the potential alternatives or range of alternatives likely to be considered, the probable zones of project influence (impact zones), and list the technical specialists needed. These estimates are the basis for initial assessment efforts and will be refined as planning proceeds. Identification of impact zones is important since they influence the extent and intensity of subsequent assessment efforts. These zones vary considerably according to the kind of effect being assessed.
3. Identify concerned public interest groups who should participate in or be informed about assessment activities. Do this early so that such groups actively participate and are consulted throughout assessment.
4. Identify and briefly document initial study needs as the beginning of the support file for each action. Also, include aerial photos, soil surveys and interpretations, copies of the request for assistance, and other readily available data.

C. Establish the interdisciplinary team
1. On the basis of the initial identification of study needs, assemble an interdisciplinary team (IDT). The IDT is the critical link in the assessment process. The IDT is a constantly evolving group of resource experts who interact with one another and the public to provide technical planning information to project decision makers. The task of the IDT is to provide information on present and alternative future environments as a rational basis for selecting plans. The IDT is the same group that assists sponsors with other phases of planning, including public participation. Ordinarily, the IDT consists of fewer persons during initial and supplemental assessment than are needed during the detailed phase.

Designate an IDT leader to be responsible for managing assessment and establishing a reviewable record. The team leader is central to successful accomplishment of the assessment part of planning since he is responsible for coordinating and synthesizing team efforts. This individual may be at the field, area, or state office level of SCS, depending on the scale and scope of the action.
2. As the IDT performs its work, periodically reexamine the possible need for additional expertise. The IDT approach does not mean that all members participate in each activity, task, or stage. Members participate when their skills can have a significant effect on the assessment effort. People in other agencies and educational institutions, members of special interest groups, and consultants are sources of additional expertise.

3. It is essential that IDT members appreciate that concisely written records, displays, and data collections are the expected output of assessment activities. Written documents encourage precision, contribute to the reviewable record of planning, and support decisionmaking as a final objective.
4. Effective participation on IDT's includes keeping an open mind, avoiding prejudgment, and interchanging ideas with other participants. The reasoning behind recommendations should be clear and objective. The IDT should point out concerns, limitations, alternatives, and areas of possible tradeoff. Balance and objectivity should be preserved. Members of the IDT should discuss and plan collection of data to avoid overlap and inefficiency.
5. Make every effort to insure that IDT's have disciplinary strengths that reflect the economic, physical, biological, social, and other factors being considered. Balance in project emphasis occurs most easily when there is a balance of disciplinary influence on decisionmaking documents. Invite personnel from other concerned agencies and interested private organizations to participate as IDT members as their interests appear.

D. Obtain resource data
Examine locally available resource information such as the following:
1. Aerial photos and published maps.
2. Soil maps and interpretations.
3. Land use, cover types, water quality, and social and economic factors.

E. Make field examination
The field examination is a broad nonintensive analysis of resource factors and environmental concerns in the probable impact zones. Judgmental planning techniques are normally used. Sponsors and concerned environmental groups should participate to the extent possible in the initial assessment. RC&D and watershed handbooks provide additional guidance for field examinations to supplement the following key steps:
1. Before going to the field, brief the IDT on:
a. Sponsors' objectives
b. Locally available resource data
c. Potential alternatives
d. Analytical approaches to be used to obtain a broad overview analysis of the existing resource base and potential impacts
2. Make a visual inspection of the planning area and probable impact zones.

Matrix analysis can be used to identify and document broad areas of environmental concern early in planning. See Appendix B for an example of a matrix. Refer to Leopold, et al., 1971, Appendix A, for a discussion of the matrix method. Matrices usually consist of two-dimensional arrays of environmental factors versus potential alternatives and ratings of relative effect at matrix intersections. The object is to acquire broad data quickly because some studies will not proceed beyond the initial phase. Matrices are very useful visual aids for displaying preliminary environmental relationships at public meetings. Completed matrices should usually be supplemented by narratives to clarify key interactions.

In selecting potential alternatives and probable plan elements, take care to allow the unique aspects of the project area to dictate plan evolution. Always study the alternative of no project.

Experienced IDT's working on routine problems may elect not to use a matrix but proceed directly to abbreviated checklists and narrative reports. Any data collected at the field examination stage should, to the extent possible, be designed to dovetail with data collected later during more intensive phases of assessment.
3. Hold an IDT group meeting after the field examination. This meeting should feature open discussion, challenge, compromise, and consensus within and among specialists. The consensus must neither suppress nor ignore inputs of an individual specialist. Keep notes and a reviewable record of group consensus or its lack. Display facts and their sources apart from opinions and recommendations.

Provide written summaries containing data and recommendations to the team leader as soon as possible after completion of the field assessment. This material will become the basis for an overall initial assessment summary for use in the policy formation part of planning. Record interdisciplinary dissent and technical controversy to the extent reasonable. This meeting is a good time to plan for IDT participation in presenting initial assessment data at public meetings.

F. Initial assessment summary
Prepare an initial assessment summary consisting of environmental data, assessment matrices, and generalized narratives, as appropriate and needed to fit planning needs. Enter this initial assessment summary in the planning support file along with other data and findings. For watershed projects, the initial assessment summary can probably be prepared as a part of the field examination report. For RC&D measures, it could be as simple as a brief written narrative report to the RC&D Measure Steering Committee following a technical field review.

III. DETAILED PHASE OF ASSESSMENT

This is the primary data collection and future prediction phase of assessment. It begins when project decision makers agree to advance planning beyond the initial stages and begin selecting alternatives for detailed study. When this has been done, the team leader should reconvene the IDT to develop strategy for detailed assessment. At the same time, determine the need for adding or deleting individual specialists. It is also an appropriate time to discuss further public participation.

The emphasis during the detailed phase of assessment is on developing an indepth portrait of existing conditions (quality and quantity) and estimating future conditions and impacts (direct, indirect, primary, secondary, tertiary, onsite, offsite, and other).

It is the responsibility of individual members of the IDT to specify the extent of data collection for their area of expertise. This guide is not intended to provide detailed technical procedures for assessment for each technical discipline. Such procedures are selected, developed, and disseminated in the form of various SCS technical guides and publications. Some of the detailed procedures are obtained directly from the published literature in the technical field. Each professional staff specialist is responsible for keeping abreast of the latest and best evaluation procedures in his field. Guidance and training will be provided by appropriate SCS specialists as needed.

Because of the variety and complexity of resource evaluations that SCS is concerned with, it is worth repeating that environmental assessments must be tailored to each planning situation. The examples in this guide are seldom applied "as is."

Following are some points to consider in making detailed assessment studies:
- Put all technical contributions in writing. Oral conclusions, no matter how useful, do not support decisionmaking.
- Edit data summaries and narrative reports of assessment primarily for technical content to expedite their completion.
- Make a special effort to present data clearly, concisely, accurately, and objectively. Environmental data are often complex, and public understanding of ecological consequences is the goal.
- To improve efficiency, concentrate assessment in areas of significant impact for the alternatives being considered.
- Hold periodic briefings to help accomplish meaningful consensus among IDT members.
- Continue data collection until the resulting assessment summaries provide a data base that reasonably addresses the probable and significant concerns in relation to each alternative being considered.
- Record data in systematic form for permanent retention in support files.

Following is a set of procedural steps that can be adapted to the planning needs of individual projects:

A. Develop a strategy for detailed assessment
1. Review the literature
The first step in developing a detailed assessment strategy is to obtain and review literature and other planning information pertinent to the impact zone and the specific alternatives being considered. A variety of organizations may have planning materials related directly to the sponsors' concerns. Search for data describing past environmental conditions in the area. The literature review should be in proportion to the scope and scale of the project.

Persons who work on IDT's need to become familiar with the information resources available at area colleges and universities. Rapid entry to this literature can be accomplished by talking to staff specialists, each of whom often has personal collections for his own discipline. Use computerized literature retrieval systems (for example, CAIN, USDA, Washington, D.C., has 700,000 bibliographic citations from the National Agricultural Library, January 1976). Experienced IDT members already have much of the needed literature and will spend little time on this step. Following are some additional potential sources of information:
- Colleges and universities
- U.S. Fish and Wildlife Service, Bureau of Land Management, and Bureau of Reclamation
- Environmental Protection Agency and the Corps of Engineers
- U.S. Forest Service, Extension Service, Agricultural Research Service, Agricultural Stabilization and Conservation Service, and Economic Research Service
- State agencies (such as geological surveys, state historical groups, departments of natural resources)
- U.S. Geological Survey
- National Park Service (National Register of Historic Places)
- Regional planning agencies
- Private environmental organizations
- Consulting firms

2. Select an evaluation system
After existing pertinent literature has been retrieved and examined, select a system or systems for detailed environmental assessment. Detailed assessment methods include comprehensive matrix analysis, network analysis, checklist approaches, overlay methods, and a variety of other systems of evaluation.

Depending on the size, complexity, and kind of planning action being considered, certain methods are more useful than others. Publications are available that discuss the advantages, disadvantages, and situational utility of the

different systems of assessment. (See Jain and Urban, 1975, Appendix A.) For many SCS-assisted planning actions, network analysis to trace and find impacts, followed by the development of specific checklists to schedule data collection, is the most efficient strategy for detailed assessment. Note that the complexity and detail of any assessment method must be carefully tailored to the unique aspects of each planning situation. A brief discussion of four major systems follows:

a. The overview type of matrix analysis was discussed in connection with the initial phase of assessment. Matrix analysis indicates mainly areas of first-order environmental interaction. For detailed assessment, more complex matrices that account in greater detail for alternative planning actions can be prepared. For example, stepped or three-dimensional matrices are sometimes used to help account for second-order cause and effect sequences.

b. Ecological or network analysis is the systematic tracing of cause-and-effect sequences that lead to significant impacts. The resulting network diagrams help identify the interrelationships between components of ecological systems. (See Appendix C for an example.) Whereas matrix analysis identifies areas of environmental concern, network analysis shows what these concerns are and what data are needed to measure their effects.

This tracing of causes and effects is the part of assessment that requires the greatest technical skill and is the point where interdisciplinary influence is most vital. It permits analysts to discover unsuspected effects and impacts and leads naturally from past conditions to predictions of future conditions. It tends to be a deductive method because existing conditions and probable effects are estimated and then environmental data are collected to document conditions and aid in predicting impacts.

Analyze each alternative and plan element, including future without a plan, to determine potential impacts. Impacts may be caused by the inputs required to carry out a measure, by the measure itself, or by the outputs resulting from it.

Determine which evaluation factors would change as a consequence of developing each alternative. Network analysis should surface all significant impacts of the first, second, and subsequent orders.

Temper the tracing of causes and effects so that only significant effects are ultimately considered. Significance

is established by determining whether an effect is of sufficient magnitude to have a material bearing on decisionmaking. The IDT makes this determination and documents its reasoning in the support file. Be sure to include all environmentally important information without overloading planning with excessive detail.

There are assessment situations where previous network diagramming has thoroughly delineated the ecological relationships and the IDT can proceed directly to preparing the checklists. Any decision to skip network analysis should be a deliberate one made by the IDT after the field examination.

Some degree of network analysis is needed in most detailed assessment efforts. For very large projects with numerous alternatives and subcomponents, network analysis can be done by project subareas to prevent schematic displays from becoming too complex. Note that completed network diagrams are a convenient basis for preparing work schedules and report outlines.

c. Checklist assessment systems are general listings of resource elements and parameters that can be investigated to detect possible impacts. General checklists are excellent as reminders of environmental data that may be needed. Such checklists are also useful as a format for displaying data in environmental assessment summaries. Use checklist systems with some kind of network analysis for best results. This will help in identifying those evaluation factors unique to specific projects and help avoid the collection of more data than are needed. Appendix D is an example of a general checklist system for environmental assessment (adapted from Environmental Assessment Procedure, SCS, 1974).

Each major element in the SCS checklist system (such as land, water, air) is evaluated according to specific parameters (such as volume of flow, dissolved oxygen, etc.). Each parameter is an individual impact indicator. Considered in total, these parameters can signal the consequences of different resource actions.

Considerable technical skill is needed to decide which parameter on a checklist needs to be studied during assessment. Evaluation standards need to be applied to the original assessment data to interpret importance. Evaluation standards are provided by SCS specialists for each technical field. For example, SCS Engineering Technical Release 58, provides information on selecting water-quality parameters and evaluating data.

d. Overlay methods consist of superimposed sets of maps containing various kinds of resource use interpretations, basic resource data, and project alternatives. At any point in the analysis, alternative locations on the overlay map that transmit the most light are the least environmentally damaging. Overlay maps are very useful in displaying data on linear corridor proposals (such as pipeline or highway locations) for the purpose of selecting the least damaging route. Overlay systems lend themselves well to computerization. McHarg, 1969, (Appendix A) provides an extensive treatment of this subject.

3. Resource data retrieval
After the possible effects and potential impacts have been anticipated through network or other analysis, IDT members can prepare specific checklists of those evaluation parameters needed to characterize the present and predict possible future environmental conditions. Once this is done, as in the last column of the network analysis example, retrieve from existing sources any of the needed data to minimize expensive field collection. Examples of possible sources include STORET, WATSTORE, and NAWDEX [1/] for water-quality data. Persons working on IDT's should keep themselves well informed of sources of data for their disciplines and geographic areas.

Examine the retrieved data and pertinent literature with the dual objective of improving the design of the assessment model and of satisfying as much of the checklist of needed environmental data as possible. Prepare a field checklist of the data and information that must be collected in the field.

4. Written study plan
As the last step in developing strategy, prepare a written plan for completing detailed assessment. This can range from a simple work schedule for a minor proposal to a detailed critical-path analysis for a highly complicated project. (See RC&D Handbook and Watershed Protection Handbook.) Clearly specify the following items:
- Team leader
- Components of work
- Time periods for completing work
- Responsible team members for each data summary
- Scheduled completion dates for summaries
- Team member responsible for preparing overall assessment summaries

[1/] These acronyms are titles of water-quality data systems maintained by the U.S. Environmental Protection Agency and U.S. Geological Survey.

B. Describe present conditions
This part of the detailed assessment is devoted primarily to collecting data on existing environmental conditions using the field checklists as a guide. Some data are collected by IDT members working separately and other parts of the data are collected jointly but interpreted individually. Some of the data can be collected and interpreted by consulting firms functioning as IDT members. Hold periodic team meetings to coordinate field work and provide interdisciplinary influence on data interpretation.

To simplify organization and review of support files and various summaries and reports, environmental assessment can be organized and displayed in the format of basic resources (land, water, air) and resource uses (such as crop production, recreation, wildlife habitat, fish habitat, social uses, natural area, historical, and municipal water supply). A comprehensive example of this format is contained in Appendix D. This pattern of data display lends itself well to most SCS-assisted projects and is easily understood by non-SCS persons cooperating in assessment.

Describe fully the existing environment in terms of quantity and quality for each basic resource and resource use factor. In evaluating basic resources and resource uses, specify all significant physical, biological, social, and economic components, and their interactions. Evaluate only those parameters identified as significant during network or other analysis or discovered as significant during field work.

C. Predict future conditions (with and without project)
A variety of techniques is available to assist in estimating future conditions including trend extrapolation, pattern identification, probabilistic forecasting, models, simulations, and scenarios. (See Handbook of Forecasting Techniques, Appendix A.) Expert judgment about existing systems and forecasting methods is needed to produce reliable data. Some agents of change to consider in predicting future environmental conditions with and without project are:
- Successional changes in ecosystems that are occurring or will occur
- Cultural disturbances that are occurring or will occur
- Probable physical events
- Hypothetical changes associated with different alternatives

Forecasts of future environmental conditions are often based directly or indirectly on current conditions. Such methods yield useful predictions for natural, social, or economic systems that tend toward dynamic equilibrium or apply to short time periods. Conversely, basing forecasts on existing conditions is often a poor method for disturbed or unstable systems or for long time periods.

The prediction of future conditions includes anticipating futures that would be associated with each alternative including future without a plan. Alternatives are generated by sponsors, concerned publics, and the IDT during planning. Continue the evaluation of alternatives until the cause-and-effect sequences and data needs delineated by network or other analysis have been traced and satisfied. Following are some general considerations relating to predicting future environmental conditions.

1. All predictions are based on conceptual models of reality. These models range from totally intuitive to highly rational. Both may yield useful predictions of future environmental conditions. Technical specialists on the IDT at the project planning level should select the methods for forecasting future conditions. Specialist members of IDT's must be well informed about and use those methods, models, and techniques that are most acceptable profassionally in the disciplines they represent.

   Complex models requiring major investments in staff and equipment are, in most cases, not justified for typical SCS-assisted projects unless the resulting computer hardware and software can be made to apply to other projects of that type.
2. Extrapolation of existing trends is the most common method of forecasting future conditions without the project. It is done by extending past environmental trend data to future points in time. Proper use of this technique includes guarding against the problem of inadequate trend data and using common sense in evaluating the resulting predictions. Uncertainties and the limitations inherent in all forecasting methods can be recognized by assigning ranges of values to predicted future conditions.
3. Consider the limits of prediction. Past efforts to predict specific conditions in the future have often proved to be highly inaccurate. Future conditions are often very difficult to predict, particularly beyond 20-25 years. This is one reason for expanding probable error limits for predictions of future conditions as prediction time is extended. This is also a valid reason for limiting predictions of future conditions to as short a period of time as practicable.
4. Past experience with similar proposals or similar resources responding to analogous changes may offer a convenient model for predicting probable futures. Using analogous situations, with carefully stated assumptions, is sometimes ~~the only practical means of predicting impact (Dickert, 1974)~~. Future predictions based on these kinds of analogies are usually credible.

5. Network analysis is an excellent way to identify potential environmental conditions associated with alternative futures and to detect otherwise obscure trend factors (Appendix C).
6. In constructing models for predicting future environmental conditions, be especially alert to the value of the "what if" approach to detecting obscure trends. The "what if" technique is stimulating the intuition and imagination of IDT members by postulating a variety of resource management situations and their resulting impacts, even some unlikely ones.

D. Calculate environmental impacts

The differences between future conditions without the project and predicted conditions under the various with-project alternatives are the environmental impacts. If predictions of future conditions are adequate, determination of impacts is essentially a bookkeeping task and usually does not require additional field work. Specify impacts as clearly as possible in technical terms and do not label them as good or bad in a technical sense unless the evidence is coercive. The broader labeling of impacts as favorable or unfavorable in a public policy sense should be done later in planning (such as when a draft EIS is prepared) after public participation has clarified the political value judgments.

E. Detailed assessment summaries

The planning support file should contain a reviewable record consisting of data, reports, specific and overall technical summaries, and other material relating to detailed assessment. The resulting store of data can be assembled and arrayed in various forms to fit a variety of planning needs. Needs will vary depending on the program and the actual type of measure.

This guide is not meant to stimulate separate new assessment reports. To the extent possible, assessment summaries should be written as inputs to (or actual parts of) field examination reports, preliminary investigation reports, draft and final EIS's, and various other documents needed throughout planning.

The two general kinds of assessment summaries described below may be adapted to meet individual planning needs:

1. Technical assessment summary with tabular and graphical displays.--This summary is an indepth documentation of the assessment findings of the IDT. It contains, the environmental data, conclusions, and recommendations for each ~~alternative considered. Environmental assessment checklists~~ and network diagrams may be appropriate analytical and display devices to use.

   Assessment summaries normally are based on and supported by written reports and summaries prepared by each technical field represented on the IDT. Exact format and content are the responsibility of the IDT leader and individual specialists. Bringing assessment summaries together in a

truly interdisciplinary atmosphere of comment, challenge, controversy, consensus, and synergy is a major task of the IDT leader.

2. Executive assessment summary.--This summary is an overall narrative in laymen's language, accompanied by limited graphic and tabular summaries of data. These summaries can be provided to sponsors and other interested public groups as needed during planning. Executive summaries may make recommendations about mitigation or enhancement measures, preferable alternatives, or the need for additional study based on purely technical considerations. A brief summary of the supporting reasoning should be included.

   In project planning, these summaries are normally prepared just before the preliminary report or the preliminary investigation report in RC&D and watershed planning, respectively. In some other situations, assessment summaries can be prepared as preliminary drafts of technical appendixes or as preliminary draft EIS's, as appropriate.

IV. THE SUPPLEMENTAL PHASE OF ASSESSMENT

As the need for additional environmental data arises during later stages of planning, the IDT should reassess its earlier work and make any needed supplemental assessment. Plan formulation often requires repeating parts of the overall planning process. As noted in USDA Procedures for Water and Related Land Resources, one of the reasons for reiteration of planning is that the level of detail in environmental assessment is inadequate as a basis for selecting a recommended plan. When this is so, it is necessary to make additional assessment for selected alternatives unless the needed data can be obtained from the planning support file.

Supplementary assessment basically consists of convening the IDT, discussing the new planning needs, expanding the strategy for assessment, preparing a list of needed supplementary data, collecting the data, revising or adding to the predictions of alternative future conditions, and revising the summaries and displays of data for decision makers. This work should proceed rapidly because of the existing extensive data base and analytical models used during earlier phases of assessment. Maximum advantage should again be taken of existing data retrieval sources. Again, all new significant environmental information should be placed in the planning support file. It may be necessary to go through more than one cycle of supplementary assessment in response to overall planning needs.

Appendix C.—
AN EXAMPLE OF A NETWORK DIAGRAM FOR ANALYZING PROBABLE ENVIRONMENTAL IMPACTS

APPENDIX D.--An example of a general checklist system for environmental evaluation

Checklist systems of evaluation are commonly used environmental assessments. Presented here is a general system that, with variations to meet individual programs and local conditions, can be used as a reminder of the environmental conditions that should be analyzed. This material was adapted directly from Environmental Assessment Procedure, Soil Conservation Service, USDA, May 1974. Some changes were made in response to suggestions from the field. TSC's and states should modify this system as necessary to meet regional and local conditions. Also, note that SCS technical specialists change these methods as better techniques become accepted in each technical field.

Using this procedure

The basic procedure for using this system consists of selecting the basic resource and resource use data sheets needed for a particular project, adding or deleting individual parameters, collecting data and entering values on the sheet, developing relative weightings for each parameter, and summarizing the data. These activities should be done by a balanced IDT using detailed technical procedures and evaluation criteria approved by specialists in each technical field.

Display of output for decision makers

The procedure provides four tabulations of data to assist environmental analysts and decision makers: (1) basic resource quantity levels, (2) basic resource quality levels, (3) resource use ratings, and (4) resource use summary ratings. For each tabulation predictions of future conditions with and without project are made.

Individual assessment sheets in this example contain a mixture of metric and English units of measure. The units listed for each parameter represent the standard in each technical field at the time this guide was written. Metric units are gradually being adopted and users should change English units to metric units as appropriate.

Present conditions

The profile of present conditions describes the physical, biological, economic, social, and other characteristics of the area likely to be affected by the proposed actions. Judgment is critical, both in determining impact boundaries and in selecting relevant indicators. The impact boundaries vary, depending on whether the focus of the indicator and the extent of the proposed action are local or regional and on whether the boundaries are determined by political, economic, cultural, hydrologic, or ecologic units. For example, the area of influence of a proposed watershed project may well extend beyond the hydrologic boundaries of the project area. This is particularly true for economic effects if the primary trade center is outside the boundaries of the proposed project. The impact of a project on a large stream may influence conditions far beyond other project boundaries.

The profile of present conditions can be started during the initial phase of assessment. As alternatives are considered in greater detail, the profile can be refined and further focused on significant effects. When completed, the profile should clearly present the existing significant conditions, problems, needs, and the rationale for proposed alternatives.

This assessment system requires the compilation and evaluation of many kinds of data. Some of the data can be obtained from outside sources, such as federal, regional, state, and local agencies, regional and state clearinghouses, planning authorities, river commissions, and universities.

If needed information is not available, it is necessary to collect new data. Appropriate agencies such as the USDA, Agricultural Research Service, U.S. Environmental Protection Agency, and corresponding state agencies such as health, air quality, and water quality agencies should be asked to assist with the development of data collection and interpretative procedures. American Society for Testing and Materials and other standards are available for measuring indicators. Their use provides uniformity and acceptance of the measurements and is encouraged.

Predicting probable conditions that would occur under the without action and various with-project alternatives

Predict conditions following the without action alternative and each with-project alternative being considered. Estimate the impact both during installation and throughout the expected life of the action. Identify and evaluate cause-effect relationships between the alternatives and the environmental indicators being considered. The evaluation for each alternative is to be set forth in enough detail to insure that all significant interaction relationships are considered. Procedures for predicting future environmental conditions, to the extent they are available, are provided by technical specialists in SCS.

Basic resources

Land quantity levels

Dominant land use categories can be used for assessing land quantity and quality. Land use can be subdivided as needed by different technical specialists.

Often it will be desirable to consider cover types in addition to land use in land quantity analyses. When this is done, we suggest using the classification system detailed in "A Land Use and Land Cover Classification System for Use with Remote Sensor Data," Professional Paper 964, U.S. Geological Survey, 1976. The first level of the USGS classification system is also shown in the following example.

A sample form for assessing land quantity levels for each dominant land use and cover type follows. Entries are in terms of acres of each dominant land use or cover type.

ASSESSMENT SHEET

Land quantity levels

Description of area: (County, watershed, state, major land resource area, etc.)

Parameters	Unit	Present conditions	Future conditions: Planning alternatives: Without project	With project: 1	2	3
Land use						
Cropland	acres					
Pastureland	acres					
Rangeland	acres					
Forestland	acres					
Wildlife land	acres					
Urban land	acres					
Recreation land	acres					
Other land uses, e.g., surface-mined land	acres					
Water	acres					
Total	acres					
Cover type						
Urban or built-up land	acres					
Agricultural land	acres					
Rangeland	acres					
Forestland	acres					
Water	acres					
Wetland	acres					
Barren land	acres					
Tundra	acres					
Perennial snow or ice	acres					
Total	acres					

NOTE: The IDT may decide to use one or both of these classification systems.

Land quality levels

The guidelines for assigning quality levels to the land types shown in this section need to be tailored to local conditions. Much of the information used for evaluation indicators can be taken from existing records, such as soil surveys, range studies, woodland soil-site studies, soil interpretation records for named kinds of soils, and from other sources.

Examples of quality indicators to be considered for land uses are soil limitations such as degree and kind of erosion, flood hazard, and deposition (wind and water). Other indicators are important for one land use and not for another.

Cropland.--Soil management systems, production potential, water management system.

Pastureland.--Production potential, soil management systems, water management system.

Rangeland.--Quality or condition, woody plants, poisonous plants.

Forestland.--Suitability, species composition, stocking, forage production (understory potential).

Wildlife land.--Wildlife habitat management system.

Urban land.--Land developed to include design that overcomes soil and/or site limitations.

Recreation land.--Land developed to include design that overcomes soil and/or site limitations.

Other land uses.--For example, mined land.

ASSESSMENT SHEET

Land quality levels

Description of area: _____

Parameters	Unit	Present conditions	Future conditions: Planning alternatives: Without project	With project: 1	2	3
Gross erosion	acres					
A. ____ton or less/ac/yr

Water quantity levels

The water resource includes surface and underground water and both quantity and quality are measured.

Describe streams in terms of average monthly discharge in cubic feet per second (cfs) and average annual discharge volume in acre-feet. Give minimum flows in cubic feet per second (cfs). Summations of periods with a 50-percent chance of no-flow occurrence in any one year can be shown as days/year. If significant for a possible use, give other frequencies and times. Describe stream size by width and depth increments for channel reaches. If pools and riffles are significant, show them in miles or percentage of the channel reach in question. Give streambank length in miles as measured on one or both sides, depending on the width of the stream.

Give storage in lakes or reservoirs in acre-feet; but if sustained yield is important because of municipal or industrial water use, show the sustained yield in million gallons per day (mgd). Give surface area of a water body in acres. If average depth is significant, show the area as an average depth of acres by depth increment, i.e., less than 3 feet deep, 80 acres; from 3 to 5 feet deep, 100 acres; etc. Give ground-water volume available for use on an annual basis in acre-feet. Show depth to the ground-water aquifer if significant for a possible use. If annual ground-water use exceeds recharge, give the expected life in years.

Other physical properties of a water resource should be inventoried where necessary to determine the impact of the proposed project. A sample assessment sheet of quantity indicators follows.

ASSESSMENT SHEET

Water quantity levels

Description of area: _____

Parameters	Unit	Present conditions	Future conditions: Planning alternatives: Without project	With project: 1	2	3
Streams						
Perennial	miles					
Intermittent	miles					
Ephemeral	miles					
Average discharge by months	cfs					
Average annual discharge	ac-ft					
Minimum flow	cfs/days					
No flow	days/yr					
Stream size by reach width ___ to ___ depth ___ to ___	miles					
Streambank	miles					
Type of stream channel[1/]						
Lakes or reservoir						
Effective storage	ac-ft					
Surface area	acres					
less than feet deep _____	acres					
to ____ feet deep	acres					
Shoreline	miles					
Ground water						
Major springs	no.					
Available storage	ac-ft					
Expected life	years					

[1/] Natural or manmade.

Water-quality levels

Water quality must be related to uses and standards. Most states have developed standards for their water resources.

Some of the more common water-quality indicators are shown on the sample water-quality level assessment sheet. Other indicators may need to be added and some may need to be deleted. The pertinent indicators may need to be measured at several locations in the project area, depending on need and proposed use.

Considerable data are available from federal agencies, including the Environmental Protection Agency (EPA) and the U.S. Geological Survey (USGS), and their corresponding state agencies. Local government agencies such as water and sanitary districts are also good sources. The IDT will determine what data are available and make arrangements for any additional testing. Procedures for sampling and testing should be in accordance with recognized standards. These include: Standard Methods for the Examination of Water and Wastewater, published by the American Public Health Association; the water section of the American Society for Testing and Materials book of standards; or applicable methods in EPA manuals for analyzing water.

Air quality levels

Air quality is an important consideration in environmental assessment. Examples of indicator groupings considered important for assessing air quality are particulate matter, polluting gases, odor, patterns of movement, noise, and visibility. Use standard units of measure (ASTM or others) where applicable. Indicators in addition to those shown on the air quality level assessment sheet that follow may be important in some areas and should be used.

Resource Uses

The quantity and quality determinations made in the previous section have a bearing on the suitability of the water, land, and air for each resource use. A lake may store floodwater, municipal water, and sediment while providing fish and aquatic organism habitat, recreation for boating and swimming, and an esthetically pleasing view. Various resource uses are evaluated as follows.

Cropland production

Crop production is rated in terms of expected/potential for all major crops. Expected is an expression of all average yields now. Expected future without action and with various alternatives reflects the influence of projected levels of management within a specific time frame. Potential production reflects the same time frame as expected but assumes (within reason) the use of known improved cultural and management techniques and technology. The list of crops includes those extensively grown and/or important crops produced in the study area. Standard units of measure are used for each crop. These differ according to the crop. The procedure follows.

1. Determine what production information is available.
2. Develop table showing by crop average yield per acre and acres grown.
3. Analyze data using soil surveys, aerial photographs, and/or overlays showing extent and location of major soils or groups of soils where each crop is grown. Example: corn may be grown mostly on moderately deep to deep, well to moderately well drained soils, including dominant mapping units; i.e., Chester, Duffield, Berks, etc. Take into account model cropping systems.
4. Analyze all the data collected using best experts available, arrive at consensus of potential production, expected production without program and with various alternative programs. Potential production may also differ for the various alternatives.
5. Expand production data to complete "Production potential" portion of assessment sheets depicting "Land quality levels."

Summary rating						

Fish habitat

Fish habitat evaluation usually includes consideration of the following four factors: (1) physical features of water areas, (2) biological productivity, (3) water quality, and (4) threatened or endangered species.

For lakes and ponds, display total acres in the physical feature inventory. Depth, water quality, and other data may also be displayed, as appropriate.

For streams, a model can be devised for each watershed, using selected stream features. Suggested features to consider are width, flow, pool-riffle ratio, percentage stream shade, pool quality, and riffle quality.

Biological productivity evaluations may include the following factors:

1. Fish (pounds of fish, diversity of species, and size relationship). If practical, determine the pounds of fish per mile by sampling. Consider local adaptation in rating diversity of species. Consider the percentage of fish of catchable size and the presence or absence of young of the year fish.
2. Benthic organisms. Beck's Diversity Index or a similar procedure can be used.
3. Other vertebrates present.
4. Water-quality limitations for fish and other aquatic organisms.

Threatened or endangered aquatic species, if present, should be evaluated and recorded.

Summary rating

Industrial water supply

Evaluation of the industrial water supply is related to the needs of the industry to be served and to the type of industry. Limit the evaluation to (1) the current and projected needs of existing industries that depend on the supply, (2) the estimated current and projected needs of any new industries identified by the sponsors that will depend on the supply, and (3) the currently available supply and its potential for meeting the projected industrial demand.

Industrial need.--Industry representatives or the sponsor's consultants should identify the current and projected needs of the industry in million gallons per day for the projected life of the project. Show need by months if the demand is seasonal.

Quantity available.--Industry representatives or the sponsor's consultants should furnish the present and projected quantity and the source of industrial water supply. Show quantity by months if the supply varies. If the present and projected supply is interrelated with other uses such as recreation during certain seasons, indicate any restrictions, water rights, etc.

Quality available.--The ideal quality of water required for industrial use varies widely for the many purposes to which water is put. As a request, it is difficult to organize the quality requirements of water used for each of the many different industrial processes into standards. Individual industries have established specific water-quality criteria. When developing water resource projects with industrial water, be sure that the water quality will be suitable for the intended industrial use.

People employed.--Show numbers of people now employed and projected to be employed.

Net benefits.--Estimate the net benefits in dollars resulting from the improved industrial water supply.

Quality of the effluent.--The various state agencies have published water-quality standards. The Permit Assistance and Evaluation Division, Office of Water Enforcement, U.S. Environmental Protection Agency, Washington, D.C. 20460, has published "Interim Effluent Guidance for NPDES Permits," which establishes effluent criteria for specific industries. Publications can be obtained from the EPA regional offices. All industries are expected to meet minimum EPA criteria (by best practicable control technology currently available) by July 1, 1977. These agencies should be consulted to rate the quality of industrial effluent as adequate or not adequate.

Quantity of effluent.--Industry representatives or the sponsor's consultants should furnish the current quantity of effluent in million gallons per day and an estimate of the future quantity for the evaluation period. If the quantity varies, show the variation by months.

Summary rating

Irrigation water

Evaluate water as a resource for irrigation of agricultural crops. Relate water requirements to water supply under present conditions, future without action, and identifiable alternative development plans. Assess the irrigation water not used by evapotranspiration that becomes available for other uses. Describe the economic feasibility of each alternative action in terms of net benefits.

Evaluate irrigation water requirements by considering such things as the extent and characteristics of the lands to be irrigated; type and quality of crop to be grown; consumptive use of each crop under the existing climatic conditions; irrigation method to be used; water application efficiency considering proper application depth, rate, and timing of irrigation; reuse of tailwater; and special water uses for plan quality, cooling, and frost protection. Evaluate efficiency of conveyance of the irrigation water from the point of supply to the point of use by considering such things as the type of and extent of the conveyance system; adequacy of control and measuring structures; seepage and management losses.

Assess the water supply available under present, future without action, and each alternative action in terms of quantity and quality. Evaluate separately water supplies available for diversion from direct streamflow and from storage, both surface and ground water. This evaluation includes assessment of the availability and quality of the water supply with respect to the irrigation season and the dependability of the supply. Legal restraints on availability must also be considered.

Low flow

Evaluate low-flow maintenance or augmentation for effectiveness in improving stream characteristics. An alternative to the low-flow use section is to show the impact on other resource uses, e.g., fish resource use, municipal water supply use, industrial water supply use.

Low-flow maintenance or augmentation is accomplished by releasing water from impoundments or other sources into a stream in a predetermined manner. The purpose of such releases is to augment or increase the rate or duration of flow in a particular reach or in the entire stream unit in order to improve or enhance one or more of the environmental factors listed on the following resource use sheet.

As previously indicated under Water quantity levels, minimum flow is shown in cubic feet per second (cfs) with periods of no-flow given in days for the frequency of occurrence commensurate with the possible uses. Data on duration of no flow may be useful in evaluating the impact on other environmental factors such as fish and recreation.

Minimum-flow data may be readily available for some streams. If not, frequency analyses of stream-gage data from federal and state agencies or special studies are required.

The needs for water to improve or enhance other resource uses should be developed in consultation with personnel who have expertise in the particular fields under consideration. For example, the EPA provides data on the need for, value of, and impact of storage and releases for water-quality control in federal projects.

Assign a rating of 1 to 5 to low-flow augmentation for the resource use. Consider all environmental consequences of the low-flow regulation action, both adverse and beneficial. Even though storage and release of water may be planned for only one purpose, e.g., water quality, weigh both the positive and negative effects of the other resource uses in making the composite rating for low flow.

Mineral extraction

This evaluation should be based on the quantity indicators for land and the quality indicators for land, water, and air. Because the potential hazards and environmental degradation due to surface mining, underground mining, and fluid mineral extraction are different, evaluate each of these categories of mineral extraction separately.

Surface mining (quarries, pits).--Surface mining of materials such as copper, iron, phosphate, and oil shale is generally on a large scale because of low unit value and/or large tonnage requirements.

Sand and gravel, dimension stone, and coal operations may be large or small.

Any surface mining operation generates large volumes of waste material, and all have the potential for contributing to air and water pollution because of extraction or processing procedures. Dewatering of deep pits or quarries can result in local lowering of the water table.

Spoil banks and gob piles themselves are often sterile and expensive to restore to a useful purpose. Abandoned (orphan) spoil banks will probably not be rehabilitated because of the high costs and the low priority for public funding.

Reclamation laws may or may not be adequate to insure proper reclamation of areas still subject to surface mineral extraction operations.

Spoil banks and gob piles are often major sediment sources, and runoff from coal-mined areas is acid and high in iron and sulphates.

Underground mining.--Underground mining and the associated processing operations often result in large volumes of waste material. Some of this material may accumulate as waste rock piles at the mine. These piles may be unstable and may be a major sediment source. More waste material is generated, usually as sludge or slurry, at processing or cleaning plants. Crushing or smelting operations may generate significant air pollution.

Underground excavations sometimes collapse, and this results in some degree of surface subsidence, which can be detrimental to overlying roads, railroads, dams, or buildings.

Waste water from mine dewatering or seepage, as well as waste water from cleaning and processing operations, may be of extremely poor quality.

Fluid mineral extraction.--Extraction of fluid (oil and gas) or fluidized (brine, sulfur) minerals can result in surface subsidence.

Ground-water contamination can result from improperly cased or sealed wells.

The potential hazard of spills must be considered, both at the well and at associated bulk storage and loading facilities.

Municipal water supply

Municipal water supply is assessed on the quantity and quality of water needed and available under present and future conditions.

Municipal water supply needs are predicted from unit consumption per capita or number of hookups; such data are obtained from local municipal water utility organizations, water companies and districts, planning commissions, and demographic organizations.

Municipal water-quality ratings are determined by local or general Public Health Service drinking water standards. Consider the practicability of treating water to meet required standards and quality management.

Consider reuse of water for municipal, industrial, irrigation, or other resource uses. Sanitation districts and similar organizations can provide data relative to quantity and quality of effluent.

Cost and economic feasibility of municipal water may be useful in ranking the resource for this use compared to other possible uses.

Summary rating

Pastureland production

Pastureland production is rated in terms of expected/potential in terms of animal unit months (aum). Expected is an expression of the average yield now. Expected future without action and with various alternatives reflect the influence of projected levels of management within a specific time frame. Potential pastureland production is a projection of possible yield within the same time frame as the expected but using, within reason, known improved cultural and management techniques and technology.

The same procedure used for cropland production can be adapted to determining pastureland production.

Forage - expected potential	aum/ acre					

Summary rating

Rangeland production

Rangeland production is expressed in terms of expected/potential range condition class for each range site. The range condition class designation reflects both quality and amount of production. Expected means that this is the present condition class level and that under future without action and alternatives. Potential means the condition rating possible with existing technology. The range condition class for a specific range site is determined in accordance with criteria in the local technical guide. Where local experience data are available and the grazing situation (season of use, kind and class of livestock, size of grazing units, etc.) is known, the range condition class can be further interpreted in terms of animal unit months of available grazing.

Recreation

Evaluate recreation as a use on the basis of the resources and activities available. Evaluate each significant activity as well as quality factors such as proximity, access, and water quality compared to the local and state water-quality standard for the proposed use, i.e., swimming, boating, etc.

Population in local area of influence.--Determine the present population in the local area of influence (usually a 2-hour drive). For columns headed future without and with, estimate the project population that will generate future demand, for example, 5 to 10 years after installation. Round out population to the nearest thousand. Finer calculations imply accuracy that is not consistent with the method.

Resource analysis.--Evaluate resource use on the basis of the resources and recreation activities available. The resources should include the quantity and quality of recreation land and water in the watershed and in the local area of influence. Calculate the quantity on the basis of acres of recreation land per 1,000 people and compared with standards for the state or with standards that provide adequate recreation opportunities for all persons.

Quality factors, such as proximity and access, should reflect the needs of the people in the specific area being served and reasonably or substantially attainable. Compare the water quality with local and state standards for the proposed use. The following quality ratings can be used: 1, unsuited; 2, poor; 3, neutral or fair; 4, good; and 5, excellent. Overall, the land or site must be suitable for the purpose for which it is intended.

Rate recreation facilities and developments within the watershed according to the same scale. When these areas are viewed or inventoried, note the following items to facilitate calculations of supply; number of campsites, number of picnic tables, square feet or linear feet of beach, acres of boating waters, fishing waters, and open hunting areas.

Activity analysis.--Estimates of supply (recreation visits per year) on existing recreation areas are based on the items listed, on the latest inventories by the National Association of Conservation Districts and the Bureau of Outdoor Recreation, or on estimates by the State Comprehensive Outdoor Recreation Plan, local recreation commission, etc. Base the estimate of supply in the future without action on the loss of facilities and installation of new or additional recreation facilities by other agencies, government units, programs, private entrepreneurs, etc. Supply in alternatives is based on the future without action and the net addition or loss of facilities provided by the alternatives. In the alternative columns record only those activities on which the project would make a major impact.

Estimates of the demand for visitor days per year are generally based on local surveys. These surveys are based on population in the local area of influence, participation rates (see TSC Technical Notes, BOR Surveys, etc.), or the utilization of existing facilities on heavy-use days. Often estimates of supply (availability) and demand (use) can be obtained from reports already prepared, e.g., North Atlantic regional water resource studies, river basin studies, Appalachia reports, state comprehensive outdoor recreation plans, etc. Future demand can also be based on the estimated future population times participation rates.

Generally, future participation rates are expected to be higher than present because of increased leisure time, greater mobility, improved facilities, and higher income. Record supply and demand for all activities in the "Present" and "Future without action" columns. In the alternative columns, record the supply and demand for only those activities on which the project would make a major impact. Obtain totals of the supply columns and demand columns for all activities in the "Present" and "Future without action" columns.

To determine the effect of the project alternatives, total the entries in the supply columns and demand columns for activities where there is a major impact created by the alternative.

The opportunity index for the activities to be influenced by the project is obtained by dividing the subtotal for supply column by the subtotal for demand column and multiplying by 100.

Quality and uniqueness of the activity must also be considered along with the quantity even though such an evaluation is often subjective. If desired, supply and demand can be converted to dollar evaluations for later use in the economic analysis.

Wildlife habitat

The wildlife habitat evaluation is based on the quantity, quality, and degree of interspersion of each kind of wildlife habitat in the area under consideration. Most wildlife habitat is created, improved, or maintained by planting vegetation, manipulating existing vegetation, inducing natural establishment of plants, or by combination of such actions; thus, wildlife use and land use go hand-in-hand.

The measurable factors are the vegetative types and conditions according to the various land uses as related to wildlife needs. All significant wildlife species in the project area, both game and nongame, should be considered.

The initial unit of measure is actual acres. The value unit is a quality-size relationship. It is determined by analyzing the habitat condition present or expected on the land.

Wildlife habitat can be grouped into three basic categories for purposes of this assessment procedure: openland habitat, woodland habitat, and wetland habitat. Wetland areas can be recorded by type.

Each habitat model should contain at least three major components:

1. The percentage occurrence component, which is a percentage relationship of habitat elements to one another on a given area.
2. The mangement condition, which is an expression of vegetative quality.
3. The interspersion factor, which considers distribution of vegetation.

In the model each component is assigned a point value expressed in tenths (0-1.0) and used to determine an acre value. These values are not intended to portray all the factors influencing the populations of wildlife on a given area. But, it is assumed that other factors will remain constant or at least not be affected by the activities. For this reason models will vary for each land resource area. It is necessary to make assessments for each major woodland type and possibly for each primary agricultural area within the area being appraised. Assessments should also be made for the site of each proposed structure.

Land use figures can be obtained from the land quantity assessment sheets, crop and pasture management data from cropland and pastureland assessment field notes, and forest types, amounts, and management data from the woodland production field notes.

In most places, it is necessary to make an evaluation for (1) structural works of improvement and for (2) land use and treatment since it is important to separate direct and indirect effects. The effects of the structural works are more direct and immediate; the effects of land use and treatment are based more on land use changes and conservation practices expected or predicted over the life of the project.

The total acreage of the area being evaluated and the total acreage of each structure site are assessed an acre-value for open land habitat and woodland habitat. Thus, there may be 50,000 acres in the area and this acreage may have a 10,000 acre-value as woodland wildlife habitat and a 45,000 acre-value as open land wildlife habitat.

Determine and record key open land and woodland wildlife species. Note threatened or endangered species on the assessment sheets for open land, woodland, or wetland habitat, both by entire area and site locations.

For each alternative, predict future conditions by using projected land use and management figures.

Summary rating						

Woodland production

Forests used primarily for wood production are rated in terms of expected/potential average annual growth or average yield of wood. Expected means the amount of production that is estimated to exist or will exist under future without action and under the alternatives presented. Potential means the average amount of growth or production that is possible with fully stocked stands for the age classes that exist. The standard unit of measure used for wood production is cubic feet, but it may be desirable in some study areas to use other units of measure or to refine the factors used.

Environmental forest,[2/] Christmas tree areas, and specialty forests are rated in terms of acre equivalent acres/total acres. To determine equivalent acres, convert total acres in production to full production acres for the type of forest or use.

[2/] Environmental forests are those forests known to be devoted to uses that totally exclude them from production of wood products. Examples might be residential areas, parks, or recreation areas, etc.

Economic

Economic analyses are provided in accordance with the SCS Economics Guide and SCS policy. Economic considerations are important in identifying problems and alternatives. Economic impacts should be viewed from both a national and regional viewpoint. National economic development effects are commonly referred to as primary benefits, i.e., flood damage reduction, recreation, fish and wildlife habitat, irrigation, drainage, municipal and industrial water supply, and water quality. Regional external economies are not included as national economic effects. Costs of resource use are external or induced costs and should be included in total installation costs.

Regional effects are gains or losses in regional income and employment. Regional income includes benefits accruing to residents of the region, economies external to the region, and increases in regional wages and salaries. Measurements of external economies utilize input-output (I-O) regional studies. Employment data are presented in terms of additional man-years, which include seasonal and year-long employment.

Summary rating

Visual quality

Visual resources are made up of topography, diversity of geologic materials, diversity of vegetation texture and density, distribution and visual condition of water in lakes and streams, and compatability of land use, including farms, forests, and urban areas. An area of high visual quality could include all these items. An area of water has been found to be a consistent preference. An area with low visual quality would have predominantly one kind of relief, one kind of geologic material, very little water, and visually incompatible land uses.

Geologic surface material.--Esthetic value is enhanced by the presence of a wide variety of geologic materials. Use should be compatible with geologic materials. Mudflats around a lake are undesirable, but rocky shores are very desirable. A high-quality geologic surface material would be pleasing to view and convenient to use according to the purpose, i.e., a rocky, erosion-free shore or bank on a lake or stream, a sand beach for swimming, good deep soil for farming, etc. A low-quality area would have predominantly the same material regardless of use.

Water-land ratio.--Visual quality is assumed to be high if about 10 percent of a large area is covered with well-distributed water bodies or stream corridors, average if 3 to 5 percent covered, and low if 2 percent or less is covered.

For high visual quality, the water must be visible from several places, have an irregular shoreline, and contrast with the surrounding land. Streams should have some flow most of the season for a high-quality rating.

Sound.--This item refers to sounds caused directly by improvements such as a pumping plant or indirectly, e.g., by automobiles or motorboats. A noisy diesel pumping plant in a residential area might be unsuitable and rate 1 on a numerical scale of 1 to 5, but an electric plant might be less objectionable and rate 2 or 3. The ideal would be a very low noise level, 5.

Odor.--Waste disposal systems and sewage lagoons may be unsuitable, rating 1, if they create disagreeable odors near a residential area or recreation area but may be tolerated, rating 2 or 3 on a numerical scale of 1 to 5, if in a relatively unused area such as a forest or farm. Here again, the ideal would be the absence of objectionable odors, rating 5.

Visibility.--This item refers to particles in the air that hamper visibility. Probably the greatest threat in SCS projects comes from blowing dust. The presence of blowing dust in quantities substantial enough to reduce visibility is not acceptable. A slight hazard would be fair or neutral and rate 3, and the absence of the threat would be excellent or 5.

Linear structures.--Linear structures may enhance or detract from the visual quality of the landscape. A linear structure in an area of topographic diversity may enhance the visual quality by interrupting the pattern. Conversely, a linear structure located in a flat landscape may detract by visually changing the horizon line or by blocking views of distant mountains or coastlines. The impact of the linear structure on the landscape can be lessened if the structure is made from materials that "fit" with the surroundings and provide a welcome break in the pattern.

Dams.--Dams constructed with SCS assistance are generally made of earth. They have a mechanical principal spillway and usually an earth emergency spillway. Dams add water and open space, thus expanding the view, which is generally an improvement. Dams may add or detract from the visual quality of the landscape. The rating depends on how well the dam and pool fit into the landscape. The scars caused by borrow pits and emergency spillways may have a negative effect on the visual quality of the dam and, if substantial, reduce the rating by one point.

Recreation facilities.--These include shelter houses, restrooms, swimming beaches, boat docks, and parking lots. Such facilities generally are accepted as a part of the total project and may either add or detract from the visual quality of the area. Facilities on the shoreline may disrupt the continuity of the view and detract from the visual quality unless properly located and designed to fit in the landscape. Normally, recreation facilities are rated 2, 3, or 4 unless there is a very outstanding feature present in the development.

Other structures.--Buildings, pumping plants, sewage treatment plants, and other structures associated with SCS projects are usually relatively small and, if well planned, neither add nor detract from the visual quality of the area. They may detract if located close to a residential or recreation area and do not "fit" well with their surroundings. Normal rating would be 2 or 3 on a numerical scale of 1 to 5; 1, unsuited; 2, poor; 3, neutral; 4, good; and 5, excellent.

Social

Program activities of SCS have a significant impact on the social well-being of the nation's citizenry. This impact needs to be measured during planning and taken into account in decisionmaking and in preparing environmental impact statements. Factors that may be pertinent include population (total density and stratification), health factors (adequacy of domestic water supply, sewage disposal, doctors, dentists, hospitals, residences for the aged), housing (total, adequacy), and education (pupil/classroom ratio). Data from secondary sources are usually obtained for social evaluations. An excellent source of information about social assessment is, "A Guide to the Preparation of the Social Well-being Account, Social Assessment Manual," by Stephen Fitzsimmons, Lurrie Stuart, and Peter Wolff, July 1975.

Summarizing checklist assessment data for decision makers

Checklist assessment findings may be reflected in a variety of ways in program planning documents. A short executive summary of the assessment and a map of the project area are usually needed. Such narrative summaries will usually be prepared by the interdisciplinary team and highlight significant impacts and include recommendations about specific alternatives. Overview summaries containing brief summaries of the ratings by the interdisciplinary team may also be useful. A general format for this section is shown on the opposite page.

More detailed technical summaries may also be needed to support planning documents. The second section may contain quantity and quality rating sheets for those resources that are likely to be affected by the proposed action and rating sheets for each resource use.

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected
$10.00
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index $8.00
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed $_____ for _____ subscription(s) to the publications checked below:

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

Memorandum of August 1, 1977

Eligibility of Egypt for the Purchase of Defense Articles and Defense Services Under the Arms Export Control Act, as Amended

[Presidential Determination No. 77–17]

Memorandum for the Secretary of State

THE WHITE HOUSE,
Washington, August, 1, 1977.

Pursuant to the authority vested in me by section 3(a)(1) of the Arms Export Control Act, as amended, I hereby find that the sale to Egypt of defense articles and defense services will strengthen the security of the United States and promote world peace.

You are requested, on my behalf, to report this finding to the Congress.

This finding further amends Presidential Determination No. 73–10 of January 2, 1973 (38 FR 7211), as amended by Presidential Determinations No. 73–12 of April 26, 1973 (38 FR 12799), No. 74–9 of December 13, 1973 (39 FR 3537), No. 75–2 of October 29, 1974 (39 FR 39863), No. 75–21 of May 20, 1975 (40 FR 24889), No. 76–1 of August 5, 1975 (40 FR 37205), No. 76–12 of April 14, 1976 (41 FR 18281), and No. 77–5 of November 5, 1976 (41 FR 50625), and supersedes Presidential Determination No. 76–11 of March 25, 1976 (41 FR 14163). It shall be published in the FEDERAL REGISTER.

Jimmy Carter

cc: The Secretary of Defense

Memorandum of August 5, 1977

Occupational Safety and Health

Memorandum for the Heads of Executive Departments and Agencies

THE WHITE HOUSE,
Washington, August 5, 1977.

I have frequently expressed my commitment to review and reform the Federal role in combatting safety and health hazards in the workplace. My aim is to improve the effectiveness of our efforts to protect the health and safety of American workers.

The Secretary of Labor, Ray Marshall, and the Assistant Secretary for Occupational Safety and Health, Eula Bingham, have already moved vigorously to make our approach to occupational safety and health more sensible and effective. On May 19, 1977, the Labor Department announced a program to redirect the resources of the Occupational Safety and Health Administration (OSHA) away from trivial problems and toward more serious hazards to safety and health.

In another step towards common sense priorities, the Department of Labor announced on July 19 a program to reduce OSHA paperwork and streamline its recordkeeping requirements. The nation's 3.4 million small businesses will be exempt from filling out complicated job health and safety forms, and the paperwork for 1.5 million larger employers will be cut in half. Over the coming weeks, the Administration will take additional steps to reduce unnecessary burdens and allow OSHA to concentrate on the most serious hazards.

To complement these internal changes at OSHA, I have asked Ray Marshall and Bert Lance to head an interagency task force that will consider ways to strengthen the Federal role in protecting workplace safety and health. This task force will report to me with its first recommendations for action by April 30, 1978.

In addition to the Secretary of Labor and the Director of the Office of Management and Budget, this interagency group on worker safety and health protection will include the Departments of Commerce, Health, Education and Welfare and the Council of Economic Advisers, the Domestic Policy Staff, and the Small Business Administration. From time to time, I expect other departments and agencies to participate actively.

I want to be sure that federal programs actually do reduce threats to the health and safety of American workers, and that they help employers make the necessary adjustments. The inquiry will concentrate upon:

- Exploration of incentives that might supplement workplace safety regulations. These might include improved education and information services, economic aid and tax incentives to help employers improve workplace safety, changes in workers' compensation and liability laws and deterrent penalty structures.

- Evaluation of the government-wide administration of Federal workplace safety and health activities. This will include investigation of duplication, overlap and gaps in Federal agency jurisdiction.

- Review of other ways to improve the safety and health efforts of all Federal agencies, including those programs that affect Federal employees, and the resources devoted to them.

As you know, improvement of Federal health and safety protection measures is a matter of intense concern to the American people. This effort will be part of our larger program of looking at innovative approaches to many regulatory issues. It will help shape our reform program in other regulatory areas and will, I am confident, be one of this Administration's most valuable accomplishments.

You may be asked to contribute time, resources, and staff to this effort. I know I can count on your assistance.

In order to inform all affected parties that this review is underway, I have directed that this memorandum be published in the FEDERAL REGISTER.

Jimmy Carter

[FR Doc.77-23107 Filed 8-5-77;4:57 pm]

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

PART 213—EXCEPTED SERVICE

Federal Energy Administration

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: The purpose of this amendment is to make headnote changes reflecting organizational redesignations and to change the title of one Schedule C position to reflect its current superior. The following are headnote changes: From Office of the Assistant Administrator for Conservation and Environment to Office of the Assistant Administrator for Conservation; from Office of the Assistant Administrator for Management and Administration to Office of the Associate Administrator for Management and Administration; and, from Office of the Assistant Administrator for Policy and Analysis to Office of the Assistant Administrator for Energy Information and Analysis. The title change is as follows: from Special Assistant to the Assistant Administrator, Office of the Assistant Administrator for Management and Administration to Special Assistant to the Associate Administrator, Office of the Associate Administrator for Management and Administration.

EFFECTIVE DATE: August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3388 (g), (h), (h)(2), and (k) are amended as set out below:

PART 713—EQUAL OPPORTUNITY

Age Group Coverage—Nondiscrimination on Account of Age

Correction

In FR Doc.77-21001, appearing on page 37530 in the issue of Friday, July 22, 1977, the second word in the third line of § 713.512, now reading "many", should read "any".

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 980—VEGETABLES: IMPORT REGULATIONS

Minimum Grade, Size, Quality, and Maturity Requirements

Correction

In FR Doc. 77-21833, appearing at page 38384 in the issue of Thursday, July 28, 1977, the eighth entry under the heading "Advance notice" in the table on page 38385 should read, "1 d.".

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES AND OTHER OPERATIONS

[Amdt. 2]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—General Regulations Governing Price Support for the 1976 and Subsequent Crops

COOPERATIVES WHICH MAY PARTICIPATE

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: This rule amends the General Regulations Governing Price Support for the 1976 and Subsequent Crops to permit approved cooperative marketing associations to obtain on behalf of their members price support on their eligible warehouse stored production of barley, corn, oats, rye, sorghum and wheat. Previously, eligible cooperatives were authorized to obtain on behalf of their members only price support loans on eligible cotton, honey, rice and soybeans. This amendment is intended to increase the marketing options of wheat and feed grain producers.

EFFECTIVE DATE: August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Charlie B. Robbins, (ASCS) 202–447–4634, P.O. Box 2415, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: On Tuesday, April 12, 1977, a notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 19149) announcing that the Secretary of Agriculture was considering amending the General Regulations Governing Price Support for the 1976 and Subsequent Crops to expand the list of commodities on which approved cooperative marketing associations may participate in authorized price support programs to include barley, corn, oats, rye, sorghum and wheat in order to afford producers of these commodities the same marketing tool as is currently available to producers of certain other commodities. Comments were solicited on the proposal and interested persons were given thirty (30) days to express their views. To afford additional time for comment, the original comment period was extended an additional fifteen (15) days by a notice published in the FEDERAL REGISTER on May 10, 1977, (42 FR 23613).

DISCUSSION OF MAJOR COMMENTS

This Department received nearly 5,000 comments. Of these, about 1,900 favored the proposal and about 2,700 opposed it. The major issues raised by the comments received are discussed below.

COMMENTS SUPPORTING THE PROPOSAL

The comments supporting the proposal came from individuals and a wide range of State and national organizations and elected representatives in Congress. Individual producers indicated that the proposed action would provide use of a marketing tool that would give them additional marketing options. Further, they stated that these options would create more competition and directly benefit individual producers as well as independent grain dealers by providing access to specified volume units of grain. Cooperative managers indicated that the proposal would provide a more orderly marketing system that would release grains at the time they are needed to satisfy domestic and export demand, which would in turn benefit all farmers including those that did not participate in a pool of commodities on which a cooperative would participate in price support.

The State and national organizations submitting comments favoring the proposal include commodity groups, State cooperative councils, and national cooperative organizations. Also, several State governors, and members of Congress supported this action. These organizations and members of Congress stated that an expanded program would improve the economic position of their members and constituents by providing additional marketing options. They further stated that the proposal was a positive step towards improving the voice of producers in their marketing efforts.

COMMENTS OPPOSING THE PROPOSAL

Of the comments opposing the proposal, approximately 1,800 were received from the National Farmers Organization and their members. These comments opposed the proposal on the basis that: (1) USDA/CCC was proposing to delegate its loan function to cooperatives, and (2) nonmembers of cooperatives would be discriminated against because they would be required to become members of the cooperatives to participate in the price support program. Neither contention is valid.

Commodity Credit Corporation does not propose to delegate any of its loan functions to cooperatives. A grain cooperative that meets the eligibility requirements for participation in the program may be approved by Commodity Credit Corporation to obtain loans on or sell commodities on behalf of its members. Producers may also obtain price support at the county ASCS offices. The rule does not discriminate against nonmembers of cooperatives because all producers have the option of participating in authorized price support programs as an individual or marketing through a cooperative. The rule does not require that a producer become a member of a cooperative before he can participate individually in a price support program.

Other commenters opposed the proposal for reasons which may be grouped into the following four main categories: (1) Discrimination, (2) Monopoly, (3) Unlawful action, and (4) Unfair tax advantage. Each of these will be discussed separately below:

(1) *Discrimination.* Some commenters stated that the proposal would discriminate against private elevators because it would not permit them to obtain CCC price support loans on commodities acquired from producers, as would be the case for approved cooperatives.

Only those cooperatives which meet the eligibility requirements established by CCC are permitted to obtain price support loans on behalf of their members on commodities delivered to them for marketing. An eligible producer is not required to market his commodity through the cooperative in order to obtain price support. He may obtain price support individually through the county ASCS office or he may obtain price support through a cooperative marketing association. A participating cooperative is required to distribute loan advances and pool sale proceeds (profits realized from marketing commodities delivered by members) to the members who delivered the commodity. The member delivering the commodity to the cooperative maintains an equity interest in the proceeds from the sale of that commodity. Conversely, when a producer sells his commodity to a private elevator, title and all interest in the commodity is transferred by the sale to the elevator. All profits realized from the sale of the commodity inure to the benefit of the elevator and not the producers. Accordingly, to provide price support to an elevator for commodities it purchased from producers would benefit the elevator rather than the producer and would be inconsistent with the intent of Congress in enacting the statutes under which price support is administered.

Some commenters stated that the proposed rule would give grain marketing cooperatives an unfair advantage in that they would have access to a free of cost inventory for merchandising or processing. This option was rejected because, except for a short-term increase in cash flow, the proposed action provides little relief from the basic inventory financing requirements of cooperatives. These needs must still be met by the banks for cooperatives or through other lending arrangements. Extending the program will provide little relief from the inventory financing requirements of regional cooperatives, the primary organization expected to use the expanded loan program. These needs must still be met by the banks for cooperatives or other lending institutions. There is little or no likelihood that the expanded program will be a major source of working capital for cooperatives. Moreover, interest rates for CCC loans are not lower than commercial rates to an extent that would give the cooperative any significant market advantage. In any event, any marginal financial advantages accruing to cooperatives would be passed on to farmer members.

(2) *Monopoly.* Some commenters stated that the proposal would give grain marketing cooperatives control of a sufficient quantity of grain to enable them to acquire a monopoly on the supply of grain. These comments are not economically valid. In that regard, it is not expected that the combined volume of wheat and feed grains placed under CCC price support loan by cooperatives on behalf of their members would greatly exceed that which would be placed under loan by such farmers in the absence of the proposed action. Moreover, grain cooperatives are expected to put only about six percent of total U.S. grain sales under loan during the next five years. The proposed action, therefore, will not give cooperatives access to more grain than they now have and could not result in their acquisition of sufficient stocks to acquire a monopoly.

Other commenters opposed the proposal on the basis that it would tend to favor cooperatives with an unfair competitive advantage. Given the limited financial advantages to cooperatives and their projected six percent participation in wheat and feed grains over the next five years, it is not expected that the expanded program will have any significant affect on competition, nor will the marginal financial advantage of the program give participating cooperatives a significant competitive edge over local, regional or multi-national private grain firms.

(3) *Unlawful action.* While this Department has for many years made price support available to producers through approved cooperative marketing associations on such commodities as cotton, peanuts, rice and tobacco, some commenters contend that the proposed action is unlawful. The rationale for such contention is that since the cooperative is not itself a "producer", it may not receive price support. This contention misses the point. The regulation is not premised on the extension of price support to a cooperative for the benefit of the cooperative rather than its producer-members. Under the proposal, price support will be made to producers collectively through their cooperatives, for the benefit of the individual producers. The proposal is merely, therefore, an alternative method for carrying out the intent of the statutes under which price support must be made available for wheat and feed grains.

Frequently cited by these commenters as support for their contention that the proposal is unlawful is the case of *Tennessee Burley Tobacco Growers' Association* v. *Commodity Credit Corporation*, 350 F. 2d 34 (6th Cir. 1965), cert. denied, 383 U.S. 907 (1966). The Court in this case did not consider the question whether a cooperative approved by CCC could, under the price support statutes, receive price support on behalf of its producer-members. The legality of the long standing practice followed by this Department of making price support available to producers through cooperative marketing associations was undisturbed by the decision in this case. Cooperatives have been utilized by CCC for making price support available to producers for nearly 40 years. During this period numerous changes have been made in price support legislation by the Congress which has left undisturbed the administrative practice in question, although it has been fully familiar with the process. In fact, utilization of cooperatives has expressly been recognized and sanctioned by the Congress. For example, when appropriating funds to carry out this Department's functions and programs for the 1960 fiscal year, Congress, in the 1960 appropriation act (Pub. L. 86-80, 73 Stat. 167, 178), referring to a $50,000-limitation on the amount of price support which could be extended through loans, purchases, or purchase agreements, stated: "(3) that in the case of any loan to, or purchase from, a cooperative marketing organization, * * * such limitation shall not apply to the amount of price support received by the cooperative marketing organization, or other persons, but the amount of price support made available to any person through such cooperative marketing organization or other persons shall be included in determining the amount of price support received by such person for purposes of such limitation * * *."

(4) *Tax Advantage.* Certain commenters contended that cooperatives already have a tax advantage and that to permit them to participate in price support would further enhance this advantage. Cooperatives do not operate as business entities whose primary purpose is profit and return on investment. Therefore, all sales proceeds, less costs of doing business, are returned to its members. The proposal will have no effect on the present tax status of cooperatives.

All comments received have been considered in connection with this final rule. After giving careful consideration to those comments, it has been determined that the arguments opposing the proposal were not valid reasons for not expanding the list of commodities.

FINAL RULE

Accordingly, 7 CFR 1421.3 of the General Regulations Governing Price Support for the 1976 and Subsequent Crops of grains and Similarly Handled Commodities is hereby amended as follows:

§ 1421.3 Eligible producer.

* * * * *

(g) *Approved cooperative.* A cooperative marketing association which is approved by the Executive Vice President, CCC, or his designee, pursuant to Part 1425 of this chapter, to obtain price support on a crop of barley, corn, oats, rice, rye, sorghum, soybeans and wheat may obtain price support on the eligible warehouse stored production of such crop of the commodity on behalf of its members. When used in this subpart and on applicable forms, the term "producer" means both an eligible producer as defined in paragraphs (a), (b), and (c) of this section and an approved cooperative association.

* * * * *

NOTE.—It is hereby certified that the economic and inflationary effects of this action have been carefully evaluated in accordance with Executive Order 11921 and OMB Circular A-107.

Signed at Washington, D.C., on July 26, 1977.

RAY FITZGERALD,
Executive Vice President,
Commodity Credit Corporation.

SUPPLEMENTARY INFORMATION: On Tuesday, April 12, 1977, a notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 19149) announcing that the Secretary of Agriculture was considering amending the General Regulations Governing Price Support for the 1976 and Subsequent Crops to expand the list of commodities on which approved cooperative marketing associations may participate in authorized price support programs to include barley, corn, oats, rye, sorghum and wheat in order to afford producers of these commodities the same marketing tool as is currently available to producers of certain other commodities. Comments were solicited on the proposal and interested persons were given thirty (30) days to express their views. To afford additional time for comment, the original comment period was extended an additional fifteen (15) days by a notice published in the FEDERAL REGISTER on May 10, 1977, (42 FR 23613).

DISCUSSION OF MAJOR COMMENTS

This Department received nearly 5,000 comments. Of these, about 1,900 favored the proposal and about 2,700 opposed it. The major issues raised by the comments received are discussed below.

COMMENTS SUPPORTING THE PROPOSAL

The comments supporting the proposal came from individuals and a wide range of State and National Organizations and elected representatives in Congress. Individual producers indicated that the proposed action would provide use of a marketing tool that would give them additional marketing options. Further, they stated that these options would create more competition and directly benefit individual producers as well as independent grain dealers by providing access to specified volume units of grain. Cooperative managers indicated that the proposal would provide a more orderly marketing system that would release grains at the time they are needed to satisfy domestic and export demand, which would in turn benefit all farmers including those that did not participate in a pool of commodities on which a cooperative would participate in price support.

The State and National Organizations submitting comments favoring the proposal include commodity groups, State Cooperative Councils, and National Cooperative Organizations. Also several State governors and Members of Congress supported this action. These organizations and Members of Congress stated that an expanded program would improve the economic position of their members and constituents by providing additional marketing options. They further stated that the proposal was a positive step towards improving the voice of producers in their marketing efforts.

COMMENTS OPPOSING THE PROPOSAL

Of the comments opposing the proposal, approximately 1,800 were received from the National Farmers Organization and their members. These comments opposed the proposal on the basis that: (1) USDA CCC was proposing to delegate its loan function to cooperatives, and (2) nonmembers of cooperatives would be discriminated against because they would be required to become members of the cooperatives to participate in the price support program. Neither contention is valid.

Commodity Credit Corporation does not propose to delegate any of its loan functions to cooperatives. A grain cooperative that meets the eligibility requirements for participation in the program may be approved by Commodity Credit Corporation to obtain loans on or sell commodities on behalf of its members. Producers may also obtain price support at the county ASCS offices. The rule does not discriminate against nonmembers of cooperatives because all producers have the option of participating in authorized price support programs as an individual or marketing through a cooperative. The rule does not require that a producer become a member of a cooperative before he can participate individually in a price support program.

Other commenters opposed the proposal for reasons which may be grouped into the following four main categories: (1) Discrimination, (2) Monopoly, (3) Unlawful action, and (4) Unfair tax advantage. Each of these will be discussed separately below:

(1) *Discrimination.* Some commenters stated that the proposal would discriminate against private elevators because

it would not permit them to obtain CCC price support loans on commodities acquired from producers, as would be the case for approved cooperatives.

Only those cooperatives which meet the eligibility requirements established by CCC are permitted to obtain price support loans on behalf of their members on commodities delivered to them for marketing. An eligible producer is not required to market his commodity through the cooperative in order to obtain price support. He may obtain price support individually through the county ASCS office or he may obtain price support through a cooperative marketing association. A participating cooperative is required to distribute loan advances and pool sale proceeds (profits realized from marketing commodities delivered by members) to the members who delivered the commodity. The member-delivering the commodity to the cooperative maintains an equity interest in the proceeds from the sale of that commodity. Conversely, when a producer sells his commodity to a private elevator, title and all interest in the commodity is transferred by the sale to the elevator. All profits realized from the sale of the commodity inure to the benefit of the elevator and not the producers. Accordingly, to provide price support to an elevator for commodities it purchased from producers would benefit the elevator rather than the producer and would be inconsistent with the intent of Congress in enacting the statutes under which price support is administered.

Some commenters stated that the proposed rule would give grain marketing cooperatives an unfair advantage in that they would have access to a free of cost inventory for merchandising or processing. This objection was rejected because, except for a short-term increase in cash flow, the proposed action provides little relief from the basic inventory financing requirements of cooperatives. These needs must still be met by the banks for cooperatives or through other lending arrangements. Extending the program will provide little relief from the inventory financing requirements of regional cooperatives, the primary organization expected to use the expanded loan program. These needs must still be met by the banks for cooperatives or other lending institutions. There is little or no likelihood that the expanded program will be a major source of working capital for cooperatives. Moreover, interest rates for CCC loans are not lower than commercial rates to an extent that would give the cooperative any significant market advantage. In any event, any marginal financial advantages accruing to cooperatives would be passed on to farmer members.

(2) *Monopoly.* Some commenters stated that the proposal would give grain marketing cooperatives control of a sufficient quantity of grain to enable them to acquire a monopoly on the supply of grain. These comments are not economically valid. In that regard, it is not expected that the combined volume of barley placed under CCC price support loan by cooperatives on behalf of their members would greatly exceed that which would be placed under loan by such farmers in the absence of the proposed action. Moreover, grain cooperatives are expected to put only about two percent of total U.S. barley sales under loan during the next five years. The proposed action, therefore, will not give cooperatives access to more barley than they now have and could not result in their acquisition of sufficient stocks to acquire a monopoly.

Other commenters opposed the proposal on the basis that it would tend to favor cooperatives with an unfair competitive advantage. Given the limited financial advantages to cooperatives and their projected two percent participation in barley over the next five years, it is not expected that the expanded program will have any significant effect on competition, nor will the marginal financial advantage of the program give participating cooperatives a significant competitive edge over local, regional or multinational private grain firms.

(3) *Unlawful Action.* While this Department has for many years made price support available to producers through approved cooperative marketing associations on such commodities as cotton, peanuts, rice and tobacco, some commenters contend that the proposed action is unlawful. The rationale for such contention is that since the cooperative is not itself a "producer", it may not receive price support. This contention misses the point. The regulation is not premised on the extension of price support to a cooperative for the benefit of the cooperative rather than its producer-members. Under the proposal, price support will be made to producers collectively through their cooperatives, for the benefit of the individual procedures. The proposal is merely, therefore, an alternative method for carrying out the intent of the statutes under which price support must be made available for barley.

Cited by these commenters as support for their contention that the proposal is unlawful is the case of *Tennessee Burley Tobacco Growers' Association* v. *Commodity Credit Corporation*, 350 F. 2d 34 (6th Cir. 1965), cert. denied, 383 U.S. 907 (1966). The Court in this case did not consider the question whether a cooperative approved by CCC could, under the price support statutes, receive price support on behalf of its producer-members. The legality of the long standing practice followed by this Department of making price support available to producers through cooperative marketing associations was undisturbed by the decision in this case. Cooperatives have been utilized by CCC for making price support available to producers for nearly 40 years. During this period numerous changes have been made in price support legislation by the Congress which has left undisturbed the administrative practice in question, although it has been fully familiar with the process. In fact, utilization of cooperatives has expressly been recognized and sanctioned by the Congress. For example, when appropriating funds to carry out this Department's functions and programs for the 1960 fiscal year, Congress, in the 1960 appropriation act (Pub. L. 86-80, 73 Stat. 167, 178), referring to a $50,000 limitation on the amount of price support which could be extended through loans, purchases, or purchase agreements, stated: "(3) that in the case of any loan to, or purchase from, a cooperative marketing organization, * * * such limitation shall not apply to the amount of price support received by the cooperative marketing organization, or other persons, but the amount of price support made available to any person through such cooperative marketing organization or other persons shall be included in determining the amount of price support received by such person for purposes of such limitation * * *"

(4) *Tax advantage.* Certain commenters contended that cooperatives already have a tax advantage and that to permit them to participate in price support would further enhance this advantage. Cooperatives do not operate as business entities whose primary purpose is profit and return on investment. Therefore, all sales proceeds, less costs of doing business, are returned to its members. The proposal will have no effect on the present tax status of cooperatives.

All comments received have been considered in connection with this final rule. After giving careful consideration to those comments, it has been determined that the arguments opposing the proposal were not valid reasons for not expanding the list of commodities.

FINAL RULE

Accordingly, 7 CFR 1421.50 of the 1970 and Subsequent Crops Barley Loan and Purchase Program is hereby amended as follows:

§ 1421.50 Purpose.

This supplement contains program provisions which, together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1976 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1970 and Subsequent Crops of barley.

NOTE.—It is hereby certified that the economic effects of this action have been carefully evaluated in accordance with Executive Order 11821 and OMB Circular A-107.

Signed at Washington, D.C., on August 2, 1977.

DISCUSSION OF MAJOR COMMENTS

This Department received nearly 5000 comments. Of these, about 1900 favored the proposal and about 2700 opposed it. The major issues raised by the comments received are discussed below.

COMMENTS SUPPORTING THE PROPOSAL

The comments supporting the proposal came from individuals and a wide range of State and National Organizations and elected representatives in Congress. Individual producers indicated that the proposed action would provide use of a marketing tool that would give them additional marketing options. Further, they stated that these options would create more competition and directly benefit individual producers as well as independent grain dealers by providing access to specified volume units of grain. Cooperative managers indicated that the proposal would provide a more orderly marketing system that would release grains at the time they are needed to satisfy domestic and export demands, which would in turn benefit all farmers including those that did not participate in a pool of commodities on which a cooperative would participate in price support.

The State and National Organizations submitting comments favoring the proposal include commodity groups, State Cooperative Councils, and National Cooperative Organizations. Also, several State governors and Members of Congress supported this action. These organizations and Members of Congress stated that an expanded program would improve the economic position of their members and constituents by providing additional marketing options. They further stated that the proposal was a positive step towards improving the voice of producers in their marketing efforts.

COMMENTS OPPOSING THE PROPOSAL

Of the comments opposing the proposal, approximately 1,800 were received from the National Farmers Organization and their members. These comments opposed the proposal on the bases that: (1) USDA/CCC was proposing to delegate its loan functions to cooperatives, and (2) nonmembers of cooperatives would be discriminated against because they would be required to become members of the cooperatives to participate in the price support program. Neither contention is valid.

Commodity Credit Corporation does not propose to delegate any of its loan functions to cooperatives. A grain cooperative that meets the eligibility requirements for participation in the program may be approved by Commodity Credit Corporation to obtain loans on or sell commodities on behalf of its members. Producers may also obtain price support at the county ASCS offices. The rule does not discriminate against nonmembers of cooperatives because all producers have the option of participating in authorized price support programs as an individual or marketing through a cooperative. The rule does not require that a producer become a member of a cooperative before he can participate individually in a price support program.

Other commenters opposed the proposal for reasons which may be grouped into the following four main categories: (1) Discrimination, (2) Monopoly, (3) Unlawful action, and (4) Unfair tax advantage. Each of these will be discussed separately below:

(1) *Discrimination.* Some commenters stated that the proposal would discriminate against private elevators because it would not permit them to obtain CCC price support loans on commodities acquired from producers, as would be the case for approved cooperatives.

Only those cooperatives which meet the eligibility requirements established by CCC are permitted to obtain price support loans on behalf of their members on commodities delivered to them for marketing. An eligible producer is not required to market his commodity through the cooperative in order to obtain price support. He may obtain price support individually through the county ASCS office or he may obtain price support through a cooperative marketing association. A participating cooperative is required to distribute loan advances and pool scale proceeds (profits realized from marketing commodities delivered by members) to the members who delivered the commodity. The member delivering the commodity to the cooperative maintains an equity interest in the proceeds from the sale of that commodity. Conversely, when a producer sells his commodity to a private elevator, title and all interest in the commodity is transferred by the sale to the elevator. All profits realized from the sale of the commodity inure to the benefit of the elevator and not the producers. Accordingly, to provide price support to an elevator for commodities it purchased from producers would benefit the elevator rather than the producer and would be inconsistent with the intent of Congress in enacting statutes under which price support is administered.

Some commenters stated that the proposed rule would give grain marketing cooperatives an unfair advantage in that they would have access to a free of cost inventory for merchandising or processing. This objection was rejected because, except for a short-term increase in cash flow, the proposed action provides little relief from the basic inventory financing requirements of cooperatives. These needs must still be met by the banks for cooperatives or through other lending arrangements. Extending the program will provide little relief from the inventory financing requirements of regional cooperatives, the primary organization expected to use the expanded loan procooperatives, the primary organization grams. These needs must still be met by the banks for cooperatives or other lending institutions. There is little or no likelihood that the expanded program will be a major source of working capital for cooperatives. Moreover, interest rates for CCC loans are not lower than commercial rates to an extent that would give the cooperative any significant market advantage. In any event, any marginal financial advantages accruing to cooperatives would be passed on to farmer members.

(2) *Monopoly.* Some commenters stated that the proposal would give grain marketing cooperatives control of a sufficient quantity of grain to enable them to acquire a monopoly on the supply of grain. These comments are not economically valid. In that regard, it is not expected that the combined volume of sorghum placed under CCC price support loan by cooperatives on behalf of their members would greatly exceed that which would be placed under loan by such farmers in the absence of the proposed action. Moreover, grain cooperatives are expected to put only about 5 percent of total U.S. sorghum sales under

loan during the next five years. The proposed action, therefore, will not give cooperatives access to more sorghum than they now have and could not result in their acquisition of sufficient stocks to acquire a monopoly.

Other commenters opposed the proposal on the basis that it would tend to favor cooperatives with an unfair competitive advantage. Given the limited financial advantages to cooperatives and their projected 5 percent participation in sorghum over the next five years, it is not expected that the expanded program will have any significant affect on competition, nor will the marginal financial advantage of the program give participating cooperatives a significant competitive edge over local, regional or multi-national private grain firms.

(3) *Unlawful action.* While this Department has for many years made price support available to producers through approved cooperative marketing associations on such commodities as cotton, peanuts, rice, and tobacco, some commenters contend that the proposed action is unlawful. The rationale for such contention is that since the cooperative is not itself a "producer", it may not receive price support. This contention misses the point. The regulation is not premised on the extension of price support to a cooperative for the benefit of the cooperative rather than its producer-members. Under the proposal, price support will be made to producers collectively through their cooperatives, for the benefit of the individual producers. The proposal is merely, therefore, an alternative method for carrying out the intent of the statutes under which price support must be made available for wheat.

Cited by these commenters as support for their contention that the proposal is unlawful is the case of *Tennessee Burly Tobacco Growers' Association v. Commodity Credit Corporation*, 350 F. 2d 34 (6th Cir. 1965), *cert. denied*, 383 U.S. 907 (1966). The Court in this case did not consider the question whether a cooperative approved by CCC could, under the price support statutes, receive price support on behalf of its producer-members. The legality of the long standing practice followed by this Department of making price support available to producers through cooperative marketing associations was undisturbed by the decision in this case. Cooperatives have been utilized by CCC for making price support available to producers for nearly 40 years. During this period numerous changes have been made in price support legislation by the Congress which has left undisturbed the administrative practice in question, although it has been fully familiar with the process. In fact, utilization of cooperatives has expressly been recognized and sanctioned by the Congress. For example, when appropriating funds to carry out this Department's functions and programs for the 1960 fiscal year, Congress, in the 1960 appropriation act (Pub. L. 86-80, 73 Stat. 167, 178), referring to a $50,000 limitation on the amount of price support which could be extended through loans, purchases, or purchase agreements, stated: "(3) that in the case of any loan to, or purchase from, a cooperative marketing organization, * * * such limitations shall not apply to the amount of price support received by the cooperative marketing organization, or other persons, but the amount of price support made available to any person through such cooperative marketing organization or other persons shall be included in determining the amount of price support received by such person for purposes of such limitation * * *."

(4) *Tax advantage.* Certain commenters contended that cooperatives already have a tax advantage and that to permit them to participate in price support would further enhance this advantage. Cooperatives do not operate as business entities whose primary purpose is profit and return on investment. Therefore, all sales proceeds, less costs of doing business, are returned to its members. The proposal will have no effect on the present tax status of cooperatives.

All comments received have been considered in connection with this final rule. After giving careful consideration to the comments, it has been determined that the arguments opposing the proposal were not valid reasons for not expanding the list of commodities.

FINAL RULE

Accordingly, 7 CFR 1421.210 of the 1970 and Subsequent Crops Sorghum Loan and Purchase Program is hereby amended as follows:

§ 1421.210 Purpose.

This supplement contains program provisions which, together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1976 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1970 and subsequent crops of sorghum.

NOTE.—It is hereby certified that the economic effects of this action have been carefully evaluated in accordance with Executive Order 11921 and OMB Circular A-107.

Signed at Washington, D.C., on August 2, 1977.

RAY FITZGERALD,
Executive Vice President,
Commodity Credit Corporation.

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1970 and Subsequent Crops Wheat Loan and Purchase Program

COOPERATIVES WHICH MAY PARTICIPATE

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: This rule amends the 1970 and Subsequent Crops Wheat Loan and Purchase Program to permit approved cooperative marketing associations to obtain on behalf of their members price support on their eligible warehouse stored production of wheat. Previously, eligible cooperatives were authorized to obtain on behalf of their members price support loans on eligible cotton, honey, rice and soybeans. This amendment is intended to increase the marketing options of wheat producers.

EFFECTIVE DATE: August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION

On Tuesday, April 12, 1977, a notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 19149) announcing that the Secretary of Agriculture was considering amending the General Regulations Governing Price Support for the 1976 and Subsequent Crops to expand the list of commodities on which approved cooperative marketing associations may participate in authorized price support programs to include barley, corn, oats, rye, sorghum and wheat in order to afford producers of these commodities the same marketing tool as is currently available to producers of certain other commodities. Comments were solicited on the proposal and interested persons were given thirty (30) days to express their views concerning the proposal. To afford additional time for comment, the original comment period was extended an additional fifteen (15) days by a notice published in the FEDERAL REGISTER on May 10, 1977 (42 FR 23613).

DISCUSSION OF MAJOR COMMENTS

This Department received nearly 5000 comments. Of these, about 1900 favored the proposal and about 2700 opposed it. The major issues raised by the comments received are discussed below.

COMMENTS SUPPORTING THE PROPOSAL

The comments supporting the proposal came from individuals and a wide range of State and National organizations and elected representatives in Congress. Individual producers indicated that the proposed action would provide use of a marketing tool that would give them additional marketing options. Further, they stated that these options would create more competition and directly benefit individual producers as well as independent grain dealers by providing access to specified volume units of grain. Cooperative managers indicated that the proposal would provide a more orderly marketing system that would release grains at the time they are needed to satisfy domestic and export demand, which would in turn benefit all farmers including those that did not participate in a pool of commodities on which a cooperative would participate in price support

The State and National Organizations submitting comments favoring the proposal include commodity groups, State Cooperative Councils, and National Cooperative Organizations. Also, several State governors and Members of Congress supported this action. These organizations and Members of Congress stated that an expanded program would improve the economic position of their members and constituents by providing additional marketing options. They further stated that the proposal was a positive step towards improving the voice of producers in their marketing efforts.

COMMENTS OPPOSING THE PROPOSAL

Of the comments opposing the proposal, approximately 1,800 were received from the National Farmers Organization and their members. These comments opposed the proposal on the bases that: (1) USDA/CCC was proposing to delegate its loan function to cooperatives, and (2) nonmembers of cooperatives would be discriminated against because they would be required to become members of the cooperatives to participate in the price support program. Neither contention is valid.

Commodity Credit Corporation does not propose to delegate any of its loan functions to cooperatives. A grain cooperative that meets the eligibility requirements for participation in the program may be approved by Commodity Credit Corporation to obtain loans on or sell commodities on behalf of its members. Producers may also obtain price support at the county ASCS offices. The rule does not discriminate against nonmembers of cooperatives because all producers have the option of participating in authorized price support programs as an individual or marketing through a cooperative. The rule does not require that a producer become a member of a cooperative before he can participate individually in a price support program.

Other commenters opposed the proposal for reasons which may be grouped into the following four main categories: (1) Discrimination, (2) Monopoly, (3) Unlawful action, and (4) Unfair tax advantage. Each of these will be discussed separately below:

(1) *Discrimination.* Some commenters stated that the proposal would discriminate against private elevators because it would not permit them to obtain CCC price support loans on commodities acquired from producers, as would be the case for approved cooperatives.

Only those cooperatives which meet the eligibility requirements established by CCC are permitted to obtain price support loans on behalf of their members on commodities delivered to them for marketing. An eligible producer is not required to market his commodity through the cooperative in order to obtain price support. He may obtain price support individually through the county ASCS office or he may obtain price support through a cooperative marketing association. A participating cooperative is required to distribute loan advances and pool sale proceeds (profits realized from marketing commodities delivered by members) to the members who delivered the commodity. The member delivering the commodity to the cooperative maintains an equity interest in the proceeds from the sale of that commodity. Conversely, when a producer sells his commodity to a private elevator, title and all interest in the commodity is transferred by the sale to the elevator. All profits realized from the sale of the commodity inure to the benefit of the elevator and not the producers. Accordingly, to provide price support to an elevator for commodities it purchased from producers would benefit the elevator rather than the producer and would be inconsistent with the intent of Congress in enacting statutes under which price support is administered.

Some commenters stated that the proposed rule would give grain marketing cooperatives an unfair advantage in that they would have access to a free of cost inventory for merchandising or processing. This objection was rejected because, except for a short-term increase in cash flow, the proposed action provides little relief from the basic inventory financing requirements of cooperatives. These needs must still be met by the banks for cooperatives or through other lending arrangements. Extending the program will provide little relief from the inventory financing requirements of regional cooperatives, the primary organization expected to use the expanded loan program. These needs must still be met by the banks for cooperatives or other lending institutions. There is little or no likelihood that the expanded program will be a major source of working capital for cooperatives. Moreover, interest rates for CCC loans are not lower than commercial rates to an extent that would give the cooperative any significant market advantage. In any event, any marginal financial advantages accruing to cooperatives would be passed on to farmer members.

(2) *Monopoly.* Some commenters stated that the proposal would give grain marketing cooperatives control of a sufficient quantity of grain to enable them to acquire a monopoly on the supply of grain. These comments are not economically valid. In that regard, it is not expected that the combined volume of wheat placed under CCC price support loan by cooperatives on behalf of their members would greatly exceed that which would be placed under loan by such farmers in the absence of the proposed action. Moreover, grain cooperatives are expected to put only about 12 percent of total U.S. wheat sales under loan during the next five years. The proposed action, therefore, will not give cooperatives access to more wheat than they now have and could not result in their acquisition of sufficient stocks to acquire a monopoly.

Other commenters opposed the proposal on the basis that it would tend to favor cooperatives with an unfair competitive advantage. Given the limited financial advantages to cooperatives and their projected 12 percent participation in wheat over the next five years, it is not expected that the expanded program will have any significant effect on competition, nor will the marginal financial advantage of the program give participating cooperatives a significant competitive edge over local, regional or multinational private grain firms.

(3) *Unlawful action.* While this Department has for many years made price support available to producers through approved cooperative marketing associations on such commodities as cotton, peanuts, rice, and tobacco, some commenters contend that the proposed action is unlawful. The rationale for such contention is that since the cooperative is not itself a "producer", it may not receive price support. This contention misses the point. The regulation is not premised on the extension of price support to a cooperative for the benefit of the cooperative rather than its producer-members. Under the proposal, price support will be made to producers collectively through their cooperatives, for the benefit of the individual producers. The proposal is merely, therefore, an alternative method for carrying out the intent of the statutes under which price support must be made available for wheat.

Cited by these commenters as support for their contention that the proposal is unlawful is the case of *Tennessee Burley Tobacco Growers' Association v. Commodity Credit Corporation*, 350 F. 2d 34 (6th Cir. 1965), cert. denied, 383 U.S. 907 (1966). The Court in this case did not consider the question whether a cooperative approved by CCC could, under the price support statutes, receive price support on behalf of its producer-members. The legality of the long standing practice followed by this Department of making price support available to producers through cooperative marketing associations was undisturbed by the decision in this case. Cooperatives have been utilized by CCC for making price support available to producers for nearly 40 years. During this period numerous changes have been made in price support legislation by the Congress which has left undisturbed the administrative practice in question, although it has been fully familiar with the process. In fact, utilization of cooperatives has expressly been recognized and sanctioned by the Congress. For example, when appropriating funds to carry out this Department's functions and programs for the 1960 fiscal year, Congress, in the 1960 appropriation act (Pub. L. 86-80, 73 Stat. 167, 178), referring to a $50,000 limitation on the amount of price support which could be extended through loans, purchases, or purchase agreements, stated: "(3) that in the case of any loan to, or purchase from, a cooperative marketing organization, * * * such limitation shall not apply to the amount of price support received by the cooperative marketing organization, or other persons, but the amount of price support made available to any person through such cooperative marketing organization or other persons shall be included in determining the amount of price support received by such person for purposes of such limitation * * *."

(4) *Tax advantage.* Certain commenters contended that cooperatives already have a tax advantage and that to permit them to participate in price support would further enhance this advantage. Cooperatives do not operate as business entities whose primary purpose is profit and return on investment. Therefore, all sales proceeds, less costs of doing business, are returned to its members. The proposal will have no effect on the present tax status of cooperatives.

All comments received have been considered in connection with this final rule. After giving careful consideration to the comments, it has been determined that the arguments opposing the proposal were not valid reasons for not expanding the list of commodities.

FINAL RULE

Accordingly, 7 CFR 1421.460 of the 1970 and Subsequent Crops Wheat Loan and Purchase Program is hereby amended as follows:

§ 1421.460 Purpose.

This supplement contains program provisions which, together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1976 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1970 and subsequent crops of wheat.

NOTE.—It is hereby certified that the economic effects of this action have been carefully evaluated in accordance with Executive Order 11921 and OMB Circular A-107.

Signed at Washington, D.C., on August 2, 1977.

Charlie B. Robbins, (ASCS), 202-447-4634, P.O. Box 2415, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: On Tuesday, April 12, 1977, a notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 19149) announcing that the Secretary of Agriculture was considering amending the General Regulations Governing Price Support for the 1976 and Subsequent Crops to expand the list of commodities on which approved cooperative marketing associations may participate in authorized price support programs to include barley, corn, oats, rye, sorghum and wheat in order to afford producers of these commodities the same marketing tool as is currently available to producers of certain other commodities. Comments were solicited on the proposal and interested persons were given thirty (30) days to express their views concerning the proposal. To afford additional time for comment, the original comment period was extended an additional fifteen (15) days by a notice published in the FEDERAL REGISTER on May 10, 1977 (42 FR 23613).

DISCUSSION OF MAJOR COMMENTS

This Department received nearly 5,000 comments. Of these, about 1,900 favored the proposal and about 2,700 opposed it. The major issues raised by the comments received are discussed below.

COMMENTS SUPPORTING THE PROPOSAL

The comments supporting the proposal came from individuals and a wide range of State and National organizations and elected representatives in Congress. Individual producers indicated that the proposed action would provide use of a marketing tool that would give them additional marketing options. Further, they stated that these options would create more competition and directly benefit individual producers as well as independent grain dealers by providing access to specified volume units of grain. Cooperative managers indicated that the proposal would provide a more orderly marketing system that would release grains at the time they are needed to satisfy domestic and export demand, which would in turn benefit all farmers including those that did not participate in a pool of commodities on which a cooperative would participate in price support.

The State and National Organizations submitting comments favoring the proposal include commodity groups, State Cooperative Councils, and National Cooperative Organizations. Also, several State governors and Members of Congress supported this action. These organizations and Members of Congress stated that an expanded program would improve the economic position of their members and constituents by providing additional marketing options. They further stated that the proposal was a positive step towards improving the voice of producers in their marketing efforts

COMMENTS OPPOSING THE PROPOSAL

Of the comments opposing the proposal, approximately 1,800 were received from the National Farmers Organization and their members. These comments opposed the proposal on the bases that: (1) USDA/CCC was proposing to delegate its loan function to cooperatives, and (2) nonmembers of cooperatives would be discriminated against because they would be required to become members of the cooperatives to participate in the price support program. Neither contention is valid.

Commodity Credit Corporation does not propose to delegate any of its loan functions to cooperatives. A grain cooperative that meets the elibility requirements for participation in the program may be approved by Commodity Credit Corporation to obtain loans on or sell commodities on behalf of its members Producers may also obtain price support at the county ASCS offices. The rules does not discriminate against nonmembers of cooperatives because all producers have the option of participating in authorized price support programs as an individual or marketing through a cooperative. The rule does not require that a producer become a member of a cooperative before he can participate individually in a price support program.

Other commenters opposed the proposal for reasons which may be grouped into the following four main categories (1) Discrimination, (2) Monopoly, (3) Unlawful action, and (4) Unfair tax advantage. Each of these will be discussed separately below

(1) *Discrimination.* Some commenters stated that the proposal would discriminate against private elevators because it would not permit them to obtain CCC price support loans on commodities acquired from producers, as would be the case for approved cooperatives.

Only those cooperatives which meet the eligibility requirements established by CCC are permitted to obtain price support loans on behalf of their members on commodities delivered to them for marketing. An eligible producer is not required to market his commodity through the cooperative in order to obtain price support. He may obtain price support individually through the county ASCS office or he may obtain price support through a cooperative marketing association. A participating cooperative is required to distribute loan advances and pool sale proceeds (profits realized from marketing commodities delivered by members) to the members who delivered the commodity The member delivering the commodity to the cooperative maintains an equity interest in the proceeds from the sale of that commodity Conversely, when a producer sells his commodity to a private elevator, title and all interest in the commodity is transferred by the sale to the elevator. All profits realized from the sale of the commodity inure to the benefit of the elevator and not the producers. Accordingly, to provide price support to an elevator for commodities it purchased from producers would benefit the elevator rather than the producer and would be inconsistent with the intent of Congress in enacting statutes under which price support is administered.

Some commenters stated that the proposed rule would give grain marketing cooperatives an unfair advantage in that they would have access to a free of cost inventory for merchandising or processing. This objection was rejected because, except for a short-term increase in cash flow, the proposed action provides little relief from the basic inventory financing requirements of cooperatives. These needs must still be met by the banks for cooperatives or through other lending arrangements. Extending the program will provide little relief from the inventory financing requirements of regional cooperatives, the primary organization expected to use the expanded loan program. These needs must still be met by the banks for cooperatives or other lending institutions. There is little or no likelihood that the expanded program will be a major source of working capital for cooperatives. Moreover, interest rates for CCC loans are not lower than commercial rates to an extent that would give the cooperative any significant market advantage. In any event, any marginal financial advantages accruing to cooperatives would be passed on to farmer members.

(2) *Monopoly.* Some commenters stated that the proposal would give grain marketing cooperatives control of a sufficient quantity of grain to enable them to acquire a monopoly on the supply of grain. These comments are not economically valid. In that regard, it is not expected that the combined volume of oats placed under CCC price support loan by cooperatives on behalf of their members would greatly exceed that which would be placed under loan by such farmers in the absence of the proposed action. Moreover, grain cooperatives are expected to put only about 1 percent of total U.S. oat sales under loan during the next five years. The proposed action, therefore, will not give cooperatives access to more oats than they now have and could not result in their acquisition of sufficient stocks to acquire a monopoly.

Other commenters opposed the proposal on the basis that it would tend to favor cooperatives with an unfair competitive advantage. Given the limited financial advantages to cooperatives and their projected 1 percent participation in oats over the next five years, it is not expected that the expanded program will have any significant affect on competition, nor will the marginal financial advantage of the program give participating cooperatives a significant competitive edge over local, regional or multi-national private grain firms.

(3) *Unlawful action.* While this Department has for many years made price support available to producers through approved cooperative marketing associations on such commodities as cotton, peanuts, rice, and tobacco, some commentors contend that the proposed action is unlawful. The rationale for such contention is that since the cooperative is not itself a "producer", it may not receive price support. This contention misses the point. The regulation is not premised on the extension of price support to a cooperative for the benefit of the cooperative rather than its producer-members. Under the proposal, price support will be made to producers collectively through their cooperatives, for the benefit of the individual producers. The proposal is merely, therefore, an alternative method for carrying out the intent of the statutes under which price support must be made available for oats.

Cited by these commenters as support for their contention that the proposal is unlawful is the case of *Tennessee Burley Tobacco Growers' Association* v. *Commodity Credit Corporation*, 350 F. 2d 34 (6th Cir. 1965), cert. denied, 383 U.S. 907 (1966). The Court in this case did not consider the question whether a cooperative approved by CCC could, under the price support statutes, receive price support on behalf of its producer-members. The legality of the long standing practice followed by this Department of making price support available to producers through cooperative marketing associations was undisturbed by the decision in this case. Cooperatives have been utilized by CCC for making price support available to producers for 40 years. During this period numerous changes have been made in price support legislation by the Congress which has left undisturbed the administrative practice in question, although it has been fully familiar with the process. In fact, utilization of cooperatives has expressly been recognized and sanctioned by the Congress. For example, when appropriating funds to carry out this Department's functions and programs for the 1960 fiscal year, Congress, in the 1960 appropriation act (Pub. L. 86-80, 73 Stat. 167, 178), referring to a $50,000 limitation on the amount of price support which could be extended through loans, purchases, or purchase agreements, stated: "(3) that in the case of any loan to, or purchase from, a cooperative marketing organization, * * * such limitation shall not apply to the amount of price support received by the cooperative marketing organization, or other persons, but the amount of price support made available to any person through such cooperative marketing organization or other persons shall be included in determining the amount of price support received by such person for purposes of such limitations * * *"

(4) *Tax advantage.* Certain commenters contended that cooperatives already have a tax advantage and that to permit them to participate in price support would further enhance this advantage. Cooperatives do not operate as business entities whose primary purpose is profit and return on investment. Therefore, all sales proceeds, less costs of doing business, are returned to its members. The proposal will have no effect on the present tax status of cooperatives

All comments received have been considered in connection with this final rule. After giving careful consideration to the comments, it has been determined that the arguments opposing the proposal were not valid reasons for not expanding the list of commodities.

FINAL RULE

Accordingly, 7 CFR 1421.245 of the 1970 and Subsequent Crops Oats Loan and Purchase Program is hereby amended as follows:

§ 1421.245 Purpose.

This supplement contains program provisions which, together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1976 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1970 and subsequent crops of oats.

NOTE: It is hereby certified that the economic effects of this action have been carefully evaluated in accordance with Executive Order 11921 and OMB Circular A-107

Signed at Washington, D.C., on August 2, 1977.

RAY FITZGERALD,

SUPPLEMENTARY INFORMATION: On Tuesday, April 12, 1977, a notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 19149) announcing that the Secretary of Agriculture was considering amending the General Regulations Governing Price Sup-

port for the 1976 and Subsequent Crops to expand the list of commodities on which approved cooperative marketing associations may participate in authorized price support programs to include barley, corn, oats, rye, sorghum and wheat in order to afford producers of these commodities the same marketing tool as is currently available to producers of certain other commodities. Comments were solicited on the proposal and interested persons were given thirty (30) days to express their views concerning the proposal. To afford additional time for comment, the original comment period was extended an additional fifteen (15) days by a notice published in the FEDERAL REGISTER on May 10, 1977 (42 FR 23613).

DISCUSSION OF MAJOR COMMENTS

This Department received nearly 5,000 comments. Of these, about 1,900 favored the proposal and about 2,700 opposed it. The major issues raised by the comments received are discussed below.

COMMENTS SUPPORTING THE PROPOSAL

The comments supporting the proposal came from individuals and a wide range of State and national organizations and elected representatives in Congress. Individual producers indicated that the proposed action would provide use of a marketing tool that would give them additional marketing options. Further, they stated that these options would create more competition and directly benefit individual producers as well as independent grain dealers by providing access to specified volume units of grain. Cooperative managers indicated that the proposal would provide a more orderly marketing system that would release grains at the time they are needed to satisfy domestic and export demand, which would in turn benefit all farmers including those that did not participate in a pool of commodities on which a cooperative would participate in price support.

The State and national organizations submitting comments favoring the proposal include commodity groups, State cooperative councils, and national cooperative organizations. Also, several State governors and Members of Congress stated that an expanded program would improve the economic position of their members and constituents by providing additional marketing options. They further stated that the proposal was a positive step towards improving the voice of producers in their marketing efforts.

COMMENTS OPPOSING THE PROPOSAL

Of the comments opposing the proposal, approximately 1,800 were received from the National Farmers Organization and their members. These comments opposed the proposal on the basis that: (1) USDA/CCC was proposing to delegate its loan function to cooperatives, and (2) nonmembers of cooperatives would be discriminated against because they would be required to become members of the cooperatives to participate in the price support program. Neither contention is valid.

Commodity Credit Corporation does not propose to delegate any of its loan functions to cooperatives. A grain cooperative that meets the eligibility requirements for participation in the program may be approved by Commodity Credit Corporation to obtain loans on or sell commodities on behalf of its members. Producers may also obtain price support at the county ASCS offices. The rule does not discriminate against nonmembers of cooperatives because all producers have the option of participating in authorized price support programs as an individual or marketing through a cooperative. The rule does not require that a producer become a member of a cooperative before he can participate individually in a price support program.

Other commenters opposed the proposal for reasons which may be grouped into the following four main categories: (1) Discrimination, (2) Monopoly, (3) Unlawful action, and (4) Unfair tax advantage.

(1) *Discrimination.* Some commenters stated that the proposal would discriminate against private elevators because it would not permit them to obtain CCC price support loans on commodities acquired from producers, as would be the case for approved cooperatives.

Only those cooperatives which meet the eligibility requirements established by CCC are permitted to obtain price support loans on behalf of their members on commodities delivered to them for marketing. An eligible producer is not required to market his commodity through the cooperative in order to obtain price support. He may obtain price support individually through the county ASCS office or he may obtain price support through a cooperative marketing association. A participating cooperative is required to distribute loan advances and pool sale proceeds (profits realized from marketing commodities delivered by members) to the members who delivered the commodity. The member delivering the commodity to the cooperative maintains an equity interest in the proceeds from the sale of that commodity. Conversely, when a producer sell his commodity to a private elevator, title and all interest in the commodity is transferred by the sale to the elevator. All profits realized from the sale of the commodity inure to the benefit of the elevator and not the producers. Accordingly, to provide price support to an elevator for commodities it purchased from producers would benefit the elevator rather than the producer and would be inconsistent with the intent of Congress in enacting statutes under which price support is administered.

Some commenters stated that the proposed rule would give grain marketing cooperatives an unfair advantage in that they would have access to a free of cost inventory for merchandising or processing. This objection was rejected because, except for a short-term increase in cash flow, the proposed action provides little relief from the basic inventory financing requirements of cooperatives. These needs must still be met by the banks for cooperatives or through other lending arrangements. Extending the program will provide little relief from the inventory financing requirements of regional cooperatives, the primary organization expected to use the expanded loan program. These needs must still be met by the banks for cooperatives or other lending institutions. There is little or no likelihood that the expanded program will be a major source of working capital for cooperatives. Moreover, interest rates for CCC loans are not lower than commercial rates to an extent that would give the cooperative any significant market advantage. In any event, any marginal financial advantages accruing to cooperatives would be passed on to farmer members.

(2) *Monopoly.* Some commenters stated that the proposal would give grain marketing cooperatives control of a sufficient quantity of grain to enable them to acquire a monopoly on the supply of grain. These comments are not economically valid. In that regard, it is not expected that the combined volume of corn placed under CCC price support loan by cooperatives on behalf of their members would greatly exceed that which would be placed under loan by such farmers in the absence of the proposed action. Moreover, grain cooperatives are expected to put only about 4 percent of total U.S. corn sales under loan during the next five years. The proposed action, therefore, will not give cooperatives access to more corn than they now have and could not result in their acquisition of sufficient stocks to acquire a monopoly.

Other commenters opposed the proposal on the basis that it would tend to favor cooperatives with an unfair competitive advantage. Given the limit financial advantages to cooperatives and their projected 4 percent participation in corn over the next five years, it is not expected that the expanded program will have any significant affect on competition, nor will the marginal financial advantage of the program give participating cooperatives a significant competitive edge over local, regional or multi-national private grain firms.

(3) *Unlawful Action.* While this Department has for many years made price support available to producers through approved cooperative marketing associations on such commodities as cotton, peanuts, rice, and tobacco, some commenters contend that the proposed action is unlawful. The rationale for such contention is that since the cooperative is not itself a "producer", it may not receive price support. This contention misses the point. The regulation is not premised on the extension of price support to a cooperative for the benefit of the cooperative rather than its producer-members. Under the proposal, price support will be made to producers collectively through their cooperatives, for the benefit of the individual producers. The proposal is merely, therefore, an alternative method for carrying out the intent of the statutes under which price support must be made available for corn.

Cited by these commenters as support for their contention that the proposal is unlawful is the case of *Tennessee Burley Tobacco Growers' Association* v. *Commodity Credit Corporation*, 350 F. 2d 34 (6th Cir. 1965), cert. denied, 383 U.S. 907 (1966). The Court in this case did not consider the question whether a cooperative approved by CCC could, under the price support statutes, receive price support on behalf of its producer-members. The legality of the long standing practice followed by this Department of making price support available to producers through cooperative marketing associations was undisturbed by the decision in this case. Cooperatives have been utilized by CCC for making price support available to producers for nearly 40 years. During this period numerous changes have been made in price support legislation by the Congress which has left undisturbed the administrative practice in question, although it has been fully familiar with the process. In fact, utilization of cooperatives has expressly been recognized and sanctioned by the Congress. For example, when appropriating funds to carry out this Department's functions and programs for the 1960 fiscal year, Congress, in the 1960 appropriation act (Pub. L. 86-80, 73 Stat. 167, 178), referring to a $50,000-limitation on the amount of price support which could be extended through loans, purchases, or purchase agreements, stated: "(3) that in the case of any loan to, or purchase from, a cooperative marketing organization, * * * such limitation shall not apply to the amount of price support received by the cooperative marketing organization, or other persons, but the amount of price support made available to any person through such cooperative marketing organization or other persons shall be included in determining the amount of price support received by such person for purposes of such limitation * * *"

(4) *Tax Advantage.* Certain commenters contended that cooperatives already have a tax advantage and that to permit them to participate in price support would further enhance this advantage. Cooperatives do not operate as business entities whose primary purpose is profit and return on investment. Therefore, all sales proceeds, less costs of doing business, are returned to its members. The proposal will have no effect on the present tax status of cooperatives.

All comments received have been considered in connection with this final rule. After giving careful consideration to the comments, it has been determined that the arguments opposing the proposal were not valid reasons for not expanding the list of commodities.

FINAL RULE

Accordingly, 7 CFR 1421.90 of the 1970 and Subsequent Crops Corn Loan and Purchase Program is hereby amended as follows:

§ 1421.90 Purpose.

This supplement contains program provisions which, together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1976 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1970 and subsequent crops of corn.

NOTE.—It is hereby certified that the economic effects of this action have been carefully evaluated in accordance with Executive Order 11921 and OMB Circular A-107.

Signed at Washington, D.C., on August 2, 1977.

RAY FITZGERALD,
Executive Vice President,
Commodity Credit Corporation.

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1970 and Subsequent Crops Rye Loan and Purchase Programs

COOPERATIVES WHICH MAY PARTICIPATE

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: This rule amends the 1970 and Subsequent Crops Rye Loan and Purchase Program to permit approved cooperative marketing associations to obtain on behalf of their members price support on their eligible warehouse stored production of rye. Previously, eligible cooperatives were authorized to obtain on behalf of their members price support loans on eligible cotton, honey, rice and soybeans. This amendment is intended to increase the marketing options of rye producers.

EFFECTIVE DATE: August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles B. Robbins, (ASCS) 202-447-4634, P.O. Box 2415, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: On Tuesday, April 12, 1977, a notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 19149) announcing that the Secretary of Agriculture was considering amending the General Regulations Governing Price Support for the 1976 and Subsequent Crops to expand the list of commodities on which approved cooperative marketing associations may participate in authorized price support programs to include barely, corn, oats, rye, sorghum and wheat in order to afford producers of these commodities the same marketing tool as is currently available to producers of certain other commodities. Comments were solicited on the proposal and interested persons were given thirty (30) days to express their views concerning the proposal. To afford additional time for comment, the original comment period was extended an additional fifteen (15) days by a notice published in the FEDERAL REGISTER on May 10, 1977 (42 FR 23613).

DISCUSSION OF MAJOR COMMENTS

This Department received nearly 5,000 comments. Of these, about 1,900 favored the proposal and about 2,700 opposed it. The major issues raised by the comments received are discussed below.

COMMENTS SUPPORTING THE PROPOSAL

The comments supporting the proposal came from individuals and a wide range of State and national organizations and elected representatives in Congress. Individual producers indicated that the proposed action would provide use of a marketing tool that would give them additional marketing options. Further, they stated that these options would create more competition and directly benefit individual producers as well as independent grain dealers by providing access to specified volume units of grain. Cooperative managers indicated that the proposal would provide a more orderly marketing system that would release grains at the time they are needed to satisfy domestic and export demand, which would in turn benefit all farmers including those that did not participate in a pool of commodities on which a cooperative would participate in price support.

The State and national organizations submitting comments favoring the proposal include commodity groups, State cooperative councils, and national cooperative organizations. Also, several State governors and Members of Congress supported this action. These organizations and Members of Congress stated that an expanded program would improve the economic position of their members and constituents by providing additional marketing options. They further stated that the proposal was a positive step towards improving the voice of producers in their marketing efforts.

COMMENTS OPPOSING THE PROPOSAL

Of the comments opposing the proposal, approximately 1,800 were received from the National Farms Organization and their members. These comments opposed the proposal on the basis that: (1) USDA/CCC was proposing to delegate its loan function to cooperatives, and (2) nonmembers of cooperatives would be discriminated against because they would be required to become members of the cooperatives to participate in the price support program. Neither contention is valid.

Commodity Credit Corporation does not propose to delegate any of its loan functions to cooperatives. A grain cooperative that meets the eligibility requirements for participation in the program may be approved by Commodity Credit Corporation to obtain loans on or sell commodities on behalf of its members.

Producers may also obtain price support at the county ASCS offices. The rule does not discriminate against nonmembers of cooperatives because all producers have the option of participating in authorized price support programs as an individual or marketing through a cooperative. The rule does not require that a producer become a member of a cooperative before he can participate individually in a price support program.

Other commenters opposed the proposal for reasons which may be grouped into the following four main categories: (1) Discrimination, (2) Monopoly, (3) Unlawful action, and (4) Unfair tax advantage. Each of these will be discussed separately below:

(1) *Discrimination.* Some commenters stated that the proposal would discriminate against private elevators because it would not permit them to obtain CCC price support loans on commodities acquired from producers, as would be the case for approved cooperatives.

Only those cooperatives which meet the eligibility requirements established by CCC are permitted to obtain price support loans on behalf of their members on commodities delivered to them for marketing. An eligible producer is not required to market his commodity through the cooperative in order to obtain price support. He may obtain price support individually through the county ASCS office or he may obtain price support through a cooperative marketing association. A participating cooperative is required to distribute loan advances and pool sale proceeds (profits realized from marketing commodities delivered by members) to the members who delivered the commodity. The member delivering the commodity to the cooperative maintains an equity interest in the proceeds from the sale of that commodity. Conversely, when a producer sells his commodity to a private elevator, title and all interest in the commodity is transferred by the sale to inure to the benefit of the elevator and not the producers. Accordingly, to provide price support to an elevator for commodities it purchased from producers would benefit the elevator rather than the producer and would be inconsistent with the intent of Congress in enacting statutes under which price support is administered.

Some commenters stated that the proposed rule would give grain marketing cooperatives an unfair advantage in that they would have access to a free of cost inventory for merchandising or processing. This objection was rejected because, except for a short-term increase in cash flow, the proposed action provides little relief from the basic inventory financing requirements of cooperatives. These needs must still be met by the banks for cooperatives or through other lending arrangements. Extending the program will provide little relief from the inventory financing requirments of regional cooperatives, the primary organization expected to use the expanded loan program. These needs must still be met by the banks for cooperatives or other lending institutions. There is little or no likelihood that the expanded program will be a major source of working capital for cooperatives. Moreover, interest rates for CCC loans are not lower than commercial rates to an extent that would give the cooperative any significant market advantage. In any event, any marginal financial advantages accruing to cooperatives would be passed on to farmer members.

(2) *Monopoly.* Some commenters stated that the proposal would give grain marketing cooperatives control of a sufficient quantity of grain to enable them to acquire a monopoly on the supply of grain. These comments are not economically valid. In that regard, it is not expected that the combined volume of rye placed under CCC price support loan by cooperatives on behalf of their members would greatly exceed that which would be placed under loan by such farmers in the absence of the proposed action. Moreover, grain cooperatives are expected to put only about 5 percent of total U.S. rye sales under loan during the next five years. The proposed action, therefore, will give cooperatives access to more rye than they now have and could not result in their acquistion of sufficient stocks to acquire a monopoly.

Other commenters opposed the proposal on the basis that it would tend to favor cooperatives with an unfair competitive advantage. Given the limited financial advantages to cooperatives and their projected 5 percent participation in rye over the next five years, it is not expected that the expanded program will have any significant affect on competition, nor will the marginal financial advantage of the program give participating cooperatives a significant competitive edge over local, regional or multinational private grain firms.

(3) *Unlawful action.* While this Department has for many years made price support available to producers through approved cooperative marketing associations on such commodities as cotton, peanuts, rice, and tobacco, some commenters contend that the proposed action is unlawful. The rationale for such contention is that since the cooperative is not itself a "producer", it may not receive price support. This contention misses the point. The regulation is not premised on the extension of price support to a cooperative for the benefit of the cooperative rather than its producer-members. Under the proposal, price support will be made to producers collectively through their cooperatives, for the benefit of the individual producers. The proposal is merely, therefore, an alternative method for carrying out the intent of the statutes under which price support must be made available for rye.

Cited by these commenters as support for their contention that the proposal is unlawful in the case of *Tennessee Burley Tobacco Growers' Association* v. *Commodity Credit Corporation*, 350 F. 2d 34 (6th Cir. 1965), cert. denied, 383 U.S. 907 (1966). The Court in this case did not consider the question whether a cooperative approved by CCC could, under the price support statutes, receive price support on behalf of its producer-members. The legality of the long standing practice followed by this Department of making price support available to producers through cooperative marketing associations was undisturbed by the decision in this case. Cooperatives have been utilized by CCC for making price support available to producers for nearly 40 years. During this period numerous changes have been made in price support legislation by the Congress which has left undisturbed the administrative practice in question, although it has been fully familiar with the process. In fact, utilization of cooperatives has expressly been recognized and sanctioned by the Congress. For example, when appropriating funds to carry out this Department's functions and programs for the 1960 fiscal year, Congress, in the 1960 appropriation act (Pub. L. 86-80, 73 Stat. 167, 178), referring to a $50,000-limitation on the amount of price support which could be extended through loans, purchases, or purchase agreements, stated: (3) that in the case of any loan to, or purchase from, a cooperative marketing organization, * * * such limitation shall not apply to the amount of price support received by the cooperative marketing organization, or other persons, but the amount of price support made available to any person through such cooperative marketing organization or other persons shall be included in determining the amount of price support received by such person for purposes of such limitation * * *"

(4) *Tax Advantage.* Certain commenters contended that cooperatives already have a tax advantage and that to permit them to participate in price support would further enhance this advantage. Cooperatives do not operate as business entities whose primary purpose is profit and return on investment. Therefore, all sales proceeds, less costs of doing business, are returned to its members. The proposal will have no effect on the present tax status of cooperatives.

All comments received have been considered in connection with this final rule. After giving careful consideration to the comments, it has been determined that the arguments opposing the proposal were not valid reasons for not expanding the list of commodities.

FINAL RULE

Accordingly, 7 CFR 1421.335 of the 1970 and Subsequent Crops Rye Loan and Purchase Program is hereby amended as follows:

§ 1421.335 Purpose.

This supplement contains program provisions which, together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1976 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1970 and subsequent crops of rye.

NOTE.—It is hereby certified that the economic effects of this action have been carefully evaluated in accordance with Executive Order 11821 and OMB Circular A-107

Signed at Washington, D.C., on August 2, 1977.

PART 1425—COOPERATIVE MARKETING ASSOCIATIONS

Subpart—Eligibility Requirements for Price Support

COOPERATIVES WHICH MAY PARTICIPATE

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: This rule amends the regulations which set forth the eligibility requirements which approved cooperative marketing associations must meet to obtain price support on behalf of their members. Previous regulations limited the commodities on which cooperatives may participate in authorized price support programs to cotton, rice, honey and soybeans. This amendment will add barley, corn, oats, rye, sorghum and wheat to the list of commodities on which approved cooperatives may obtain price support loans on behalf of their members. The amendment is intended to increase the marketing options of wheat and feed grain producers.

EFFECTIVE DATE: August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Charlie B. Robbins, (ASCS), 202-447-4634, P.O. Box 2415, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: On Tuesday, April 12, 1977, a notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 19149) announcing that the Secretary of Agriculture was considering amending 7 CFR Part 1425, "Cooperative Marketing Associations, Eligibility Requirements for Price Support" to expand the list of commodities on which approved cooperative marketing associations may participate in authorized price support programs to include barley, corn, oats, rye, sorghum and wheat in order to afford producers of these commodities the same marketing tool as is currently available to producers of certain other commodities. Comments were solicited on the proposal and interested persons were given thirty (30) days to express their views. To afford additional time for comment, the original comment period was extended an additional fifteen (15) days by a notice published in the FEDERAL REGISTER on May 10, 1977 (42 FR 23613).

DISCUSSION OF MAJOR COMMENTS

This Department received nearly 5,000 comments. Of these, about 1900 favored the proposal and about 2700 opposed it. The major issues raised by the comments received are discussed below.

COMMENTS SUPPORTING THE PROPOSAL

The comments supporting the proposal came from individuals and a wide range of State and National organizations and elected representatives in Congress. Individual producers indicated that the proposed action would provide use of a marketing tool that would give them additional marketing options. Further, they stated that these options would create more competition and directly benefit individual producers as well as independent grain dealers by providing access to specified volume units of grain. Cooperative managers indicated that the proposal would provide a more orderly marketing system that would release grains at the time they are needed to satisfy domestic and export demand, which would in turn benefit all farmers including those that did not participate in a pool of commodities on which a cooperative would participate in price support.

The State and National Organizations submitting comments favoring the proposal include commodity groups, State Cooperative Councils, and National Cooperative Organizations. Also, several State governors and Members of Congress supported this action. These organizations and Members of Congress stated that an expanded program would improve the economic position of their members and constitutents by providing additional marketing options. They further stated that the proposal was a positive step towards improving the voice of producers in their marketing efforts.

COMMENTS OPPOSING THE PROPOSAL

Of the comments opposing the proposal, approximately 1,800 were received from the National Farmers Organization and their members. These comments opposed the proposal on the bases that: (1) USDA/CCC was proposing to delegate its loan function to cooperatives, and (2) nonmembers of cooperatives would be discriminated against because they would be required to become members of the cooperatives to participate in the price support program. Neither contention is valid.

Commodity Credit Corporation does not propose to delegate any of its loan functions to cooperatives. A grain cooperative that meets the eligibility requirements for participation in the program may be approved by Commodity Credit Corporation to obtain loans on or sell commodities on behalf of its members. Producers may also obtain price support at the county ASCS offices. The rule does not discriminate against nonmembers of cooperatives because all producers have the option of participating in authorized price support programs as individuals or marketing through a cooperative. The rule does not require that a producer become a member of a cooperative before he can participate individually in a price support program.

Other commenters opposed the proposal for reasons which may be grouped into the following four main categories: (1) Discrimination, (2) Monopoly, (3) Unlawful action, and (4) Unfair tax advantage. Each of these will be discussed separately below.

(1) *Discrimination.* Some commenters stated that the proposal would discriminate against private elevators beause it would not permit them to obtain CCC price suppor loans on commodities acquired from producers, as would be the case for approved cooperatives.

Only those cooperatives which meet the eligibility requirements established by CCC are permitted to obtain price support loans on behalf of their members on commodities delivered to them for marketing. An eligible producer is not required to market his commodity through the cooperative in order to obtain price support. He may obtain price support individually through the county ASCS office or he may obtain price support through a cooperative marketing association. A participating cooperative is required to distribute loan advances and pool sale proceeds (profits realized from marketing commodities delivered by members) to the members who delivered the commodity. The member delivering the commodity to the cooperative maintains an equity interest in the proceeds from the sale of that commodity. Conversely, when a producer sells his commodity to a private elevator, title and all interest in the commodity its transferred by the sale to the elevator. All profits realized from the sale of the commodity inure to the benefit of the elevator and not the producers. Accordingly, to provide price support to an elevator for commodities it purchased from producers would benefit the elevator rather than the producers and would be inconsistent with the intent of Congress in enacting statutes under which price support is administered.

Some commenters stated that the proposed rule would give grain marketing cooperatives an unfair advantage in that they would have access to a free of cost inventory for merchandising or processing. This objection was rejected because, except for a short-term increase in cash flow, the proposed action provides little relief from the basic inventory financing requirements of cooperatives. These needs must still be met by the banks for cooperatives or through other lending arrangements. Extending the program will provide little relief from the inventory financing requirements of regional cooperatives, the primary organization expected to use the expanded loan program. These needs must still be met by the banks for cooperatives or other lending institutions. There is little or no likelihood that the expanded program will be a major source of working capital for cooperatives. Moreover, interest rates for CCC loans are not lower than commercial rates to an extent that would give the cooperative any significant market advantage. In any event, any marginal financial advantages accruing to cooperatives would be passed on to farmer members.

(2) *Monopoly.* Some commenters stated that the proposal would give grain marketing cooperatives control of a sufficient quantity of grain to enable them to acquire a monopoly on the supply of grain. These comments are not economically valid. In that regard, it is not expected that the combined volume of wheat and feed grains placed under CCC price support loan by cooperatives on behalf of their members will greatly exceed that which would be placed under loan by such farmers in the absence of the proposed action. Moreover, grain cooperatives are expected to put only about six percent of total U.S. grain sales under loan during the next five years. The proposed action, therefore, will not give cooperatives access to more grain than they now have and could not result in their acquisition of sufficient stocks to acquire a monopoly.

Other commenters opposed the proposal on the basis that it would tend to favor cooperatives with an unfair competitive advantage. Given the limited financial advantage to cooperatives and their projected six percent participation in wheat and feed grains over the next five years, it is not expected that the expanded program will have any significant effect on competition, nor will the marginal financial advantage of the program give participating cooperatives a significant competitive edge over local, regional or multi-national private grain firms.

(3) *Unlawful action.* While this Department has for many years made price support available to producers through approved cooperative marketing associations on such commodities as cotton, peanuts, rice, and tobacco, some commenters contend that the proposed action is unlawful. The rationale for such contention is that since the cooperative is not itself a "producer", it may not receive price support. This contention misses the point. The regulation is not premised on the extension of price support to a cooperative for the benefit of the cooperative. Under the proposal, price support will be made to producers collectively through their cooperatives, for the benefit of the individual producers. The proposal is merely, therefore, an alternative method for carrying out the intent of the statutes under which price support must be made available for wheat and feed grains.

Frequently cited by these commenters as support for their contention that the proposal is unlawful is the case of *Tennessee Burley Tobacco Growers' Association* v. *Commodity Credit Corporation*, 350 F. 2d 34 (6th Cir. 1965), cert denied, 383 U.S. 907 (1966). The court in this case did not consider the question whether a cooperative approved by CCC could, under the price support statutes, receive price support on behalf of its producer-members. The legality of the long standing practice followed by this Department of making price support available to producers through cooperative marketing associations was undisturbed by the decision in this case. Cooperatives have been utilized by CCC for making price support available to producers for nearly 40 years. During this period numerous changes have been made in price support legislation by the Congress which has left undisturbed the administrative practice in question, although it has been fully familiar with the process. In fact, utilization of cooperatives has expressly been recognized and sanctioned by the Congress. For example, when appropriating funds to carry out this Department's functions and programs for the 1960 fiscal year, Congress, in the 1960 appropriation act (Pub. L. 86–80, 73 Stat. 167, 178), referring to a $50,000 limitation on the amount of price support which could be extended through loans, purchases, or purchase agreements, stated: "(3) that in the case of any loan to, or purchase from, a cooperative marketing organization, * * * such limitation shall not apply to the amount of price support received by the cooperative marketing organization or other persons shall be included in determining the amount of price support made available to any person through such cooperative marketing organization or other persons shall be included in determining the amount of price support received by such person for purposes of such limitation * * *"

(4) Tax advantage. Certain commenters contended that cooperatives already have a tax advantage and that to permit them to participate in price support would further enhance this advantage. Cooperatives do not operate as business entities whose primary purpose is profit and return on investment. Therefore, all sales proceeds, less costs of doing business, are returned to its members. The proposal will have no effect on the present tax status of cooperatives.

All comments received have been considered in connection with this final rule. After giving careful consideration to those comments, it has been determined that the arguments opposing the proposal were not valid reasons for not expanding the list of commodities.

FINAL RULE

Accordingly, 7 CFR Part 1425 is amended as follows:

1. The table appearing in paragraph (a) of § 1425.3, which contains a list of commodities and final dates for submission by cooperatives marketing associations of applications for approval to participate in authorized price support programs on behalf of their members is revised to read as follows:

§ 1425.3 Application.

(a) * * *

Commodity:	*Date*
Barley	June 1.[1]
Corn	Oct. 1.
Cotton	Aug. 1.
Honey	July 1.[1]
Oats	June 1.[1]
Rice	Aug. 1.
Rye	June 1.[1]
Sorghum	Oct. 1.
Soybeans	Sept. 1.
Wheat	June 1.[1]

[1] Cooperatives submitting applications for approval to participate in 1977 crop price support programs must do so by Oct. 1, 1977.

* * * * *

2. The two tables appearing in paragraph (b) of § 1425.6 which contain a list of commodities, units and amount per unit are revised to read as follows:

§ 1425.6 Financial condition.

* * * * *

(b) * * *

Commodity	Unit	Amount per unit
Barley	Bushel	$0.10
Corn	do	.10
Cotton	Bale	5.00
Honey	Hundredweight	1.00
Oats	Bushel	.10
Rice	Hundredweight	.40
Rye	Bushel	.10
Sorghum	Hundredweight	.15
Soybeans	Bushel	.30
Wheat	do	.10

* * * * *

Commodity	Unit	Amount per unit
Barley	Bushel	$0.05
Corn	do	.05
Cotton	Bale	2.50
Honey	Hundredweight	.50
Oats	Bushel	.05
Rice	Hundredweight	.20
Rye	Bushel	.05
Sorghum	Hundredweight	.10
Soybeans	Bushel	.15
Wheat	do	.05

* * * * *

NOTE.—It is hereby certified that the economic and inflationary effects of this action have been carefully evaluated in accordance with Executive Order 1821 and OMB Circular A–107.

Signed at Washington, D.C., on July 26, 1977.

RAY FITZGERALD,
Executive Vice President,
Commodity Credit Corporation.

Title 16—Commercial Practices

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

SUBCHAPTER B—CONSUMER PRODUCT SAFETY ACT REGULATIONS

PART 1201—SAFETY STANDARD FOR ARCHITECTURAL GLAZING MATERIALS

Stay for Faceted, Patinaed and Leaded Glass

AGENCY: Consumer Product Safety Commission.

ACTION: Stay of Standard for Architectural Glazing Materials as it applies to faceted, patinaed and leaded glass.

SUMMARY: The Commission stays the application of the Standard for Architectural Glazing Materials as it applies to patinaed, faceted and leaded glass used in "category I" products pending action by the Commission on a petition from the Stained Glass Association of America to amend the standard to exclude certain decorative glass. In the event that petition is denied, the stay in the effective date applies during judicial review of the standard currently pending before the U.S. Court of Appeals for the District of Columbia.

DATES: The stay for faceted, patinaed, and leaded glass in category I applications is effective immediately.

FOR FURTHER INFORMATION CONTACT:

Allen Brauninger, Division of Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207, 301–492–6629.

SUPPLEMENTARY INFORMATION: On January 6, 1977, the Consumer Product Safety Commission promulgated a standard for Architectural Glazing Materials designed to eliminate or reduce the unreasonable risks of injury associated with architectural glazing materials. (42 FR 1428). The standard is designed to ensure that the glazing materials used in certain architectural products either do not break when impacted with a specified energy, or break with such characteristics that they are less likely than other glazing materials to present an ureasonable risk of injury.

On March 4, 1977, the Stained Glass Association of America (SGAA), filed, in the U.S. Court of Appeals for the District of Columbia, a petition for review of the Standard. On April 20, 1977, SGAA petitioned the Commission under section 10 of the CPSA, 15 U.S.C. 2059, to amend the Standard to exempt decorative glass (petition CP 77–12). On June 21, 1977, the SGAA filed a motion with the Commission requesting that the Standard be stayed for the products that were described in SGAA's petition. SGAA pointed out that decorative glass of the types described in the petition cannot be manufactured to conform to the standard, are used for decorative and artistic purposes, and their use is extremely limited. SGAA also argued that the standard effectively eliminates all of its products from use in glazed panels and decorative glass as an art form. On June 30, the Commission, in view of the arguments raised by SGAA granted a limited stay of the standard for certain decorative glass. The stay is limited to faceted glass, patinaed glass and leaded glass used in "category I" products, 16 CFR 1201.2(a)(3). The Order of the Commission is set forth below:

IN THE MATTER OF STAINED GLASS ASSOCIATION OF AMERICA, ET AL., PETITIONERS V. CONSUMER PRODUCT SAFETY COMMISSION, RESPONDENTS

ORDER

On consideration of petitioner's motion for stay the Commission orders a stay in the Standard for Architectural Glazing Material as it applies to faceted, patinaed and leaded glass as set forth below pending action on the petition of SGAA to amend the Standard to exempt "decorative glass" CP 77–12, or if that petition is denied, pending judicial review of the Standard.

The Standard for Architectural Glazing Materials, 16 CFR 1201, is stayed as it applies to "Faceted Glass," "Patinaed Glass" and "Leaded Glass" as defined below, used in "Category I products" only, 16 CFR 1201.2(a)(3), where such glazing meets the following criteria:

1. The coloring, texturing, or other design qualities and materials of the panels are permanently irremovable without destroying the material.

2. The panel's primary purpose is decorative or artistic.

3. The panel is conspicuously colored or textured so as to be plainly visible and plainly identifiable as aesthetic or decorative rather than functional (other than for the purpose of admitting or controlling admission of light components or heat and cold).

4. The panel is divided into segments by conspicuous and plainly visible lines.

The definitions set forth below shall apply to the glazing material for which a stay is granted:

Faceted Glass means glass made up of pieces of slab dalle imbedded in a matrix of concrete or epoxy.

Patinaed Glass means glass made by creating a design on a piece of glass by a process in which various chemical coatings are fused by firing in such manner that the design is permanently integrated into the glass.

Leaded Glass means a decorative composite glazing material made of individual pieces of glass whose circumference is enclosed by lengths of durable metal such as lead or zinc and the pieces of glass are completely held together and supported by such metal.

Dated June 30, 1977

For the Commission.

RICHARD E. RAPPS,
Secretary, Consumer
Product Safety Commission.

Dated: August 3, 1977.

SADYE E. DUNN,
Deputy Secretary, Consumer
Product Safety Commission.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33–5847; 34–13819; 35–20122; 39–477; IC–9877; IA–603]

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

Miscellaneous Amendments

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: These rule amendments update information and correct certain organization designations.

EFFECTIVE DATE: August 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles A. Moore, Records and Privacy Act Officer, Securities and Exchange Commission, Washington, D.C. 20549, 202–523–5550.

SUPPLEMENTARY INFORMATION: These amendments correct the address of the Los Angeles Regional Office, update the mailing address for Freedom of Information and Privacy Act requests, reflect current copying fees, and correct an omission of regional office addresses in 17 CFR 200.80(c)(1). Because these amendments involve matters relating to organization management and practices, the prior notice and publication procedure provisions of the Administrative Procedure Act, 5 U.S.C. 553, are not applicable.

Part 200, Chapter II, Title 17 of the Code of Federal Regulations is amended as follows:

Subpart D—Information and Requests

1. Section 200.80 of Subpart D is amended by revising paragraphs (c)(1), (c)(2), (d)(2), (d)(6)(ii) and (d)(9)(ii), as follows:

§ 200.80 Commission records and information.

* * * * *

(c)(1) *Public reference facilities.* The Commission has a specially staffed and equipped public reference room located at 1100 L Street, NW., Washington, D.C. (202–523–5360) and public reference facilities in its regional offices. Coin-operated machines, which are available to requesters on a do-it-yourself basis, can be used to make immediate copies up to 8½ x 14 inches in size of materials that are available for inspection in the Washington, D.C., New York City, Chicago and Los Angeles offices.

(i) The public reference rooms in Washington, New York, Chicago and Los Angeles have available for public inspection all of the publicly-available records of the Commission as described in paragraph (a) of this section.

(ii) All other regional offices of the Commission have available for public examination the materials set forth in paragraph (a)(2) of this section, as well as copies of registration statements and recent annual reports filed pursuant to the Securities Exchange Act of companies having their principal offices in their respective regions in microform; and paper copies of active broker-dealer and investment adviser applications originating in their respective regions; and paper copies of Regulation A (17 CFR 200.251 et seq.) notifications filed in their respective regions. Certain of the materials described in paragraph (a)(1) of this section may also be available at particular regional offices.

The addresses of the Commission's regional offices are:

Atlanta Regional Office, 1375 Peachtree Street, NE, Suite 788, Atlanta, Georgia 30309, (404–881–4768). Office hours—9 a.m. to 5:30 p.m. e.s.t.

Boston Regional Office, 150 Causeway Street, Boston, Massachusetts 02114, (617–223–2721). Office hours—9 a.m. to 5:30 p.m. e.s.t.

Chicago Regional Office, Everett McKinley Dirksen Building, 210 South Dearborn Street, Room 1204, Chicago, Illinois 60604, (312–253–7390). Office hours—8:45 a.m. to 5:15 p.m. c.s.t.

Denver Regional Office, Two Park Central, Room 640, 1515 Arapaho Street, Denver, Colorado 80202, (303–837–2071). Office hours—8 a.m. to 4:30 p.m. m.s.t.

Fort Worth Regional Office, 503 U.S. Courthouse, 10th and Lamar Streets, Fort Worth, Texas 76102, (817–334–3393). Office hours—8:30 a.m. to 5 p.m. c.s.t.

Los Angeles Regional Office, 10960 Wilshire Boulevard, Suite 1710, Los Angeles, California 90024, (213–473–4511). Office hours—8 a.m. to 4:30 p.m. p.s.t.

New York Regional Office, 26 Federal Plaza, New York, New York 10007, (212-264-1615) Office hours—9 a.m. to 5:30 p.m. e.s.t.
Seattle Regional Office, 3040 Federal Building, 915 Second Street, Seattle, Washington 98174, (206-442-7990). Office hours—8:30 a.m. to 5 p.m. p.s.t.
Washington Regional Office, Ballston Center Tower 3, 4015 Wilson Boulevard, Arlington, Virginia 22203, (703-557-8201). Office hours—9 a.m. to 5:30 p.m. e.s.t.

(2) *Public reference inquiries.* Inquiries concerning the nature and extent of records available at the Commission's public reference room in Washington or at its other public reference facilities may be made in person or by telephone. The addresses and telephone numbers of all Commission Regional Offices are set forth at paragraph (c) (1) of this section. Written inquiries may be addressed to the Securities and Exchange Commission, Public Reference Section, Washington, D.C. 20549, or to a particular regional office.

(d) • • •

(2) *Requests for copies of records.* Requests for copies of Commission records may be made either in person at the public reference room or by mail addressed to the Securities and Exchange Commission, Public Reference Section, Washington, D. C. 20549. Each request for information under the Freedom of Information Act should be clearly and prominently identified by a legend on the first page, such as "Freedom of Information Act Request," and addressed to the Freedom of Information Act Officer, Securities and Exchange Commission, Washington, D. C. 20549.

• • • • • •

(6) • • •

(ii) The application should be delivered to the Office of the Freedom of Information Act Officer, 1100 L Street, N.W., Washington, D.C., or sent by mail to the Freedom of Information Act Officer, Securities and Exchange Commission, Washington, D.C. 20549.

• • • • • •

(9) • • •

(ii) *Misdirected written requests.* The Commission cannot assure that a timely or satisfactory response will be given to written requests for inspection or copies of records that are directed to the Commission other than in the manner prescribed in paragraphs (d) (1) and (2) of this section. Any staff member who receives a written request for records should promptly forward the request to the Freedom of Information Act Officer. Misdirected requests for records will be considered to have been received for purposes of paragraph (d) of this section only when they have been actually received by the Freedom of Information Act Officer. The Commission will not entertain any appeal from an alleged denial or failure to comply with a misdirected request unless it is clearly shown that the request was in fact received by the Freedom of Information Act Officer.

• • • • • •

Subpart H—Regulations Pertaining to the Privacy of Individuals and Systems of Records Maintained by the Commission

2. Section 200.308 of Subpart H is amended by revising paragraphs (a) (2) and (b) (1) to read as follows:

§ 200.308 Appeal of initial adverse agency determination as to access or as to amendment or correction.

(a) • • •

(2) The application shall be delivered to the Securities and Exchange Commission, Privacy Act Officer, Room 6335, 1100 L Street, N.W., Washington, D.C. or mailed to the Privacy Act Officer, Securities and Exchange Commission, Washington, D.C. 20549.

• • • • • •

(b) • • •

(1) Such statement of disagreement shall be delivered to the Securities and Exchange Commission, Privacy Act Officer, Room 6335, 1100 L Street, NW., Washington, D.C. or mailed to the Privacy Act Officer, Securities and Exchange Commission, Washington, D.C. 20549, within 30 days after receipt by the individual of the Commission's order denying the amendment or correction. For good cause shown this period can be extended for a reasonable time.

• • • • • •

3. Section 200.309 of Subpart H is amended by revising the second sentence of paragraph (e) (2) to read as follows:

§ 200.309 General provisions.

• • • • • •

(e) • • •

(2) • • • Any staff member who receives a written request for information, access or amendment should promptly forward the request to the Privacy Act Officer. Misdirected requests for records will be considered to have been received by the Commission only when they have been actually received by the Privacy Act Officer in cases under § 200.308(a) (2). The Commission will not entertain any appeal from an alleged denial or failure to comply with a misdirected request unless it is clearly shown that the request was in fact received by the Privacy Act Officer.

4. Section 200.310 of Subpart H is amended by revising the fourth and fifth sentences to read as follows:

§ 200.310 Fees.

• • • Records will be copied onto 8½ x 14 inch pages at a cost of 10 cents per page. Copying machines are provided in the public reference room in the Commission's Washington, D.C., New York, Los Angeles and Chicago Offices, where the individual may make copies at a cost of 10 cents per page.

SHIRLEY E. HOLLIS,
Assistant Secretary

AUGUST 1, 1977.

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL POWER COMMISSION

SUBCHAPTERS A AND B—RULES AND REGULATIONS UNDER THE FEDERAL POWER ACT

[Docket No. RM77-18; Order No. 570]

CHANGE IN PROCEDURE CONCERNING APPLICATIONS UNDER PART I OF THE FEDERAL POWER ACT

AGENCY: Federal Power Commission

ACTION: Final rule.

SUMMARY: The Commission hereby amends specific sections of its rules and regulations in order to clarify the criteria used to determine when applications filed under Part I of the Federal Power Act should be set for formal, evidentiary hearing. The effect is to dispense with the cumbersome and rather confusing shortened procedure now used to process certain Part I applications, and to allow the Commission to act on these and all other Part I applications after any required public notice has been issued and opportunity for hearing has been afforded.

EFFECTIVE DATE: August 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Don Garber, Office of General Counsel, 202-275-4296.

SUPPLEMENTARY INFORMATION On April 29, 1977, the Commission issued a Notice of Proposed Rulemaking in this proceeding (42 FR 23160, May 6, 1977), wherein it proposed to amend specific sections of the rules and regulations in order to clarify the criteria used to determine when applications filed under Part I of the Federal Power Act should be set for formal, evidentiary hearing. No responses to the Commission's notice have been received.

As stated in the aforementioned notice, the reason for revising these sections is to prevent confusion and delay in processing certain applications[1] now required by the Commission's rules and regulations, unless the shortened procedure of § 1.32(b) [2] is requested, to be set for hearing. The effect of the proposed rulemaking would be to allow the Commission to act on these and all other Part I applications after any public notice has been issued and opportunity for hearing has been afforded. Proceedings in which substantial and relevant issues of fact are disputed would continue to involve full hearings before administrative law judges, with attendant cross-examination, briefing, and initial decision.

These amendments to the Commission's rules and regulations would apply to those applications currently pending before the Commission as well as all applications filed after the effective date of said amendments.

The Commission finds. (1) The notice and opportunity to participate in this rulemaking proceeding through the submission, in writing, of views, comments, and suggestions respecting the matter described above, is consistent and in accordance with the procedural requirements prescribed by 5 U.S.C. 553.

(2) In view of the purpose, intent, and effect of the amendments herein ordered, good cause exists for making them effective upon issuance of this order.

(3) It is appropriate and in the public interest in administering Part I of the Federal Power Act that the rules and regulations under the Federal Power Act be amended as herein provided.

The Commission, acting pursuant to the provisions of the Federal Power Act, as amended, particularly sections 308 and 309 (49 Stat. 858, 859; 16 U.S.C. 825g, 825h), orders:

PART 1—RULES OF PRACTICE AND PROCEDURE

(A) Paragraph (b) of § 1.32 in Part I, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations is revised to read as follows:

§ 1.32 Shortened procedures.

• • • • • •

(b) *Noncontested proceedings.* In any proceeding required by statute to be set for hearing, the Commission when it appears to be in the public interest and to be the interest of the parties to grant the relief or authority requested in the initial pleading, and to omit the intermediate decision procedure, may after a hearing during which no opposition or contest develops, forthwith dispose of the proceedings upon consideration of the pleadings and other evidence filed and incorporated in the record: *Provided,* (1) The applicant or initial pleader requests that the intermediate decision procedure be omitted and waives oral hearing and opportunity for filing exceptions to the decision of the Commission; and (2) no issue of substance is raised by any request to be heard, protest or petition filed subsequent to publication in the FEDERAL REGISTER of the notice of the filing of an initial pleading and notice or order fixing of hearing, which notice or order shall state that the Commission considers the proceeding a proper one for disposition under the provisions of this section and shall otherwise conform with the requirements of § 1.19. Requests for the procedure provided by this section may be contained in the initial pleading or subsequent request in writing to the Commission. The decision of the Commission in such proceeding after noncontested hearing, will be final, subject to reconsideration by the Commission upon application for rehearing as provided by statute.

[1] Applications for license authorizing construction of major projects, license for constructed major projects, renewal of licenses for major projects, and substantial alteration to licenses for major projects

[2] 18 CFR 1.32(b) (1976)

PART 3—ORGANIZATION; OPERATION; INFORMATION AND REQUESTS

(B) Paragraph (b) of § 3.114 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations is revised to read as follows:

§ 3.114 Licenses.

• • • • • •

(b) Applications under the Federal Power Act for license authorizing construction of major projects; for license for constructed major projects; and for renewal of licenses for major projects are processed in the manner stated in § 3.113.

• • • • • •

PART 4—LICENSES, PERMITS, AND DETERMINATION OF PROJECT COSTS

(C) Section 4.32 in Part 4, Subchapter B of Chapter I, Title 18 of the Code of Federal Regulations is revised to read as follows:

§ 4.32 Hearing on application.

A hearing upon an application may be ordered by the Commission, in its discretion, either upon its own motion or upon the motion of any party in interest. The hearing shall be limited to the issues specified by order or orders of the Commission.

PART 5—APPLICATION FOR AMENDMENT OF LICENSE

(D) Section 5.1 in Part 5, Subchapter B of Chapter I, Title 18 of the Code of Federal Regulations is revised to read as follows:

§ 5.1 Amendment of license.

Where a licensee desires to make a change in the physical features of the project or its boundary, and/or make an addition or betterment and/or abandonment or conversion, of such character as to constitute an alteration of the license, application for an amendment of the license shall be filed with Commission, fully describing the changes licensee desires to make. Furthermore, the provisions of § 2.81(a) of this chapter shall apply to all applications for amendment of license as defined therein. If it is determined that approval of the application for amendment of license would constitute an alteration of license pursuant to Section 6 of the Act, public notice of such application shall be given at least 30 days prior to action upon the application. The application for amendment of license shall be verified, shall conform to § 131.30 of this chapter and shall be filed in accordance with § 4.31 of this chapter.

PART 6—SURRENDER OR TERMINATION OF LICENSE

(E) Section 6.1 in Part 6, Subchapter B of Chapter I, Title 18 of the Code of Federal Regulations is revised to read as follows:

§ 6.1 Application for surrender.

Every application for surrender of a license shall state the reason therefor; and, except in the case of an application for surrender of a license for a minor project, or for a transmission line only, shall be executed by the licensee and filed in same form and manner as the application for license, and shall be accompanied by the license and all amendments thereof. Public notice of such application shall be given at least 30 days prior to action upon the application.

PART 16—PROCEDURES RELATING TO TAKEOVER AND RELICENSING OF LICENSED PROJECTS

§ 16.6 [Deleted]

(F) Paragraph (f) of § 16.6 in Part 16, Subchapter B of Chapter I, Title 18 of the Code of Federal Procedures is deleted.

(G) The amendments adopted herein shall be effective upon issuance of this order.

(H) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22915 Filed 8-8-77;8:45 am]

Title 20—Employees' Benefits

CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Reg. No. 16]

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Subpart L—Resources and Exclusions

EXCLUSION OF THE VALUE OF A HOME

AGENCY: Social Security Administration, HEW.

ACTION: Final rule.

SUMMARY: The rule provides that the entire value of a home shall be excluded in the counting of resources to determine an individual's eligibility for supplemental security income benefits. It is necessary to reflect section 1613(a)(1) of the Social Security Act (42 U.S.C. 1382b(a)(1)), as amended by section 5 of Pub. L. 94-569.

EFFECTIVE DATE: August 9, 1977.

ADDRESSES: Although this rule is being published as a final rule without a prior Notice of Proposed Rule Making, consideration will be given to any data, views, or arguments pertaining to the rule, which are submitted in writing to the Commissioner of Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Maryland 21203, on or before September 23, 1977.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 5131, 330 Independence Avenue SW., Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT:

Vera Schlosser, Office of Policy and Regulations, Office of Program Policy and Planning, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, 301–594–7332.

SUPPLEMENTARY INFORMATION: Section 1611(a) of the Social Security Act (42 U.S.C. 1382(a)) provides that, for an aged, blind, or disabled individual or spouse to be eligible for supplemental security income benefits, his or her resources may not exceed certain specified amounts. Section 1613(a)(1) of the Act (42 U.S.C. 1382b(a)(1)) formerly provided that when an individual's eligibility for supplemental security income benefits was determined, a home should be excluded to the extent that its value did not exceed the amount which the Secretary determined to be reasonable. However, section 1613(a)(1) of the Act was amended by section 5 of Pub. L. 94–569, enacted October 20, 1976, to exclude the total value of a home.

The present regulation (20 CFR 416.1212) excludes the home up to $25,000 ($35,000 in Alaska and Hawaii). In accordance with section 1613(a)(1) of the Act, as amended by section 5 of Pub. L. 94–569, § 416.1212 is being revised to provide that effective October 1976, the entire value of a home is excluded when determining whether the statutory resource limitation is exceeded.

Since this rule contains the same language as the Act, the Secretary finds that publication of a prior Notice of Proposed Rule Making would be impracticable and unnecessary (5. U.S.C. 553(b)(3)(B)). Although the Notice of Proposed Rule Making is being dispensed with, consideration will be given to any data, views, or arguments pertaining to this rule if submitted in writing to the Commissioner of Social Security.

As section 5 of Pub. L. 94–569, was effective October 1976, operating personnel have been alerted to this change and the need to process such cases under the newly enacted legislation. That action was necessary to insure prompt recognition and equitable handling of these cases, on an interim basis, pending publication of final regulations.

(Secs. 1102, 1613, and 1631 of the Social Security Act, as amended, 49 Stat. 647, as amended, 86 Stat. 1470, as amended, and 1475; 42 U.S.C. 1302, 1382b, and 1383.)

(Catalog of Federal Domestic Assistance Program No. 13.807, Supplemental Security Income Program.)

NOTE.—The Social Security Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: July 18, 1977.

J. B. CARDWELL,
Commissioner of Social Security.

Approved: August 2, 1977.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare.

Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is amended by revising paragraph (a) of § 416.1212 to read as follows:

§ 416.1212 Exclusion of the home.

(a)(1) Prior to October 1976, a home is excluded in determining the resources of an individual (and spouse, if any) to the extent its current market value does not exceed $25,000 ($35,000 in Alaska and Hawaii). Where the current market value of the home exceeds $25,000 ($35,000 in Alaska and Hawaii), only the excess is counted toward the resource limitation as defined in § 416.1205.

(2) Effective October 1976, the entire value of a home is excluded in determining the resources of an individual (and spouse, if any).

CHAPTER V—EMPLOYMENT AND TRAINING ADMINISTRATION, DEPARTMENT OF LABOR

PART 602—FEDERAL-STATE EMPLOYMENT SERVICE SYSTEM

Temporary Alien Labor Certification Program 1977 Adverse Effect Rates

AGENCY: Employment and Training Administration, Labor.

ACTION: Final rule.

SUMMARY: This rulemaking document contains the 1977 Adverse Effect Rates, that is, the minimum wage rates which the Department has determined must be offered and paid by the employers of temporary alien agricultural workers. The purpose of the adverse effect rates, and thus of this rule, is to prevent the employment of such aliens from having an adverse effect on the wages of U.S. workers who are similarly employed.

EFFECTIVE DATE: August 5, 1977.

FOR FURTHER INFORMATION CONTACT:

Aaron Bodin, Chief, Division of Labor Certifications, United States Employment Service, Room 8410, 601 D Street, NW., Washington, D.C. 20213, telephone 202–376–6295.

SUPPLEMENTARY INFORMATION: On April 1, 1977, at 42 FR 17486, the Employment and Training Administration published the 1977 Adverse Effect Rates as proposed rulemaking. On April 19, 1977, at 42 FR 20312, the 1977 Adverse Effect Rate for West Virginia, which had been inadvertently omitted from the April 1 document, was published as proposed rulemaking. Comments on all the proposed 1977 Adverse Effect Rates were due by May 2, 1977.

Only three comments were received on the proposed rulemaking. All three comments stated that the 1977 rates were too low. All three comments requested the Department to publish the methodology by which it arrived at the 1977 Adverse Effect Rates. The Department's methodology was the same as that used for determining the 1976 Adverse Effect Rates, which had been published in the FEDERAL REGISTER at 41 FR 25018 on June 22, 1976. The Department is re-publishing the methodology and the reasons therefor below for the convenience of the public:

METHODOLOGY FOR DETERMINING THE ADVERSE EFFECT RATE: REASONS FOR SELECTING THE METHODOLOGY

The following is reprinted in relevant part from the FEDERAL REGISTER issue of June 22, 1976, at 41 FR 25018:

Last year (1975) and since 1968, the prior year's adverse effect rate was adjusted by the percentage change in the United States Department of Agriculture (U.S.D.A.) hourly farm wage rate (without room or board). This data was published in the U.S.D.A. publication Farm Labor (Publication Code No. La 1). The data was expressed as a yearly average on a State by State basis.

In 1974, which was a transition year, U.S.D.A. began utilizing a different survey method, publishing average farm wage rates on a quarterly basis, and publishing rates expressed by method of pay and type of work performed. No annual data is published. Data is listed in a State by region format with the New England States not reported separately. In view of this new manner of expressing average wage data by U.S.D.A., it is necessary that the Department of Labor adjust its method of adjusting its "adverse effect" rates.

The movement of wage rates and not absolute wage rates are utilized to update the § 602.10b adverse effect rates for workers performing similar tasks, therefore, it was deemed desirable that the choice of what data to utilize from U.S.D.A. should coincide with the crop affected. In the States for which adverse effect rates are being published, temporary foreign agricultural workers are imported primarily for crop harvesting activities, e.g., to pick apples in the eastern seaboard States and to cut sugar cane in Florida. It is reasonable, therefore, to utilize the average wage rate that most closely coincides with the type of work performed by these workers. The category which closely resembles that task for which data is obtained by U.S.D.A. is Field and Livestock Workers.

Although, U.S.D.A. also obtains data based upon Piece-Rate methods of pay to farmworkers, this data was determined to be less desirable than the data utilized in view of the limited data available from some States, and the inclusion of Packing House Workers, Machine Operators and Supervisors in this category.

To determine the adverse effect rate for this year the Department of Labor sought, and obtained, average hourly wage rates for Field and Livestock Workers from U.S.D.A. for calendar years 1974 and 1975. This data is not published by U.S.D.A. However, the primary data, which is the basis for the statistics in Farm Labor, was utilized in responding to the Department of Labor's request. The U.S.D.A. response was as follows:

"The sample design for the Quarterly Agricultural Labor Survey is such that the valid wage rates for the individual states in New England cannot be produced. Because of the limited use of hired agricultural labor in New England and limited resources available to us, it was decided to treat New England as a single unit for sampling purposes. We have examined the results when calculated for individual states and find them too variable for release. Consequently, we can provide only the annual average rate for New England as a whole."

"NOTE.—For documentation of the methodology utilized in the Quarterly Agricultural Labor Survey, we suggest that the section on "Sources and Reliability of Estimates" as published on p. 2 of the enclosed Farm Labor release be used."

To obtain this year's (1976) adverse effect rate the prior year's rate was adjusted by the percentage change in the U.S.D.A. farm wage rate for Field and Livestock Workers between 1974 and 1975. For the individual New England States the prior year's adverse effect rates for each State was adjusted by the percentage change in all the New England States.

THIS YEAR'S COMMENTS

As noted above, all three of the comments received this year stated that the proposed 1977 Adverse Effect Rates were too low. They asserted that higher rates were necessary to prevent adverse effect with respect to American workers. One commenter suggested that the rate be set at the wage that would be paid if alien workers were excluded from the country. At the present time, the Department does not posses an economic model or the data by which such a hypothetical rate could be calculated.

Another commenter suggested that the following methodology be used to determine the adverse effect rate:

(1) Locate for each State the quarter during the previous year in which the greatest number of agricultural workers were employed. This number is set by the U.S. Department of Agriculture Statistical Reporting Service and it varies from State to State.

(2) Determine the consumer price index increase from the previous year.

(3) Multiply the increase by the average piece rate wage paid to these workers.

(4) This figure should be the adverse effect rate offered to U.S. workers prior to certifying alien workers.

The Department is giving consideration to the proposed methodology. At the present time, however, the Department has the following concerns regarding suggested methodology:

(a) The commenter made no showing that the present rate adversely affects U.S. workers;

(b) Except for the fact that the wage rate produced would probably be higher, the suggested methodology was not supported by reasons as to why it would succeed in assuring that U.S. workers would not be adversely affected;

(c) The Department does not presently have adequate data on average piece rates; and

(d) The commenter gave no reason for pegging the rate to the consumer price index.

Another commenter stated that the use of aliens in and of itself adversely affected U.S. workers. The Department would like to note, however, that the Immigration and Nationality Act, by which the labor certification program is authorized, allows for the admission of aliens for temporary agricultural labor. It does not seem probable, therefore, that Congress meant the Act to be administered in such a way as to preclude such admissions altogether.

One commenter noted that Social Security taxes do not have to be paid by alien workers or their employers. Thus, domestic workers doing the same work get less take-home pay, and employers incur less expense when they employ alien workers. The Department would like to note that domestic workers in the long run, benefit from belonging to the Social Security system. Nevertheless, the Department is taking a serious look at this matter with a view towards adverse effect rates in future years.

One commenter enclosed a theoretical analysis of the impact of the adverse effect rate. The Department found the analysis very interesting. The analysis, however, was based on many assumptions, including the following:

(1) A perfectly competitive labor market;

(2) Perfect knowledge of alternatives by U.S. workers;

(3) Perfect mobility of U.S. workers;

(4) Employers will not pay wages above what is minimally necessary to meet their labor demands;

(5) Offered employment of equal desirability, workers will choose jobs which offer the highest wages;

(6) The short run quantity of capital and other nonhuman resources remain constant; and

(7) Consumer tastes, technology, price of working conditions, wages in alternate occupations, labor force participation rates, and population remain constant.

The Department believes that the list of assumptions above reveals the enormity of the problem in using such an economic model to construct an adverse effect rate for various crops and for various areas of the country. To do so would require a great deal of time, personnel and money. The Department must construct its adverse effect rate in a way which is at the same time (1) fair, (2) reasonable, (3) cost effective, and (4) geared as much as possible to the reality of agricultural crops, areas and existing wage factors.

The Department believes that its present methodology meets these criteria and, as much as any alternative suggested by the commenters, protects the wages of U.S. workers from being adversely affected by alien labor. The Department is making the regulation effective immediately upon publication because it finds that, in view of the imminence of the harvest season, it is in the public interest to protect the wage rates of American workers by having the regulation in effect at the start of the harvest season. The Department also finds that it is both unnecessary and impracticable to delay the effective date in light of the fact that growers and workers have been on notice with respect to this year's wage rates since April 1, 1977, the date of proposed rulemaking.

Consequently, the Department is publishing as final rulemaking the 1977 Adverse Effect Rates which it proposed. This final rulemaking document was prepared under the direction and control of William B. Lewis, Administrator, United States Employment Service. Accordingly, 20 CFR 602.10b Wage rates, paragraph (a)(1), is revised to read as follows:

§ 602.10b Wage rates.

(a) (1) Except as otherwise provided in this section, the hourly wage rates set forth below shall be offered and paid to agricultural workers. The Department has found that, unless these wage rates are offered and paid, the wage rates of similarly employed U.S. workers will be adversely affected.

State:	*Rate*
Connecticut	$2.75
Maine	2.84
Massachusetts	2.70
New Hampshire	2.97
Rhode Island	2.72
Vermont	2.93
New York	2.70
Maryland	2.43
Virginia	2.63
Florida (sugar cane only)	3.23
West Virginia	2.74

* * * * *

Signed at Washington, D.C., this 15th day of July 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

[FR Doc 77–22792 Filed 8–8–77;8:45 am]

Title 24—Housing and Urban Development

SUBTITLE A—OFFICE OF THE SECRETARY, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R–77–457]

PART 25—MORTGAGEE REVIEW BOARD

Composition of the Board

AGENCY: Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: The Secretary is revising membership of the Mortgagee Review Board responsible for withdrawing HUD approval from Mortgagees. A change is needed in part to improve the effectiveness of the Board and in part to reflect the Department's desire to be more responsive to public considerations.

EFFECTIVE DATE: August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Peter E. Novick, Rm. 9224, Department of Housing and Urban Development, 451 7th Street S.W., Washington, D.C. 20410, 202–755–6740.

SUPPLEMENTARY INFORMATION: In Part 25, published September 18, 1975 (40 FR 43026), the Secretary established a Mortgagee Review Board and gave it all powers necessary and incident to withdrawing approval from mortgagees

engaged in mortgage insurance under the National Housing Act, 12 U.S.C. 1701. An amendment to this Part, published June 14, 1977 (42 FR 30361), listed as Board members: The Assistant Secretary for Housing—Federal Housing Commissioner, Chairman; the General Counsel; and the Assistant Secretary for Administration, or their designees. The Inspector General, or designee, serves as a nonvoting advisor to the Board. This amendment to Part 25:

1. Includes as a Board member the Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Protection.

Because this revision involves the Department's internal management, comment and public procedure are unnecessary under 5 U.S.C. 553 and 24 CFR Part 10. Moreover, good cause exists for making the Amendment effective upon publication.

Findings of inapplicability with respect to Environment and Inflation are not required.

Accordingly, 24 CFR Part 25.2 is amended to read as follows:

§ 25.2 Composition of the Board.

(a) Members. The Board consists of the following members: The Assistant Secretary for Housing—Federal Housing Commissioner, Chairman; the General Counsel; the Assistant Secretary for Administration; the Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Protection, or their designees

(Sec 7(d) Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).)

Issued at Washington, D.C., July 29, 1977.

PATRICIA ROBERTS HARRIS,
Secretary of Housing and Urban Development.

[FR Doc.77-22958 Filed 8-8-77;8:45 am]

Title 25—Indians

CHAPTER I—BUREAU OF INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

SUBCHAPTER M—FORESTRY

PART 141—GENERAL FOREST REGULATIONS

Trespass

AUGUST 2, 1977.

AGENCY: Bureau of Indian Affairs, Department of the Interior.

ACTION Final rulemaking.

SUMMARY: This amendment permits Bureau officials to accept proposed settlements for damages to Indian trust property when such settlements are less than the value claimed. It results in an efficiency measure by implementing field authority and lessening correspondence to the Commissioner of Indian Affairs for concurrence.

DATE Effective date August 9, 1977.

ADDRESS None.

FOR FURTHER INFORMATION CONTACT

Mr. Gregory J. Stevens, 1951 Constitution Avenue, NW., Washington, D.C. 20245. Telephone 202–343–6067.

SUPPLEMENTARY INFORMATION: The primary author of this document is Gregory J. Stevens, Forester, Bureau of Indian Affairs and can be reached at 202–343–6067.

The authority for the Commissioner of Indian Affairs to issue these regulations is contained in 230 DM 1 and 2 (5 U.S.C. 301) and Sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9).

The revision was proposed pursuant to the authority contained in section 6 of the Act of June 18, 1934 (48 Stat. 986; 25 U.S.C. 466). Beginning on page 50299 of the November 15, 1976, FEDERAL REGISTER (41 FR 50299), there was published a notice of proposed rulemaking to revise Part 141 of Subchapter M, Chapter I, Title 25 of the Code of Federal Regulations. The public was given until December 15, 1976, to submit written comments, suggestions, or objections regarding the proposed revision. Since there have been no comments received, the revision as proposed is hereby adopted.

The Solicitor's Regulations were revised effective January 19, 1977. Regulation No. 28 is now Solicitor's Regulations Manual I.4.1. The change is reflected in the final rule.

Subchapter M, of Chapter I of Title 25 of the Code of Federal Regulations is hereby revised to read as published in FEDERAL REGISTER, Vol. 41, No. 221, Page 50299, Monday, November 15, 1976, a copy of which is attached.

These regulations shall become effective on August 9, 1977, as published herein and shall remain in effect until they are amended, revoked or superseded.

RAYMOND V. BUTLER,
Acting Deputy, Commissioner of Indian Affairs.

Section 141.22 is revised as follows:

§ 141.22 Trespass.

(a) Federal Statutes provide that:

(1) Willful and unauthorized setting fire to timber, underbrush, or grass or other inflammable material upon any Indian reservation or lands belonging to or occupied by any tribe or group of Indians under authority of the United States, or upon any Indian allotment while the title to the same shall be held in trust by the Government, or while the same shall remain inalienable by the allottee without the consent of the United States, is punishable by fine of not more than $5,000 or imprisonment of not more than 5 years, or both.

(2) Whoever, having kindled or caused to be kindled, a fire in or near any forest timber, or other inflammable material on such lands, leaves said fire without totally extinguishing it, or permits such fire to spread beyond his control or leaves such fire unattended shall be fined not more than $500 or imprisoned not more than 6 months, or both.

(3) The unlawful cutting or wanton injury or destruction of trees standing, growing, or being upon such lands is punishable by fine of not more than $1,000 or imprisonment of not more than one year, or both.

(4) Section 1 of the Act of June 25, 1948 (62 Stat. 787 (18 U.S.C. 1853)), provides penalties for the unlawful cutting of timber on Government lands and on Indian lands under Government supervision.

(b) The Secretary may mark and forbid the removal of timber from restricted or trust Indian lands or direct its removal to a point of safekeeping when he has reason to believe that such timber was unlawfully cut. Any such timber that can be positively identified as Indian trust property should be sold to prevent its deterioration. When any timber cut in trespass is found to be removed to land not under Government supervision, the owner of the land should be notified that such timber is Indian trust property and any further action should be upon advice of the Office of the Solicitor of the Department of the Interior. Any timber sold under this § 141.22 may be disposed of under the provisions of this Part 141 insofar as they are applicable. The Secretary may accept payment of damages in full in the settlement of civil trespass cases without resort to court action. The Secretary may also accept a recommended settlement per Solicitor's Regulations Manual I.4.1 when exercised in accordance with regulations contained in 344 DM 3.

All other matters relating to the collection of debts under this section will be in accordance with Departmental Manual, Part 344.

[FR Doc.77-22999 Filed 8-8-77;8:45 am]

Title 29—Labor

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1952—APPROVED STATE PLANS FOR ENFORCEMENT OF STATE STANDARDS

Approval of Supplements to Virgin Islands State Plan

AGENCY: Occupational Safety and Health Administration.

ACTION: Final rule.

SUMMARY: Three new paragraphs are added to 29 CFR 1952.254 to codify the approval of developmental steps under the Virgin Islands State Plan. The State's public information program, remedial legislative amendments, and field operations manual are approved.

EFFECTIVE DATE: August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Mabel Stanton, Project Officer, Department of Labor, Occupational Safety and Health Administration, Room N-3112, 200 Constitution Avenue, Washington, D.C. 20210.

A copy of this supplement, along with the approved plan, may be inspected and copied during normal business hours

at the following locations: Technical Data Center, Occupational Safety and Health Administration, Room N-3620, 200 Constitution Avenue NW., Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, Room 3445, 1515 Broadway, New York, N.Y. 10036; Department of Labor, Occupational Safety and Health Division, Building No. 1, Second Floor, Government Complex, Room 207, Lagoon Street, Frederiksted, St. Croix, Virgin Islands 00840.

SUPPLEMENTARY INFORMATION: Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter referred to as the Act), for review of changes and progress in the development and implementation of State plans which have been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On September 11, 1973, notice was published in the FEDERAL REGISTER (38 FR 24896), of the approval of the Virgin Islands Plan and adoption of Subpart S of Part 1952 containing the decision and describing the plan. The Virgin Islands has submitted supplements to the plan involving developmental changes. (See Subpart B, 29 CFR Part 1953.)

DESCRIPTION OF THE SUPPLEMENTS

(1) Public Information Program: The Virgin Islands public information program contains provisions for radio and television coverage, as well as newspaper coverage, and distribution of standards through the Chamber of Commerce, the Virgin Islands Division of Business and Licenses, and the Administrator's Office.

(2) Remedial Legislative Amendments: Act No. 3852, 24 VIC, Chapter 2, Section 1, deletes reference to "political subdivisions," since there are no political subdivisions within the Territory, and substitutes the term "department."

Section 2 adds a new section equivalent to the Federal Act on "Variations, Tolerances and Exemptions" which will provide the authority for exemptions for national defense.

Section 3 amends the Virgin Islands legislation by adding a section on "Disclosure of Confidential Trade Secrets," which was referenced in Section 43, but had not been enacted. It mirrors the Federal statute on the subject.

(3) Field Operations Manual: The Virgin Islands Field Operations Manual is modeled after the Federal Field Operations Manual.

PUBLIC PARTICIPATION

Under § 1953.2(c) of this chapter the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), may prescribe alternative procedures to expedite the review process or for any other good cause which may be consistent with applicable law. The Assistant Secretary finds that the Virgin Islands plan supplements described above are consistent with commitments contained in the approved plan, which were previously made available for public comment. Accordingly, it is found that further public comment is unnecessary.

DECISION

After careful consideration, the Virgin Islands plan supplements described in 2 (a), (b), and (c) above are hereby approved under Subpart B of Part 1953. This decision incorporates the requirements of the Act and implementing regulations applicable to State plans generally. In addition, Subpart S of 29 CFR Part 1953 is hereby amended to reflect these approved plan changes. Accordingly, § 1952.254 of Subpart S is hereby amended as follows:

§ 1952.254 Completed developmental steps.

* * * * *

(f) The Virgin Islands has developed and implemented an effective Public Information Program.

(g) The Virgin Islands amended its legislation to (i) delete reference to "political subdivisions" and substitute the term "department," and (ii) to add new sections (1) "Variations, Tolerances and Exemptions," and (2) "Disclosure of Confidential Trade Secrets."

(h) The Virgin Islands' Field Operations Manual (FOM) modeled after the Federal FOM has been developed by the State, and approved by the Assistant Secretary.

Signed at Washington, D.C., this 29th day of July 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

[FR Doc.77-22923 Filed 8-8-77;8:45 am]

PART 1952—APPROVED STATE PLANS FOR ENFORCEMENT OF STATE STANDARDS

Alaska; Approval of Plan Supplements

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Approval of Alaska's Administrative Regulations and Compliance Manual.

SUMMARY: This document gives notice of the approval of developmental plan changes relating to the State's compliance manual and administrative regulations applicable to inspections, citations and proposed penalties; the Alaska Occupational Safety and Health Review Board; recording and reporting occupational injuries and illnesses; variances; and consulting and training.

EFFECTIVE DATE: August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Veronica Allen, Project Officer, Office of State Programs, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210, 202–523–8031.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter referred to as the Act) for the review of changes and progress in State plans which have been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On August 10, 1973, notice was published in the FEDERAL REGISTER (38 FR 21628) of the approval of the Alaska plan and the adoption of Subpart R to Part 1952 containing the decision and a description of the plan. Further, a notice of approval of a Revised Developmental Schedule was published on December 21, 1976, in the FEDERAL REGISTER (41 FR 56314). On January 26, 1976, and September 28, 1976, the State of Alaska submitted to the Seattle Regional Office of the Occupational Safety and Health Administration supplements to the plan involving developmental changes. On July 9, 1976, and December 28, 1976, notices of submission and opportunity for public comment on the supplements were published in the FEDERAL REGISTER (41 FR 28313 and 41 FR 56336). In addition, on April 14, and May 13, 17, and 18, 1977, Alaska submitted assurances and additional plan supplements amending certain aspects of the originally published supplement in response to comments resulting from Federal review. The supplements covered by this notice are described below.

DESCRIPTION OF PLAN SUPPLEMENTS

A. *Compliance manual.* In response to the commitment contained in 29 CFR 1952.243(b) the State has developed and subsequently revised a compliance operations manual entitled, "DOSH Operations Manual" for use by the State's compliance staff in carrying out the goals of the Alaska occupational safety and health program. On April 14, and May 17, and 18, 1977, the State submitted the following amendments to its manual.

1. Chapter VIII was revised, to remove from the State's definition of "repeat violation," the one year time limitation for non-fixed establishments.

2. Chapter IX was revised to amend the State's definition of "imminent danger" to parallel the Federal definition and to clearly state that a health hazard constitutes an imminent danger situation, when there is a present possibility that the hazard creates a possibility that exposed employees will contract an illness or disease and the probable consequence of such illness or disease is death or serious physical harm.

3. Chapter XI has been revised to change the penalty amount for failure to post a citation to $500.00 and the maximum normal penalty for failure to abate violations to ten times the daily additional penalty proposed.

B. *Administrative regulations.* In response to the commitment contained in 29 CFR 1952.243(g) the State has sub-

mitted rules covering inspections, citations and proposed penalties; the Alaska Occupational Safety and Health Review Board; recording and reporting of occupational injuries and illnesses; variances; and consulting and training (Alaska Administrative Code, Title 8, Chapter 61, sections .020 through .460). These rules correspond to the Federal regulations 29 CFR Parts 1903, 1904, 1905 and 2200. By letters dated April 14, 1977, and May 17, 1977, the State submitted the following assurances.

1. Section 8.61.080, which is comparable to 29 CFR 1903.11, will be revised to provide that upon the Commissioner's determination that a safety or health complaint meets the requirements set forth for formal complaints and that there is reasonable grounds to believe that the alleged violation exists, an inspection will be conducted as soon as practicable to determine if such alleged violation exists; and that inspections under this section will not necessarily be limited to matters referred to in the complaint.

2. Section 8.61.130, which is comparable to 29 CFR 1903.18, will be revised to provide for notification to employers for failure to abate. A new State § 8.61.145 is added to explain the abatement period provision which is also in § 1903.18 to which § 8.61.145 is comparable.

3. Section 8.61.330, which is comparable to 29 CFR 1905.5, will be revised to state that all variances granted shall have only future effect.

4. Section 8.61.360 will be revised to provide for publication of adequate variance applications as provided in § 1905.14 (b). As a matter of practice the State does publish such applications in local and State-wide newspapers.

5. Section 8.61.170, which is comparable to 29 CFR 2200.2, will be revised to include the incorporation of the following additional rules from the Alaska Rules of Civil Procedures: Rule 4, Service of Process; Rule 24, Intervention; and Rules 26 through 37, Depositions and Discovery.

LOCATION OF THE PLAN AND ITS SUPPLEMENTS FOR INSPECTION AND COPYING

A copy of the plan and the supplements may be inspected and copied during normal business hours at the following locations: Office of Federal Compliance and State Programs, Occupational Safety and Health Administration, Room N-3112, 200 Constitution Avenue NW., Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6048, 909 First Avenue, Seattle, Washington 98174; and the Alaska Department of Labor, Juneau, Alaska 99801.

PUBLIC PARTICIPATION

On July 9, 1976, and December 28, 1976, notice was published in the FEDERAL REGISTER describing the supplements and allowing 30 days for interested persons to submit written data, views, and arguments concerning whether the supplements should be approved. No public comments concerning these supplements were received.

DECISION

After careful consideration, the Alaska plan supplements described in A and B above are hereby approved under Subpart B of Part 1953 of this chapter. This decision incorporates the requirements of the Act and implementing regulations applicable to State plans generally. In addition, in accordance with the above, Subpart R of 29 CFR Part 1952 is hereby amended to reflect these approved plan changes. Accordingly, § 1952.244 of Subpart R is hereby amended as follows:

§ 1952.244 Completed developmental steps.

* * * * *

(f) In accordance with § 1952.243(g) Alaska has adopted regulations covering inspections, citations, and proposed penalties, Alaska Occupational Safety and Health Review Board procedures; recording and reporting occupational injuries and illnesses; variances; and consulting and training which were approved by the Assistant Secretary on August 2, 1977.

(g) In accordance with § 1952.243(b) Alaska has developed a Compliance Manual which is modeled after the Federal Field Operations Manual and was approved by the Assistant Secretary on August 2, 1977.

(Sec. 18 Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Washington, D.C., this 2d day of August 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

[FR Doc.77-22972 Filed 8-8-77;8:45 am]

Title 33—Navigation and Navigable Waters

CHAPTER II—CORPS OF ENGINEERS, DEPARTMENT OF THE ARMY

PART 204—DANGER ZONE REGULATION

San Pablo Bay, California

AGENCY: Corps of Engineers, DOD.

ACTION: Final rule.

SUMMARY: This rule redesignates the agency using the danger zone in San Pablo Bay, California, and extends the period of use of the danger zone until September 30, 1982. The Navy Coastal River Division 11 is designated the user agency in accordance with its request.

DATE: Effective August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Ralph T. Eppard, 202-693-5070 or write: Office of the Chief of Engineers, Forrestal Building, Washington, D.C. 20314, Attention: DAEN-CWO-N.

SUPPLEMENTARY INFORMATION: The Corps of Engineers published proposed rules soliciting comments on this matter in the FEDERAL REGISTER on May 24, 1977 (42 FR 26437) with the comment period expiring on June 15, 1977. One comment was received from the California State Lands Commission which did not object to the reestablishment of the danger zone but requested the five year review period be shortened to two years. Shortening the time between reviews would not be in the interest of the national defense and would entail an almost continuous review to keep the regulation current.

Accordingly, 33 CFR 204.216 is amended as set forth below, effective August 9, 1977.

NOTE.—The Department of the Army has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(40 Stat. 266; (33 U.S.C. 3).)

Dated: July 25, 1970.

CHARLES R. FORD,
Acting Assistant Secretary of the Army (Civil Works).

Section 204.216 is amended as follows:

§ 204.216 San Pablo Bay, California; gunnery range, Department of the Navy, Coastal River Division Eleven, Mare Island, Vallejo.

(a) *The Danger Zone.* * * *

NOTE.—The danger zone will be used until September 30, 1982, after which it shall be subject to review to determine the further need thereof.

(b) *The Regulations.* The Commanding Officer, Coastal River Division Eleven, Department of the Navy, Mare Island, Vallejo, California, will conduct gunnery practice in the area during the period April 1 through September 30, between the hours of 10 a.m. and 3 p.m. on the first Wednesday of each month and the third full weekend (Saturday and Sunday) of June. No vessels shall enter or remain in the danger zone during the above stated periods except those vessels connected with the gunnery practice operations. All firing will be from the southerly portion of the danger zone in a northerly direction, and only during good visibility. The public will be notified prior to each firing by a Notice to Mariners issued by the U.S. Coast Guard and the area will be patrolled by boat and searched by radar to insure a clear range. A safety officer will always be aboard the firing boat to guarantee that all safety precautions are observed. The regulations in this section will be enforced by the Commandant, 12th Naval District and such agencies as he may designate.

[FR Doc.77-22830 Filed 8-8-77;8:45 am]

Title 35—Panama Canal

CHAPTER I—CANAL ZONE REGULATIONS

PART 69—PROFESSIONS AND OCCUPATIONS

Subpart B—Practice of Medicine and Dentistry

REVISION OF LICENSING REGULATIONS TO EXEMPT PHYSICIAN'S ASSISTANTS

AGENCY: Canal Zone Government.

ACTION: Final rule.

SUMMARY: This document revises 35 CFR Part 69, Subpart B, which governs the practice of medicine in the Canal Zone. The amendment, by exempting them from licensure, will permit utilization of trained military physician's assistants to perform paramedical work in Canal Zone health care facilities. The prior regulations authorized commissioned medical and dental officers of the U.S. Armed Forces, in the discharge of their official duties, to practice in the Canal Zone without local licensing. This revision extends that exemption to physician's assistants on active military duty.

EFFECTIVE DATE: June 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr Thomas Constant, Secretary, Panama Canal Company, Room 312, Pennsylvania Building, 425 13th Street NW., Washington, D.C. 20004, telephone 202-724-0104.

Accordingly, § 69.312(a) of Title 35 is revised to read as follows:

§ 69.312 Exemption from licensure.

* * * * *

(a) Commissioned medical or dental officers of the Armed Forces or Public Health Service of the United States or physician's assistants of the Armed Forces.

* * * * *

Effective Date: This amendment is effective June 1, 1977.

(2 C Z C § 1191, 76A Stat. 41; 35 CFR 3.1(a)(4).)

Dated July 21, 1977.

CLIFFORD L. ALEXANDER,
Secretary of the Army.

Title 41—Public Contracts and Property Management

CHAPTER 29—DEPARTMENT OF LABOR

Procurement Regulations

AGENCY: Department of Labor.

ACTION: Final rule.

SUMMARY: This rule amends the Department of Labor Procurement Regulations to conform the Department of Labor Procurement Regulations to Government-wide regulations (the Federal Procurement Regulations) and to update departmental regulations to reflect current departmental policies and responsibilities.

EFFECTIVE DATE: This rule shall be effective on September 8, 1977.

FOR FURTHER INFORMATION CONTACT

Theodore Goldberg, Assistant Director, Division of Grants and Procurement Policy, OGPAMP, OASAM, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210. Telephone: 202-523-9174.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Pursuant to the authority of the Secretary of Labor contained in the Act of March 4, 1913 (37 Stat. 736, 29 U.S.C. 551), the Secretary proposed to amend 41 CFR Chapter 29, the Department of Labor Procurement Regulations (DOLPR). The proposed amendments added procurement requirements needed to implement and supplement current Federal Procurement Regulations (FPR) deleted entries no longer applicable, provided for changes in titles and responsibilities due to departmental reorganization, modified language involving personal pronouns denoting gender to reflect departmental policy, modified DOLPR numbering and text to conform the DOLPR with the current FPR, updated references, and corrected typographical erorrs.

Significant changes included in the proposal were: Section 29-1.401 changed delegations of contracting officer authority and procurement responsibilities; § 29-3.205 limited use of authority for procurement from, or grants, to educational institutions; § 29-3.210 (formerly § 29-1.352) prescribed specific actions to be taken by program officials and contracting officers when noncompetitive procurements are contemplated; §§ 29-3.203 and 29-3.603-1, covering small purchase procedures, were changed to conform to the current FPR requirements including the change from $2,500 to $10,000 limitation on small purchases; § 29-3.604-4 provided for the use of imprest funds for common carriers; § 29-3.604-5 encouraged the use of imprest fund procedures for small purchases of $150 or less; § 29-3.802 made limitations on divulging Government cost estimates for proposed procurements more specific and set forth requirements for DOL requests for proposals; §§ 29-3.805-50, 29-3.805-51, 29-3.805-52, 29-3.805-53, and 29-3.805-54 provided DOL requirements in evaluating proposals, negotiating with prospective contractors, and selecting contractors. Part 29-61 was proposed to be deleted in its entirety.

COMMENTS AND CHANGES

On June 21, 1977, the proposed amendments were published as a proposed rule in the FEDERAL REGISTER (42 FR 31462). The public was given until July 21, 1977, to comment.

Written comments were received from the Small Business Administration in which that agency requested that § 29-1.706-54, covering the proposed ceiling of $750,000 below which procurement for construction would be set aside for exclusive small business participation, be amended to raise the ceiling to $1 million to reflect the rise in the construction cost index. Section 29-1.706-54 was amended to accommodate this concern and the ceiling was increased to $1 million. The requirement in § 29-3.210-50 (b), authorizing use of noncompetitive procurement where it is impossible to draft for an invitation for bids adequate specifications or any other adequately detailed description of the required property or services, has been deleted. This is a justification for using negotiation, not for using noncompetitive procurement.

In connection with this rulemaking, a sentence was added to § 29-1.401(c)(5)(ii) to make clear the intent of the Assistant Secretary for Administration and Management that further redelegation of authority delegated by that section was restricted to officials in the National Office. Other nonsubstantive changes which are editorial in nature have been made. Public comment on these changes is not deemed necessary.

Accordingly, Chapter 29 of Title 41 of the Code of Federal Regulations is amended as set forth below:

PART 29-1—GENERAL

1. The table of contents of Subpart 29-1.0 is amended to revise a caption which reads:

* * * * *

29-1.008-50 Department of Labor (DOL) Agency implementation.

* * * * *

§ 29-1.006-4 [Amended]

2. Section 29-1.006-4 is amended by substituting the word "Agencies" for the words "administrations and offices" in the second sentence, and by substituting the words "the Assistant Secretary's" for the word "his" in the third sentence.

3. Section 29-1.008-50 is revised to read as follows:

§ 29-1.008-50 Department of Labor (DOL) Agency implementation.

DOL Agencies may implement or supplement the FPR or the DOLPR with internal instructions whose applicability is not DOL-wide, but nevertheless necessary to implement or supplement the FPR or the DOLPR. DOL Agencies may request publication in the DOLPR of procurement instructions and other procurement material considered of interest to the general public. Such instructions shall not extensively repeat, paraphrase, or otherwise restate the FPR or the DOLPR and shall be numbered in accordance with § 1-1.007-2 of this title, except that the numbers prescribed there and in § 29-1.007-2 shall be suffixed by the alphabetic abbreviation or other symbol of the respective Agency issuing the instructions. Whether the instructions are to be published as part of the DOLPR or not, such proposed instructions and material that implement or supplement the DOLPR or the FPR must be submitted, prior to their publication, for the review and concurrence of the Assistant Secretary for Administration and Management and of the Solicitor. In the case of internal procurement instructions, the purpose of such review is to ascertain that such instructions are consistent with the FPR and the DOLPR and that they do not contain material which should be issued as the DOLPR. In the case of instructions or other material submitted for inclusion in the DOLPR, after concurrence by interested DOL Agencies, the necessary arrangements will be made for publication of such instructions or other material in the FEDERAL REGISTER.

§ 29–1.009–2 [Amended]

4. Section 29–1.009–2 is amended by substituting the word "Agency" for the words "administration or office" in the third sentence of paragraph (a), and by substituting the words "this official" for the word "he" in the fourth sentence of paragraph (c).

5. To conform the DOLPR's numbering system with that of the FPR, the table of contents for Subpart 29–1.3 is revised to delete §§ 29–1.310, 29–1.310–4, and 29–1.352, since these sections are being redesignated and transferred to other parts of the DOLPR. The revised table of contents reads as follows:

Subpart 29–1.3—General Policies

Sec.	
29–1.302	Procurement sources.
29–1.302–3	Contracts between the Government and Government employees or business concerns substantially owned or controlled by Government employees.
29–1.302–50	Contracts between the Government and former Government employees.
29–1.303	Approval signatures.
29–1.305	Specifications.
29–1.305–3	Deviations from Federal Specifications.
29–1.310	[Reserved].
29–1.310–4	[Reserved].
29–1.315	Use of liquidated damages provisions in procurement contracts.
29–1.315–2	Policy.
29–1.318	Disputes clause.
29–1.318–1	Contracting officer's decision under a Disputes clause.
29–1.350	Buying in.
29–1.351	Refunds from contractors.
29–1.352	[Reserved].
29–1.353	Standards of conduct.
29–1.354	Violations of law.

6. Section 29–1.302–50 is revised to read:

§ 29–1.302–50 Contracts between the Government and former Government employees.

Negotiated contracts or grants or amendments to existing contracts or grants which constitute new procurement (including those for the rental of real or personal property) may be entered into with former employees of DOL or with firms in which former employees are known to have a substantial interest, within a period of 1 year subsequent to the termination of the individual's employment by DOL, only with the prior written approval of the Assistant Secretary for Administration and Management.

§ 29–1.310 and 29–1.310–4 [Deleted]

7. Section 29–1.310 entitled "Responsible prospective contractor." and § 29–1.310–4 entitled "General policy." are deleted from Subpart 29–1.3 and are transferred to a new Subpart 29–1.12.

§ 29–1.315–2 [Amended]

8. Section 29–1.315–2 is amended by substituting the words "the contracting officer" for the word "he" in the second sentence of paragraph (a), and by substituting "(under $10,000)" for "(under $2,500)" in paragraph (a)(3)(iv).

§ 29–1.350 [Amended]

9. Section 29–1.350 is amended by substituting the words "the contractor's" for "his" in the sixth sentence.

§ 29–1.352 [Deleted]

10. Section 29–1.352 entitled "Sole source procurement." is deleted from Subpart 29–1.3 and is redesignated and transferred to Subpart 29–3.2.

11. The table of contents for Subpart 29–1.4 is revised to delete § 29–1.451 entitled "Regional administrative officer purchasing authority." and to redesignate § 29–1.454 as § 29–1.453, and reads as follows:

Subpart 29–1.4—Procurement Responsibility and Authority

Sec.	
29–1.400	Scope of subpart.
29–1.401	Responsibility of the head of the procuring activity.
29–1.402	Authority of contracting officers.
29–1.404	Selection, designation, and termination of designation of contracting officers
29–1.404–1	Selection.
29–1.404–2	Designation.
29–1.404–50	Modification of authority.
29–1.404–51	Continuity of responsibility.
29–1.405	Ratification of unauthorized contract awards.
29–1.450	Contracting officer's representative.
29–1.451	[Reserved]
29–1.452	Responsibility of procurement officials to question requirements and reaffirm their validity
29–1.453	Independence of procurement officials to carry out responsibilities.
29–1.454	[Reserved]

12. Section 29–1.401 is revised to read as follows:

§ 29–1.401 Responsibility of the head of the procuring activity.

(a) *First tier delegation.* In the DOL, contracting officer and grant officer authority and procurement responsibility have been delegated from the Secretary of Labor through the Assistant Secretary for Administration and Management to the following officials, or officers acting in their behalf:

(1) The Assistant Secretary for Employment and Training.

(2) The Assistant Secretary for Occupational Safety and Health.

(3) The Assistant Secretary for Employment Standards.

(4) The Deputy Under Secretary for International Affairs.

(5) The Commissioner of Labor Statistics.

(6) The Regional Administrators—Office of the Assistant Secretary for Administration and Management (OASAM).

(7) The Director, Administrative Programs and Services, OASAM.

(b) *Delegations and limitations.* Except for the restriction set forth in § 29–1.401(c)(5)(ii), the delegations noted in paragraph (a) above may be further redelegated within limitations by these officers within their respective areas of assigned responsibility. However, prior to such redelegations, contracting officers should consider the following factors to determine the extent to which authority should be redelgated: Volume of procurement programs; presence of, or capability of obtaining adequately trained personnel; consolidation of smaller procurement programs and offices on a geographical basis; and the overall strengthening of the procurement process by the selection of qualified personnel. In accordance with § 29–1.404–2, copies of every further redelegation must be furnished to the Assistant Secretary for Administration and Management, Attention: ABA.

(c) *Responsibilities.* The responsibilities of the delegations above are described as follows:

(1) *The Assistant Secretary for Employment and Training,* or an officer acting in that capacity, is assigned the responsibility for procurement and the issuance of grants for program property and services, except as otherwise delegated under paragraph (c)(7) of this section, required to fulfill the statutory and regulatory responsibilities imposed on the Assistant Secretary for Employment and Training.

(2) *The Assistant Secretary for Occupational Safety and Health,* or an officer acting in that capacity, is assigned the following responsibilities:

(i) Issuance of grant agreements with States required to fulfill the statutory and regulatory responsibilities imposed on the Assistant Secretary for Occupational Safety and Health.

(ii) Reimbursement to States, pursuant to Section 7(c)(1) of the Occupational Safety and Health Act of 1970, as amended (Pub. L. 91–596, 84 Stat. 1590), for services, facilities, and personnel of the States used to carry out the statutory and regulatory responsibilities imposed on the Assistant Secretary for Occupational Safety and Health.

(iii) Issuance of grants, pursuant to Section 21(b) of the Act, for the conduct of short-term training of personnel.

(3) *The Assistant Secretary for Employment Standards,* or an officer acting in that capacity, is assigned the responsibility for medical supplies and services required under the Federal Coal Mine Health and Safety Act of 1969, as amended (Pub. L. 91–173, 84 Stat. 742).

(4) *The Deputy Under Secretary for International Affairs,* or an officer acting in that capacity, is assigned the responsibility for procurement of supplies and services, except as otherwise delegated under paragraph (c)(7) of this section, required for economic research services in support of foreign economic and trade policy formulation; training and orientation of foreign nationals; and overseas exhibitions required to fulfill the statutory and regulatory responsibilities imposed on the Deputy Under Secretary for International Affairs.

(5) *The Commissioner of Labor Statistics,* or an officer acting in that capacity, is assigned the following responsibilities:

(i) Procurement of statistical and economic research services, including grants, except for those delegated under paragraph (c)(7) of this section, required to fulfill the statutory and regulatory responsibilities imposed on the Commissioner of Labor Statistics.

(ii) Procurement needed for operation of the National Office of the Bureau of Labor Statistics: (A) Using FEDSTRIP for General Services Administration (GSA) common cataloged and supplied office furnishings, equipment, and supplies; (B) using GSA Federal Supply Schedule contracts for all items except automatic data processing (ADP) hardware and software, office copiers, and ADP communication devices; and (C) using the imprest fund for small purchase items in accordance with § 29–3.604. This authority may be redelegated only to officials in the National Office.

(iii) Sale of special statistics developed by the Bureau of Labor Statistics in accordance with the Act of April 13, 1934 (29 U.S.C., Sec. 9 (1970)).

(6) *The Regional Administrators—OASAM,* or officers acting in that capacity, are assigned the following responsibilities within their respective regions:

(i) Procurement of property and services required for the regional offices, including all imprest fund purchases and GSA Federal Supply Schedule purchases. Purchases of office machines, e.g., typewriters, adding machines, and calculators, must be written against blanket purchase orders maintained for such equipment by the Director, Administrative Programs and Services, OASAM.

(ii) Procurement of all automatic data processing (ADP) hardware and software for the regional offices, with prior approval from the Director, Office of Grants, Procurement and ADP Management Policy.

(7) *The Director, Administrative Programs and Services, OASAM,* or an officer acting in that capacity, is assigned the following responsibilities:

(i) Procurement of all property and services required for the operation of the DOL, and program-related property and services not specifically delegated to other officials in paragraphs (c)(1), (2), (3), (4), (5), and (6) of this section.

(ii) Procurement of all supplies and services, including program-related, through the imprest fund and from GSA Federal Supply Schedules required for the DOL National Office, except for authority delegated in § 29–1.401(c)(5); and the purchases of advertising required for the DOL National Office.

(iii) Procurement of all automatic data processing (ADP) hardware and software for the DOL National Office, only with prior approval from the Director, Office of Grants, Procurement and ADP Management Policy, OASAM.

(8) *The Director, Office of Grants, Procurement and ADP Management Policy, OASAM,* or an officer acting in that capacity, is assigned the following responsibilities:

(i) Developing and publishing departmentwide procurement and grant regulations, guidelines, and policies.

(ii) Reviewing and evaluating administrative adequacy of the Department's procurement and grant operations

(iii) Providing technical advice and assistance to those DOL officials and officers delegated procurement and grant responsibilities. This includes interpreting the Federal Procurement Regulations as they apply to the Department's procurement operations, and obtaining the advice of the Solicitor as required.

§ 29–1.402 [Amended]

13. In line four of the first paragraph of § 29–1.402, the word "authorty" should be spelled "authority."

14. Section 29–1.404–50 is amended to read:

§ 29–1.404–50 Modification of authority.

To effect modification of a contracting officer's authority, a new designation (appointment) shall be issued revoking the present appointment.

15. Section 29–1.450 is amended to read:

§ 29–1.450 Contracting officer's representative.

(a) * * * The designation of the contracting officer's representative and the responsibilities delegated to that official * * *

(b) A person assigned to a procurement office and performing primary duties in a position within a procurement office, and under the supervision of a contracting officer, does not require written designation as a representative of the contracting officer nor designation in a contractual document to perform assigned duties. Such a person is considered to be an employee of the contracting officer, acting in the latter's behalf and, as such, has the authority and responsibility to perform under the terms and conditions of employment, and to act as assigned by the contracting officer. The contracting officer, however, shall not authorize such an employee, acting as a representative of the contracting officer, to sign any contractual document or letter in those instances where the signature of a contracting officer is required.

* * * * * *

§ 29–1.451 [Deleted]

16. Section 29–1.451 entitled "Regional administrative officer purchasing authority." is deleted in its entirety.

§ 29–1.452 [Amended]

17. In line seven of paragraph (o) of § 29–1.452, the word "makes" should be substituted for the word "make."

18. Section 29–1.508–2 is revised to read:

§ 29–1.508–2 Failure or refusal to furnish Standard Form 119.

The contracting officer may take any of the actions authorized in § 1–1.508–2 of this title provided that the contract file is documented to justify the action taken.

19. Section 29–1.601–1 is revised to read:

§ 29–1.601–1 Definitions.

"Debarring Officer" means the Assistant Secretary for Administration and Management, who is the DOL official authorized to invoke debarment or suspension measures as authorized by § 1–1.602–1 (d), (f), and (g) of this title; and to include on the "DOL Debarred, Suspended, and Ineligible Bidders' List," defined below, those concerns and individuals determined to be subject to such measures in accordance with § 1–1.602–1 (a), (b), (c), and (e) of this title.

20. Section 29–1.602 is amended to correct organizational titles and make editorial changes and reads as follows:

§ 29–1.602 Establishment and maintenance of a list of concerns or individuals debarred, suspended, or declared ineligible.

The Debarring Officer shall establish and maintain a list of concerns and individuals to whom contracts will not be awarded and from whom bids or proposals will not be solicited for contracts with the DOL. The list shall be designated as the "DOL Debarred, Suspended, and Ineligible Bidders' List," and compliance with its use throughout DOL is mandatory. The Debarring Officer shall keep the list current and publish and distribute it bi-monthly to heads of DOL procuring activities who shall be responsible for its redistribution. The list shall be marked "For Official Use Only" to reduce inspection of its contents by other than DOL personnel required to have access thereto. The head of an Agency may request, in writing, that a concern or individual be placed on the "DOL Debarred, Suspended, or Ineligible Bidders' List" in accordance with procedures of this subpart. This official may initiate the request personally, or may do so by endorsing the recommendation of the responsible Agency contracting officer. If all necessary information is not readily available, a preliminary report concerning actions that may warrant debarment may be submitted, to be followed as soon thereafter as practicable by a completely documented report. The Debarring Officer, based on the preliminary report, may determine that a suspension is warranted. The Debarring Officer will also be responsible for making for DOL the determinations, administrative and otherwise, which are permitted under § 1–1.602–1 (d), (f), and (g), and § 1–1.604 of this title and for maintaining liaison with the General Services Administration and otherwise complying with § 1–1.606 of this title. Upon a showing by the head of an Agency that it would be in the public's best interest to make an exception for a particular procurement action and allow an award to a debarred concern or individual, the Debarring Officer may determine that an exception is warranted.

21. In § 29–1.604–1, paragraph (a) is revised to read as follows:

§ 29–1.604–1 Procedural requirements relating to the imposition of debarment.

(a) *Initiation of debarment action.* The Debarring Officer shall determine whether the request for debarment has sufficient merit to warrant further processing. This official shall communicate

the decision to the head of the Agency recommending debarment.

(1) *Notice to contractors.* If the Debarring Officer decides further action in the matter is warranted, this official shall send a letter by registered mail, return receipt requested, to notify the concern or individual that debarment is being proposed stating, as a minimum, in addition to the items required in § 1–1.604–1 of this title, the following:

* * * * *

22. The table of contents for Subpart 29–1.7 is revised to delete §§ 29–1.708 and 29–1.708–3, entitled respectively "Certificate of competency program." and "Conclusiveness of certificate of competency.," and to redesignate § 29–1.706–53 as § 29–1.706–3 to conform to FPR numbering. The table of contents reads as follows:

Subpart 29–1.7—Small Business Concerns

Sec.

29–1.702	Small business policies.
29–1.704	Agency program direction and operation.
29–1.704–1	Small business advisor.
29–1.704–2	Small business specialists.
29–1.704–3	Responsibilities of the procurement office.
29–1.706	Procurement set-asides for small business.
29–1.706–3	Withdrawal or modification of set-asides.
29–1.706–50	Procurement set-asides for small business when an SBA representative is not available.
29–1.706–51	General.
29–1.706–52	Review of set-aside recommendations initiated by small business specialist.
29–1.706–53	[Reserved]
29–1.706–54	Small business set-asides for proposed procurement.
29–1.708	[Reserved]
29–1.708–3	[Reserved]
29–1.709	Records and reports.
29–1.713	Contracts with the Small Business Administration.
29–1.713–2	Policy.

23. Section 29–1.704–1 is revised to read as follows:

§ 29–1.704–1 Small business advisor.

The Director, Office of Grants, Procurement and ADP Management Policy, OASAM, or designee, under the policy direction of the Assistant Secretary for Administration and Management, is designated as DOL's small business advisor. The small business advisor shall have the responsibility, as a collateral duty, for establishing and implementing the small business program, including the minority business program, and for guiding the small business specialists in executing the program. The advisor will be the central point of contact for inquiries concerning the small business program from industry, the Small Business Administration (SBA), the Congress, and others. Duties shall include developing a plan of operation to increase the share of contracts awarded to small business by DOL.

§ 29–1.704–2 [Amended]

24. In line four of paragraph (b) of § 29–1.704–2, the word "the" should be substituted for the word "his."

25. Paragraph (b) of § 29–1.704–3 is revised to read as follows:

§ 29–1.704–3 Responsibilities of the procurement office.

* * * * *

(b) The procurement office shall insure that bidders' mailing lists identify small business and minority business concerns and that all solicitations state the applicable small business size standard and product classification.

* * * * *

§ 29–1.706–52 [Amended]

26. Section 29–1.706–52 is amended to substitute the word "the" for the word "his" on line eight.

§ 29–1.706–53 [Redesignated and amended]

27. Section 29–1.706–53 is redesignated § 29–1.706–3 to conform with FPR numbering and is amended to substitute the word "Withdrawal" for the word "Withdrawals" in the first line, and to add the words "or she" after the word "he" on the eleventh line.

28. Section 29–1.706–54 is revised to read as follows:

§ 29–1.706–54 Small business set-asides for proposed procurement.

(a) Each proposed procurement for construction estimated to cost between $10,000 and $1 million shall be set aside for exclusive small business participation. Such set-asides shall be considered to be unilateral small business set-asides, and shall be withdrawn, in accordance with the procedures of § 1–1.706–3 of this title, and § 29–1.706–3 only if found not to serve the best interest of the Government.

(b) Small business set-aside preferences for construction procurements in excess of $1 million shall be considered on a case-by-case basis.

§§ 29–1.708 and 29–1.708–3 [Deleted]

29. Sections 29–1.708 and 29–1.708–3 are deleted in their entirety.

30. Paragraph (a) of § 29–1.709 is revised to read as follows:

§ 29–1.709 Records and reports.

(a) A semiannual small business report shall be prepared by each procuring activity in accordance with § 1–16.804–3 of this title and shall be forwarded to the Director, Office of Grants, Procurement and ADP Management Policy, OASAM, Attention: ABA, not later than the 30th day following the end of the 6-month and 12-month periods covered respectively by the report.

* * * * *

§ 29–1.709 [Amended]

31. The penultimate line in paragraph (b) of § 29–1.709 is amended to add the word "on" after the word "Report."

32. The introductory paragraph in § 29–1.1002 is amended to read:

§ 29–1.1002 Availability of invitations for bids and requests for proposals.

A contracting officer may limit the availability of publicized unclassified invitations for bids and requests for proposals provided that they are made available for perusal at the issuing office and *Provided, further,* That the contracting officer:

* * * * *

33. The table of contents for Part 29–1 is corrected by deleting the caption "Subpart 29–1.50 [Reserved]."

34. Part 29–1 is corrected by deleting the entry of the part entitled "Subpart 29–1.50 [Reserved]."

35. This new Subpart 29–1.12 entitled "Responsible Prospective Contractors." is added to the DOLPR in lieu of § 29–1.310, to conform the numbering system to that of the FPR. The table of contents for this subpart reads:

Subpart 29–1.12—Responsible Prospective Contractors

Sec.

29–1.1202 General policy.

36. The new subpart reads as follows:

Subpart 29–1.12—Responsible Prospective Contractors

§ 29–1.1202 General policy.

(a) A contracting officer's duty to contract only with a responsible contractor does not preclude that official's disclosing to the contractor those actions the contractor might take to become "responsible" within the meaning of §§ 1–1.1203–1 and 1–1.1203–2 of this title. The contracting officer should consider the use of DOL staff in order to qualify a contractor as responsible only when such assistance is within the spirit of the Small Business Administration's program objectives; or is the only way a marginal organization, for which there is no substitute in a given geographic area, can be made eligible, such as in a program for the disadvantaged.

(b) Such DOL staff assistance can take many forms. In cases of borderline financial responsibility, the contracting officer should encourage the contractor's use of available financing techniques. These include, but are not limited to, performance guarantees, advance payments, or Small Business Administration loans. In cases where either the inadequacy of a contractor's accounting system or the contractor's inability to conform to the requirements of the Equal Opportunity Clause is a barrier to the award of a contract, the contracting officer should consider, on a case-by-case basis, the practicality of arranging for assistance to the contractor. Such assistance may take the form of either staff assistance from the Department or, in instances of an equal opportunity problem, the assistance of the applicable compliance agency. In this manner, the services of specialists could be made available to the contractor, when appropriate, to overcome the obstacle to award.

(c) Nothing herein, however, shall be construed, directly or indirectly, as placing on the contracting officer the burden of always finding a contractor "responsible" or, alternatively, initiating and pursuing a course of action which, with the help of the Department's staff, will lead to a finding of responsibility. Rather, only where the situation warrants it, is it the policy of DOL to encourage positive involvement of a contracting officer in assisting a contractor to become responsible. Where the circumstances clearly warrant a finding of nonresponsibility and also indicate the impracticality of the DOL's attempting to take steps to cure the contractor's deficiencies, it is the policy of the DOL that the contracting officer make a finding of nonresponsibility.

PART 29–2—PROCUREMENT BY FORMAL ADVERTISING

37. The table of contents for Subpart 29–2.1 is revised to delete § 29–2.102–50 entitled "Limitation on procurement by formal advertising." and reads as follows:

Subpart 29–2.1—Use of Formal Advertising

Sec.

29–2.101	Meaning of formal advertising
29–2.102	Policy
29–2.102–50	[Reserved].
29–2.102–51	Specification requirement.
29–2.105	Solicitation for informational or planning purposes.

§ 29–2.102–50 [Deleted]

38. Section 29–2.102–50 entitled "Limitation on procurement by formal advertising." is deleted in its entirety.

Subpart 29–2.2 [Amended]

39. The table of contents of Subpart 29–2.2 is amended to correct the caption number "29–2.205–50" to read "29–2.205–5."

§ 29–2.202–1 [Amended]

40. Line 14 of § 29–2.202–1 is amended to substitute "20 or 30 calendar days" for "15 or 30 days."

§ 29–2.202–2 [Amended]

41. Line nine of the provision required in § 29–2.202–2 is amended to substitute the word "the" for the word "he."

42. Section 29–2.202–3 is revised to read:

§ 29–2.202–3 Place and method of delivery of supplies.

To the maximum extent practicable, invitations for bids issued by DOL shall stipulate "f.o.b. destination." Only where it is determined to be in the Government's best interest, may the contracting officer deviate from this policy.

§ 29–2.202–52 [Amended]

43. Line 11 of paragraph (a) of § 29–2.202–52 is amended by substituting the words "the contracting officer" for the word "he."

44. Section 29–2.202–53(a) is amended to read:

§ 29–2.202–53 Prebid conference.

(a) *General.* A prebid conference is a procedure, generally reserved for complex procurements, whereby prospective suppliers (and their subcontractors, if known) are invited to a meeting presided over by the contracting officer, where there is discussed any unusual aspect of a particular procurement for which an invitation for bids (IFB) or a request for proposals (RFP) has been issued. Whenever the contracting officer deems it in the DOL's best interest (but only, in the case of IFB's, after approval of the Director, Administrative Programs and Services, Office of the Assistant Secretary for Administration and Management), a prebid conference is authorized.

* * * * *

§ 29–2.205–50 [Amended]

45. The heading for § 29–2.205–50 entitled "Release of bidders mailing lists" is corrected to read, "29–2.205–5 Release of bidders mailing lists."

§ 29–2.301 [Amended]

46. Line two of § 29–2.301 is amended to substitute the words "or the bidder's" for the word "his."

47. Section 29–2.303–1 is amended to read as follows:

§ 29–2.303–1 General.

The contracting officer may not alter the late bid regulations and procedures of § 1–2.303 of this title or in this § 29–2.303 in response to a bidder's argument either that the bid is only slightly late (e.g., several minutes) or that none of the other bidders has been prejudiced by the late bid.

§ 29–2.402 [Amended]

48. Section 29–2.402 is amended to substitute the word "representatives" for "representative" on line 11 and to delete the word, "his" on line 21

49. Section 29–2.402–50 is amended to correct pronouns limiting gender and reads:

§ 29–2.402–50 Firm-bid rule.

Under the "firm-bid rule," a bidder is bound after the bid opening by the bid submitted and may not, in the absence of the exceptions provided in the mistakes in bids procedures of § 1–2.406 of this title, withdraw the bid prior to the time of award or until after the expiration of the period provided in the bid for bid acceptance. It is the Department's policy, on the other hand, that it will not be bound by its invitation for bids, except that if it does make an award based on bids submitted in response to its invitation, it must award to that responsible supplier submitting the lowest responsive bid. Aside from that, however, the Department will not be bound by any bid it receives. The Department's preferred position is justified judicially on the basis that laws concerning the advertising and award of public contracts may be construed as primarily for the Government's own benefit and protection. Therefore, no bidder acquires any enforceable rights from the Department until the valid acceptance of the bid by an official authorized to do so. The mere submission of a bid does not, in and of itself, bestow a right or grant an interest in any prospective procurement.

§ 29–2.402–52 [Amended]

50. Section 29–2.402–52 is amended to substitute the word "a" for the word "his" in line two of paragraph (a); to substitute the word "conducive" for the word "conductive" in line seven of paragraph (b); and to substitute the word "that official" for the word "he" in line three of paragraph (c).

§ 29–2.404–1 [Amended]

51. Section 29–2.404–1 is amended to delete the word, "he" on line five.

§ 29–2.407–3 [Amended]

52. Section 29–2.407–3 is amended to delete the words, "or requests for proposals" on lines one and two.

53. Section 29–2.407–8 is amended to delete pronouns limiting gender and reads:

§ 29–2.407–8 Protests against award.

(a) *Protests before award.* If, after bid opening but prior to award, a protest against award has been lodged and it is necessary to make an award before the matter is resolved, the contracting officer shall obtain and place in the file the written approval of the head of the agency. Prior to making an award, the head of the agency will inform the Comptroller General of the Department's intent to award and obtain advice from the Comptroller General concerning the status of the protest in accordance with § 1–2.407–8(b) of this title.

(b) *Protests after award.* In the event of a protest after award, consideration of its merit and a determination regarding its resolution, including any required reports to the Comptroller General, shall be made by the head of the agency and, where required, that official shall obtain assistance from the Solicitor

PART 29–3—PROCUREMENT BY NEGOTIATION

54. The table of contents for Subpart 29–3.1 is revised to delete § 29–3.101–50 entitled "Late proposals" and reads as follows:

Subpart 29–3.1—Use of Negotiation

Sec.

29–3.100	Scope of subpart.
29–3.100–50	Other procedures applicable to negotiated procurements.
29–3.101	General requirements for negotiation
29–3.101–50	[Reserved]
29–3.101–51	Limitations on use of requests for quotations
29–3.103	Dissemination of procurement information

§ 29–3.100–50 [Amended]

55. Section 29–3.100–50 is amended to correct the entry in the list of applicable sections to read "1–2.407–2—Responsible bidder—reasonableness of price."

§ 29–3.101–50 [Deleted]

56. Section 29–3.101–50 entitled "Late proposals." is deleted in its entirety.

57. Section 29–3.103(a) is amended to read as follows:

§ 29–3.103 Dissemination of procurement information.

(a) During the interval between the initiation of the request for proposals and the making of an award, the limitations on communication between DOL representatives, procurement and other-

wise, and prospective suppliers shall be the same as those provided in § 29–2.202–52 of this chapter for formally advertised solicitations. Moreover, no prospective supplier shall be given an advantage over competitors of advance knowledge that proposals are to be requested.

* * * * *

58. The table of contents for Subpart 29–3.2 is revised to amend § 29–3.203 and to add new §§ 29–3.205 and 29–3.205–50, and §§ 29–3.210 and 29–3.210–50 which are redesignated and transferred from § 29–1.3. The revised table of contents reads as follows:

Subpart 29–3.2—Circumstances Permitting Negotiation

Sec.	
29–3.202	Public exigency.
29–3.203	Purchases not in excess of $10,000.
29–3.204	Personal or professional services.
29–3.204–50	Criteria for determining whether services are personal.
29–3.205	Services of educational institutions.
29–3.205–50	Limitations.
29–3.210	Impracticable to secure competition by formal advertising.
29–3.210–50	Noncompetitive procurements.
29–3.211	Experimental, developmental, or research work.

59. Section 29–3.203 is revised to read as follows:

§ 29–3.203 Purchases not in excess of $10,000.

When determining whether or not the amount involved in any one transaction exceeds $10,000, the full or gross purchase price is controlling. Any prompt payment discount or the trade-in value of any article (to be offered to the vendor in exchange) is not to be deducted to qualify a procurement for the exception of § 1–3.203 of this title.

§ 29–3.204—50 [Amended]

60. Section 29–3.204–50 entitled "Criteria for determining whether services are personal." is amended by deleting the word "his" on line three, and by substituting the words "the contracting officer" for the word "he" on line five.

61. Section 29–3.205 is added and reads as follows:

§ 29–3.205 Services of educational institutions.

§ 29–3.205–50 Limitations.

(a) This authority shall be used only for the procurement of or the issuance of grants for specialized noncommercial services which are customarily performed by educational institutions. Use of this authority for any services other than those listed in § 1–3.205(a) of this title shall require a written determination with supporting facts by the head of the procuring activity that the particular type of service is available only from educational institutions.

(b) Proposals shall be solicited from as many educational institutions as are known to possess the required capability. This shall be consistent with § 1–3.101(c) of this title. Solicitation of a single educational institution shall require a written justification for sole source procurement in accordance with the requirements of § 29–3.210 of this chapter.

(c) Where the circumstances of both paragraphs (a) and (b) of this section pertain in the same case, the required determinations shall be combined and made by the head of the procuring activity.

62. Section 29–3.210 is added and reads as follows:

§ 29–3.210 Impracticable to secure competition by formal advertising.

§ 29–3.210–50 Noncompetitive procurements.

(a) It is a basic Department of Labor procurement policy that the selection of contractors shall be based on competition among responsible suppliers. This requirement for maximum competition exists regardless of whether the procurement is formally advertised or negotiated. However, there are circumstances where one organization or individual has exclusive or predominant capability by reason of experience, specialized facilities, or technical competence to perform the work within the time required and at a reasonable price. To insure that DOL procurements conform fully with the basic policy prescribing competitive procurement, any proposed noncompetitive procurement in excess of $10,000 must be fully justified and approved by the Assistant Secretary for Administration and Management or, in the case of research contracts of $25,000 or more, by the Assistant Secretary for Policy, Evaluation and Research. The contracting officer is responsible for assuring that proposed noncompetitive procurements below these dollar levels are in compliance with FPR and DOLPR requirements regarding maximum competition.

(b) The DOL recognizes that noncompetitive awards may be made where the items or services are unique; where time is of the essence and only one known source can meet the Government's needs within the required time frame; or where it is necessary that the desired items manufactured by one source be compatible and interchangeable with existing equipment. In the event that a nonprofit, tax-exempt, or volunteer citizens' group falls within one of the preceding examples, a noncompetitive procurement may be justified. However, there is no authority justifying a sole source procurement when the factors are based solely on a firm's status as either a nonprofit organization, a tax-exempt entity, or a volunteer citizens' group. In addition, there is no authority justifying a sole source procurement on the basis that a firm can perform the services with greater ease than any other firm.

(c) Where follow-on contracts are anticipated, sufficient data should be obtained to permit competition of later contracts. In study or research contracts, where practical, the contractor's work papers shall be stipulated as a deliverable end product along with the final report. Work papers may supply sufficient background so that competition may be possible for future procurements of research effort based on a previously delivered final report of a study or research contract.

63. Section 29–3.211 is amended to delete pronouns limiting gender and reads:

§ 29–3.211 Experimental, developmental, or research work.

The determination referred to in § 1–3.211 of this title shall be made by the head of the procuring activity for requirements of $25,000 or less. Otherwise the head of the procuring activity shall forward the matter together with recommendations to the head of the agency for that official's determination.

§ 29–3.305 [Amended]

64. Section 29–3.305 is amended to correct the FPR reference on line six by substituting "§ 1–3.305" for "§ 1–2.305."

§ 29–3.404–4 [Amended]

65. Section 29–3.404–4 is amended to correct a typographical error. On line 10, the word "provide" should be substituted for the word "provides."

§ 29–3.404–7 [Amended]

66. Section 29–3.404–7 is amended to substitute the words "the individual" for the word "he" on line 19 of the section, and to substitute a semicolon for the comma on line 22.

67. Section 29–3.405–5 is revised to reorganize content, correct the title of an official, and correct typographical errors, and reads as follows:

§ 29–3.405–5 Cost-plus-a-fixed-fee contract.

(a) *Limitations.* There is no departmentwide fixed-fee ceiling schedule other than the limitations imposed in § 1–3.405–5(c)(2) of this title. Within those limitations, the head of each procuring activity may establish a fee ceiling for the activity.

(b) *Administrative limitations.* In addition to the statutory limitations described in § 1–3.405–5(c)(2) of this title, fees under cost-plus-a-fixed-fee type contracts are subject to the administrative limitations set forth below:

(1) Nine percent of the estimated cost, exclusive of the fee, for any cost-plus-a-fixed-fee contract for experimental, evaluation, developmental, or research work; or

(2) Six percent of the estimated cost, exclusive of the fee, for any other cost-plus-a-fixed-fee contract. Fixed fees within the limitations imposed by § 1–3.405–5(c)(2) of this title and in excess of those cited herein shall be submitted to the Director, Office of Grants, Procurement and ADP Management Policy, OASAM, Washington, D.C., 20210, Attn: ABA, for approval. The request for approval shall include a detailed justification setting forth the rationale supporting the proposed fee in terms of the factors prescribed in § 1–3.808–2 of this title.

(c) *Contractor's investment in work-in-process.* The head of each procuring activity has been delegated the authority

to make the determination described in § 1–3.405–5(d)(1)(ix) of this title.

68. Section 29–3.405–50 is amended to correct grammatical and typographical errors, and reads:

§ 29–3.405–50 Cost-plus-award-fee contract.

(a) *Description.* The use of this type of cost-reimbursement contract is relatively new and stems from the desire on the part of the Government to introduce incentives into cost-reimbursement contracting situations where finite measures of performance necessary for cost-plus-incentive-fee contracts are absent. The use of this type of contract requires a willingness on the part of the contractor to accept a unilateral Government determination of a suitable level of fee for the performance of the contract. By terms of the contract, this determination by the Government of the fee is excluded from the scope of the Disputes clause. The contractor's performance itself is measured against criteria included in the contract. The contractor's performance relative to these criteria is a subject for discussion between the parties at various intervals during the period of contract. The mechanics of the fee determination are unusual in that two fee elements are involved. First, there is a fee in a fixed amount or "base" fee. Second, there is a fee that is variable, the "award" fee. Maximizing the second part of the fee is the basis of the contractor's motivation to be responsive to the results of progress discussions at the periodic reviews of the contractor's performance.

(b) *Application.* The cost-plus-award-fee contract shall not be used where it is clear that a cost-plus-a-fixed-fee or cost-plus-incentive-fee contract is more appropriate.

(c) *Limitations.* The base fee shall not exceed 3 percent of the estimated cost of the contract exclusive of fee. The maximum fee (base fee plus award fee) shall not exceed the limits in §§ 1–3.405–5(c)(2) of this title, and 29–3.405–5(b).

§ 29–3.406–1 [Amended]

69. In § 29–3.406–1, line six is amended to substitute the word "are" for the word "is."

§ 29–3.409 [Amended]

70. Section 29–3.409 entitled "Indefinite delivery type contracts." is amended to correct typographical errors as follows:

(a) In line five of paragraph (a)(1), the word "exist" is substituted for the word "exists."

(b) Paragraphs (b) and (c) are amended to delete subparagraph headings and read:

(b) *Requirements contract.* This is another form of term contract wherein, for the full duration of the specific contract period, all the needs for a particular item or service are placed with a contractor by a simple order. Each order incorporates the terms and conditions of the basic requirements contract under which the order is placed. Procuring activities using this contract form shall stipulate a maximum quantity beyond which the contractor is not obligated to deliver the items that may be ordered under the contract. In addition, where possible, such contracts shall obligate the Department, by guarantee or otherwise, to order some stated minimum amount of the item in question, thus converting it to an indefinite quantity contract as defined in § 1–3.409(c) of this title. This will thereby protect the Department in the event of drastic changes in the demand or supply of the item or in the event of a technological breakthrough. In the absence of an obligation on the Department to procure a minimum quantity, funds are only obligated when a particular order is placed. The order, therefore, becomes the obligating document and must contain appropriation symbols and dollar amounts.

(c) *Indefinite quantity contract.* When used, this contract can only obligate funds covering the low (i.e., the minimum or guaranteed) end of the range of quantities the Department can purchase. Where there is no obligation on the Department to procure a minimum quantity and where payment is to be made from a central revolving fund (e.g., "Working Capital Fund"), the basic contract award shall state that the appropriation data cited is not for the purpose of indicating the obligation, but rather that the money reserved for the purpose of paying invoices under the contract is being identified.

71. The table of contents for Subpart 29–3.6 is amended to add a new § 29–3.604–5 entitled "Limitations" and reads as follows:

Subpart 29–3.6—Small Purchases

29–3.602	Policy.
29–3.602–50	Purchasing authority.
29–3.603	Competition.
29–3.603–1	Solicitation.
29–3.603–2	Data to support small purchases.
29–3.604	Imprest funds (petty cash) method.
29–3.604–3	Agency responsibilities.
29–3.604–4	Use of imprest funds.
29–3.604–5	Limitations.
29–3.604–6	Procurement and payment.
29–3.604–50	Designation of cashiers.
29–3.604–51	Instructions for cashiers.
29–3.604–52	Accountability of imprest funds.
29–3.605	Purchase order forms.
29–3.605–3	Agency order forms.
29–3.605–50	Cancellation of purchase orders.
29–3.605–51	Duplicate purchase orders.
29–3.606	Blanket purchase arrangements.
29–3.606–1	General.
29–3.606–3	Establishment of account.
29–3.606–4	Documentation.

72. Paragraph (b) of § 29–3.602–50 is amended to update references and reads:

§ 29–3.602–50 Purchasing authority.

* * * * *

(b) *Delegations.* See § 29–1.401(c) of this chapter.

73. Paragraphs (a) and (c) of § 29–3.603–1 are revised to read as follows:

§ 29–3.603–1 Solicitation.

(a) Quotations or offers for purchases estimated not to exceed $5,000 may be solicited by use of written request, telegrams, telephone, or "in-person" contact, whichever is considered by the purchasing officer to be the most appropriate for the particular transaction. Quotations or offers for purchases estimated to exceed $5,000 must be in writing and in accordance with § 1–3.603–1(d) of this title and § 1–16.201 entitled "Request for Quotations."

* * * * *

(c) In the absence of urgency, and where the estimated dollar amount of the purchase is between $1,000 and $10,000, quotations shall be obtained from at least three sources of supply.

74. Section 29–3.604–4 is revised to incorporate the GSA authorization to use the imprest fund to make payments to common carriers and reads:

§ 29–3.604–4 Use of imprest funds.

Purchases made from imprest funds shall follow the policy of purchasing satisfactory merchandise at fair prices without favoritism to any vendor. The item to be purchased, its price, and the quantity involved generally govern the action to be taken. If a special item costing only a few dollars is required, a minimum amount of time and expense should be devoted to consummating the transaction. However, where feasible, purchases should be made from firms offering prices most advantageous to the Department. A vendor may be reimbursed by a payment from imprest funds for the cost of the supplies and the parcel post or other delivery charges which the vendor has already prepaid. Payments to common carriers for line haul transportation are allowable up to $100.00.

75. Section 29–3.604–5 is added and reads as follows:

§ 29–3.604–5 Limitations.

Officials responsible for small purchases should consider the use of imprest fund procedures for purchases amounting to $150 or less.

76. Section 29–3.604–6 is amended to change organization terms and correct typographical errors in paragraphs (a) through (e) which read as follows:

§ 29–3.604–6 Procurement and payment.

Purchases through use of imprest funds shall be accomplished as follows:

(a) Requisitioning offices shall submit a requisition, D/L Form 1–1, to the Department's imprest fund cashier showing necessary information such as estimated cost, unit of issue, quantity, description, delivery requirements, and appropriation chargeable.

(b) The imprest fund cashier shall prepare D/L Form 1–110 showing appropriate information.

(c) If the method of purchase is cash upon delivery of merchandise, the vendor's representative will sign D/L Form 1–110 indicating receipt of cash and will be furnished a copy of the form. One copy shall be forwarded to the requisitioning office and the original and two copies shall be retained by the imprest fund cashier.

(d) If the method of purchase requires pickup of the merchandise, D/L Form

1–110 is to be signed by the DOL representative authorized to make the actual purchase upon receipt of the cash by this individual. One copy shall be retained by the imprest fund cashier. The original and three copies shall be submitted to the vendor who shall sign the four copies upon supplying the merchandise and receiving the cash. The vendor may retain one copy. The DOL representative shall return the original and two copies to the imprest fund cashier as well as cash register receipt, sales slip, or invoice, whichever shall be furnished by the vendor. Any excess funds are returned to the cashier at this time. One copy of D/L Form 1–110 shall be forwarded to the requisitioning office, and the imprest fund cashier shall retain the original and two copies.

(e) A purchase for which cash is advanced must be confirmed and the receipt returned not later than the fifth working day following the date of the advance; otherwise, the cashier shall take immediate action to recover the cash advanced.

* * * * *

77. Section 29–3.604–51 is amended to delete the pronoun limiting gender and to correct typographical errors and reads:

§ 29–3.604–51 Instructions for cashiers.

Prescribed procedures for operating an imprest fund are contained in the Treasury Department "Manual of Procedures and Instructions for Cashiers Operating under Executive Order No. 6166." This manual is furnished by the Treasury Department for use by each person who is designated as a cashier.

§ 29–3.605–50 [Amended]

78. Line eight of § 29–3.605–50 is amended by substituting the words "the vendor's" for the word "his."

§ 29–3.605–51 [Amended]

79. Line five of § 29–3.605–51 is amended by substituting the words "the vendor's" for the word "his."

§ 29–3.606–4 [Amended]

80. Line four of § 29–3.606–4 is amended by substituting the words "the vendor" for the word "him."

§ 29–3.705 [Amended]

81. In § 29–3.705, line three of paragraph (a) is amended by substituting the words "the contracting officer" for the word "he."

§ 29–3.707–50 [Amended]

82. In § 29–3.707–50, paragraph (b) is amended by deleting the word "his" from the next to the last line of that paragraph.

83. The table of contents for Subpart 29–3.8 is revised to add new entries and reads as follows:

Subpart 29–3.8—Price Negotiation Policies and Techniques

Sec.

29–3.802 Preparation for negotiation
29–3.805–50 Criteria for award.
29–3.805–51 Evaluation of technical proposals.
29–3.805–52 Competitive range
29–3.805–53 Conduct of discussions.
29–3.805–54 Selection of contractor.
29–3.809 Contract audit as a pricing aid.
29–3.809–50 Procedures.

84. Section 29–3.802 is revised and reads as follows:

§ 29–3.802 Preparation for negotiation.

(a) *General.* At no time shall a prospective offeror be advised in the Request for Proposals (RFP) or otherwise furnished the Department's cost estimate or the amount of funds it has available to effect a particular procurement. In addition, RFP's shall avoid any statement which, while not indicating a specific sum, indicates a range within which that sum may be determined. Exceptions to the above policy shall be limited to the extremely unusual circumstance wherein the parameters of a study proposal are necessarily vague. In such case, the Director, Office of Grants, Procurement and ADP Management Policy, OASAM, may authorize the publication in the RFP, or otherwise, an indication of what the Department considers an estimate of either the range in costs or professional labor time (e.g., 2 to 3 work-years) which the contractor will be required to expend to perform the work contemplated. Such range will never be narrowed to the point where the maximum is less than 50 percent more than the minimum. This exception, when authorized, shall be accompanied by suitable language in the form of a disclaimer as to any guarantee of the accuracy of the Department's estimate and inviting proposals, even if they contradict the Department's estimate, with the concomitant assurance that proposals outside the estimated range of the Government's estimate will not be rejected solely for that reason.

(b) *Request for Proposals.* (1) the RFP shall require that the proposal be in two parts: a "Technical Proposal" and a "Business Proposal." Each proposal shall be separate and complete in itself so that evaluation of one may be accomplished independently of and concurrently with the other. The RFP shall provide that the "Technical Proposal" not contain any reference to cost. However, it shall provide that resource information such as data concerning labor hours and categories, materials, subcontracts, travel, and computer time shall be included in the "Technical Proposal" so that the offeror's understanding of the scope of work may be evaluated.

(2) The instructions to the offerors concerning the "Business Proposal" shall require submission of cost information in sufficient detail to allow a complete cost analysis. (See § 1–3.807–3 of this title for requirements for cost or pricing data.) Categories and amounts of labor, materials, travel, and computer time, as well as information with regard to contractor past performance (including contracts or subcontracts for like services or supplies), financial capacity, certifications and representations, and other pertinent administrative and business information should also be requested.

(3) Evaluation criteria must be developed by technical personnel at the time of initiation of the procurement request for inclusion by the contracting officer in the RFP. These criteria and their relative importance or weight require the exercise of judgment on a case-by-case basis, since the criteria must be tailored to the requirements of each particular procurement. These criteria must be submitted to the contracting officer in sufficient time to allow for this review before the issuance of the request for proposals. Since these criteria will serve as the standards against which all proposals will be evaluated, it is imperative that they be chosen carefully to emphasize those factors considered to be critical to the selection of a contractor.

85. Section 29–3.805–50 is revised to read as follows:

§ 29–3.805–50 Criteria for award.

(a) The RFP must set forth all significant matters which affect the opportunities of suppliers to compete on an equal basis, including any special evaluation factors. Evaluation factors are defined as (1) any minimum standards which will be required with respect to any particular element of the procurement, as well as (2) reasonably definite information as to the degree of importance to be given particular factors in relation to one another. Although a mathematical formula need not be used in the evaluation process, when the numerical rating is used, the RFP must inform the offerors of the major factors to be considered and the broad scheme of scoring to be used.

(b) An example of a mathematical evaluation process is set forth herein. The evaluation factors are examples only and should be changed to meet the particular needs of the individual request for proposals.

CRITERIA FOR AWARD

Prospective suppliers are advised that the selection of an offeror for contract award is to be made after a careful evaluation of the proposals received by a panel of specialists within the Department. Each panelist will evaluate the proposals for acceptability with emphasis on the various factors enumerated below, assigning to that factor a numerical weighting within the range shown for each of these factors. The scores will then be averaged to select an offeror or develop a list of offerors.

Negotiations will be initiated, if necessary, with one or more of the offerors within the competitive range, as the situation warrants, beginning with the head of the list, i.e., the offeror with the highest score, determined by the factors shown below:

	Points
A. Supplier's collective experience as it relates to the work required by the proposed contract	1–20
B. Educaton and experience of supplier's key personnel as they relate to the work required by the proposed contract	1–20
C. Supplier's resources and facilities	1–20
D. Planned approach in accomplishing the proposed work and its indication of the supplier's understanding of the work required	1–40

NOTE.—While proposed cost will usually not be point-scored in evaluation of proposals in response to an RFP, the overall cost proposal will be analyzed and examined relative to the decision regarding the award of the procurement. The RFP should inform offerors of the cost factor's relative importance—whether the procurement is intended to achieve a minimum standard of technical excellence at the lowest cost, or whether cost is considered secondary to technical excellence.

(c) Whenever the contract is to have a fixed price, price may not be disregarded in selecting a contractor. This is particularly true where more than one acceptable offer from technically qualified sources remains for consideration after conduct of negotiations. If a lower priced, lower scored offer meets the Government's needs, acceptance of a higher priced, higher scored offer shall be supported by a specific determination by the contracting officer that the technical superiority of the higher priced offer warrants the additional cost involved in the award of a contract to that offeror.

(d) For award of cost-reimbursement contracts, the estimated costs and proposed fees shall not be the controlling factors where offerors are not substantially equal on a technical basis. However, where offerors are substantially equal as to technical ability and resources, the price becomes the controlling factor, and the contract should be awarded to the lowest offeror. The award of cost-reimbursement contracts requires procurement personnel to exercise informed judgments as to whether submitted proposals are realistic with regard to proposed costs and technical approaches.

(e) The RFP evaluation criteria shall not be modified except by a formal amendment to the RFP.

86. Section 29–3.805–51 is added and reads as follows:

§ 29–3.805–51 Evaluation of technical proposals.

(a) The technical proposals received by the contracting officer shall be forwarded to the technical evaluators for evaluation; the business portion of the proposals shall be retained by the contracting officer for evaluation.

(b) The technical evaluators shall evaluate each proposal in strict conformity with the evaluation criteria of the RFP and shall assign each proposal a score. A technical ranking shall then be compiled. The technical evaluators shall then identify each proposal as either acceptable or unacceptable. Predetermined cutoff scores shall not be employed.

(c) The technical evaluators shall then determine whether any proposal which has been rated as unacceptable might be considered acceptable upon the furnishing of clarifying data by the offeror, and the contracting officer will be so informed. The contracting officer will arrange for the submission of clarifying data in writing or by consultation, and furnish it to the technical evaluators for their consideration.

(d) It is essential to the competitive procurement process that all information contained in offerors' proposals be maintained in strict confidence. In no event, during the evaluation period, shall any offeror be told the number of proposals received, prices, cost ranges, or the Government cost estimate. Discussions with offerors relative to any aspect of the procurement shall be held only with the contracting officer or his authorized representative.

(e) A technical evaluation report shall be prepared and signed by the technical evaluators, furnished to the contracting officer, and maintained as a permanent record in the contract file. The report shall reflect the scoring of each proposal and the ranking of the proposals, and shall identify each proposal as acceptable or unacceptable. The report shall also include a narrative evaluation specifying the strengths and weaknesses of each proposal, and any reservations or qualifications that might bear upon the selection of sources for negotiation and award. Concrete technical reasons supporting a determination of unacceptability with regard to any proposal shall be included.

87. Section 29–3.805–52 is added and reads as follows:

§ 29–3.805–52 Competitive range.

The competitive range consists of the proposals of those offerors which, based either on an evaluation by a mathematical formula or by other means, are grouped more or less at the same level and are competitive with one another. In all cases it is important that the criteria used in establishing a competitive range be meaningful and realistic and in no way arbitrary. Determining firms which are and firms which are not within a competitive range is a matter of administrative discretion which must be exercised in a reasonable manner. A determination of the limits of the competitive range requires the comparison of each proposal against the other proposals. Therefore, there is no way to predetermine the number of or percentage of proposals that will be competitive with one another. The limits of what constitutes competitive range in a particular case is a judgment matter for determination by the contracting officer. Such discretion will be reasonable and justified and shall not be exercised in an arbitrary or capricious manner.

88. Section 29–3.805–53 is added and reads as follows:

§ 29–3.805–53 Conduct of discussions.

(a) In accordance with § 1–3.805–1(a) of this title, where discussions or other negotiations are to be conducted, the contracting officer must negotiate regarding the work to be performed, the cost or price of the work, and other relevant topics with all those offerors within the competitive range.

(b) The contracting officer shall point out to each such offeror the ambiguities, uncertainties, and deficiencies, if any, in its proposal. This official shall give each offeror a reasonable opportunity (with a common cutoff date for all) to support, clarify, correct, improve, or revise its proposal. Discussions with one offeror will not identify areas in which another has apparently achieved a higher evaluation or provided more detail. Nor will information be transmitted by the Government which could give one offeror a competitive advantage over another. Cost estimates made by the Government will not be disclosed.

(c) Careful judgment will be exercised in determining the extent of discussions. In some cases, good business practice may require more than one round of discussions with all of the offerors within the competitive range. The time available, the expense and administrative limitations, and the size and significance of the procurement should all be considered in deciding on the type, duration, and depth of the discussions.

(d) In order to terminate negotiations properly, the contracting officer shall advise each offeror within the competitive range that (1) negotiations are being conducted, (2) offerors are being asked for "best and final offer," not merely to confirm or reconfirm prior offers, and (3) any revision or modification of proposals must be submitted by the cutoff date.

89. Section 29–3.805–54 is added and reads as follows.

§ 29–3.805–54 Selection of contractor.

After the close of discussions and the receipt of any addenda to proposals, the contracting officer shall determine whether another technical evaluation is required prior to award. The contracting officer shall then select for award the offeror or offerors whose proposal(s) offers the greatest advantage to the Government, cost or price, technical and other factors considered.

90. Section 29–3.809–50 is revised to read as follows:

§ 29–3.809–50 Procedures.

The Assistant Secretary for Administration and Management shall perform or obtain reviews of indirect cost data in the establishment of provisional and fixed overhead rates and the performance of audits as a pricing aid upon request of a head of a procuring activity. All such requests shall be in writing and shall be directed to the Director of Audit and Investigations in Washington, D.C. or to the Regional Administrator for Audit in the regions. Requests shall (a) describe the problem, (b) specify the purpose to be served by the audit, and (c) indicate the audit scope and depth desired.

91. Part 29–12 is revised to correct errors in assigned subpart and paragraph numbers, to delete pronouns limiting gender, and to update organizational information, and reads as follows

PART 29–12—LABOR

Subpart 29–12.12—Williams-Steiger Occupational Safety and Health Act of 1970

Sec.

29–12.1250 Scope of subpart.
29–12.1251 Basic protection
29–12.1252 Applicability.
29–12.1253 Contract clause.
29–12.1254 Notice of award.

AUTHORITY: 80 Stat. 379, 5 U.S.C. 301; sec. 207, 76 Stat. 29, 42 U.S.C. 2587; sec. 602, 78 Stat. 528, 42 U.S.C. 2942; and sec. 204(a), 81 Stat. 888, 42 U.S.C. 639.

Subpart 29–12.12—Williams-Steiger Occupational Safety and Health Act of 1970

§ 29–12.1250 Scope of subpart.

This subpart extends the standards and policies of the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 et seq.) to persons who are receiving occupation or job training under Department of Labor contracts but who are not employees of the contractor.

§ 29–12.1251 Basic protection.

The Occupational Safety and Health Act of 1970 provides the following basic protection for employees:

(a) It requires the employer to furnish to each employee employment and a place of employment which are free from recognized hazards that are causing or are likely to cause death or serious physical harm to the employees.

(b) It requires the employer to comply with occupational safety and health standards promulgated under the Act which are published in Chapter XVII of Title 29, Code of Federal Regulations.

§ 29–12.1252 Applicability.

The Department of Labor shall require its contractors providing occupational and job preparation training to persons who are not employees to protect such persons as though they were employees with respect to the provisions of Federal or State occupational safety and health standards, as applicable.

§ 29–12.1253 Contract clause.

The following clause shall be included in all contracts with the Department of Labor which provide for occupational or job preparation training (including basic education, counseling, personal and cultural development, recreational activities, and work-experience training) when the trainees are not employees of the contractor:

OCCUPATIONAL SAFETY AND HEALTH ACT

(a) In the performance of this contract, the contractor agrees to provide all trainees, who are not employees, with safety and health protection which shall be at least as effective as that which would be required under the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 et seq.) if the trainees were employees of the contractor thereunder.

(b) All records pertaining to injuries and illnesses of trainees who are not employees shall be maintained in accordance with the provisions of Part 1904 of Title 29 of the Code of Federal Regulations.

(c) Contractor agrees to include the substance of this clause in all subcontracts which provide for the training of persons who are not employees of the subcontractor.

(d) Failure of the contractor to comply with the provisions of this clause shall be grounds for the termination of this contract or the invocation of the "Debarred, Suspended, and Ineligible Bidders" procedures of the Federal Procurement Regulations and the Department of Labor Procurement Regulations.

§ 29–12.1254 Notice of award.

Contracting officers of the Department of Labor shall submit a notice of award of a contract containing the clause in § 29–12.1253 to the Occupational Safety and Health Administration (OSHA) Regional Administrator within the region where the contract is to be performed at the following addresses:

REGION I

Regional Administrator, OSHA, U.S. Department of Labor, John F. Kennedy Federal Building, Government Center, Room 1804, Boston, Mass. 02203.

REGION II

Regional Administrator, OSHA, U.S. Department of Labor, 1515 Broadway (1 Astor Plaza), Room 3455, New York, NY 10036.

REGION III

Regional Administrator, OSHA, U.S. Department of Labor, Suite 2100, 3535 Market Street, Philadelphia, PA 19104.

REGION IV

Regional Administrator, OSHA, U.S. Department of Labor, 1375 Peachtree Street, N.E., Suite 587, Atlanta, GA 30309.

REGION V

Regional Administrator, OSHA, U.S. Department of Labor, 230 S. Dearborn Street, Room 3263, Chicago, IL 60604.

REGION VI

Regional Administrator, OSHA, U.S. Department of Labor, Room 602, 555 Griffin Square Building, Dallas, TX 75202.

REGION VII

Regional Administrator, OSHA, U.S. Department of Labor, 911 Walnut Street, Room 3000, Kansas City, MO 64106.

REGION VIII

Regional Administrator, OSHA, U.S. Department of Labor, Room 15010, 1961 Stout Street, Denver, CO 80202.

REGION IX

Regional Administrator, OSHA, U.S. Department of Labor, Room 9470, Federal Building, 450 Golden Gate Avenue, San Francisco, CA 94102.

REGION X

Regional Administrator, OSHA, U.S. Department of Labor, Room 6048, 909 First Avenue, Seattle, WA 98174.

PART 29–26—CONTRACT MODIFICATIONS

92. Section 29–26.400 is amended to correct an FPR reference and to provide for changes in organizational terms, and reads as follows:

§ 29–26.400 Scope of subpart.

This subpart prescribes the policy and procedures for execution of novation agreements and change of name agreements by a single Agency and novation or change of name agreements affecting more than one Agency. (See also § 1–30.710 of this title on assignment of claims in case of transfers of business or corporate mergers.)

93. Section 29–26.404–50 is amended to provide for changes in organizational titles and terms and reads as follows:

§ 29–26.404–50 Processing novation and change of name agreements.

(a) The Agency(ies) processing a proposed novation agreement shall promptly provide notice of the proposed agreement, including lists of affected contracts which are required by § 1–26.402(c)(2) of this title, to the Agencies having contracts with the contractor or contractors concerned. Such notice shall be transmitted to the addresses listed herein as appropriate:

Directorate of Administrative Programs and Services, OASAM, Attn: ACBB.
Office of Policy, Evaluation and Research, Employment and Training Administration, Attn: TP.
Office of National Programs, Employment and Training Administration, Attn: TDX.
Office of Field Operations, Employment and Training Administration, Attn: TG.
Regional Coordination Staff, OASAM, Attn: AH.
Bureau of International Labor Affairs, Attn: IA.
Bureau of Labor Statistics, Attn: BA.

(b) All novation agreements and change of name agreements, prior to execution by the Department, shall be reviewed by the Solicitor's Office for legal sufficiency.

(c) If the Agency(ies) does not object to the proposed novation agreement within 30 days after receipt of notice, the initiating Agency shall assume acceptance of the proposed agreement.

(d) When more than one Agency has outstanding contracts with the contractor or contractors, a single agreement covering all such contracts shall be executed by the Agency having the largest unsettled dollar balance with the contractor or contractors.

(e) A signed copy of the executed novation agreement or change of name agreement shall be forwarded to the contractor; a signed copy shall be retained in the Agency executing the agreement; and, where more than one Agency is involved, two conformed copies of the agreement shall be prepared for each affected Agency. In addition, there shall be attached to each of the conformed copies of the agreement for each affected Agency a summary of the agreement and a complete list of the contracts affected.

PART 29–51—PROVISIONS REGARDING AWARDS TO CONTRACTORS AND GRANTEES EMPLOYING FORMER DEPARTMENT OF LABOR EMPLOYEES

94. Part 29–61 is deleted in its entirety.

Signed at Washington, D.C., this 1st day of August 1977.

ALFRED M. ZUCK,
Assistant Secretary for Administration and Management.

[FR Doc.77–22784 Filed 8–8–77;8:45 am]

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 100a—DIRECT PROJECT GRANT AND CONTRACT PROGRAMS

PART 194—PUBLIC SERVICE EDUCATION PROGRAMS

Award of Institutional Grants and Fellowships

AGENCY: U.S. Office of Education, HEW.

ACTION: Final regulation.

SUMMARY: The Commissioner issues final regulations (45 CFR Part 194) to establish rules, procedures, and criteria governing the award of Institutional Grants and Fellowships to improve Public Service education.

EFFECTIVE DATE: Pursuant to section 431(d) of the General Education Provision Act, as amended (20 U.S.C. 1232 (d)), this regulation has been transmitted to the Congress concurrently with the publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

FOR FURTHER INFORMATION CONTACT:

Dr. Louis J. Venuto, Bureau of Higher and Continuing Education, 7th and D Streets, SW, Regional Office Building 3, Room 3036, Washington, D.C. 20202. telephone 202–245–8082.

SUPPLEMENTARY INFORMATION: 1. *Public participation.* One written comment to the proposed regulation was received. The commentor suggested that the funding criteria for Institutional Grant awards be revised to indicate that a project can be part of an educational program which prepares persons for leadership and management positions in "institutions." The Commissioner believes that the use of the word "institutions" in this context is too vague However, the regulation has been amended (see § 194.8(c)(3) and 194.30(c)(12)) to indicate that the program may prepare persons for leadership and management positions in non-profit community service agencies.

The same commentor suggested that § 194.8(c)(V) be revised to give special consideration to education programs that have arrangements with "institutions." The Commissioner believes that this section is sufficiently clear, and no changes, therefore, have been made.

2. *Revision of stipend and institutional allowance amounts.* The statute requires the Commissioner to pay such stipends (including such allowances for subsistence and other expenses for fellows and their dependents) as he may determine to be consistent with prevailing practices under comparable federally supported programs. The proposed regulation set the annual stipend at $3,600; the annual dependency allowance for each qualified dependent at $300; and the annual institutional allowance for each fellow at $3,600. To achieve consistency with other comparable federally supported programs and to conform with departmental policy, dependency allowances are being eliminated and the stipend and institutional allowance are both being set at $3,900 in the final regulation.

3. *Format change.* The proposed regulations were publisted in separate Parts. Part 194 was designated to cover the Institutional Grants while Part 195 was designated for the Fellowships. In the final regulations, these two Parts have been merged into one Part 194 to cover both the Institutional Grants and the Fellowships.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

(Catalog of Federal Domestic Assistance Program No. 13.555; Public Service Education Programs.)

Dated: June 27, 1977

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: August 2, 1977

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare.

Title 45 of the Code of Federal Regulations is amended as follows

1. In Part 100a § 100a.10(a) is revised by substituting a period (".") for semicolon (";") at the end of each subparagraph, by deleting the word "and" where it appears at the end of subparagraphs (31) and (36), and by adding a new subparagraph (37). As amended § 100a.10 reads as follows:

§ 100a.10 Scope.

(a) Programs. Unless inconsistent with a statute or regulation, the regulations in this part apply to the following programs:

* * * * *

(37) Public service education grants under Title IX–A of the Higher Education Act of 1965, as amended (20 U.S.C. 1134 et seq.)

* * * * *

2. A new Part 194 is added, to read as follows:

Subpart A—Public Service Institutional Grants

Sec.
194.1 Definitions
194.2 General provisions regulations.
194.3 Purpose.
194.4 Institutional eligibility
194.5 Award procedure
194.6 Authorized activities
194.7 Grant limitations
194.8 Criteria for evaluating applications and considerations for awarding grants to institutions of higher education

Subpart B—Public Service Fellowships

194.21 Definitions
194.22 Purpose
194.23 Award procedure
194.24 Eligibility for fellowships
194.25 Fellowship conditions
194.26 Vacated fellowships.
194.27 Amount of the fellowship.
194.28 Institutional allowance.
194.29 Payment procedure.
194.30 Criteria for allocating fellowships to institutions of higher education
194.31 Application requirements.
194.32 Records and reports.

AUTHORITY: Title IX, Parts A and C sections 901–904 and 941–944 of Pub. L. 89–329, as amended (20 U.S.C. 1134–1134c; 1134i–1134m), unless otherwise noted.

Subpart A—Public Service Institutional Grants

§ 194.1 Definitions.

As used in this Subpart:

"Act" means the Higher Education Act of 1965, as amended.

"Institution of higher education" is defined in section 1201 (a) of the Act (20 U.S.C. 1141(a)).

"Project" means the activity or a combination of activities for which an institutional grant is requested.

"Internship means a supervised administrative experience which provides the student with a practical introduction to a career in public service.

"Public service education" means the preparation for leadership and management careers in all levels of government and in nonprofit community service organizations.

(20 U.S.C. 1134.)

§ 194.2 General provisions regulations.

Assistance under Title IX, Part A of the Act is subject to applicable provisions contained in subchapter A of this chapter (relating to fiscal, administrative, property management, and other matters).

(20 U.S.C. 1134.)

§ 194.3 Purpose.

Assistance provided under this part shall be used to establish, strengthen, and improve programs designated to prepare graduate and professional students for public service.

(20 U.S.C. 1134(a)(2).)

§ 194.4 Institutional eligibility.

Institutions of higher education which have graduate or professional programs leading to a master's or more advanced degree in public service education are eligible to apply.

(20 U.S.C. 1134a(a).)

§ 194.5 Award procedure.

(a) Grants will be made on the basis of applications submitted by eligible institutions. An application shall describe a program of activities for carrying out the purposes of this part.

(b) An application shall provide assurances that the institution has notified the appropriate State Commission (established or designated under section 1202 of the Higher Education Act of 1965, as amended) and that the State Commission has been given the opportunity to offer recommendations on the application to the institution and to the Commissioner.

(c) Applications will be evaluated on the basis of the criteria set forth in § 194.8.

(20 U.S.C. 1134a.)

§ 194.6 Authorized activities.

Funds are to be used solely for the purposes stated in § 194.3. In meeting these purposes the funds may be used for the following activities:

(a) Faculty improvement;

(b) The expansion of graduate and professional programs of study;

(c) The acquisition of appropriate instructional equipment and materials;

(d) Cooperative arrangements among graduate and professional schools;

(e) The strengthening of graduate and professional school administration;

(f) The development of proposed graduate professional programs; and

(g) Needed innovation in graduate and professional programs.

(20 U.S.C. 1134(b).)

§ 194.7 Grant limitations.

Funds provided under this part shall not be used for:

(a) Payment in excess of 66⅔ percent of the total cost of the project or activity described in the institution's application;

(b) Payment in excess of 50 percent of the cost of the purchase or rental of books, audiovisual aids, scientific apparatus, or other materials or equipment, less any percent of that cost, as determined by the Commissioner, which is paid from sums received (other than under this part) as Federal financial assistance;

(c) Sectarian instruction or religious worship, or primarily in connection with any part of the program of a school or department of divinity;

(d) Construction or renovation of buildings; or

(e) Fellowship assistance for students.

(20 U.S.C. 1134b (a), (c).)

§ 194.8 Criteria for evaluating applications and considerations for awarding grants to institutions of higher education.

The Commissioner shall take into account the following considerations when evaluating applications for institutional grants. These criteria replace the general criteria for direct project grant and contract programs contained in 45 CFR 100a.26(b).

(a) The extent to which the institution requests funding of activities which received assistance under this part during the preceding fiscal year but have not been completed, provided there has been substantial progress in meeting the original goals;

(b) The extent to which funding the application will assist in attaining a wider distribution throughout the United States of high quality public service education programs;

(c) The extent to which the proposed project ranks high on the criteria set forth below, with the maximum point score for each criterion as shown:

(1) It is likely to result in establishing, strengthening or improving a program which prepares graduate and professional students for public service; (20 points)

(2) The educational and other related experiences of the personnel conducting the activity or activities qualify them to plan or participate in the project, and the director is given clear responsibility, ample time, and sufficient authority; (15 points)

(3) It is related to, or is part of, an academic program which prepares persons for leadership and management positions in local and State governments and non-profit community service agencies, and for positions in program administration involving intergovernmental relations; (10 points)

(4) It is especially imaginative and innovative; (10 points)

(5) The budget is realistic in relation to its successful implementation; (10 points)

(6) It is consistent with State and regional priorities; (10 points)

(7) Procedures are planned to measure its effectiveness; (5 points) and,

(8) The overall academic program of public service education is strong enough to assure the success of the proposed project when measured by such criteria as the following: (20 points)

(i) There is a clear statement of program objectives;

(ii) Institutional resources such as facilities, equipment, and libraries are adequate;

(iii) The multidisciplinary background, education, and research ability of the faculty are of high quality;

(iv) The program offers opportunities for relevant, supervised practicum and internship experiences;

(v) The program has arrangements with government agencies or jurisdictions or other nonprofit agencies for such activities as program development, personnel exchange, and field work;

(vi) The program involves other graduate units of the institution in supportive or cooperative efforts of practical benefit to public service education; and

(vii) Graduates of the program have achieved leadership and management positions in public service careers.

(20 U.S.C. 1134a; 1134b (a).)

Subpart B—Public Service Fellowships

§ 194.21 Definitions.

As used in this Subpart:

"Fellowship" means an award by the Commissioner to an individual.

"Fellow" means a fellowship recipient.

"Institution of Higher Education" is defined in section 1201(a) of the Act (20 U.S.C. 1141(a)).

"Internship" means a supervised administrative experience which provides the student with a practical introduction to a career in public service.

"Public service education" means the preparation for leadership and management careers in all levels of government and in nonprofit community service organizations.

(20 U.S.C. 1134i.)

§ 194.22 Purpose.

The purpose of this program is to award fellowships for graduate or professional study for persons who plan to pursue or continue in a career in public service.

(20 U.S.C. 1134i.)

§ 194.23 Award procedures.

(a) Fellowships are allocated to institutions of higher education which apply for a fellowship allocation and which offer a graduate or professional program in public service education meeting the criteria described in § 194.30. Institutions receiving such an allocation shall recommend eligible students to the Commissioner for the award of fellowships.

(b) Fellowships will be awarded to cover a period of nine to twelve months of study. Individuals who are currently receiving a fellowship under this part or who have received a fellowship in the past but have interrupted their study for a period not to exceed twelve months for the purposes of work, travel, or independent study away from the campus that is supportive of the fellows' academic program are eligible to receive additional fellowships to continue study. No individual may receive assistance under this part for more than thirty-six months except that the Commissioner may award a fellowship for an additional twelve month period to allow a student who has completed all course work and comprehensive examinations (if any) for a doctoral degree to complete his or her doctoral dissertation.

(20 U.S.C. 1134i; 1134j; 1134k.)

§ 194.24 Eligibility for fellowships.

A recipient of a fellowship under this part must: (a) Have been accepted for graduate or professional study at an institution of higher education that has received an allocation of fellowships under this part;

(b) Plan to pursue a career in the public service; and

(c) Be a national of the United States or be in the United States for other than a temporary purpose and intend to become a permanent resident thereof, or be a permanent resident of the Trust Territories of the Pacific Islands.

(20 U.S.C. 1134i; 1134j.)

§ 194.25 Fellowship conditions.

In order to remain eligible for a fellowship, a fellow must: (a) Maintain satisfactory proficiency in the approved program in which he or she is enrolled;

(b) Continue to devote full-time study or research in the field in which the fellowship was awarded; and

(c) Not engage in gainful employment during the period of the fellowship, except in an internship or other activity which is under the supervision of the institution which awarded the fellowship and is related to the approved program.

(20 U.S.C. 1134m(a) (b).)

§ 194.26 Vacated fellowships.

If a fellowship is vacated prior to the end of a period for which it was awarded, the institution to which the fellowship is allocated may recommend to the Commissioner another individual to receive the fellowship. This individual must meet all the eligibility requirements set forth in § 194.24. The duration of a reawarded fellowship shall be for a period of graduate or professional study not in excess of the remainder of the period for which the fellowship it replaces was awarded.

(20 U.S.C. 1134i.)

§ 194.27 Amount of the fellowship.

(a) The stipend to which a fellow is entitled will be $3,900 for an academic year of twelve months.

(b) A fellow who is enrolled in the program of study for less than twelve months shall only be entitled to receive a pro rata share of these amounts. For the purposes of this section, a fellow who is enrolled in the program for the entire academic year (including summer sessions) shall be considered to be enrolled in the program for the full twelve months.

(20 U.S.C. 1134i(a).)

§ 194.28 Institutional allowance.

The institution of higher education at which the fellow is pursuing his or her course of study shall be paid $3,900 per twelve month period, except that any amount charged to and collected from the fellow by the institution for tuition and other expenses required by the institution as part of the fellow's instructional program shall be deducted from this amount. If the fellow is enrolled for less than 12 months, the institution will be paid a pro rata share of this amount.

(20 U.S.C. 1134i (b).)

§ 194.29 Payment procedure.

(a) The Commissioner will pay to the approved institution of higher education the fellowship stipend and the institutional allowance for each fellowship allocated to that institution. The institution is responsible for disbursing all funds due to the fellow.

(b) The timing of payments to fellows will be left to the discretion of each institution of higher education except that no fewer than two payments a year shall be made. Institutions are responsible for recovery of excess payments made to students who, for any reason, fail to complete the academic year for which they are enrolled.

(20 U.S.C. 1134i (b).)

§ 194.30 Criteria for allocating fellowships to institutions of higher education.

The Commissioner shall take into account the following considerations in evaluating applications from institutions of higher education for fellowship allocations:

(a) The extent to which an application requests fellowships for the continuation of support for individuals awarded fellowships in a previous year;

(b) The extent to which funding the application will assist in attaining a wider distribution throughout the United States of graduate centers for study in public service; and

(c) The extent to which the graduate program of public service education ranks high (calculated according to maximum point scores as shown) on the criteria set forth below:

(1) The need for and the objectives of the public service program are justified in the application (15 points).

(2) Procedures are planned to measure the effectiveness and success of the program (5 points).

(3) Evidence is provided which demonstrates past success of graduates, if any, from the program in achieving leadership and management positions in public service careers (5 points).

(4) Institutional resources such as facilities, equipment, and libraries are adequate to support the program (5 points).

(5) The multidisciplinary background, education, research interests, and experiences of the faculty qualify them to plan and implement a successful program of public service education (15 points)

(6) The director of the program has clear responsibilities and sufficient time to devote to the program (5 points).

(7) The academic requirements are sufficient to support a high quality program (10 points).

(8) The program offers opportunities for relevant, supervised practicum and internship experiences (10 points).

(9) The program establishes arrangements with government agencies or other nonprofit agencies for such activities as program development, personnel exchange, and field work (10 points).

(10) The program will involve other graduate units of the institution in supportive or cooperative efforts of practical benefit to public service education (5 points).

(11) The program is especially imaginative or innovative and gives promise of leading to significant improvement in public service education (5 points).

(12) The program is designed to prepare persons for entry into leadership and management positions in local or State government and non-profit community service agency administration or in intergovernmental relations for which a master's degree is generally the educational level required (10 points).

(20 U.S.C. 1134k (1), (2); 1134j(4).)

§ 194.31 Application requirements.

Each application for a fellowship allocation by an institution of higher education must describe the institution's public service education program. The description should address each of the criteria set forth in § 194.30. In addition, the application must:

(a) Describe the relation of the graduate or professional program of public service education to any program activity, research or development set forth by the applicant in an application, if any, submitted pursuant to section 901 (a)(2) of the Act;

(b) Contain satisfactory assurance that:

(1) The institution will recommend to the Commissioner, for the award of fellowships under this part, for study in such program, only persons of superior promise who have demonstrated to the satisfaction of the institution a serious intent to enter or continue in the public service upon completing the program; and

(2) The institution will make continuing efforts to encourage recipients of fellowships under this part, enrolled in the program, to enter or continue in the public service upon completing the program.

(20 U.S.C. 1134k (3), (4).)

§ 194.32 Records and reports.

Each institution of higher education which receives an allocation of fellowships under this part, and each individual who is awarded a fellowship, shall keep records and submit reports which are required by the Commissioner. These reports shall include a certificate from an appropriate official at the institution of higher education, library, archive, or other research center whose program is approved by the Commissioner, stating that the fellow is making satisfactory progress in, and is devoting essentially full time to, the program for which the fellowship was awarded.

(20 U.S.C. 1134m(b).)

[FR Doc.77-22810 Filed 8-8-77;8:45 am]

PART 173—COMMUNITY SERVICE AND CONTINUING EDUCATION

Funding Priorities for Special Projects

AGENCY: Office of Education, HEW.

ACTION: Final Regulation.

SUMMARY: This regulation sets forth funding priorities for the Special Projects portion of the Community Service and Continuing Education Program. Priorities for Special Projects are determined annually by the Commissioner after consultation with the National Advisory Council on Extension and Continuing Education, and, to comply with program regulations, must be published in the FEDERAL REGISTER. These priorities will govern the review of applications for new awards submitted by institutions of higher education, or combination of institutions.

EFFECTIVE DATE: Pursuant to section 431(d) of the General Education Provision Act as amended (20 U.S.C. 1232(d)), this regulation has been transmitted to the Congress concurrently with the publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

FOR FURTHER INFORMATION CONTACT:

Dr. J. Eugene Welden, Chief Community Service and Continuing Education Branch, Bureau of Higher and Continuing Education, 7th and D Streets SW., Washington, D.C. Telephone 202-245-9868.

SUPPLEMENTARY INFORMATION: Under section 106 of the Higher Education Act of 1965, as amended, the Commissioner may make grants to, or contracts with institutions of higher education or combinations of institutions to assist them in carryng out special programs and projects of community service and continuing education, including resource materials sharing, designed to seek solutions to national and regional problems relating to technological and social changes and environmental pollution.

There are statutory definitions set forth at section 102 of the Act, as amended (20 U.S.C. 1002) for continuing education and resource materials sharing which have not been codified to 45 CFR Part 173. The Commissioner believes that this regulation should therefore provide the statutory definitions to potential applicants. They are:

"Continuing education program" means postsecondary instruction designed to meet the educational needs and interests of adults, including the expansion of available learning opportunities for adults who are not adequately served by current educational offerings in their communities.

"Resource materials sharing program" means planning for the improved use of existing community learning resources by finding ways that combinations of agencies, institutions, and organizations can make better use of educational materials, communications technology, local facilities, and such human resources as will expand learning opportunities for adults in the area being served.

Applications for new awards are to be directed to one of several priorities which are determined each year by the Commissioner and are reviewed and evaluated using criteria which are set forth in 45 CFR Part 100a and Part 173, Subpart C.

Response to comments received. The priorities were published in proposed form in the FEDERAL REGISTER on April 4, 1977, Vol. 42, No. 64, p. 17889. Comments on the proposed priorities were received for a 45 day period after the proposed rule was published. The following are summaries of the relevant comments received and the Commissioner's responses to the comments.

Comment. One commenter suggested that it was unfair of the Commissioner to limit eligibility for funding under the Special Projects program to institutions of higher education since other types of organizations are providers of continuing education programs.

Response. The Commissioner does not argue that there are worthy continuing education programs offered through a number of types of organizations. The statute, however, specifically notes that under the Special Projects authority, eligible applicants are limited to institutions of higher education and combinations of institutions of higher education.

Comment. One commenter questioned the limitation for funding to problems of national or regional significance. The commenter suggested that the priorities be redirected to address problems at the local level.

Response. The priorities which have been developed are based on the statute authorizing the Special Projects program. The law specifies that special programs and projects are to be designed to seek solutions to national and regional problems relating to technological and social changes and environmental pollution. Programs designed to solve problems at the State and local levels may be supported by the State Grant portion of the Community Service and Continuing Education program.

After consideration of the comments received, the Commissioner has decided that there are no changes necessary in the priorities which had been proposed.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Catalog of Federal Domestic Assistance Number 13.557; Higher Education University Community Service—Special Projects.)

Dated: July 7, 1977.

ERNEST L. BOYER,
Commissioner of Education.

Approved: August 2, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare.

Part 173 of Title 45 of the Code of Federal Regulations is amended by adding an Appendix A, to read as follows:

Appendix A—Funding Priorities for Special Projects

Applications for new awards for Fiscal Year 1977 must be directed to one of the following priorities (attention may be given within the scope of any of the priorities to the special needs of particular groups, such as women or older adults):

(1) Experimentation with inter-State programs of continuing education directed to the problems of regional or national energy conservation, transportation, and/or environmental pollution;

(2) Demonstration of State and/or local government cooperation with institutions of higher education in developing, operating, and evaluating innovative educational solutions to the national problem of citizen alienation from governmental processes;

(3) Demonstration of effective regional programs of continuing education which link higher education, labor, and management in solving problems of job security, productivity, and the quality of working life; and

(4) National and regional evaluations of multi-institutional programs of continuing education for adults that are directed to the problems of employment, career mobility, and/or job re-entry. (20 U.S.C. 1005a)

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 21200; RM-2784]

PART 73—RADIO BROADCAST SERVICES

FM BROADCAST STATION IN FLORENCE, OREGON

Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and Order.

SUMMARY: Action herein assigns a Class C channel to Florence, Oregon, as its first FM assignment. Petitioner, Gentle Shepherd Broadcasting Company, states that the channel would provide for an FM station which could render significant first and second FM service and would also provide a second aural service to a substantial area. Florence would also receive its first local aural service.

EFFECTIVE DATE: September 16, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: August 3, 1977.

Released: August 4, 1977.

In the matter of amendment of § 73.202(b), table of assignments, FM Broadcast Stations. (Florence, Oregon).

1. The Commission herein considers the Notice of Proposed Rule Making, adopted April 15, 1977, 42 FR 21628 in the above-captioned proceeding, instituted in response to a petition filed by Gentle Shepherd Broadcasting Company ("petitioner"). The petition proposed the assignment of Class C Channel 284 as a first FM channel to Florence, Oregon. Petitioner filed supporting comments in which it reaffirmed its intention to apply for the channel, if assigned.

2. Florence (pop. 2,246) in Lane County (pop. 213,358) [1], is located on the mid-coast of Oregon, approximately 84 kilometers (52 miles) west of Eugene, and 211 kilometers (131 miles) southwest of Portland, Oregon. There is presently no local aural broadcast service in the community.

3. Petitioner states that the lumber industry plays a major role in the area's economy and the largest occupational grouping involves persons working in lumber, plywood and paper manufacturing. Petitioner has furnished sufficient information regarding the social, governmental and economic factors which demonstrate Florence's need for an FM channel assignment.

4. Channel 284 could be assigned to Florence, Oregon, in conformity with the minimum distance separation requirements. Twenty-one communities with populations greater than 2,000 persons would be precluded if Channel 284 were assigned to Florence, nine [2] of which have no FM assignments. Petitioner was requested to indicate in its comments whether alternate FM channels would be available for these communities. In response, it showed that all nine communities would have Class A channels available for assignment.

5. Petitioner submitted a Roanoke Rapids, 9 F.C.C. 2d 672 (1967) and Anamosa-Iowa City, 46 F.C.C. 520 (1974) showing which indicated that assuming a station on Channel 284 operating with facilities of 100 kW and an antenna height of 305 meters (1,000 feet), a first FM service would be provided to an area of 1,165 square kilometers (450 square miles) with a population of 4,574, and a second FM service to an area of 1,575 kilometers (608 square miles) with a population of 8,124. Since at night an AM station covers nearly all of the area within the FM service area no significant first aural service would be provided. However, a second aural service would be provided to an area of 1,165 square kilometers (450 square miles) with a population of 4,574. In comparison, a Class A station operating in Florence would provide a first service to an area of 140 square kilometers (54 square miles) with a population of 393 persons and a second FM service to an area of 186 square kilometers (72 square miles) with a population of 698 persons.

6. Ordinarily a Class A channel would be assigned to a community the size of Florence. However, Channel 284 would provide for an FM station which could render significant first and second FM service in addition to providing a second aural service to a substantial area. In light of this and since Florence would receive its first local aural service and alternate channels are available for assignment to the communities without FM assignments located in the precluded areas, we believe the public interest would be served by assigning Channel 284 to Florence, Oregon.

7. Authority for the action taken herein is contained in Sections 4(i), 5(d)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules.

8. In view of the foregoing, *It is ordered*, That effective September 16, 1977, § 73.202(b) of the Commission's Rules, the FM Table of Assignments, is amended with respect to the city listed below:

City	*Channel No.*
Florence, Oregon	284

9. *It is further ordered*, That this proceeding is terminated.

[1] Population figures are taken from the 1970 U.S. Census.

[2] California: Crescent City (pop. 2,586); Oregon: Altamont (15,746); Fruitdale (2,655); Myrtle Creek (2,733); Myrtle Point (2,511); Reedsport (4,039); South Medford (3,497); Sutherlin (3,070); Winston (2,468).

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, INTERIOR

SUBCHAPTER B—TAKING, POSSESSION, TRANSPORTATION, SALE, PURCHASE, BARTER, EXPORTATION, AND IMPORTATION OF WILDLIFE

PART 20—MIGRATORY BIRD HUNTING

Final Supplemental Regulations Frameworks for Shooting Hours for 1977-78 Early Hunting Seasons on Certain Migratory Game Birds in the Contiguous United States, Alaska, and Hawaii

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule prescribes final shooting hours frameworks, that is, the outer limits for hours when shooting may begin and end, for early season migratory bird hunting regulations. The Service must annually prescribe shooting hours frameworks to States. Shooting hours were excluded from the final regulations frameworks for 1977-78 early hunting seasons on certain migratory game birds in the contiguous United States, Alaska, and Hawaii pending the expiration of a public comment period on a draft environmental assessment on shooting hours. The Service has reviewed and considered all public comments on that draft environmental assessment on shooting hours. A final environmental assessment was prepared taking into consideration the comments received. On August 1, following a review of this final environmental assessment, the Director signed a negative declaration on the final environmental assessment of the proposed shooting hours regulations, concluding that the proposed action to allow migratory bird hunting within the hours of one-half hour before sunrise until sunset is not a major Federal action which could significantly affect the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969. Accordingly, States may now select and set shooting hours within the limits of these final shooting hours frameworks for their 1977-78 early season migratory bird hunting regulations.

DATES: Effective on August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

John P. Rogers, Chief, Office of Migratory Bird Management, Department of the Interior, Washington, D.C. 20240, telephone 202-343-8827.

SUPPLEMENTARY INFORMATION: On March 10, 1977, the Service published for public comment in the FEDERAL REGISTER (42 FR 13311) proposals to amend 50 CFR Part 20, with a comment period ending May 18, 1977. That document dealt with minor modifications in § 20.11 of Subpart B, the addition of § 20.40 in Subpart D, and with establishment of seasons, limits and shooting hours for migratory game birds under §§ 20.101 through 20.107 of Subpart K. On May 25, 1977, the Service published for public comment in the FEDERAL REGISTER (42 FR 26669) a second document in the series consisting of supplemental proposed rulemaking dealing specifically with a number of supplemental or modified proposals and clarification or correction of minor portions of the earlier document. On July 5, 1977, the Service published in the FEDERAL REGISTER (42 FR 34305) a third document in the series consisting of final rulemaking, dealing specifically with final frameworks (including shooting hours) relating to migratory game bird hunting in Puerto Rico and the Virgin Islands during the 1977-78 season. On July 5, 1977, the Service also published for public comment in the FEDERAL REGISTER (42 FR 34342) a fourth document in the series consisting of supplemental proposed rulemaking dealing specifically with proposed frameworks for early season migratory bird hunting regulations from which, when finalized States could select season dates and daily bag and possession limits for 1977-78 seasons. On July 22, 1977, the Service published in the FEDERAL REGISTER (42 FR 37552) a fifth document in the series consisting of final rulemaking dealing specifically with final frameworks (except shooting hours) for early season migratory bird hunting regulations in all States during the 1977-78 seasons. The present final rulemaking is the sixth in a series of proposed, supplemental, and final rulemaking documents for migratory game bird hunting regulations and deals specifically with final frameworks for shooting hours for early season migratory game bird hunting regulations in all States during the 1977-78 season. Final rulemaking for shooting hours for early season migratory game bird hunting was deferred until the completion of a final environmental assessment for proposed shooting hours regulations.

BACKGROUND INFORMATION

As noted in the July 22, 1977, FEDERAL REGISTER, Defenders of Wildlife brought suit against the Secretary of the Interior et al. in U.S. District Court, Washington, District of Columbia, (Civil Action No. 76-1443), on August 3, 1976, regarding migratory game bird shooting hours starting one-half hour before sunrise and ending at sunset. Details of the litigation and Judge Gerhard A. Gesell's declaration and instruction to the U.S. Fish and Wildlife Service were described in that FEDERAL REGISTER document (42 FR 37552).

A public hearing was held in Washington, D.C., on June 21, 1977, as announced in the FEDERAL REGISTER on May 25, 1977 (42 FR 26709), in which proposed early season migratory game bird hunting regulations, including shooting hours.

were discussed. The public was invited to participate in the hearing and/or submit written statements.

In the 1977–78 regulatory cycle, the Service set forth its rationale for its proposed shooting hours in the March 10 FEDERAL REGISTER (42 FR 13311) before Judge Gesell's declaration was rendered. It subsequently completed a draft environmental assessment on shooting hours and announced the availability of the draft assessment for public comment in the FEDERAL REGISTER dated July 15, 1977 (42 FR 36495). In preparing the environmental assessment, the Service analyzed information from waterfowl hunter observation surveys, wing collection survey receipts, and other sources. The Service actively solicited comments on the draft assessment and delivered copies of the assessment to the plaintiffs in last year's lawsuit and other environmental groups. Also, a biological opinion was issued as a result of section 7 consultation under the Endangered Species Act of 1973. This opinion resulted from over 500 man hours of consultation conducted between the Office of Endangered Species and the Office of Migratory Bird Management on the impact of migratory game bird hunting on endangered and threatened species.

In order to comply with the procedural requirements of the National Environmental Policy Act and Judge Gessel's order, the Service delayed publishing final frameworks for shooting hours relating to the early season regulations until the comment period on the shooting hours draft environmental assessment closed on July 25, 1977. Following a review of information and data in the assessment and consideration of public comments on the assessment, a final environmental assessment on shooting hours was completed on August 1, 1977. Based on that final assessment on shooting hours, the Director concluded that hunting hours beginning one-half hour before sunrise and ending at sunset for all seasons, with the exception of the September teal season when shooting hours begin at sunrise and end at sunset, do not constitute a major Federal action which would significantly affect the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969. The Director also determined that such shooting hours do not jeopardize the continued existence of endangered or threatened species nor are contrary to the conservation programs for those species.

REVIEW OF PUBLIC COMMENT AND THE SERVICE RESPONSE TO SAME

A total of 46 written comments on shooting hours as proposed in the various FEDERAL REGISTER publications (March 10, May 25, and July 5, 1977) were received as of July 15, 1977. These comments were tabulated and summarized in the July 22, 1977, FEDERAL REGISTER (42 FR 37552).

A total of 4 written comments on the draft environmental assessment on shooting hours published July 15, 1977 (42 FR 36495) were received as of July 25, 1977. Five additional written comments were received between July 26 and August 1. Although some comments were received after the close of the comment period, they were, nevertheless, considered in preparing the final environmental assessment for proposed shooting hours regulations.

Extensive written comments were received from the Wildlife Management Institute; the International Association of Fish and Wildlife Agencies on behalf of the fish and game agencies of each State; the Fund for Animals, Inc.; and the Executive Director of The Wildlife Society by the closing of the comment period (July 25). Other extensive comments were received from Defenders of Wildlife and the National Audubon Society after the comment period, but were considered prior to this final rulemaking.

Defenders of Wildlife (hereinafter Defenders) expressed the view that the draft environmental assessment failed to comply with the Court's instruction to consider the impact of early morning and late afternoon shooting hours on protected species because it did not relate the numbers of birds shot at particular hours to the species which are to be protected and to their population numbers, and because it contains no additional information regarding the amount of light necessary to make identifications. The final environmental assessment was expanded to provide more detailed analysis and discussion of the impact of shooting, during all periods of the day, upon populations of specific protected migratory game and nongame birds. The assessment shows that only a fraction of one percent of the harvest throughout the entire day consisted of protected waterfowl and non-waterfowl species, and only a fraction of this occurred during the 90-minute period in dispute.

The Service has already presented and discussed available information on the amount of light at various times of the day in relation to migratory bird hunting. The Service decided not to undertake additional studies on the amount of light necessary to make identifications during early morning and late afternoon hunting unless the assessment indicated that there was a significant problem associated with hunting at these times, or at other times of the day, that resulted in an adverse impact on the populations of protected waterfowl and non-waterfowl species or endangered species. In light of the inconsequential take of protected species during all hours of the day, it was decided that further studies on illumination in relation to species identification were unnecessary. It is therefore the view of the Service that the assessment complies with the Court's directive. The Wildlife Management Institute also commented upon the impact of shooting hours on protected waterfowl, and their comments were considered in revising the assessment.

Defenders and some other respondents stated the view that the sample size obtained by hunter performance surveys was small and the conclusions tentative. The Service believes that the sample was actually quite large (5,417 hunts were completely observed during an 8-year period) and the data very strong. The sample size is large enough to draw reasonable conclusions regarding the extent to which any shooting of protected species occurs.

Defenders questioned the representativeness of the hunter performance surveys, expressing the view that observers were subject to the same visibility restrictions as the hunters, that the observations were not concentrated in areas where protected species might be shot, and that combining years in which varying hunting regulations were applied precluded such an analysis. The Service notes that: (1) In cases where the observer had doubt about the identification of a particular shot bird, he confirmed the identification by checking birds possessed by the hunter immediately after the conclusion of the hunt. (2) The original purpose of the hunter performance surveys was to evaluate hunter performance in regard to waterfowl hunting regulations. Consequently, observations focused on areas of high hunting activity and success. The results likely reflect a higher incidence of the taking of protected species than would have been revealed had the observations been randomly distributed in both productive and unproductive hunting areas or in field shooting situations where hunters had little opportunity to shoot a species other than field feeding waterfowl. (3) The assessment was revised to more adequately reflect the impact of different years and geographic distribution of the various species upon the results presented in the draft assessment.

Defenders expressed the view that it is highly unlikely that hunters will keep a mistakenly shot protected species in the bag so that the validity of the observations is not necessarily confirmed by using a bag check. The Service was aware of this possibility when the observations were made. The Service is of the view that since hunters, unknown to themselves, were under direct observation, it is highly unlikely that they would have been able to dispose of bagged birds during the course of their hunts without the knowledge or suspicion of the observer, to such an extent as to provide reasonable grounds for questioning the accuracy of the findings derived from the observations. Since the intent of the Service in conducting the observations was to evaluate compliance with the hunting regulations, and the results were compiled, summarized, reviewed, and discussed annually for each of the eight years, it is highly unlikely that had this been a significant problem it would have gone unnoticed and unquestioned until now.

Defenders expressed the view that hunter performance survey data is inadequate in regard to the shooting of endangered species because the observations predate the Endangered Species Act of 1973. A review of the footnotes to Tables 4–6 reveals that no species presently listed as endangered or threatened was observed being shot during the period 1965–1972. The Service notes that under the Migratory Bird Treaty Act, it is illegal to shoot any migratory bird covered by any of the Migratory Bird Treaties unless specifically authorized in migratory bird hunting regulations. Thus, observers were instructed to record the shooting of any of these species including those that subsequently may have been classified as endangered. Thus, for example, if an observer had witnessed the shooting of a whooping crane in 1969 (an endangered species under the 1966 and 1969 Endangered Species Acts), it would have been in violation of the Migratory Bird Treaty Act, and would have been recorded during the hunter performance observations. It is therefore irrelevant that the taking prohibitions under the 1973 Endangered Species Act were not in existence during the data base years because the Migratory Bird Treaty Act already accorded endangered species such as the whooping crane "protected" status. Further, observers recorded the shooting of any birds whether covered by the treaty or not. For example, raptors were not covered under any of the Migratory Bird Treaties until 1972. Nevertheless, the shooting of hawks when and if observed was noted in the hunter performance observation studies.

Defenders expressed the view that the thrust of the assessment was too narrow because it allegedly focused only on the issue of "jeopardy" under section 7 of the Endangered Species Act of 1973. However, page 2 of the assessment specifically states that the purposes and objectives of the migratory bird hunting program is to "avoid the taking of endangered or threatened species so that their continued existence is not jeopardized and their conservation enhanced." Thus the focus of the assessment is broader than Defenders suggests and is in accord with the concept that conservation efforts for listed species should not be undermined by migratory bird hunting.

Further, the draft environmental assessment was supplemented by three additional studies on the impact of migratory bird hunting on endangered species. Two of these studies were conducted by the Office of Migratory Bird Management and one by a consultation team formally established under section 7 of the Endangered Species Act of 1973. The team did not limit their review to the "jeopardy" issue alone, but also considered the impact of migratory bird hunting upon the overall conservation programs established for listed species. As noted in the concluding paragraph of the consultation team's biological opinion (Attachment #3 to the Assessment), the "early season" regulations, including twilight shooting hours, do not jeopardize the continued existence of listed species nor undermine the various conservation efforts for those species. The Service is of the view that the environmental assessment, as supplemented by the 3 reviews under section 7, extensively analyzes the impact of hunting on endangered and threatened species as instructed by the Court.

Defenders commented that the draft assessment did not include a thorough discussion of bag limit violations and the alleged "overkill" that results. In response to this comment, the discussion of legal waterfowl shot in excess of the daily bag limit was expanded in the final assessment.

Several respondents expressed the view that the discussion in the section relating to social considerations was too limited. Consequently, the discussion was expanded in the final assessment in consideration of these views.

Several respondents suggested that varying shooting hour frameworks could be employed to control depredations, to reduce the kill of protected species in specific habitat types, or to further the specific management objectives of certain portions of the regulations. The discussion of Economic Impacts was not was expanded to include this possibility and its probable impacts.

Defenders expressed the view the discussion of Economic impacts was not supported by sufficient evidence. The Service notes that this subject was thoroughly described in the "Final Environmental Statement for the issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" and it was deemed unnecessary to repeat here.

Comments on the environmental assessment on shooting hours are available for public inspection during normal business hours at the Service's Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Room 2243, U.S. Department of the Interior, 18th and C Streets NW., Washington, D.C. 20240.

ENVIRONMENTAL REVIEW

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the FEDERAL REGISTER on June 13, 1975 (40 FR 24241). The final environmental assessment on shooting hours supplements the discussion on shooting hours in FES 75–54.

COMPLIANCE WITH SECTION 7 OF THE ENDANGERED SPECIES ACT OF 1973

Compliance with the Endangered Species Act, insofar as early season regulations frameworks are concerned, was described in detail in the FEDERAL REGISTER dated July 22, 1977 (42 FR 37552).

The Service's biological opinion resulting from its consultation under section 7 is considered a public document and is available for public inspection in the Office of Endangered Species at 1612 K Street, NW., Room 1100, Washington, D.C., and the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior Building, Room 2243, 18th and C Streets NW., Washington, D.C. 20240, or may be obtained by mail from these addresses.

DRAFTING INFORMATION

This final rulemaking was authored by Dr. John P. Rogers, Chief, Office of Migratory Bird Management.

REGULATIONS PROMULGATION

The Rulemaking process for migratory game bird hunting must, by its nature, operate under severe time constraints. However, the Service is of the view that every attempt should be made to give the public the greatest possible opportunity to comment on the regulations. Thus, when the proposed rulemakings were published on March 10, May 25, and July 5, and the environmental assessment on shooting hours was made available for public comment on July 15, the Service established what it believed were the longest periods possible for public comment. In doing this, the Service recognized that at the periods' close, time would be of the essence. That is, if there were a delay in the effective date of these regulations after this final rulemaking, the Service is of the opinion that the States would have insufficient time to select their shooting hours; to communicate those selections to the Service; and finally to establish and publicize the necessary regulations and procedures to implement their decisions. The Service therefore finds that "good cause" exists, within the terms of 5 U.S.C. 553(d)(3) of the Administrative Procedure Act, and these shooting hours frameworks will, therefore, take effect immediately upon publication.

Accordingly, the Service prescribes the final supplemental early season frameworks for shooting hours as follows:

Migratory game birds, except as noted below: One-half hour before sunrise until sunset daily.

Teal in September (see page 37557 of the July 22, 1977, FEDERAL REGISTER): Sunrise until sunset daily.

Mourning doves in the Eastern Management Unit (see page 37555 of the July 22, 1977, FEDERAL REGISTER): Twelve noon until sunset daily.

ECONOMIC IMPACT REVIEW

The Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Issued in Washington, D.C., August 4, 1977.

LYNN A. GREENWALT,
Director,
Fish and Wildlife Service.

[FR Doc.77-22970 Filed 8-8-77;8:45 am]

PART 26—PUBLIC ACCESS, USE, AND RECREATION

Opening of Unimak Island, Aleutian Islands National Wildlife Refuge, Alaska, to Public Access, Use and Recreation

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to public access,

use, and recreation of Unimak Island, Aleutian Islands National Wildlife Refuge, with certain restrictions as delineated below under Supplementary Information, is compatible with the objectives for which the area was established, and will provide recreational opportunity to the public.

DATE: From August 9, 1977, thenceforth until amended.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, U.S. Fish and Wildlife Service, Pouch 2, Cold Bay, Alaska 99571.

SUPPLEMENTARY INFORMATION:

§ 26.34 Special Regulations; public access, use and recreation: for individual wildlife refuge areas.

Public access, use, and recreation is permitted on Unimak Island, Aleutian Islands National Wildlife Refuge, on a year round basis, and shall be in accordance with all applicable State and Federal regulations subject to the following conditions:

1. Except in the event of emergency, the landing of aircraft is permitted only in the following areas:

A. The airstrip at the village of False Pass.

B. The airstrip at the Cape Sarichef Coast Guard Station.

C. The waters of all lakes, bays, and lagoons on or adjacent to Unimak Island.

2. Overflights by aircraft of less than 1,000 feet above ground level are prohibited.

3. The use of motorized vehicles is restricted to the established road system.

4. The use of boats driven by air thrust, commonly known as airboats, and jet boats is prohibited.

The provisions of this special regulation supplement the regulations which govern public use on wildlife refuge areas generally, which are set forth in Title 50 Code of Federal Regulations, Part 26. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: July 1, 1977.

JOHN SARVIS,
Refuge Manager.

PART 32—HUNTING

Opening of Sherburne National Wildlife Refuge, Minnesota to Public Hunting of Upland Game

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to public hunting of Sherburne National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

EFFECTIVE DATES: September 17, 1977 through February 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Route 2, Zimmerman, Minnesota 55398, Phone 612-389-3323.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

The public hunting of ruffed grouse, pheasant, grey and fox squirrels, rabbits and hares, raccoon, fox and skunk on the Sherburne National Wildlife Refuge is permitted only on the area designated by signs as open to hunting. This open area, comprising approximately 18,360 acres, is delineated on a map available at refuge headquarters, Route 2, Zimmerman, Minnesota 55398 and from the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Hunting shall be in accordance with all applicable State regulations covering the hunting of upland game subject to the following special conditions:

1. All night hunting is prohibited.
2. All motorized conveyances are prohibited from traveling off of established roads and parking areas open to such travel.
3. Parking of vehicles is restricted to designated parking areas.
4. Practice and target shooting, overnight camping and open fires are prohibited.
5. Construction or use of any permanent artificial scaffold, platform, blind or other construction is prohibited.
6. Boats, without motors, may be used on the St. Francis River only from designated river access sites.
7. Snowmobile operations are prohibited on the refuge except within the rights-of-way of County Roads 4, 5, 9, 11 and 48.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32.

The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107

JOHN E. WILBRECHT,
Refuge Manager.

JULY 28, 1977.

PART 32—HUNTING

Opening of Sherburne National Wildlife Refuge, Minnesota to Public Hunting of Big Game

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to public hunting of Sherburne National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

EFFECTIVE DATES: October 1, 1977 through December 18, 1977.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Route 2, Zimmerman, Minnesota 55398, Phone 612-389-3323.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of deer on the Sherburne National Wildlife Refuge is permitted only on the areas designated by signs as open to hunting. The open area, comprising 18,360 acres, is delineated on a map available at the refuge headquarters, Route 2, Zimmerman, Minnesota 55398, and from the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following special conditions:

1. All motorized conveyances are prohibited from traveling off of established roads and parking areas open to such travel.
2. Parking of vehicles is restricted to designated parking areas.
3. Practice and target shooting, overnight camping and open fires are prohibited.
4. Construction or use of any permanent artificial scaffold, platform, blind or other construction is prohibited.
5. Boats, without motors, may be used on the St. Francis River only from designated river access sites.
6. Snowmobile operations are prohibited on the refuge except within the rights-of-way of County Roads 4, 5, 9, 11 and 48.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32.

The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

JOHN E. WILBRECHT,
Refuge Manager.

PART 33—SPORT FISHING

Opening of Medicine Lake National Wildlife Refuge, Montana to Sport Fishing

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulations.

SUMMARY: The Director has determined that the opening to Sport Fishing of Medicine Lake National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

EFFECTIVE DATES: October 1, 1977 through September 15, 1978.

FOR FURTHER INFORMATION CONTACT:

Jay R. Bellinger, Medicine Lake, MT 59247, Telephone Number AC 406-789-2305.

SUPPLEMENTARY INFORMATION:

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

Sport fishing by rod, reel, pole, set lines and spear, including use of live bait on the Medicine Lake National Wildlife Refuge, Montana, only on the areas designated by signs as being open to fishing. These areas comprising 9,350 acres are delineated on maps available at the refuge headquarters and from the office of the Area Manager, U.S. Fish and Wildlife Service, Federal Building, Room 3035, 316 North 26th Street, Billings, Montana 59101. Fishing shall be in accordance with all applicable State regulations subject to the following conditions:

1. Driving off improved roads or established trails is prohibited.
2. All islands in Medicine Lake proper are closed to trespass throughout the entire year.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 33 The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11049 and OMB Circular A-107.

JAY R. BELLINGER,
Refuge Manager.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER H—MEDICAL DEVICES

[Docket No. 76N-0019]

PART 801—HEARING AID DEVICES

Professional and Patient Labeling and Conditions for Sale; Stay of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Stay of effective date of final rule.

SUMMARY: The Commissioner of Food and Drugs is staying until August 25, 1977, pending judicial review, the effective date of the regulations that establish professional and patient labeling and conditions for sale of hearing aids.

EFFECTIVE DATE: Sections 801.420 and 801.421 (21 CFR 801.420 and 801.421) shall be effective August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Kenneth C. Baumgartner, Office of General Counsel (GCF-1), Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-1345.

SUPPLEMENTARY INFORMATION: The Commissioner, in a final rule published in the FEDERAL REGISTER of February 15, 1977 (42 FR 9286), issued regulations under §§ 801.420 and 801.421 establishing uniform professional and patient labeling requirements and conditions for sale of hearing aid devices. The regulations prescribe the types of information that must be included in the labeling to provide hearing health professionals and patients with adequate directions for the safe and effective use of a hearing aid; specify the technical performance data that must be included in the labeling to ensure that hearing health professionals have adequate information to select, fit, and repair a hearing aid for a patient; and restrict the sale of a hearing aid to those patients who have undergone medical evaluation within the past 6 months, but with a provision that fully informed adult patient (18 years of age or older) may waive the medical evaluation because of personal or religious beliefs. The regulations were scheduled to become effective on August 15, 1977.

On July 29, 1977, a lawsuit was filed in the United States District Court for the District of Columbia seeking a declaratory judgment concerning the validity of the regulations and requesting a temporary injunction pending judicial review of the complaint. *American Speech and Hearing Association, et al. v. Joseph A. Califano, Jr., et al.*, Civil Action No. 77-1327. The court has requested a stay of the effective date of the regulations to consider the merits of the lawsuit.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201 (h), (k), (m), (n), 502, 519, 520(e), 701(a), 704, 52 Stat. 1040-1041 as amended, 1050-1051 as amended, 1055, 67 Stat. 477 as amended, 90 Stat. 564-565, 567 (21 U.S.C. 321 (h), (k), (m), (n), 352, 360i, 360j(e), 371(a), 374)) and under authority delegated to the Commissioner (21 CFR 5.1), the provisions of §§ 801.420 and 801.421 are stayed until August 25, 1977.

Dated: August 5, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 1133]

MILK IN INLAND EMPIRE MARKETING AREA

Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed Suspension of Rules.

SUMMARY: This notice invites written comments on a proposal to suspend certain provisions of the Inland Empire milk marketing order. The provisions relate to how much milk not needed for fluid (bottling) use may be moved directly from farms to manufacturing plants and still be priced under the order. Suspension of the provisions was requested by a cooperative association to help it continue the association of members' milk with the order. The proposed suspension would be for September, October and November 1977.

DATE: Comments are due on or before August 18, 1977.

ADDRESS: Comments (4 copies) should be filed with the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–7183.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), the suspension of certain provisions of the order regulating the handling of milk in the Inland Empire marketing area is being considered for the months of September, October and November 1977.

All persons who desire to submit written data, views or arguments in connection with the proposed suspension should file the same with the Hearing Clerk, Room 1077, South Building, United States Department of Agriculture, Washington, D.C. 20250, not later than 10 days from the date of publication of this notice in the Federal Register. All documents filed should be in quadruplicate.

All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The provisions proposed to be suspended are as follows:

1. In § 1133.13(c)(1) and (2), the words "50 percent in any of the months of September through March, and", and the words "in any of the months of April through August,".

STATEMENT OF CONSIDERATION

The proposed action would increase the limit on the amount of producer milk that a cooperative association or other handlers may divert from pol plants to nonpool plants during the months of September through November 1977. In the case of a cooperative, the limit would be increased from 50 percent to 70 percent of its total member milk received at all pool plants or diverted therefrom. For the operator of a pool plant, the higher 70 percent limit would apply to the milk received at or diverted from such pool plant from producers who are not members of a cooperative that has diverted milk.

The suspension with respect to diversions by cooperatives was requested by a cooperative association that supplies the market with a substantial part of its fluid milk needs and handles much of the market's reserve milk supplies. The basis for the request was that a substantial increase in milk production by producers supplying the market coupled with a decline in fluid milk sales will make it necessary for the cooperative to divert to nonpool plants more reserve milk supplies beginning in September than normally. Without the suspension, the cooperative expects that some of the milk of its member producers who have regularly supplied the fluid market will be excluded from the pool beginning in September. The cooperative asked for the suspension on an interim basis pending an opportunity to review the diversion provisions at a hearing.

As proposed by petitioner, the suspension would apply only to cooperatives. In view of the supply-demand situation in the market, it would appear that proprietary plants may have a similar need for less restrictive diversion provisions. Accordingly, it is proposed herein that the suspension apply also to proprietary handlers who may be receiving nonmember milk.

Signed at Washington, D.C., on August 4, 1977.

WILLIAM T. MANLEY,
Acting Administrator.

Commodity Credit Corporation

[7 CFR Part 1435]

PRICE SUPPORT PAYMENT PROGRAM FOR 1977-CROP SUGAR

Extension of Comment Period

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Extension of final date to receive comments on proposed rule.

SUMMARY: The purpose of this notice is to further extend the time allotted for comments on the proposed sugar payments program. This action is being taken at the request of the corn refining industry.

DATE: Additional comments must be received on or before August 15, 1977, to be sure of receiving consideration.

ADDRESS: Mail comments to Chairman, Sugar Task Force, USDA–ASCS, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Robert R. Stansberry, Jr., 202–447–5735.

SUPPLEMENTARY INFORMATION: On June 14, a Notice of Proposed Rulemaking was published in the FEDERAL REGISTER (42 FR 30409) to advise that the Secretary of Agriculture proposes to establish a price support payments program beginning with the 1977 crop of sugar, and to provide that any written comments must be received on or before July 14, 1977. On July 13, the period for comments was extended to August 1, 1977, at the requests of sugar industry representatives; a notice to this effect was published on July 22 in the FEDERAL REGISTER (42 FR 37576). The Department has now received a formal request from a representative of the corn refining industry to further extend the date to permit his organization to take into account possible developments in the Congress and Executive Branch before submitting comments on the Department's proposal. Since such developments could have a significant impact on the proposed program, the comment period is being extended to assure all interested parties adequate opportunity to prepare written comments. Prior to adopting the program, the Department will give consideration to comments submitted in writing within the comment period, as extended to the Chairman, Sugar Task Force. All written submissions made pursuant to this notice will be made available for inspection from 8:15 a.m. to 4:45 p.m., Monday through Friday, in Room 3639, South Building, 14th and Independence Avenue SW., Washington, D.C. (7 CFR 1.27 (b)).

Signed at Washington, D.C., on August 2, 1977.

RAY FITZGERALD,
Executive Vice President,
Commodity Credit Corporation.

[FR Doc.77-22829 Filed 8-8-77;8:45 am]

FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 430]

ENERGY CONSERVATION PROGRAM FOR CONSUMER APPLIANCES

Extension of Written Comment Period

AGENCY: Federal Energy Administration.

ACTION: Notice of extension of written comment period.

SUMMARY: The Federal Energy Administration gives notice of an extension of the written comment period relating to the establishment of procedural regulations for one aspect of the energy conservation program for consumer appliances. These proposed regulations deal with the submission and disposition of petitions requesting the Administrator to prescribe a rule to supersede a state appliance energy use of efficiency regulation. These petitions may be submitted under the Energy Policy and Conservation Act. FEA will receive written comments for an extended period beyond that originally stated. Fifteen copies are to be submitted.

DATE: Comments by August 22, 1977.

ADDRESSES: Comments to Room 3317, Federal Energy Administration, Box ND, Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

James A. Smith (Program Office), Room 307, Old Post Office Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202–566–4635.

James K. White (Office of the General Counsel), Room 5113, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, 202–566–9380.

SUPPLEMENTARY INFORMATION: By notice issued on June 8, 1977 (42 FR 30206, June 13, 1977), the Federal Energy Administration (FEA), proposed to amend Part 430 to Chapter II of Title 10 of the Code of Federal Regulations to establish a new subpart D. The proposal would establish procedural regulations for the submission and disposition of petitions for prescription of rules to supersede State appliance energy use or efficiency regulations. Such petitions are specifically authorized by section 327 (b)(1) of the Energy Policy and Conservation Act (Act) (Pub. L. 94–163). A public hearing on the proposed procedures was held on July 15, 1977. At that hearing, a number of issues were raised concerning the criteria, delineated in proposed section 430.43(d)(2), for judging the burden imposed by the State regulations on interstate commerce and the State's interest in those regulations. The proposed data requirements were criticized by industry representatives on a number of grounds, including the following:

1. They require confidential pricing and other information.
2. They are burdensome as to time and cost.
3. Some items are unavailable, e.g., retail prices.
4. Because of their technical nature, they tend to exclude individual manufacturers from petitioning.
5. They raise significant anti-trust questions for trade associations petitioning on behalf of members.
6. Some items were poorly or incompletely described, particularly paragraph 430.43(d)(2)(x) of the proposed regulations relative to the state interest issue.

Respondents, however, were not prepared during the public hearing to describe alternative factual information that would eliminate their objections and satisfy the legal requirements of section 237(b)(1). Since the respondents stated that such alternative factual information could be provided, the written comment period is being extended for this purpose.

In providing alternatives to the proposed section 430.43(d)(2), commenters should discuss how the alternative criteria will provide adequate notice of the basis of a disposition of a petition. Commenters presenting alternatives should also discuss how such alternative criteria satisfy the legal meaning of the phrases "undue burden" and "State interest." Because a significant portion of a petition relating to "undue burden" and "State interest" will be the presentation of economic data, the comments should indicate the anticipated sources and method of collection of such data. In considering these data requirements, it should be recognized that the regulations anticipate the submission of petitions from transporters, retailers and distributors, as well as appliance manufacturers and associations. It is expected that economic data presented to FEA submitted would include, but not be limited to, financial constraints (capital and inventory), material scarcity (domestic and imports), market restructing, alteration of existing distribution patterns and, with respect to State interests specifically, environmental impacts, energy impacts of State regulations and other quantifiable impacts.

Comments should also evaluate each proposed alternative provision in accordance with the six criticisms identified above. States are particularly encouraged to comment on the factors which would be relevant to determining a State's interest in regulating consumer product energy efficiency. For both the State interest and undue burden questions, references to any case law in which these standards were discussed would be appropriate.

Issued in Washington, D.C., August 3, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 500]

[Docket No. 76N–0286]

NEW ANIMAL DRUGS

Bovine Teat Dips

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: This document proposes to require that articles intended for use as teat dips on bovine dairy animals be subject to approved new animal drug applications (NADA's). This proposal is made because teat dips are deemed to be new animal drugs requiring approved NADA's. Interim marketing provisions are also proposed.

DATES: Comments by October 11, 1977.

ADDRESSES: Hearing Clerk (HFC–20), Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Howard Meyers, Bureau of Veterinary Medicine (HFV–214), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, (301–443–3183).

SUPPLEMENTARY INFORMATION: Bovine teat dips are widely used in the dairy industry as sanitizers for preventing the spread of mastitis organisms such as various streptococcus and staphylococcus species. The term teat dip includes, but is not limited to, solutions, emulsions, sprays, creams, and ointments intended for preventing the spread of mastitis. Active ingredients of such articles generally include chlorides, iodides, and bromides, as well as quaternary ammonium compounds; they may or may not contain emollients. Teat dips are usually recommended for use after milking and are intended to prevent the spread of mastitis in the bovine dairy herd.

Use of bovine teat dips is widely recommended by Federal, State, and local agencies concerned with mastitis control and milk quality. They are also recommended for use by the National Mastitis Council, Inc., an organization whose members consist of representatives of various regulatory agencies, the veterinary medical profession; universities, milk producers and processors, and firms engaged in the production and distribution of articles used in the dairy industry.

Postmilking dipping of teats in an effective, nonirritating residual germicide, coupled with dry cow therapy, has been proven to be an effective means of mastitis control, as reported by the 1975 Report of the Committee on Mastitis of the U.S. Animal Health Association.

Teat dips have not been shown in all cases, however, to be of uniform effectiveness. The following published articles are cited and on file with the Hearing Clerk:

An article in the Journal of dairy Science, 58:209, 1974, by Philpot and Pankey, reported that 59 teat dips tested against untreated controls demonstrated a variation ranging from a 98.2 percent reduction to a 14.7 percent increase of *Streptococcus agalactiae*, a common pathogen in bovine mastitis. Approximately 20 percent of the teat dips yielded a low activity. An abstract and condensation of the article appears on page 95 of Dairy 1975 Research Report of the North Louisiana Hill Farm Experiment Station, Homer, Louisiana. Another article in the Journal of Dairy Science, 58:205, by Philpot and Pankey, reported the lack of efficacy of oil-based teat dips. This article is also abstracted and condensed and appears on page 89 in the same Louisiana Dairy 1975 Research Report. The Journal of Milk Food Technology, 38(3):132–134, March 1975, has an article by W. D. Schultze, et al., of the U.S. Department of Agriculture, on the efficacy of a commercial iodine-in-oil teat dip. The article reported that at higher iodine concentration, use of the teat dip had no effect on incidence of new infection: at the lower concentration, the teat dip was associated with an increase in new infection by *Staphylococcus aureus*.

The Commissioner of Foods and Drugs has also received complaints that teat dips injure animals. Injuries to dairy cows have been reported: An article in the Journal of the American Veterinary Medical Association, 155(2):162, July 15, 1969, by Roberts, et al., on "Concepts and Recent Developments in Mastitis Control," states that some chlorine preparations on the market have a high sodium hydroxide content and that they are highly irritating; also, some iodophors can cause severe irritation.

Contamination of the milk has been shown to occur from use of teat dips. An article in Acta Veterinaria Scandinavica (a Swedish journal), 14:338–340, 1973, on "The Effect of a Postmilking Teat Dip on the Iodine Concentration of Bulk Herd Milk" concludes that if teat dipping with iodophor disinfectants became common, there would be a considerable increase in the iodine content in dairy milk and an increase of the iodine intake of the milk-consuming population. A similar finding of an increase in iodine content in dairy milk after use of an iodophor teat dip was reported in Journal of Dairy Science, 58(5):752, 1975.

Teat dips were formerly subject to the preclearance provisions of section 408 of the act (21 U.S.C. 346a) and after December 1970 became subject to the jurisdiction of the Environmental Protection Agency (EPA) pesticide programs. The "Federal Environmental Pesticide Control Act of 1972" excluded from EPA coverage articles used as sanitizers on or in living man or another animals (Pub. L. 92–516, sec. 2). Before this enactment, the Food and Drug Administration (FDA) under the authority of the Federal Food, Drug, and Cosmetic Act, and EPA under the authority of the Federal Insecticide, Fungicide, and Rodenticide Act had shared responsibility for regulation of marketing and use of teat dips. Since EPA no longer regulates marketing and use of teat dips, FDA is now the sole Federal agency responsible for their marketing and use.

Because teat dips are used or intended for use for preventing the spread of organisms that cause mastitis infections in milk-producing dairy cows, such articles are drugs as defined in section 201(g)(1)(B) of the Federal Food, Drug, and Cosmetics Act (21 U.S.C. 321(g)(1)(B)). Since such articles have also been shown in some instances to be ineffective, irritating, and capable of causing of unsafe residues in milk from treated cows, they are not generally recognized as safe and effective and therefore are deemed to be new animal drugs as defined in section 201(w) of the act (21 U.S.C. 321(w)). Therefore, approved NADA's are required for bovine teat dip products.

Based on an evaluation of the data currently available, the Commissioner concludes that teat dips are not required to be immediately withdrawn from the market pending NADA approval. The Commissioner further concludes, however, that this evaluation has raised questions whether each such drug is safe and effective under the labeled conditions of use. Additional data and information are required to make a final determination. The Commissioner is aware of no adequate and well-controlled studies that provide substantial evidence of effectiveness for therapeutic use of teat dips on bovine animals.

The Commissioner has determined that the following procedures shall apply to those firms currently engaged in the manufacture and distribution of teat dips requiring an approved NADA:

Persons currently marketing bovine teat dips shall, within 60 days after the effective date of a regulation based on this proposal, submit a new animal drug application (NADA) meeting the requirements of 21 CFR 514.1. Each application shall include upon submission either adequate data to establish that the animal drug is safe and effective, or protocols for and a written commitment to generate such data and to submit quarterly reports demonstrating progress. Studies establishing safety and effectiveness for the target species and meeting the requirements of 21 CFR 514.1 must be submitted within 1 year after submission of the application.

Studies to establish human safety, and meeting the requirements of 21 CFR 514.1, must be submitted within 2½ years after submission of the application. Interim marketing of articles that are the subjects of applications filed pursuant to the final regulation may continue only for 3 years and 60 days after the effective date of a final regulation based on this proposal. No new teat dips may be placed on the market after a date 60 days after the effective date of a final regulation unless they are the subject of an approved new animal drug application filed in accord with paragraphs (d) and (e) of the final regulation.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Copies of the scientific articles referenced in this document are on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 512, 701 (a), 52 Stat. 1055, 82 Stat. 343–351 (21 U.S.C. 360b, 371(a))) and under authority delegated to the Commisisoner (21 CFR 5.1), it is proposed that Part 500 be amended in Subpart B by adding new § 500.38 to read as follows:

§ 500.38 Bovine teat dips.

(a) Teat dips are articles generally recommended for use on dairy animals after milking; they are primarily intended to prevent the spread of mastitis in dairy herds. The term teat dip includes, but is not limited to, solutions, emulsions, sprays, creams, and ointments intended to prevent the spread of mastitis. Teat dips are articles that are labeled or otherwise intended for use in the control and reduction of microorganisms in or on bovine dairy animals. Therefore, such articles are drugs within the meaning of section 201(g) of the Federal Food, Drug, and Cosmetic Act.

(b) Because of questions raised regarding the safety and effectiveness of teat dips, they are deemed to be drugs that are not generally recognized as safe and effective and are therefore new animal drugs within the meaning of section 201(w) of the act.

(c) Teat dips for use on bovine milk-producing dairy animals are considered new animal drugs and shall be the subject of new animal drug applications (NADA's).

(d) Any person currently marketing a teat dip(s) shall, within 60 days after the effective date of a regulation based on this proposal, submit a new animal drug application. Such application shall include all the information required by § 514.1 (21 CFR 514.1), except that applications submitted that do not include the required information regarding the safety and efficacy of the drug shall include in lieu thereof protocols upon the basis of which the applicant proposes to establish that the drug is safe and effective. The protocols shall be accompanied by a commitment to carry out the required studies.

(e) Following the submission of an application pursuant to paragraph (d) of this section, the applicant shall submit:

(1) Within 1 year, data establishing that teat dips are safe and effective for the treated animal.

(2) Within 2½ years, data to establish the safety of residues in food for human consumption from the use of such drugs. The data shall include residue depletion studies, basic toxicological data to establish the safety of any required tolerance, and a method of analysis appropriate for the regulatory control of any required tolerance.

(f) Progress reports describing the status of ongoing studies shall be submitted every 3 months from the date of submission of the application.

(g) After the date 60 days following the effective date of a final regulation based on this proposal, teat dips that are introduced into interstate commerce shall be deemed to be adulterated within the meaning of section 501(a)(5) of the act unless:

(1) Such animal drug is the subject of an approved new animal drug application, or:

(2) Such animal drug is the subject of an application submitted pursuant to paragraph (d) of this section; and, the applicant is submitting data and progress reports pursuant to the requirements of paragraph (e) and (f) of this section.

(h) New animal drug applications and data required by this regulation shall be submitted to the Food and Drug Administration, Bureau of Veterinary Medicine, Associate Director for Scientific Evaluation, HFV–100, 5600 Fishers Lane, Rockville, Md. 20857.

Interested persons may, on or before October 11, 1977, submit to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m. Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A–107. A copy of the inflation impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Dated: July 29, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

POSTAL SERVICE

[39 CFR Part 111]

BUSINESS REPLY MAIL

Format Requirements

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend postal regulations to set out specific, measured format requirements for business reply mail (BRM). Mailers would be permitted to use existing BRM stocks which do not conform to the revised format requirements until July 1, 1978, except for Airmail BRM, which may be used until May 1, 1979. At the present time there may be as many BRM formats as there are BRM permit holders, despite the fact that postal regulations require adherence to distinctive, alternative formats pictured in the regulations. This proposed regulation change is intended to eliminate deviations from the prescribed BRM format so that BRM mail may be recognized readily (as it was designed to be) by postal employees who must separate it from the mailstream to collect postage and fees. In addition, the proposed new format would leave two clear areas on the address side of BRM pieces for markings which could activate mail processing facing, cancelling and sorting machinery.

DATE: Comments must be received on or before September 10, 1977.

ADDRESS: Written comments should be directed to the Director, Office of Mail Classification, Rates and Classification Department, U.S. Postal Service, Washington, D.C. 20260.

FOR FURTHER INFORMATION CONTACT:

Eugene R. McGill, 202–245–4749.

SUPPLEMENTARY INFORMATION: Under the provisions of 39 CFR 111.3 the Postal Service proposes to amend 131.234 of the Postal Service Manual as explained above, to ad a new 131.235 picturing the revised BRM format, and to ad a new 131.236 providing that samples of BRM pieces must be submitted for inspection to the post office issuing the permit before they may be distributed. Existing 131.235 and .236 would be redesignated .237 and .238 respectively.

PROPOSED PROHIBITION OF AIRMAIL BRM STATIONERY AFTER MAY 1, 1979

The Postal Service is required to permit use of domestic airmail stationery (cards and envelopes) for all first class mail categories until May 1, 1979, and to give at least six months notice of a change in the policy to permit such use. The proposed rule would forbid use of airmail BRM stationery after May 1, 1979, as to which comments are solicited. Formal notice of a change in the present policy of permitting use of airmail BRM stationery and the use of airmail embossed cards and envelopes and standard airmail envelopes in prepaid first class mail will be given at a later date.

Although exempt from the requirements of the Administrative Procedure Act (5 U.S.C. 553(b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comment on the following proposed revision of the Postal Service Manual:

PART 131—FIRST CLASS

In 131.23 of the Postal Service Manual redesignate .235 and .236 as .237 and .238 respectively; revise .234 and add new .235 and .236 reading as follows: 131.23 Business Reply Mail.

* * * * *

.234 Format Requirements.

a. Any photographic, mechanical or electrical process or any combination of such processes, other than handwriting, typewriting or handstamping, may be used to prepare the address side of business reply mail. The background of business reply mail pieces may be any light color that allows the address, postmark and other required endorsements to be readily discerned. Brilliant colors may not be used.

b. Business reply pieces, including labels, must conform to the illustration in 131.235 and must contain the following endorsements:

(1) The *permit indicium* must be printed in the upper right corner of the address side within a box measuring at least 1 inch in length and extending no further than 1¾ inches to the left of the right edge of the mail piece. The indicium must include the words "first-class", the permit number, and the name of the issuing post office (city and state).

(2) A series of horizontal bars parallel to the bottom of the permit indicium box must be printed immediately below the permit indicium. The bars must be the length of the permit indicium and must be 1/10 to 1/8 inch thick. The spacing between the bars must be equal to the thickness of the bars. A ¾ inch clear space must be left between the bottom horizontal bar and the bottom edge of the mailing piece or label.

(3) A horizontal rectangular box measuring at least ½ inch in height and 3 inches in length must be placed to the left of and immediately below the permit indicium. The box may not touch the parallel horizontal bars. The box must contain the legend "Business Reply Mail No Postage Necessary if Mailed in the United States". The legend must

appear in the form illustrated in 131.235.

(4) The legend "Postage will be paid by" must appear immediately below the rectangular box and immediately above the address lines.

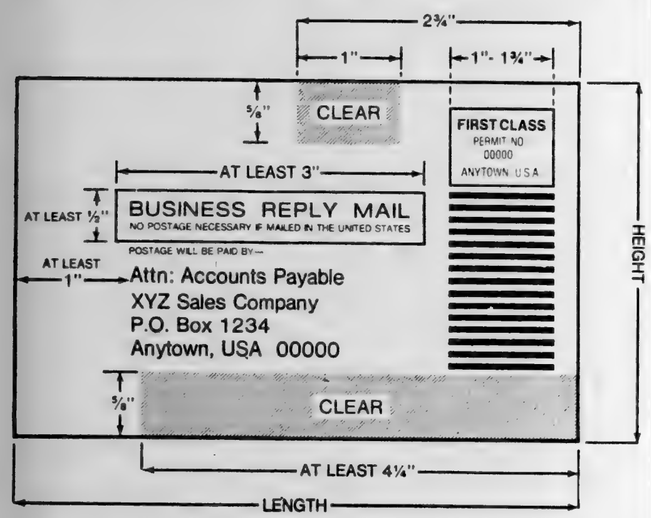
(5) The complete address, including ZIP Code, must appear in accordance with sections 122.1 and 122.2. An attention or a key line immediately above the name of the individual or firm to which the piece is addressed may be included.

(6) The upper left corner of the address side is available for use by the permit holder. This area, which is above the box reading "Business Reply Mail * * *" and to the left of the clear area, may contain logos, marketing information or other matter.

(7) A company logo may be used as part of the company name on the address side provided it is located no lower on the piece than the top of the street address or post office box line, and provided the logo does not interfere with any required business reply endorsements or extend into prescribed clear area.

c. Two clear areas must be maintained on the address side of business reply mail pieces.

(1) A horizontal rectangular area in the lower right corner measuring ⅝ of an inch in height by 4¼ inches in length.



(2) A horizontal rectangular area measuring a minimum of ⅝ inch in height by one inch in length must be located along the top edge of the piece and to the left of the permit indicium. This clear area begins 2¾ inches from the right edge of the piece and extends 1 inch to the right.

d. Mailers will be given until July 1, 1978 to use existing BRM stocks which do not conform to the above format requirements, except that the use of air-mail BRM stationery is authorized until May 1, 1979.

See 131.34 for nonstandard business reply mail.

e. See 141.114g for busines reply window envelope requirements.

.235 Illustration of Business Reply Mail.

.236 Inspection. At least two weeks prior to the initial distribution of a BRM piece, two (2) samples of the piece must be submitted for inspection to the post office issuing the BRM permit. If the post office ascertains that the sample pieces do not comply with applicable postal regulations, the permit holder will be notified of the discrepancies within two weeks.

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published if the proposal is adopted.

(39 U.S.C. 401(2).)

LOUIS A. COX,
General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 774-8]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS—MASSACHUSETTS

Proposed Revision to the Massachusetts State Implementation Plan for Pioneer Valley Air Pollution Control District

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed Rulemaking.

SUMMARY: This proposal puts forth for public comment two regulations proposed to be adopted as part of the Massachusetts State Implementation Plan for the Pioneer Valley Air Pollution Control District. The first regulation is a Stationary Source Regulation to control emissions of hydrocarbons. The second regulation proposed a program to Reduce Single Passenger Commuter Vehicle use by requiring large employers in the Pioneer Valley Air Pollution District to participate in the existing Masspool Carpooling Program currently run by the Massachusetts Executive Office of Transportation and Construction.

DATE: Comments must be received on or before September 8, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Donald C. White, Chief, Mobile Source Emissions Section, Air Branch, Region I, Room 2113, JFK Federal Building, Boston, Massachusetts 02203, 617-223-5630.

SUPPLEMENTARY INFORMATION: In a letter to the Regional Administrator from the Acting Commissioner of the Massachusetts Department of Environmental Quality Engineering dated May 20, 1977 the State Air Agency requested that two regulations be approved as part of the State Implementation Plan for the Pioneer Valley Air Pollution Control District. EPA is proposing to approve these regulations as submitted.

The Stationary Source Regulation is proposed to control emissions of hydrocarbons by controlling the transfer of motor vehicle fuel vapor emissions during deliveries to service stations. The regulation requires that by June 1, 1978 all service stations having stationary storage tanks with a capacity equal to or greater than 2000 gallons must have installed equipment which will prevent release to the atmosphere of no less than 90 percent, by weight, of the organic materials in the vapors. Control of emissions from petroleum storage terminals has already been approved as a statewide regulation.

The second regulation proposes that large employers in the Pioneer Valley Air Pollution Control District implement specified mandatory measures which are designed to achieve a goal of reducing the number of single-occupant commuter vehicles customarily commuting to each employment facility by 25 percent as of the base date. To achieve this reduction percentage goal these employers must take the following actions:

(a) Make available to their employees any pass program offered by the Pioneer Valley Transit Authority.

(b) Post in a conspicuous place the schedules, rates and routes of every bus which serves the facility.

(c) Publicize any applicable on-street parking restrictions.

(d) Provide incentives for bicycle commuting such as secure locking facilities.

(e) Negotiate with authorities for improved service in bus lines serving the facility.

(f) Conduct a carpooling program.

(g) Offer vanpooling opportunities at facilities of 1000 or more employees.

In addition, the regulation requires specific reporting requirements for these facilities in order that the State Air Agency can evaluate the on-going progress made through implementation of these measures towards achieving a 25% reduction in single passenger vehicle commuting.

AVAILABILITY OF INFORMATION

Copies of the Massachusetts submittal are available for public inspection during normal business hours at the Environmental Protection Agency, Region I, JFK Building, Room 2113, Boston, Massachusetts 02203; the Massachusetts Division of Air and Hazardous Materials, 600 Washington Street, Boston Massachusetts 02111; and the Freedom of Information Center, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

The Regional Administrator will consider all comments relating to the submittal which are received within 30 days after the date of this notice. All those who wish to ensure that their views receive formal consideration as a part of this proposal and are reflected in any record certified for judicial review must submit written comments during the comment period. All comments should be addressed to:

Mr William R. Adams Jr., Regional Administrator, Region I, Environmental Protection Agency, Room 2200, JFK Federal Building, Boston, Massachusetts 02203.

The Administrator's decision to approve or disapprove the submittal as a revision to the Massachusetts State Implementation Plan will be influenced by the comments he receives as well as by any additional technical documentation that he receives. Ultimately, the Administrator's decision will be based on whether the regulations meet the requirements of Section 110(a)(2)(A)-(H) of the Clean Air Act and EPA requirements in 40 CFR Part 51.

(Sec. 110, the Clean Air Act, as amended. (42 U.S.C. 1857c-5).)

Dated: July 25, 1977.

LESTER A. SUTTON,
Acting Regional Administrator, Region I.

EMISSION CONTROL SYSTEM PERFORMANCE WARRANTY REGULATIONS

Extension of Comment Period

AGENCY. Environmental Protection Agency.

ACTION: Extension of Comment Period.

SUMMARY: This Notice extends the period for comments to the Notice of Proposed Rulemaking, published Wednesday, May 25, 1977 (42 FR 26759), regarding the emissions performance warranty of section 207(b)(2) of the Clean Air Act. A similar extension is being published today regarding the short test notice pursuant to section 207(b)(1) of the Act published on May 25 at 42 FR 26742.

DATE: All relevant material received on or before October 7, 1977, will be considered.

ADDRESS: All comments should be sent to: Director, Mobile Source Enforcement Division (EN-340), 401 M Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. Michael Scibinico, Environmental Protection Agency, Mobile Source Enforcement Division (EN-340), 401 M Street SW., Washington, D.C. 20460, at 202-755-0298.

SUPPLEMENTARY INFORMATION: Requests for a 45-day extension have been received from several parties, all citing the complexity of the proposed regulation as the basis for an extension. The Agency has considered the requests, and decided that an extension would be in the best interests of all parties concerned. At present, the Agency is planning to conduct workshops on the proposal in three locations—New York, Chicago, and San Francisco—sometime during the month of September. The dates, times, and locations will be published in a future FEDERAL REGISTER notice.

Accordingly, the comment period is hereby extended to October 7, 1977.

Dated: August 1, 1977.

NORMAN D. SHUTLER,
Acting Assistant Administrator for Enforcement.

[FR Doc.77-22821 Filed 8-8-77;8:45 am]

EMISSION CONTROL SYSTEM PERFORMANCE WAARANTY REGULATIONS—SHORT TEST ESTABLISHMENT

Extension of Comment Period

AGENCY: Environmental Protection Agency.

ACTION: Extension of Comment Period.

SUMMARY: This Notice extends the period for comments to the Notice of Proposed Rulemaking, published Wednesday, May 25, 1977 (42 FR 26742), regarding the short test of section 207(b)(1) of the Clean Air Act. A similar extension is being published today regarding the warranty regulation notice pursuant to section 207(b)(2) of the Act published on May 25 at 42 FR 26759.

DATE: All relevant material received on or before October 7, 1977, will be considered.

ADDRESS: All comments should be sent to: Deputy Assistant Administrator, Office of Mobile Source Air Pollution Control (AW-455), Environmental Protection Agency, 401 M Street SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Paul Lapsley, Regulatory Management Staff, Office of Mobile Source Air Pollution Control, 202-755-0596, Environmental Protection Agency, 401 M Street SW., Washington, D.C.

SUPPLEMENTARY INFORMATION: Requests for a 45-day extension have been received from several parties, all citing the complexity of the proposed regulation as the basis for an extension. The Agency has considered the requests, and decided that an extension would be in the best interests of all parties concerned. At present, the Agency is planning to conduct workshops on the proposal in three locations—New York, Chicago, and San Francisco—sometime during the month of September. The dates, times, and locations will be published in a future FEDERAL REGISTER notice.

Accordingly, the comment period is hereby extended to October 7, 1977.

Dated: August 1, 1977.

ERIC O. STORK,
Acting Assistant Administrator for Air and Waste Management.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 146a]

CITIZEN EDUCATION FOR CULTURAL UNDERSTANDING PROGRAM

AGENCY: U.S. Office of Education, HEW.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Education Amendments of 1976 amended Title VI of the National Defense Education Act of 1958 to provide for a Citizen Education for Cultural Understanding Program. Under this program, the Commissioner may award grants and contracts to any public or private agency or organization to increase the understanding of students in the United States about the actions and cultures of other nations, and to enable these students to make informed judgments with respect to the international policies and actions of the United State.

DATES: Comments must be received on or before September 23, 1977.

ADDRESSES: Comments should be addressed to: Division of International Education, Room 3907, Regional Office Building 3, 7th and D Streets, SW., Washington, D.C. 20202.
Comments received will be available for inspection at the above address between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, except for Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Mr. Edward L. Meador, 202–245–9692.

SUPPLEMENTARY INFORMATION: It is anticipated that the program will not be funded in Fiscal Year 1977–78.

SUMMARY OF COMMENTS PREVIOUSLY RECEIVED

The Citizen Education for Cultural Understanding Program is designed to stimulate locally designed educational programs to increase the understanding of students in the Untied States about the actions and cultures of other nations. In the FEDERAL REGISTER of November 29, 1976, 41 FR 52410, the Commissioner published a Notice of Intent to Issue Regulations implementing certain provisions of Pub. L. 94–482. Written comments on specified issues (and any others the public chose to raise) were requested. Comments were received through December 31, 1976, and have been studied in drafting these proposed rules. A summary of the comments received and the Office of Education's responses are set out below.

Comment. Several comments received concerning the need for regulations to define the scope and variety of eligible activities. Many commenters stated that regulations should be drafted so as to provide guidance on the intent of the program, but should not prescribe content or preclude innovative approaches.

Response. Proposed § 146a.6 adheres closely to the statute and affords maximum flexibility to applicants in fashioning their programs.

Comment. One commenter urged that the regulations set priority areas with respect to nations, peoples, and areas of interest. The majority of comments received, however, opposed regulations which would limit projects to specific nations, areas, and peoples, and that would set priorities among nations and areas.

Response. Priorities with respect to programs focusing on specific nations, peoples, or areas, are not set forth in the proposed regulations.

Comment. Many comments were received which suggested that geographic distribution should be a consideration in making awards in order to insure equal distribution of Federal funds. The commenters cautioned, however, that the overall strength of the proposal, and not the geography, should be the determining factor in the selection of programs to be funded.

Response. Geographical distribution will not be a funding criterion.

Comment. Numerous comments were received suggesting that application for programs or projects at one or another level of education be given priority over other levels.

Response. Section 603 (c) (3) specifically states that awards, "* * * may be made for projects and programs and *at all levels of education* * * *" (emphasis added). Therefore these proposed regulations establish no such priorities

Comment. Two commenters suggested that local advisory committees be required for each program.

Response. There is no legal authority for requiring projects to have local advisory committees.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

(Catalog of Federal Domestic Assistance Number 13.581.)

Dated: June 14, 1977.

ERNEST L. BOYER,
Commissioner of Education.

Approved August 2, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare.

Title 45 of the Code of Federal Regulations is amended to add a new Part 146a as follows:

PART 146a—CITIZEN EDUCATION FOR CULTURAL UNDERSTANDING PROGRAM

Sec.
146a.1 Purpose and scope.
146a.2 General authority.
146a.3 Definitions.
146a.4 Eligible applicants.
146a.5 Applications.
146a.6 Project requirements.
146a.7 Evaluation criteria.

AUTHORITY: Sec. 603, Title VI of the National Defense Education Act of 1958 (20 U.S.C. 512a), as amended by sec. 302(b), Pub. L. 94–482 (Education Amendments of 1976), unless otherwise noted.

§ 146a.1 Purpose and scope.

(a) This part governs the awarding of Federal assistance to projects that will increase the availability to students in the United States of information about the cultures, actions, and policies of other nations so that these students might make more informed judgments with respect to the international policies and actions of the United States.

(b) The assistance provided under this part is subject to the applicable provisions of Subchapter A of this Chapter, pertaining to fiscal, administrative, and other matters (General Provisions for Office of Education Programs, 45 CFR Part 100a).

(20 U.S.C. 512a.)

§ 146a.2 General authority.

The Commissioner may award grants and contracts for projects to stimulate locally designed educational programs to increase the understanding of students in the United States about the cultures, actions, and policies of other nations in order to allow them to better evaluate the international and domestic impact of major policies of the United States and other nations. The Commissioner may make these grants and contracts for projects at all levels of education including community, adult, or continuing educational levels.

(20 U.S.C. 512a.)

§ 146a.3 Definitions.

"Student" means any person enrolled in an educational program.

(20 U.S.C. 512a.)

§ 146a.4 Eligible applicants.

(a) Any public or private non-profit agency or organization, including but not limited to, institutions of higher education, State and local educational agencies, professional associations, educational consortia, and organizations of teachers is eligible to receive a grant or contract under this part. A profit-making organization is eligible to receive a contract.

(b) If an educational consortium applies for this assistance, it must include in its application (1) a description of the role of each member of the consortium in carrying out the project and (2) a written commitment from each participating member stating that it will perform the activities ascribed to it.

(20 U.S.C. 512a.)

§ 146a.5 Applications.

(a) Eligible applicants that wish to apply for a grant or contract must file their applications with the Commissioner before the established closing date for such applications. Each application must contain (1) a description of the proposed activities and (2) sufficient information to enable the Commissioner to evaluate the application on the basis of the criteria set out in § 146a.7 and to determine whether the applicant will satisfy the project requirements set out in § 146a.6.

(b) Each applicant must assess the local need for the proposed project.

(20 U.S.C. 512a.)

§ 146a.6 Project requirements.

(a) Funds under this part may be used to carry out the following activities:

(1) The in-service training of teachers and other educational personnel with regard to the cultures, actions, and policies of other nations;

(2) The compilation of existing information and resources about other nations in forms useful to various types of educational programs; or

(3) The dissemination of information and resources pertaining to the cultures, actions, and policies of other nations to educators and education officials upon their request.

(b) Funds may not be used for the development of new curriculum or the acquisition of equipment or remodeling of facilities.

(20 U.S.C. 512a)

§ 146a.7 Evaluation criteria.

(a) In addition to evaluation on the basis of the criteria found in the Office of Education's General Provisions Regulations, 45 CFR 100a (26(b)), the Commissioner will also evaluate applications under this part on the basis of the following criteria:

(1) The extent to which appropriate segments of the local community were consulted on the development of the application;

(2) The degree to which the proposed project or program provides specifically for cooperation with appropriate segments of the local community; and

(3) The commitment of the agency or organization to the establishment and operation of the program as evidenced by maximum use of non-Federal resources (including financial support).

(b) The Commissioner will weigh each criterion listed in paragraph (a) of this section, including those in 45 CFR 100a (26(b)), equally in evaluating an application.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 81]

[Docket No. 21353; FCC 77–555]

MARITIME MOBILE SERVICE

Providing High Frequencies for the Use of Narrow-Band Direct-Printing (Radioteletypewriter) Between Ships and Shore on the Inland Waterways

AGENCY: Federal Communications Commission.

ACTION: Proposed rule making.

SUMMARY: Rule changes are proposed that will provide radio frequencies for use by public coast station WFN at Jeffersonville, Indiana so that teletypewriter services can be furnished to vessels on inland waters that are comparable to services already provided to vessels in areas other than the Inland Waterways. This is a follow-on to a developmental program carried out for several years.

DATES: Comments must be received on or before September 12, 1977, and reply comments must be received on or before September 22, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Walter E. Weaver, Safety and Special Radio Services Bureau, 202–632–7197.

SUPPLEMENTARY INFORMATION:

Adopted: July 27, 1977.

Released: August 4, 1977.

In the matter of amendment of Part 81 of the Commission's rules to provide high frequencies in the maritime mobile service for the use of narrow-band direct-printing (radioteletypewriter) between ships and shore on the Inland Waterways.

1. Notice of Proposed Rule Making in the above-captioned matter is hereby given. In the Report and Order in Docket No. 20813 (FCC 77–380), released June 10, 1977, the Commission amended Parts 81 and 83 to provide for the use of narrow-band direct-printing (radioteletypewriter) (NB–DP), among other things, on the high seas.

2. In their timely comments filed in response to the Notice of Proposed Rule Making in that proceeding, the American Commercial Barge Line (ACBL) advised, correctly, that the Commission had not included NB–DP frequencies for the continuation of that class of service at coast station WFN at Jeffersonville, Ind. As stated in the above referenced Order, the Commission noted that station WFN has been operating NB–DP with vessels of ACBL on a developmental basis since 1970.

3. In their developmental report, accompanying application (Form 503) dated April 9, 1974, station WFN is clearly satisfied with the results of their developmental program. For example, they state: (1) That the radioteletypewriter system not only met, but surpassed all expectations they had anticipated; and (2) that the test turned out so well that they expect teletype will become an integral part of the communications used on the Inland Waterways. Further, station WFN advises that, to their knowledge, no problems have arisen from the use of a teletype speed of 100 words per minute and, therefore, in the system they have under consideration, they plan to provide a switchable capability permitting operation at speeds of 60, 75, 100, 150, 200 and 300 Bauds.

4. As a part of their application, station WFN requests that the Commission provide for the following:

1. That the standard 5 level code be used for the present time, and this to be expanded to the standard 8 level code at a future time;

2. That the speed of 75 Bauds be used for the present time, and this to be expanded to a rate of 300 Bauds at a future period, so long as the signal is kept within the required bandwidth of 500 Hertz, as set forth in Section 81.133(a), of the regulations;

3. That simplex frequencies be assigned;

4. That the frequencies assigned will be assigned only to WFN;

5. That the regulations requiring a radio officer aboard be waived for vessels operating on the Inland Waterways; and

6. That WFN be issued a license for a period of 5 years.

5. Regarding WFN's request that provision be made for the use of the 5 level (7.42 unit code) teletype alphabet for the present time, such provision is currently included in Sections 81.143 and 83.143 of the rules. Regarding future use of the standard 8 level (11 unit code) teletype alphabet, it will be necessary to amend those sections of the rules at such time as conversion from the 5 unit to the 8 unit code is undertaken. It appears to us that there would be a substantial economic advantage to start out with the 8 level code rather than to effect, at a later date, conversion of a substantial number of ship stations from 5 level to 8 level.

6. Regarding the use of a speed of operation of 101.1 words per minute (75 Bauds), the current rules (Section 81.143 and 83.143) require a capability to operate at 50 Bauds, however, having met that requirement, a speed of operation of up to 100 Bauds (134.8 words per minute) is permitted. Thus, if the system to be installed at station WFN has the 50 Baud capability, no amendment of the rules is necessary in order for station WFN to operate at the requested 75 Bauds. We will look to station WFN, in their comments in response to the instant proceeding, to provide clarifying information in regard to this matter.

7. Regarding operation of the system at up to 300 Bauds (404.3 words per minute), station WFN indicates this will be in the indefinite future and we are not, therefore, proposing amendment of the rules to provide for operation at that rate. We note that Special Committee 64 (SC–64) of the Radio Technical Committee for Marine Services (RTCM) during its sessions considered operation of frequency shift keying at a variety of speeds, propagated via the ionosphere by means of high frequencies, in the course of which it gave particular attention to multipath effects. The technical studies considered by SC–64 were carried out by the Institute for Telecommunication Sciences (Office of Telecommunications, Dept. of Commerce), Boulder, Colorado. It was the conclusion of SC–64 that speeds of up to 150 words per minute should be practicable using high frequencies in the presence of multipath effects. Since the work of SC–64 did not extend to 300 Bauds (404.3 words per minute) and no other supporting data is available, we would not, therefore expect to amend the rules to provide for a speed of 300 Bauds prior to accumulation of substantial test results.

8. We do no concur, for a number of reasons, with WFN's request that simplex (transmit and receive on the same frequency) frequencies be assigned. While the simplex mode of operation may satisfy WFN's initial requirement where communication is effected with one vessel at a time, we question that that mode can be adapted, on a practicable basis, to meet the requirement for simultaneous communication with several vessels. To provide for the use of the simplex mode on currently available NB–DP frequencies, such would require that we authorize (1) WFN to use frequencies in the bands allocated for use by ship stations, or (2) place ACBL's vessels in the bands allocated for use by coast stations, neither of which would be in accordance with the Radio Regulations of the International Telecommunication Union (ITU) as amended at the World Maritime Administrative Radio Conference, Geneva, 1974. Coast stations throughout the world providing NB–DP service with ships will use the duplex (transmit and receive on different frequencies) mode of operation. On the basis of information currently available, we are not persuaded that station WFN should provide service on a simplex basis.

9. Use of the duplex mode will affect the type of equipment used aboard ACBL's vessels. If a satisfactory service is to be provided, ship station equipment must be capable of operating on the required number of frequencies and of providing the necessary selectivity. We stress that other stations will be using the frequencies 0.5 kHz removed from those being proposed for use on the Mississippi River System.

10. In Section 81.204(c), as amended by the Report and Order in Docket No.

20813, above referenced, we provided separate NB–DP frequencies for each coast station licensee. With regard to WFN's request that frequencies assigned be assigned only to station WFN, we are proposing the same approach be applied. We would note, however, that the number of countries in the world exceed the number of families of NB–DP frequencies available, so other countries will be using the same NB–DP frequencies proposed for station WFN and, thus, it is probable that the foreign use will be evident from time to time.

11. As concerns waiving the regulations which require a radio officer aboard vessels when operating on the Inland Waterways, we would expect the controls for use of the shipboard installation to be sufficiently uncomplicated to a degree such that that equipment can be satisfactorily operated by non-technical personnel. If this condition is observed, the license requirement for the operator will be a Radiotelephone Third-class Operator Permit. The operator license requirements were amended in the proceeding in Docket No. 20862 (FCC 76–631; 42 F.R. 1231) and, also, in Docket No. 20813, above referenced. Accordingly, in view of the changed operator license requirements, we doubt that a waiver will be necessary.

12. WFN also requests that they be issued a license for a period of five years. Once the rule amendments proposed herein have been finalized, we will license stations for the use of NB–DP on a regular, or five year basis.

13. The proposed amendments, as set forth below, are issued pursuant to the authority contained in Sections 4(i) and 303(c), (f), (g), and (r) of the Communications Act of 1934, as amended, and in the Final Acts of the World Maritime Administrative Radio Conference, Geneva, 1974.

14. Pursuant to the applicable procedures set forth in Section 1.415 of the Commission's rules, interested persons may file comments on or before September 12, 1977, and reply comments on or before September 22, 1977. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

15. In accordance with the provisions of Section 1.419 of the Commission's rules, an original and 5 copies of all statements, briefs or comments shall be furnished the Commission. All comments received in response to this Notice of Proposed Rule Making, will be available for public inspection in the Docket Reference Room in the Commission's Offices in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Part 81 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

In § 81.204, paragraph (c) is amended to read as follows:

§ 81.204 Assignable frequencies—Narrow-band direct printing radiotelegraph and data transmission systems.

* * * * *

(c) Subject to and in accordance with the provisions of paragraph (a) and (b) of this section, coast radiotelegraph stations may, upon grant of a proper application, be authorized to employ the coast transmit frequencies specified in the indicated Series No., as set forth in paragraph (a) of this section, as follows:

(1) Ocean, Gulf of Mexico and Great Lakes areas;

Call letters:	*NB–DP Series No.*
KFS	1, 3, 28, 47
KHK	10, 22, 42
KLB	8, 33, 50
KLC	8, 17, 48
KOK	6, 30, 49
KPH	13, 14, 21, 22, 38
WAX	10, 15, 36
WCC	13, 14, 21, 22, 38
WLO	5, 15, 25, 54

RADIOTELEPHONY FREQUENCIES IN MARITIME MOBILE SERVICES ADOPTED AT ITU WORLD MARITIME ADMINISTRATIVE RADIO CONFERENCE, GENEVA, 1974

Changes in Frequencies, Operating Procedures and Other Criteria; Implementation; Inquiry

AGENCY: Federal Communications Commission.

ACTION: Notice of Inquiry.

SUMMARY: This notice is to solicit comments on the assignment of radiotelephone frequencies to coast stations in implementing the new allotment plan adopted at the World Maritime Administrative Radio Conference, Geneva, 1974.

DATE: Comments must be received on or before September 6, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554

FOR FURTHER INFORMATION CONTACT:

Nicholas G. Bagnato, Safety and Special Radio Services Bureau (202–632–7197).

SUPPLEMENTARY INFORMATION:

NOTICE OF INQUIRY

Adopted: July 21, 1977.

Released: August 5, 1977.

Amendment of Parts 81 and 83 to implement changes in frequencies, operating procedures and other criteria relating to radiotelephony in the band 4000 to 27500 kHz in the maritime mobile services adopted at the ITU World Maritime Administrative Radio Conference, Geneva, 1974, Docket No. 21349.

1. In this Notice of Inquiry the Commission is seeking comments on the assignment of frequencies to public coast and ship stations operating in the maritime services. The attached Appendix shows those frequencies allocated to the United States and the provisional notifications submitted to the International Frequency Registration Board by the Commission. We are further seeking comments on the following additional matters to assist in the preparation of the Notice of Proposed Rule Making:

a. Temporary assignment of frequencies in order to develop operational experience and make adjustments to clear interference;

b. Assignment of frequencies of the same MHz order to both Class I and Class II stations; and

c. Continuing the use of HF frequencies on the inland waterways operating in the simplex mode.

2. The World Maritime Administrative Radio Conference (WARC), 1974, amended the international radio regulations applicable to stations in the maritime mobile service. The allocated spectrum space for duplex radiotelephony ship and coast stations was increased from 469.6 to 545.6 kHz, which increased the number of channels from 137 to 176. While the number of channels was increased, the number of countries sharing the channels was increased in a revised allotment plan, which may negate any benefits derived from an increase in the number of channels. Many administrations including the United States agreed to implement the plan, however, reservations were taken by these administrations which, in essence, provide for taking any steps necessary to maintain satisfactory HF links between coast stations and ships at sea, if the plan in its application should prove impossible. The United States has submitted provisional notices to the International Frequency Registration Board (I.F.R.B.) on all of the frequencies allotted to the United States for stations operated by either Government Agencies or Commission licensees.

3. The allotments to the U.S. are divided between Government and non-Government stations. In consideration of the number of non-Government frequencies allotted to public coast stations and the probability that adjustments will have to be made after implementation of the plan, we are considering the feasibility of making permanent assignments on approximately half of the frequencies and temporary assignments on the other half. At the end of a period of time, approximately 2 to 2½ years, the entire assignment plan will be evaluated and either the temporary assignments made permanent or reassignments made to satisfy operational requirements. The evaluation will be made based on reports received from the licensees, information from the users and interference reports received by the

Commission. The reports from the licensees will provide data to substantiate retention of the frequencies or requirement for any additional frequencies.

4. The Commission's rules state that the frequency assignments for Class I coast stations will include frequencies below 150 kHz or between 5000 kHz and 25,000 kHz, while the frequency assignments for Class II stations are not to include any frequency below 150 kHz or between 5000[1] and 25,000 kHz except in specified conditions (47 CFR 81.3). However, they have long made available frequencies in the 4 MHz band for assignment to both classes of stations. See 16 FR 6036, June 26, 1951. We recognized in Docket No. 20906 the implications this situation can have on what rates the public must pay for maritime mobile service when 4 MHz frequencies are allocated to Class I and Class II stations licensed to the same carrier.[2] We then indicated our intention to further explore this situation in an appropriate proceeding. Accordingly, we seek comments from all interested parties in this proceeding on the future use of the 4 MHz band for provision of radiotelephony service. In particular, we are seeking comments about the current use of the 4 MHz band by Bell System coast stations. AT&T is the licensee of three coast stations offering Class I service.[3] There are 16 coast stations offering Class II service licensed to various Bell System operating companies.[4] AT&T's Tariff F.C.C. No. 263 provides that the radio-link charge for Class I service shall be $13.50 per three minute minimum, while the radio-link charge for Class II service shall be $1.85 per three minute minimum. Since the Bell System operating companies concur in AT&T's tariff, their Class II stations charge $1.85 per three minute minimum. Eight 4 MHz frequencies are currently allocated for the common use by both the Bell System Class I and Class II stations. Of these frequencies, however, only one is actually licensed to and in use by a Class II station while all eight are licensed to and in use by the Class I stations. We are therefore concerned that a substantial number of users having a 4 MHz capability are unnecessarily precluded from communicating with Bell System Class II stations over 4 MHz frequencies allocated for use by those stations simply because they have been activated for use by AT&T Class I stations at the substantially higher rate. We recognize that, because of the limitations placed on transmitter power by our rules, a Class I station using 4 MHz frequency may be able to cover a greater area and serve more users on that frequency than a Class II station. Nevertheless, the essence of our concern is that users within this area may currently be required to communicate over 4 MHz frequencies with Class I stations when they could otherwise communicate with Class II stations at a lower rate if those stations activated 4 MHz frequencies allocated to them. We will therefore seek to determine whether a substantial number of such users exist, and, if so, whether the frequencies in the 4 MHz band should be allocated only for use by Class II stations. In doing so, we will consider the past usage by AT&T's Class I stations of those frequency bands other than 4 MHz and whether current users of 4 MHz frequencies who may be unable to communicate on that band with Class II stations will be able to communicate with Class I stations on the higher frequency bands. To this end, we require AT&T to submit in their comments frequency studies showing the usage of each of the 4 to 25 MHz frequencies assigned to its Class I stations for the past three years. If we determine that there is no substantial need for the allocation of the frequencies in the 4 MHz band to only Class II stations, we will consider their allocation to either Class I stations only, or on some other appropriate basis. We request comments and supporting data from interested parties on the following alternatives for allocation of 4 MHz frequencies:

a. Assignment of all 4 MHz frequencies to Class I stations;

b. Assignment of all 4 MHz frequencies to Class II stations;

c. Assignments of 4 MHz frequencies on the present basis;

d. Assignment of 4 MHz frequencies on a basis other than indicated above; and

e. Assignment of both MF and HF frequencies to the same coast station eliminating any class designation.

5. The Class II designator is now also applied to the inland waterways where the Commission has granted HF frequencies to coast stations to complement 2 MHz frequencies. The difference here is that these frequencies are assigned for simplex operation. While the ultimate goal is to have the inland waterways on VHF, there will be an interim period where HF frequencies will be required to satisfy the operational requirements until the VHF system can be developed and adequate VHF frequencies available to satisfy the requirement. Comments are requested on the need to establish a new class of station to differentiate between Class II regional stations providing service along the coast on 2 MHz and possibly 4 MHz and inland waterway stations which are operating simplex on MF and HF frequencies.

6. In view of the foregoing, a Notice of Inquiry is adopted. Authority for this action is contained in sections 4(i), 303 (r) and 402 of the Communications Act of 1934, as amended.

7. Interested persons may file comments on or before September 6, 1977. The form of comments and number of copies shall conform to § 1.419 of the Commission's rules which requires an original and 5 copies. Responses will be available for public inspection during regular hours in the Commission's Public Reference Room at its Headquarters in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

---

[1] A Class I station is licensed to provide maritime mobile service over distances up to several thousand miles. A Class II station is licensed to provide service primarily of a regional character. There are no specific distance limitations placed on these classes of stations regarding their service areas, although, limitations are placed on the transmitter power that they may use (47 CFR 81.134).

[2] In Docket No. 20906, we allocated a 4 MHz frequency for use by a coast station in the Class II service rather than the Class I service since that station already was using another 4 MHz frequency in Class II service. We pointed out that essentially the same customers would be served by use of the 4 MHz frequency under consideration in the Class I as were then being served by use of another 4 MHz frequency in the Class II service. Since that stations rates for Class I service were higher than those for Class II service, we found that the station would violate Sections 201(b) and 202(a) of the Communications Act if it charged the higher Class I rate for essentially the same service to the same customers as it was providing in the Class II service (FCC 77–266, April 22, 1977).

[3] Station WOM (Pennsuco, Florida); Station WOO (Manahawkin, New Jersey); Station KMI (Point Reyes, California).

[4] WOU (New England Telephone and Telegraph Company); WOX (New York Telephone Company); WAQ (New Jersey Bell Telephone Company); WAE (The Chesapeake and Potomac Telephone Company of Virginia); WGB (The Chesapeake and Potomac Telephone Company of Virginia); WJO (Southern Bell Telephone and Telephone and Telegraph Company); WNJ (Southern Bell Telephone and Telegraph Company); WDR (Southern Bell Telephone and Telegraph Company); WAK (South Central Bell Telephone Company); KQP (Southwestern Bell Telephone Company); KCC (Southwestern Bell Telephone Company); KOU (Pacific Telephone and Telegraph Company); KLH (Pacific Telephone and Telegraph Company); KOE (Pacific Telephone and Telegraph Company); KFX (Pacific Northwest Bell Telephone Company); KOW (Pacific Northwest Bell Telephone Company).

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

FLUE-CURED TOBACCO ADVISORY COMMITTEE

Meeting

The Flue-Cured Tobacco Advisory Committee has requested that an emergency meeting be held in the Tobacco Division, Agricultural Marketing Service, United States Department of Agriculture, Laboratory, Room 223 Flue-Cured Tobacco Cooperative Stabilization Corporation, 1306 Annapolis Drive, Raleigh, N.C. 27605, at 2:30 p.m., on Tuesday, August 9, 1977.

The Department has received information that exceedingly dry weather in the most northern flue-cured tobacco growing area has caused a delay in the ripening of the crop and the volume that will be ready for marketing in the next three weeks does not warrant the amount of sales opportunity currently allotted to Area E. Therefore, it is necessary to hold a meeting of the Committee to discuss how to best redistribute Area E's sales opportunity and personnel back to Areas A and B where the tobacco producers can more fully utilize it at this time. Producers are now redesignating their tobacco to various warehouses, and the results of these redesignations must be reflected in the schedules which will become effective August 15, 1977. The urgency of the meeting makes it impossible to meet the 15 days' advance notice required by OMB Circular A-63, March 27, 1974.

The purpose of the meeting is to reconsider previously established sales schedules for Marketing Area E, which is scheduled to open on August 9, 1977, in an effort to study the feasibility of redistributing unused sales opportunity from Area E back to Areas A and B. Also, matters as specified in 7 CFR Part 29, Subpart G, § 29.9404 will be discussed.

The meeting is open to the public but space and facilities are limited. Public participation will be limited to written statements submitted before or at the meeting unless their participation is otherwise requested by the Committee Chairman. Persons, other than members, who wish to address the Committee at the meeting should contact Mr. J. W. York, Director, Tobacco Division, Agricultural Marketing Service, 300 12th Street SW., United States Department of Agriculture, Washington, D.C. 20250, 202-447-2567.

Dated: August 5, 1977.

WILLIAM T. MANLEY,
Acting Administrator.

Farmers Home Administration

[Notice of Designation Number A492]

NORTH CAROLINA

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Pitt County, North Carolina, as a result of excessive rainfall May 24, 25, and 26, 1977.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 94-68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor James B. Hunt, Jr., that such designation be made.

Applications for emergency loans must be received by this Department no later than September 26, 1977, for physical losses and April 28, 1978, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 3rd day of August, 1977.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

JOY FOOTWEAR CORP.

Petition for a Determination of Eligibility To Apply for Trade Adjustment Assistance

A petition by Joy Footwear Corp., 440 West 27th Street, Hialeah, Fla. 33010, a producer of athletic footwear, was accepted for filing on August 1, 1977, pursuant to Section 251 of the Trade Act of 1974 (Pub. L. 93-618) and Section 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315). Consequently, the United States Department of Commerce has initiated an investigation to determine whether increased imports into the United States of articles like or directly competitive with those produced by the firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of the petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

CHARLES L. SMITH.
Acting Chief, Trade Act Certification Division, Office of Planning and Program Support.

National Oceanographic and Atmospheric Administration

AMERICAN TUNABOAT ASSOCIATION

Modification of Permit

Notice is hereby given that, pursuant to the provisions of § 216.33 (d) and (e) of the regulations governing the taking and importing of marine mammals (50 CFR Part 216), the General Permit for Category 2: Encircling Gear, Yellowfin Tuna Purse Seining, issued to American Tunaboat Association, 1 Tuna Lane, San Diego, Calif. 92101, on April 15, 1977, is modified in the following manner:

Delete the quota for spinner dolphin (whitebelly) and modify the permit to include the following quota:

Spinner dolphin (whitebelly):	
Take limit	2,120,000
Encirclement	1,402,000
Mortality limit	11,219

This modification is effective August 3, 1977.

The General Permit, as modified, is available for review in the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and
Regional Director, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, Calif. 90731.

Dated: August 3, 1977.

WINFRED MEIBOHM,
Associate Director, National Marine Fisheries Service.

GEOSTATIONARY OPERATIONAL ENVIRONMENTAL SATELLITE (GOES) DATA

Meeting

The National Oceanic and Atmospheric Administration announces a meeting to discuss the recently instituted Public Service Sectorizer for GOES data. The purposes of the meeting are to present to the users the capabilities of the GOES Public Service Sectorizer; to provide a forum for the users to state their requirements; and, to develop a schedule that meets as many of those requirements as possible. The meeting will be held at 9 a.m. on August 30, 1977, at the World Weather Building, Room 707, 5200 Auth Road, Camp Springs, Maryland. Mr. Don Winner, Chief of the Field Services Division of the National Environmental Satellite Service, is the contact for the meeting. His mailing address is: National Environmental Satellite Service, World Weather Building, Code S122, Washington, D.C. 20233.

THEODORE P. GLEITER,
Assistant Administrator for Administration, National Oceanic and Atmospheric Administration.

AUGUST 3, 1977.

CONSUMER PRODUCT SAFETY COMMISSION

ARCHITECTURAL GLAZING MATERIALS

Clarification to Advisory Opinion

AGENCY: Consumer Products Safety Commission.

ACTION: Notice of Clarification of Advisory Opinion 248.

SUMMARY: The Commission publishes a clarification to an Office of the General Counsel advisory opinion, approved by the Commissioners, concerning a method for certifying that that architectural glazing materials conform to the commission's Standard for Architectural Glazing Materials. The clarification, which was issued on July 12, 1977, responds to an inquiry from Visador Company.

FOR FURTHER INFORMATION CONTACT:

Allen Brauninger, Directorate for Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207, 301-492-6629.

SUPPLEMENTARY INFORMATION: On April 15, 1977, the Office of the General Counsel responded, in Advisory Opinion 248, to an inquiry from PPG Industries concerning the form for the certificate issued under section 14 of the CPSA, certifying compliance with the Architectural Glazing Standard published in the FEDERAL REGISTER of January 6, 1977 (42 FR 1428). The Office of the General Counsel advised that "in the absence of regulations to the contary, the certification necessary to comply with section 14(a) of the CPSA for the Standard for Architectural Glazing Materials must be in the form of a separate certificate (i.e., a certificate separate from the glazing material) for glazing material subject to the Standard." The opinion, which was approved by the Commission, was published in the FEDERAL REGISTER on April 27, 1977 (42 FR 25107).

By letter dated June 17, 1977, the Visador Company advised the Directorate of Compliance and Enforcement of the Commission of practical problems involved in compliance with section 14(a)(1) of the CPSA. Visador advised that it purchases approximately 40,000 to 50,000 pieces of tempered glazing material each month from five suppliers and manufactures approximately 35,000 to 40,000 door lites subject to the Standard each month. These lites are sold each month to 1,000 customers on 2,000 orders containing about ten types of door lites per order. Virador indicated that "to keep track of which certificate of compliance goes with which lite on any order boggles the mind."

In response to the problems raised by Visador, the Office of the General Counsel, with the approval of the Commission, clarified Advisory Opinion 248 in a letter to Visador dated July 12, 1977 to indicate that the certification requirements of section 14(a) of the CPSA could be met if a manufacturer issues a single continuing certificate for all complying types of products. In this way it would not be necessary for a manufacturer to accompany each order of glass with a separate certificate.

The Commission publishes below the text of the clarification to Advisory Opinion 248B, in order to apprise manufacturers of glazing materials of the Commission's clarification of its interpretation of the certification requirements under the CPSA. Other Office of the General Counsel Advisory Opinions are available upon request in the Office of the Secretary, 3rd Floor, 1111 18th Street NW., Washington, D.C. 20207.

MR. JAMES SEALE,
Process Research Executive, Visador Company, 940 Visador Road, P.O. Box 5981, Jasper, Tex.

DEAR MR. SEALE: The purpose of this letter is to advise you that the Consumer Product Safety Commission is clarifying advisory opinion 248 as a result of the various problems you have raised in your letter of June 17, 1977 concerning the issuance of certificates of compliance with the Safety Standard for Architectural Glazing Materials (16 CFR Part 1201) required by section 14(a) of the Consumer Product Safety Act (CPSA). The relevant portion of section 14(a) states that the "certificate shall accompany the product or shall otherwise be furnished to any distributor or retailer to whom the product is delivered." The advisory opinion stated that the certificate issued under section 14(a) for architectural glazing material must be in the form of a document separate from the glazing material.

In your letter you stated the following:

We understand that when CPSC 1201 becomes effective on July 6, 1977, that glass manufacturers will be required to issue Certificates of Compliance to CPSC 1201 with each order of glass sent to their customers. Further, we understand that as we purchase glass (tempered) from these glass manufacturers for incorporation into architectural glazing products (Door Lites) for sale we are required to pass the Certificate of Compliance on to our customers.

The Commission has determined that, until it issues regulations regarding certification of compliance with the Architectural Glazing Materials Standard, a certifying person may issue a single continuing certificate for all complying types of products to be delivered for a specified period of time. Thus, it is not necessary to accompany *each order of glass* with a certificate.

We note that you have proposed to send letters to all your customers to notify them of the CPSC requirements. Such letter may serve as your certification so lang as it contains all of the information required by section 14(a)(1) of the Act. For example, you could advise your customers by letter that all door lites of glass they receive from you had been manufactured by either X, Y or Z manufacturer, that the glass was manufactured in either A, B or C location, and that all such glass has been certified to comply with the Commission's Standard. In recard to the requirement in section 14(a)(1) that the date of manufacture be specified, we believe you could indicate that the certification applies to all products manufactured for a specified or indefinite period of time.

We wish to emphasize that section 14(a) requires manufacturers of products subject to consumer product safety standards to issue certificates, regardless of whether the Commission has issued certification regulations. In addition, under section 14(c)(3) the Commission could, by rule, require that each consumer product subject to a consumer product safety standard be labeled to certify that it meets all applicable standards and to specify the standards that apply.

Several issues regarding the form and content of certification and labeling will be a matter for determination by the Commission as part of the regulations regarding certi-

fication the Commission plans to propose for public comment under section 14. Please do not hesitate to contact me if you have any further questions.

Sincerely,

THEODORE J. GARRISH,
General Counsel.

Dated: August 3, 1977.

SADYE E. DUNN,
Deputy Secretary, Consumer Product Safety Commission.

[CP 77-2]

BELT-DRIVEN GRINDERS

Petition to Establish Consumer Product Safety Standard

AGENCY: Consumer Product Safety Commission.

ACTION: Denial of petition.

SUMMARY: The Commission has denied a petition to require that belt-driven grinders sold to consumers comply with Occupational Safety and Health Administration (OSHA) requirements for abrasive wheel machinery. The Commission denied the petition because there is a lack of data showing injuries to consumers caused by the hazards mentioned in the petition and because currently available information does not support a finding that a consumer product safety standard is necessary for this product.

FOR FURTHER INFORMATION, CONTACT:

Mark Gulak, Office of Program Mangement, Consumer Product Safety Commission, Washington, D.C. 20207, 301-492-6754.

SUPPLEMENTARY INFORMATION: Section 10 of the Consumer Product Safety Act (CPSA), 15 U.S.C. 2059, provides that any interested person may petition the Consumer Product Safety Commission to commence a proceeding for the issuance of a consumer product safety rule. Section 10 also provides that if the Commission denies such a petition, it shall publish its reasons for denial in the FEDERAL REGISTER.

By a petition dated December 9, 1976, Mr. William G. Schuessler, Vice-President of Wissota Manufacturing Co., 2401 Nevada Avenue North, Minneapolis, Minnesota (a manufacturer of belt-driven grinders and other tools) petitioned the Commission to establish a consumer product safety standard which would require belt-driven grinders sold to consumers to conform to the OSHA standards for abrasive wheel machinery (29 CFR 1910.215). A belt-driven grinder is one in which the wheel is actuated by a system of belts and pulleys. These grinders are generally sold without a motor, and the user supplies the power source. The petition states that if the motor's revolutions per minute and pulley ratios are not correctly chosen, the wheel can be turned so fast that it exceeds its speed rating or be turned so slow that the operator has to overstress the wheel in order to grind efficiently. These factors, plus the possibility of a faulty wheel being sold, can cause the grinding wheel to rupture while it is spinning at high speed. The petition states that wheel guards are required in order to protect consumers against the hazard and requests that a consumer product safety standard be established to require that belt-driven grinders that are sold as consumer products comply with the industrial OSHA requirements.

The OSHA requirements referred to in the petition are established by the Occupational Safety and Health Administration, U.S. Department of Labor, and apply to certain employment related activities. They do not apply to products that are for consumer use. The OSHA requirements relating to grinding machinery contain the requirements of ANSI B7.1, "Safety Code for the Use, Care, and Protection of Abrasive Wheels," which is a voluntary standard approved and published by the American National Standards Institute, 1430 Broadway, New York, N.Y. 10018.

The information available to the Commission through the National Electronic Injury Surveillance System (NEISS) does not distinguish between injuries caused by belt-driven grinders and those caused by direct drive grinders. It is estimated that 3,000 injuries associated with both types of power grinders were treated in hospital emergency rooms during the 12 month period ending June 30, 1976. Ninety-nine percent of the victims were treated and released from the hospital emergency room.

The Commission has reports of 29 investigations of accidents associated with power grinders. One of these cases involved a victim who was struck in the head by a fragment when the grinding wheel shattered. The Commission is also aware of one death which resulted when the victim was struck in the chest by fragments when a power grinding wheel broke. The Commission does not possess information which would indicate whether or not the grinding machines involved in these incidents had guards installed or whether they complied with OSHA requirements.

The voluntary standard concerning power grinders, ANSI B7.1, which is incorporated in the OSHA requirements, is presently undergoing a major revision. There is also a technical committee of B7.1 at work preparing a new section on bench grinders of the type used by consumers. In response to an inquiry by the Commission's staff, this subcommittee will consider the inclusion of belt-driven grinders in the scope of their activities.

The Commission is aware of only three manufacturers of belt-driven grinders. The information available to the Commission indicates that these manufacturers have been encouraged by their insurers and major retailers to conform to OSHA standards. Such encouragement could lead to a high degree of compliance with any voluntary standard that may be developed for bench grinders used by consumers.

In its review of this petition, the Commission considered the relative priority of the risk of injury associated with this product and the Commission resources available for rulemaking proceedings for all consumer products. The Commission noted that belt-driven grinding wheels are not included among products given priority designation for Commission action.

In addition, the Commission decided to deny this petition because, based on the information available, it does not appear that a mandatory standard is needed at this time to address any risk of injury associated with belt-driven grinding wheels.

Copies of the petition and other relevant materials may be seen in or obtained from the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, during working hours Monday through Friday.

Dated: August 3, 1977.

SADYE E. DUNN,
Deputy Secretary, Consumer Product Safety Commission.

[CP 77-36]

VENTILATION FANS

Denial of Petition

AGENCY: Consumer Product Safety Commission.

ACTION: Denial of petition.

SUMMARY: The Commission has denied a petition to require hazardous warning labels and instruction for all thermostatically controlled space ventilation cooling fans (e.g., attic fans) sold to the public. The requested label would warn the consumer against the hazards of (1) increased fire spread caused when the thermostat turns on the fan when a fire heats the air around the fan (thereby causing the fan to supply fresh air to the fire) and (2) the thermostat starting the fan while it is being cleaned or oiled by the consumer. The petition was denied by the Commission because of a lack of data showing injuries caused by these possible hazards and because presently available information does not support a finding that a consumer product safety standard requiring labels is necessary for these fans.

FOR FURTHER INFORMATION, CONTACT:

Mark Gulak, Consumer Product Safety Commission, Washington, D.C. 20207, 301-492-6754.

SUPPLEMENTARY INFORMATION: Section 10 of the Consumer Product Safety Act (CPSA), 15 U.S.C. 2059, provides that any interested person may petition the Consumer Product Safety Commission to commence a proceeding for the issuance of a consumer product safety rule. Section 10 also provides that if the Commission denies such a petition, it shall publish its reasons for denial in the FEDERAL REGISTER.

By a petition filed December 22, 1976, Mr. Lawrence H. Chapman of Harvey, Louisiana, petitioned the Commission to require hazardous warning labels and instructions for thermostatically controlled space ventilation cooling fans (Petition no. CP 77-3). The petition is set forth below:

"A PETITION TO ADOPT A STANDARD REQUIRING HAZARDOUS WARNING LABELING ON THERMOSTATICALLY CONTROLLED SPACE VENTILATION COOLING FANS SOLD

I. A Hazardous Warning Label shall be required on all thermostatically controlled space ventilation cooling fans sold to the public. Thermostatically controlled is defined as a heat sensitive switching device which turns the ventilation fan on at a predetermined increase in temperature and turns the fan off after a decrease in temperature.

II. The label shall contain the following basic information:

1. Warn the consumer of increased fire spread hazard created by the installation of a thermostatically controlled space ventilation cooling fan.

2. Inform the consumer that a fire protective limit disconnect switch may be installed in the motor supply circuit and for a mechanical fire door for prevention of the spread of fire due to the thermostat turning the fan on uncontrollably during the higher heat of a fire.

3. Inform the consumer of the desirability to also provide a separate manual disconnect switch within three feet of the fan unit in order to prevent mechanical injury to persons servicing the unit. Explain that while servicing the unit without turning such a switch off that it is possible for the thermostatic control to start up the unit and cause injury to the service person.

4. Warn the consumer that care and planning may be necessary prior to installation and that there may be local building codes to be considered in addition to the manufacturer's instructions and recommendations.

5. Inform the consumer of where to obtain information or advice from a manufacturer's representative closest to the consumer's location concerning usage.

III. The label shall have a black border around the label so that the label will stand out for the consumer's attention visually.

IV. The first line of the label shall be the words Life Safety Warning. This wording shall be in capital letters at least one half inch in height and taking three inches in width. The label shall be printed in bold type on a light background. It shall be so designed as to catch the visual attention of the consumer before unpackaging and installing the product. Dark colored inks or light pastel backgrounds will meet this general specification.

V. The regulation standard further provides that in addition to the hazardous warning label; an instruction sheet for installation and operation of the cooling fan unit shall be provided for the ultimate consumer.

VI. The hazardous warning label shall be permanently attached to the thermostatically controlled space ventilation cooling fan, instruction sheet, and all advertising announcements designed to incude a consumer to purchase the product.

VII. If any thermostatically controlled space ventilation fan which moves air at a velocity of 100 cubic feet per minute or higher is not in compliance with the standard herein: it shall be removed from sale until it has been brought into compliance with this hazardous warning labelling standard."

The petitioner argued that consumers are not being advised of the increased fire spread problem which he states can be caused by a fan turning on when heated by a fire or of the safety problem which exists if the fan is not turned off while being worked on. In the latter case, he states the thermostat can start the fan while it is being cleaned or oiled. The petitioner states that a disconnect switch or fusible link which would shut down the fan when a certain high temperature exists is desirable, as is a manual disconnect switch, and that consumers should be advised of the desirability of installing these features.

The information available to the Commission through the National Electronic Injury Surveillance System (NEISS) does not disclose any injuries attributable either to the spread of fire as a result of thermostatic activation of ventilation fans or to thermostatic activation of these fans while they are being worked on. In addition, the Commission's analysis of the potential hazards caused by thermostatic activation of ventilation fans under these conditions does not support a finding that labeling or instructions of the type requested in the petition is necessary to protect the public.

The Commission has learned that some knowledgeable experts in the fire protection field, such as staff members of the National Bureau of Standards and the American National Standards Institute, believe that an upper limit temperature switch on these fans is undesirable because it is preferable to remove as much heat and smoke from the attic as possible. It has also been theorized that a fire which is generating a sufficient amount of heat to operate a thermal cutoff will not be significantly affected by the operation of an attic ventilating fan with regard to either the quantity of heat generated or the overall smoke concentration in the attic. In those cases where the attics are not inhabited, injuries due to a fire in the attic are not likely to occur until the fire has burned through the ceiling. This would normally require a considerable length of time.

It is likely that the cutoff which is required by Underwriters Laboratories voluntary standard UL 507, "Electric Fans," in order to protect motors against overheating would operate in the event the fan were exposed to high temperatures caused by fire. The Commission is advised that at least 95% of thermostatically controlled attic ventilators conform to this UL requirement. Also, the voluntary standard for electric fans (UL 507) currently contains a requirement for a label which would alert the consumer to the need to disconnect the device prior to servicing.

After careful consideration, the Commission has decided to deny this petition because, based on the information available at this time, the Commission is unable to find either that the risk of injury associated with thermostatically activated space ventilation cooling fans due to the factors described in the petition is sufficient to warrant a consumer product safety rule requiring the requested labels and instructions or that the absence of such a rule unreasonably exposes consumers to a risk of injury presented by this product.

Copies of the petition and the staff briefing package to the Commission may be seen in or obtained from the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, during working hours Monday through Friday.

Dated: August 3, 1977.

SADYE E. DUNN,
Deputy Secretary, Consumer Product Safety Commission.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

[ERDA-1540]

BROOKHAVEN NATIONAL LABORATORY, UPTON, N.Y.

Availability of Final Environmental Statement

Notice is hereby given that the Final Environmental Statement, ERDA-1540, Brookhaven National Laboratory (BNL), Upton, Long Island, N.Y., was issued pursuant to the Energy Research and Developmental Administration's (ERDA) implementation of the National Environmental Policy Act of 1969. The statement was prepared to support continued operation of the Laboratory.

The current cumulative impact on the environment of the operation of the various facilities and conduct of research at the Laboratory has been assessed in the environmental impact statement, as well as the anticipated future impact of continuing these operations at the BNL site.

Copies of the final statement are available for public inspection in the ERDA public document rooms loacted at:

ERDA Headquarters, 20 Massachusetts Avenue NW., Washington, D.C.

Albuquerque Operations Office, Kirtland Air Force Base East, Albuquerque, N. Mex.

Chicago Operations Office, 9800 South Cass Avenue, Argonne, Ill.

Idaho Operations Office, 550 Second Street, Idaho Falls, Idaho.

Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nev.

Oak Ridge Operations Office, Federal Building, Oak Ridge, Tenn.

Richland Operations Office, Federal Building, Richland, Wash.

San Francisco Operations Office, 1333 Broadway, Oakland, Calif.

Savannah River Operations Office, Savannah River Plant, Aiken, S.C.

Copies have been furnished to those who commented on the draft statement that was issued by the Energy Research and Development Administration November 28, 1975. Copies are also avail-

able for public inspection at designated Federal Depository Libraries.

A limited number of single copies are available for distribution by the Technical Information Center, P.O. Box 62, Oak Ridge, Tenn. 27830, (615-483-8611, Extension 34672). The statement is also available from the National Technical Information Service, Springfield, Va. 22161.

Dated at Germantown, Md., this 28th day of July 1977.

For the Energy Research and Development Administration.

JAMES L. LIVERMAN,
Assistant Administrator for Environment and Safety.

FEDERAL COMMUNICATIONS COMMISSION

[FCC 77-481; Docket No. 21335; File No. 933-M-L-63]

DELTA VALLEY RADIOTELEPHONE CO., INC.

Memorandum Opinion and Order Designating Application for Hearing on Stated Issues

Adopted: July 13, 1977.

Released: July 29, 1977.

1. We have before us for consideration an Application for Review filed by the Delta Valley Radiotelephone Co., Inc. (Delta), Stockton, Calif., pursuant to section 1.115 of our rules. Delta objects to the action taken by the Chief, Safety and Special Radio Services Bureau, under delegated authority in dismissing an application filed by Delta for a Public Coast (Class III-B) radio station at El Dorado, Calif., to provide service to vessels on Lake Folsom about 17 miles away. This class of coast station provides public correspondence radiocommunication services to ships in the very high frequency (VHF) radio maritime band.

2. The Application for Review of Delta and its application for a station authorization is opposed by the Pacific Telephone and Telegraph Co. (PT&T). PT&T is the licensee of a public coast station, KGW-464, of this class, located at Vacaville, Calif., west of, and about midway between the cities of Sacramento and Stockton, Calif., and about 50 or more miles from the location of Delta's proposed station. KGW-464 has a coverage area for its signal that includes the Sacramento River and adjacent navigable waters at and near the city of Sacramento.

3. Delta complains that it has been denied the hearing on its application that it is entitled to by the Communications Act, and that the Bureau Chief operated beyond the scope of his delegated authority by acting on a request for a rule waiver that involved "new and novel" matters on which the Bureau Chief was not permitted by Section 0.331 of the Commission's rule to act. Delta asserts that the Bureau Chief granted its requested rule waiver, which made its application not defective and not subject to dismissal without a hearing; and that once the Bureau Chief granted the waiver, it could not thereafter be withdrawn or set aside. Delta requests that we reverse the Bureau Chief and grant its application with a rule waiver, or alternatively, set the application for an evidentiary hearing.

4. Essentially, as reflected by the information in the pleadings by Delta and PT&T, and in our application files, this matter involves an application for a public coast station with a proposed coverage area that significantly overlaps the coverage area of a nearby existing station of this class. The coverage overlap is permitted by our rules in section 81.303(b), provided the proposed station is at least 30 miles from any existing station and is to serve a different boating locality. For these purposes, "boating locality" is defined, in part, in that rule section, as a port, marina, or harbor with docking or servicing facilities for not less than 10 commercial or 50 noncommercial vessels that are equipped with radio. In this instance, the proposed station of Delta is well beyond 30 miles from the existing station of PT&T but Delta has not made a showing, that the boating locality it intends to serve has the requisite number of vessels that are equipped with radio, and it requests a waiver of that requirement. Delta states that a showing is not possible in this instance because vessel operators are waiting for coast radio service before equipping their vessels with radio, in a "which comes first, the chicken or the egg" situation. PT&T asserts that the real intention of the applicant is not to serve a different boating locality at Lake Folsom as claimed, but to serve, to PT&T's detriment, the navigable waters in and around Sacramento which are already served by its station. PT&T also claims it can serve Lake Folsom with its radio signal, but that there is little or no demand for service there. The Bureau granted the rule waiver concerning a showing of boats equipped with radio with the expectation that an application for amendment would resolve the overlap problem. When the applicant failed to so amend its application, the Bureau Chief withdrew the rule waiver and dismissed the application as defective.

5. The Bureau Chief did not lack authority to act on a request for waiver of the "boating locality" requirement of section 81.303(b). Such a request did not create "new or novel questions of fact, law or policy which cannot be resolved under outstanding precedents and guidelines". The fact that a specific rule may not have been waived previously does not automatically place it in the above quoted category. Precedents, policy and guidelines concerning Marine VHF Public Coast stations are found throughout numerous Commission decisions in rule makings and hearings and the information contanied therein is sufficient to give a person guidelines within which to act on a request of the nature of the one before us.[1] The Chief, Safety and Special Radio Services Bureau, was clearly within the limits of authority delegated to him by this Commission. Apparently, Delta Valley had no problem with his authority when it perceived his action as a grant of the waiver.

6. It is now left to be determined whether the Bureau Chief granted an unconditional waiver—one that he could not set aside. The operative language is contained in a one sentence paragraph in the Bureau Chief's letter of August 14, 1975, to the attorneys of Delta Valley it reads as follows:

> Accordingly, the requested rule waiver is hereby granted and we are prepared to consider favorably your application upon receipt of an amendment of your application, to show coverage area computed pursuant to section 81.801 et seq (Subpart R), that excludes the Sacramento River.

7. It is clear from later actions that the Bureau Chief felt that this waiver was granted with a condition subsequent, i.e., exclusion of the Sacramento River. When the condition subsequent was not met he took the following action by letter of December 22, 1975, to the attorneys for Delta Valley which reads in pertinent part

> Your amended application does not comply with the condition specified in our referred to letter in that there is no significant change on reduction in the coverage area of your proposed station. The coverage area still includes substantial portions of the Sacramento River.
>
> Since you have not met the condition specified in our letter, your application is dismissed pursuant to section 1.958(c) of the Commission's rules (47 CFR 1.958(c)) as defective since it is not in accordance with the Commission's rules.

8. The language of August 14, 1975, lacks certain precision as to the fact that a condition subsequent was attached to the waiver. However, a fair reading shows that clearly something more was intended of Delta Valley before they could qualify for a grant. In fact in the very sentence where a grant of waiver is discussed a requirement to exclude the Sacramento River is included. That the Bureau Chief felt the grant was conditional is abundantly clear by the December 22, 1975, letter. We must conclude, however, that the waiver contained in the August 14, 1975, letter was not subject to a condition subsequent but vested immediately in Delta. Therefore, the Bureau Chief was without authority to dismiss the application of Delta.

9. However, even under these circumstances, Delta's application cannot be granted because the information of record reveals there is a substantial and material question of fact that must also be resolved concerning the primary service area of the proposed station. We note the de facto coverage area of the proposed station, as indicated by maps and charts furnished by the applicant, will extend far beyond the nearby Lake Folsom, and will, as asserted by PT&T, include most or all of the navigable waters in the Sacramento and Stockton areas now served by station KGW-464. As stated above, this overlap of coverage areas by stations located more than 30 miles apart, on different working frequencies is not, in and of itself, contrary to the public interest or inconsistent with our rules or policy. We have, in fact, authorized new service in situations where we knew there would be overlap, without destructive electrical interference, provided the stations were serving different boating localities primarily, and overlapping into each other's coverage areas and providing service therein, only incidentally. Class III (VHF) public coast stations are defined in section 81.3(j) of our rules as stations that provide maritime mobile service primarily of a local nature. The new station thus established, however, must be intended to to serve primarily, the different boating locality and not, primarily, the area already served by an existing station. The question, therefore, of the area that is to be served primarily by the proposed Delta station takes on critical significance.

10. Notwithstanding Delta's assertion that it proposes and contemplates service only to Lake Folsom, the de facto coverage area of its proposed station, together with our rule requirement that public coast stations respond to all calls directed to them, there is uncertainty concerning the location and identification of the actual primary service area of the proposed station. This uncertainty is not ameliorated by Delta's failure to respond affirmatively to our suggestion that by antenna reorientation, or otherwise, the coverage area be changed to exclude the Sacramento River. If the primary service area is in fact to be Lake Folsom, the existence of overlap in the coverages of the two stations, under these circumstances, as explained above, would not render the Delta application defective nor its grant contrary to our rules or the public interest. If, conversely, the primary service area, based on the location of the bulk of vessel traffic, numbers of calls, and other factors is to be the navigable waters on or near the Sacramento River that are already within the primary service area of an existing station, then the rule against more than a 20 per cent overlap in coverage areas would apply and the application of Delta must be considered in conflict with our rules and the public interest, and defective, and must be denied. In order to determine whether Delta is actually seeking to be a Lake Folsom facility we have specified an issue to determine whether there are alternate technical proposals that would exclude or diminish coverage of the Sacramento River.

11. Accordingly, *it is ordered*, That the Application for Review of Delta is granted to the extent provided herein and is denied in all other respects, and the petition to deny by PT&T is granted to the extent that it is made a party in this proceeding, and in all other respects, is denied.

12. *It is further ordered*, That the application of Delta for a public coast station at El Dorado, Calif., is designated for hearing at a time and place to be specified in a subsequent Order on the following issues:

(a) To determine the location of the primary service area of the station, based on the following considerations:

(1) The coverage areas of Delta's proposed station and the existing station KGW-464;

(2) The number of vessels on Lake Folsom, and number of calls, and amount of revenue expected from communication services furnished these vessels;

(3) The number of vessels other than on Lake Folsom within the coverage area of station KGW-464 with whom communications would be exchanged, location of these vessels, and amount of revenue expected to be generated from this source;

(4) Points on land with which vessels on Lake Folsom, are expected to communicate through the proposed station;

(5) The manner and extent in which the proposed station would participate in rendering assistance to Lake Folsom vessels in distress or emergency, as compared to station KGW-464;

(b) To determine whether Delta's coverage area for its proposed station could, technically, be modified to exclude the Sacramento River by antenna redesign or otherwise.

(c) To determine in light of the evidence adduced on the foregoing issues whether the application should be granted.

13. *It is further ordered*, That the burden of proof and the burden of proceeding with the introduction of evidence on issue, (a) is placed on Delta, except for issue (a) (1) and (5) which is also placed on PT&T to the extent that the issue applies to station KGW-464. The burdens of issue (b) are placed on PT&T. Issue (c) is conclusory.

14. *It is further ordered*, That to avail themselves of an opportunity to be heard, Delta and PT&T, pursuant to section 1.221(c) of the rules, shall, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date set for hearing and present evidence on the issues specified in this Order. Pursuant to section 1.21(b) of the rules, the Chiefs of the Safety and Special Radio Services and the Common Carrier Bureaus are deemed parties in this proceeding.

FEDERAL COMMUNICATIONS COMMISSION.[2]
VINCENT J. MULLINS,
Secretary.

FEDERAL ENERGY ADMINISTRATION

CASES FILED WITH THE OFFICE OF EXCEPTIONS AND APPEALS

Week of July 22 through July 29, 1977

Notice is hereby given that during the week of July 22 through July 29, 1977, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Federal Energy Administration's Office of Exceptions and Appeals.

Under the FEA's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the FEA action sought in such cases may file with the FEA written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be August 9, 1977, or the date of receipt by an aggrieved person of actual notice, whichever occurs first.

ERIC J. FYGI,
Acting General Counsel.

AUGUST 3, 1977.

[2] Chairman Wiley concurring in the result; Commissioners Lee and Washburn dissenting; Commissioner Hooks absent.

APPENDIX.—*List of cases received by the Office of Exceptions and Appeals, week of July 22 through July 29, 1977*

Date	Name and location of applicant	Case No.	Type of submission
July 22, 1977	Charter Oil Co., Jacksonville, Fla. (If granted: The Charter Oil Co. would receive an extension of the exception relief granted in the FEA's Mar. 11, 1977, decision and order and its purchase obligations would be reduced.)	FXE-4416	Extension of relief granted in Charter Oil Co., 5 FEA par 83,101 Mar 11, 1977).
Do	Ely Crude Oil Co., Ely, Nev. (If granted: The Ely Crude Oil Co. would be granted a stay of certain provisions of pt. 212 pending a final determination of its exception application.)	FES-4413	Stay request.
Do	Ingram Corp., A. Johnson & Co., Inc., Washington, D.C. (If granted: A. Johnson & Co., Inc. would receive various types of administrative relief from the mandatory petroleum allocation and price regulations in connection with its acquisition of the Ingram Corp.'s refinery located in Wilmington, N.C.	FEE 1449	Exception to mandatory petroleum allocation and price regulations (pt. 211 and pt. 212).
Do	Wardair Canada (1975) Ltd., Washington, D.C. (If granted: The FEA's June 22, 1977, allocation order would be modified and Wardair Canada (1975) Ltd. would receive an adjustment to its annual base period use of aviation turbine fuel.)	FEA-1402	Appeal of allocation order issued June 22, 1977.
July 25, 1977	Arent, Fox, Kintner, et al., Washington, D.C. (If granted: The FEA's June 22, 1977, information request denial would be modified and Arent, Fox, Kintner, et al., would receive access to additional FEA data concerning directions for completing FEA form P-125-S-0 and form P-125.)	FFA-1405	Appeal of information request denial dated June 22, 1977.
Do	Ball Marketing, Inc., et al., Lafayette, La. (If granted: The FEA's June 13, 1977, interpretation would be rescinded and Ball Marketing Enterprise, Ball Marketing, Inc., and Great Southern Oil & Gas Co., Inc., would be treated as separate entities for purposes of determining the maximum lawful selling prices of petroleum products under sec. 212.83.)	FIA-1403	Appeal of FEA's interpretation dated June 12, 1977.

Date	Name and location of applicant	Case No.	Type of submission
Do	Cities Service Oil Co., Tulsa, Okla. (If granted: The FEA's July 11, 1977, remedial order would be rescinded and Cities Service Oil Co. would be permitted to terminate its supplier/wholesale purchaser-reseller relationship with 23 lessees located in Massachusetts and New Hampshire.)	FRA-1404	Appeal of FEA region I's remedial order for immediate compliance dated July 11, 1977.
Do	Hughes & Hughes; Beeville, Tex. (If granted: Crude oil produced from Hughes & Hughes' East Pleasanton field unit located in Atascosa County, Tex., would be sold at upper tier ceiling prices.)	FEE-4150	Price exception (sec. 212.73).
Do	Jamar Oil Co., Tulsa, Okla. (If granted: The FEA's July 15, 1977, decision and order would be rescinded and the Jamar Oil Co. would be assigned a new, lower priced supplier of motor gasoline to replace its base period supplier, Foremost Petroleum Corp.)	FXA-1106	Appeal of decision and order in *Jamar Oil Co.*, 6 FEA par. ——— (July 15, 1977).
Do	North Pole Refining; North Pole, Alaska. (If granted: North Pole Refining would be treated as a separate entity for purposes of the entitlement program and for determining its maximum selling prices under sec. 212.83.)	FEE-1151	Exception to mandatory petroleum allocation and price regulations (pt. 211 and pt. 212)
July 25 1977	Aspen Park Gas Co., Inc., Conifer, Colo. (If granted: Aspen Park Gas Co. would be permitted to discontinue its early payment percentage discount which was in effect on May 15, 1973, in computing its maximum allowable price for propane.)	FEE-1152	Price exception (pt. 212)
Do	Belo Gajdos/Al Daniels d.b.a. Louis Butane Co., Robstown, Tex. (If granted: Belo Gajdos Al Daniels d.b.a. Louis Butane Co. would receive a stay of the requirements of the FEA's July 8, 1977, remedial order pending a final determination of their appeal of that order which they intend to file.)	FRS-1407	Stay request
Do	Farmers Gas & Oil Co., Ithaca, Mich. (If granted: The Farmers Gas & Oil Co. would receive a stay of the requirements of the FEA's June 28, 1977, remedial order pending a final determination of its appeal of that order.)	FRS-1393	Do.
Do	J&W Refining, Inc., Dallas, Tex. (If granted: J&W Refining, Inc., would receive an extension of the relief granted in the FEA's Apr. 13, 1977, decision and order which would relieve the firm of its entitlement purchase obligations.)	FXE-1133	Extension of relief granted in J&W Refining, Inc., 5 FEA par. 85,133 (Apr. 13, 1977).
Do	Kern County Refinery, Inc., Cerritos, Calif. (If granted: The FEA's July 21, 1977, decision and order would be rescinded and the FEA would review the entitlements exception relief granted to Kern County Refinery, Inc., during its 1976 fiscal year in order to determine whether the level of exception relief approved was appropriate.)	FEX-0176	Supplemental order to decision and order in Kern County Refinery, Inc., 6 FEA par. ——— (July 21, 1977).
Do	Richard Levy, Alexandria, Va. (If granted: The FEA's June 16, 1977, information request denial would be modified and Richard Levy would receive access to an Aug 10, 1976, memorandum regarding the retroactivity of 10 CFR 212.93(b)(1)(ii).)	FFA-1108	Appeal of information request denial dated June 16, 1977.
Do	Maurice L. Brown Co., Kansas City, Mo. (If granted: Crude oil produced from the Maurice L. Brown Co.'s Midwest Federal lease located in Lea County, N. Mex., would be sold at upper tier ceiling prices.)	FEE-4155	Price exception (sec. 212.73).
Do	State of Oregon, Salem, Oreg. (If granted: The FEA's June 20, 1977, decision and order would be amended by deleting from ordering para. (2) references to H.R. 2141 or H.R. 2142 and substituting reference to H.R. 2140.)	FEX-0177	Supplemental order to decision and order in *State of Oregon*, 6 FEA par. ——— (June 20, 1977).
Do	Valentine & Sons, Inc., Glenrock, Wyo. (If granted: Valentine & Sons, Inc., would be permitted to sell at upper tier ceiling prices the crude oil which it processes from contaminated waste crude oil.)	FEE-4154	Price exception (sec. 212.73).
July 27, 1977	Leonard E. Belcher, Inc., Alexandria, Va. (If granted: Leonard E. Belcher, Inc., would receive a temporary stay of the requirements of the FEA's July 18, 1977, remedial order pending a final determination of a stay request which it intends to file.)	FRT-0046	Request for temporary stay.
July 28 1977	Independent Fuel Terminal Operators Association, et al., Washington, D.C. (If granted: The members of the Independent Fuel Terminal Operators Association, et al., would be recognized by the FEA as a properly formed "class" for the purposes of granting exception relief.)	FEE-4156	Price exception (sec. 212.92).
Do	Mohawk Petroleum Corp., Inc., Los Angeles, Calif. (If granted: The FEA's July 20, 1977, decision and order would be modified to reduce Mohawk Petroleum Corp.'s entitlement purchase obligations.)	FEX-0178	Supplemental order to decision and order in *Mohawk Petroleum Corp., Inc.*, 6 FEA par. ——— (July 20, 1977).

FEDERAL MARITIME COMMISSION

INDEPENDENT OCEAN FREIGHT FORWARDER LICENSE

Applicants

Notice is hereby given that the following applicants have filed with the Federal Maritime Commission applications for licenses as independent ocean freight forwarders pursuant to Section 44(a) of the Shipping Act, 1916, (Stat. 522 and 46 U.S.C. 841(b)).

Persons knowing of any reason why any of the following applicants should not receive a license are requested to communicate with the Director, Bureau of Certification and Licensing, Federal Maritime Commission, Washington, D.C. 20573.

R. G. Croft & Co. (Richard Garland Croft, d.b.a.), 1103 Ashpark Lane, Harbor City, CA 90702.

Theta International Freight Forwarders, (Daniel M. Riccio, d.b.a.), 1068 W. 44th Terrace, Hialeah, FL 33012.

S. A. CHIARELLA & SONS (S.A. Chiarella, d.b.a), 22 Battery Street, San Francisco, CA 94111.

Krupa Shipping Company (Gary J. Krupa, d.b.a), 1400 West 20th Street, Erie, PA 16501.

Gerald Thomas Flocco, 14 Bridgetown Street, Staten Island, N.Y. 10314.

Consulspeed Services (John Charles Grandon, d.b.a), 8501 South Sepulveda Blvd., Suite N. 312, Los Angeles, CA 90045.

James W. Haney, 81 Rains Street, Houston, TX 77003.

Transeurope Shipping, Inc., 5341 W. 104th Street, Los Angeles, CA 90045, Officer: Peter K. Laser, President.

Almar International (Alberto J. Marino, d.b.a.), 6595 NW., 36th Street, Miami, FL 33166.

E. H. Harrington & Company (Edward H Harrington, Jr., d.b.a.), 8410 NW 53rd Terrace, Miami, FL 33166.

By the Federal Maritime Commission.

Dated: August 4, 1977.

JOSEPH C. POLKING,
Acting Secretary.

[Independent Freight Forwarder License No. 1257]

JOSEPH F. ARMENDARIZ

Order of Revocation

On July 28, 1977, Joseph F. Armendariz, 8780 East Valley Blvd., Rosemead, CA 91770, voluntarily surrendered his Independent Ocean Freight Forwarder License No. 1257 for revocation.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised), Section 5.01 (b), dated June 30, 1975;

It is ordered, that Independent Ocean Freight Forwarder License No. 1257 issued to Joseph F. Armendariz be and is hereby revoked effective July 28, 1977 without prejudice to reapply for a license in the future.

It is further ordered, that a copy of this Order be published in the FEDERAL REGISTER and served upon Joseph F. Armendariz.

LEROY F. FULLER,
Director, Bureau of Certification and Licensing.

[FR Doc.77-22962 Filed 8-8-77;8:45 am]

SECTION 7. SPECIFIC AUTHORITIES DELEGATED TO THE MANAGING DIRECTOR

Amendment No. 3 to Commission Order No. 1 (Revised)

Section 7 of the revised order is amended by the addition of subsection 7.20 to facilitate the timely processing of applications for and issuance of certificates of financial responsibility to operators whose vessels will transport oil that has been pumped through the trans-Alaska pipeline as provided by Part 543 of the Commission's rules. The added subsection 7.20 is as follows:

7.20 Authority to (a) approve applications for Certificates of Financial Responsibility (Alaska Pipeline), and to issue or reissue or transfer such Certificates; (b) issue a written notice to an applicant stating that the Commission intends to deny an application, indicating the reason therefor; (c) deny any application for a Certificate where the applicant has been issued the written notice of intention to deny, and has not submitted a timely request for a hearing on that denial; (d) rescind notices of intention to deny an application, and grant extensions of the time within which a request for a hearing may be filed; (e) revoke a Certificate upon request of the certificant; (f) revoke a Certificate for the reasons set forth in subparagraphs (4) and (5) of paragraph (a) of section 543.8 of the Commission's rules; and (g) grant or deny requests for extensions of time provided for in subdivision (v) of subparagraph (3) of paragraph (a) of section 543.6 of the Commission's rules.

KARL E. BAKKE,
Chairman.

JULY 29, 1977.

[FR Doc.77-22960 Filed 8-8-77;8:45 am]

FEDERAL POWER COMMISSION

[Docket No. ER77-514]

CENTRAL POWER & LIGHT CO.

Order Accepting for Filing and Suspending Proposed Increased Rates, Granting Intervention, Denying Motion for Partial Summary Judgment, Denying Request for Waiver of Notice Provisions, Providing for Hearing, and Establishing Procedures

AUGUST 3, 1977.

On July 12, 1977, Central Power & Light Company (CP&L), tendered for filing proposed increased rates and charges for jurisdictional sales to six wholesale customer.[1] The proposed rates would increase revenues to CP&L by $1,012,302 for the test period year ending June 30, 1978. CP&L requests an effective date of August 7, 1977, and therefore seeks waiver of the Commission's notice requirements.

On July 21, 1977, Magic Valley Electric Cooperative, Inc., and Rio Grande Electric Cooperative, Inc., (hereinafter referred to as "Petitioners") filed a "Protest, Petition to Intervene and Motion for Partial Summary Judgment" of the rate filing. The Petitioners allege, inter alia, that CP&L has requested an unprecedented return on equity and improperly seeks to include accumulated deferred tax credits in the capital structure. In addition, Petitioners assert that since it is clear that CP&L has no hope of justifying the requested return on equity, it is requested that partial summary judgment be granted on this issue so that the wholesale customers may be spared the imposition of paying an unjustified rate of return during the pending of these proceedings.

It is clear that Petitioners are interested parties within the meaning of Section 1.8 of the Rules of Practice and Procedure and, therefore, we conclude that good cause exists to permit intervention in this proceeding. However, we find no basis for rejecting CPL's filing or issuing a partial summary judgment. The Commission may summarily reject a filing when it is not in proper form or order or issue a summary judgment where the filing raises no dispute of fact but only a question of law which does not require ventilation of underlying facts or administrative policy. *Municipal Light Boards* v. *F.P.C.*, 450 F. 2d 1341 (D.C. Cir. 1971). We find no such factors here.

A review of CP&L's filing indicates that the proposed increase in rates and charges have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, preferential or otherwise unlawful. Based on a review of all the pleadings, we will accept for filing the proposed increased rates and will suspend their effectiveness for one day, i.e., to August 13, 1977, at which time they will become effective subject to refund.

The Commission finds: (1) The intervention in this proceeding of the Magic Valley Electric Cooperative, Inc. and Rio Grande Electric Cooperative, Inc. may be in the public interest.

(2) Good cause exists to deny the request for waiver of the notice provisions, to deny the motion for partial summary judgment, to accept for filing CP&L's proposed rate schedules, and to suspend the rates contained therein, all as hereinafter ordered.

(3) It is necessary and in the public interest that an evidentiary hearing be held in this docket in order for the Commission to discharge its statutory responsibilities under the Federal Power Act.

The Commission orders: (A) The Magic Valley Electric Cooperative, Inc., and Rio Grande Electric Cooperative, Inc. are hereby permitted to intervene in this proceeding; *Provided, however,* That participation of such intervenors shall be limited to matters set forth in the petition to intervene; and *Provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) CP&L's request for waiver of our notice provisions is hereby denied and the proposed rate schedules are hereby accepted for filing and suspended for one day until August 13, 1977, when they shall become effective subject to refund.

(C) Pursuant to the authority contained under the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure and the Regulations under the Federal Power Act, a public hearing shall be held concerning the justness and reasonableness of the rates, charges, terms and conditions of service included in the proposed rate schedules.

(D) The Staff shall prepare and serve top sheets on all parties for Settlement purposes on or before December 1, 1977. (See Administrative Order No. 157).

(E) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5(d)), shall preside at an initial conference in this proceeding to be held on December 14, 1977, at 10 a.m., in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426. The Law Judge is authorized to establish all procedural dates and to rule upon all motions (except to consolidate and sever and motions to dismiss), as provided for in the Rules of Practice and Procedure.

(F) Nothing contained herein shall be construed as limiting the rights of parties to this proceeding regarding the convening of conferences or offers of settlement pursuant to Section 1.18 of the Commission's Rules of Practice and Procedure.

(G) The motion for partial summary judgment filed herein by Petitioners is hereby denied.

(H) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22903 Filed 8-8-77;8:45 am]

[Docket No. CP77-519]

COLUMBIA GAS TRANSMISSION CORP.

Application

AUGUST 3, 1977.

Take notice that on July 25, 1977, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue SE., Charleston, West Virginia 25314, filed in Docket No. CP77-519 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Orange and Rockland Utilities, Inc. (Orange and Rockland) for 5 years, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant seeks authorization to transport natural gas for Orange and Rockland from existing points of receipt to Applicant from Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee). Applicant states that the gas so received would be redelivered by it to Orange and Rockland at existing points of delivery in eastern New York.

It is stated that the National Fuel Gas Supply Corporation and National Gas Storage Corporation in FPC Docket No. CP76-492 requested authorization to render long-term storage service for Orange and Rockland, et al. It is further stated that in order to take advantage of this storage service, Orange and Rockland has requested Applicant to deliver up to 1,000,000 Mcf of gas annually to Tennessee for storage injection and receive from Tennesse up to 1,000,000 Mcf annually of gas withdrawn from storage, transport and redeliver like volumes to Orange and Rockland.

Applicant states that it would deliver a portion of Orange and Rockland's CDS rate scheduled entitlement to Tennessee during summer (April 1 through October 31) injection periods at its existing South Ceredo sales meter station delivery point to Applicant located in Wayne County, West Virginia, or at such other existing

[1] The wholesale customers to whom the proposed increased rates will be applicable are as follows: Magic Valley Electric Cooperative, Inc., Nueces Electric Cooperative, Inc., Rio Grande Electric Cooperative, Inc., Kimble Electric Cooperative, Inc., Medina Electric Cooperative, Inc., and Victoria County Electric Cooperative Company.

points of interconnection between Tennessee and Applicant as may actually be agreed upon. Such deliveries would be made by Applicant nominating a portion of its CD rate schedule purchased from Tennessee for retention by Tennessee for Orange and Rockland's account, it is indicated.

Applicant states that it would receive during the winter (November 1 through March 31) withdrawal period up to 10,000 Mcf per day from Tennessee at Tennessee's existing Milford sales meter station delivery point to Columbia located in Pike County, Pennsylvania, or at such other existing points of interconnection between the facilities of Tennessee and Columbia as may be mutually agreed upon. Applicant further states that it would transport the gas so received on an interruptible basis and redeliver it to Orange and Rockland at existing points of delivery in Eastern New York.

Applicant indicates that on the total volumes of gas delivered during the winter withdrawal period by Tennessee to Applicant for Orange and Rockland's account, it would make a transportation charge of 22.21 cents per Mcf and would retain for company-use and unaccounted-for gas a percentage of the gas so delivered, which percentage is currently 3.1 percent.

No construction is necessary to effect the proposed transportation service, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) as the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-45]

CONSUMERS POWER CO.

Filing

AUGUST 2, 1977.

Take notice that Consumers Power Company (Consumers Power) on July 22, 1977, tendered for filing Standard Service Agreements for wholesale for resale eleectric service between consumers Power and the City of Bay City, Alpena Power Company and Southeastern Michigan Rural Electric Cooperative, Inc.

Consumers Power states that the execution and filing of the Service Agreements were performed pursuant to the terms of a Settlement Agreement approved by the Commission order in this docket dated March 7, 1977.

Consumers Power states that on their effective dates, these Service Agreements cancelled and superseded contracts, FPC Nos. 1, 12 and 13, respectively.

Consumers Power states that copies of the filing were served on the affected customers, their counsel and on the Michigan Public Service Commission.

Any person desiring to protest said agreements should file a protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Section 1.10 of the Commission's Rules of Practice and Procedure (18 CFR, 1.10). All such protests should be filed on or before August 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken. Copies of the agreements are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-517]

DUKE POWER CO.

Supplement to Electric Power Contract

AUGUST 2, 1977.

Take notice that Duke Power Company (Duke) tendered for filing on July 17, 1977, a supplement to the Company's Electric Cooperative with Broad River Electric Cooperative, Inc. which is to become effective on August 19, 1977. Duke indicates that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FPC No. 143.

Duke states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for a new delivery point, No. 10, and increase in a capacity at Delivery Points No. 2 and No. 7. Duke further states that the supplement also includes an estimate of sales and revenue for the twelve months immediately preceding and for the twelve months immediately succeeding the effective date.

The Company states that a copy of this filing was mailed to Broad River Electric Cooperative, Inc. and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22894 Filed 8-8-77; 8:45 am]

[Docket No. ER77-442]

DUKE POWER CO.

Supplement to Electric Power Contract

AUGUST 3, 1977.

Take notice that Duke Power Company (Duke Power) tendered for filing by letter dated July 11, 1977, a supplement to the Company's Electric Power Contract with Haywood Electric Membership Corporation, Inc. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FPC No. 136.

Duke Power further states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for an increase in capacity and reallocation of SEPA capacity and energy to preference customers. Duke Power indicates that the supplement also includes an estimate of sales and revenue for the twelve months immediately preceding and for the twelve months immediately succeeding the effective date.

Duke Power requests waiver of the Commission's notice requirements to allow for an effective date of June 20, 1977.

According to Duke Power a copy of this filing was mailed to Haywood Electric Membership Corporation, Inc. and to the North Carolina Utilities Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of

the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-22906 Filed 8-8-77;8:45 am]

[Project No. 2232]

DUKE POWER CO.

Application for Approval of Easement over Project Lands

AUGUST 3, 1977.

Public notice is hereby given that an application was filed on May 20, 1977, under the Federal Power Act, 16 U.S.C. §§ 791a–825r, by Duke Power Company (Correspondence to: Mr. William L. Porter, Associate General Counsel, Duke Power Company, Box 2178, Charlotte, North Carolina 28242) for Commission approval of the grant of an easement over the lands of the Catawba (Lake Wylie) Development of the Catawba-Wateree Project, FPC Project No. 2232, to the Charlotte-Mecklenburg Board of Education (Board) for construction, operation, and maintenance thereon of a sewage effluent line and outfall. The affected project lands are located on and under Lake Wylie in Mecklenburg County, North Carolina.

The subject effluent line would transport treated wastewater from a new sewage treatment plan located outside the project boundary into the waters of Lake Wylie. The easement for the line would be 340 feet long and 30 feet wide, with approximately 320 feet of the length extending into Lake Wylie. The line would be comprised of a four-inch-diameter ductile iron pipe, and would be buried a minimum of three feet below ground level. The submerged portion of the pipe would be sunk into place on the lake bottom, where it would bury itself in the mud. At the point of discharge, the pipe would be five feet below the maximum drawdown of record. The maximum discharge would be approximately 6,000 gallons per day.

The Board has obtained National Pollutant Discharge Elimination System Permit No. NC 0028711 and Corps of Engineers Permit No. 77-5A-008 for the proposed discharge and construction at Lake Wylie.

Any person desiring to be heard or to make any protest with reference to said application should, on or before August 30, 1977, file with the Federal Power Commission, 825 N. Capitol Street NE., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 C.F.R. § 1.8 or § 1.10 (1976). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-441]

DUKE POWER CO.

Supplement to Electric Power Contract

AUGUST 3, 1977.

Take notice that Duke Power Company (Duke Power) tendered for filing by letter dated July 11, 1977, a supplement to the Company's Electric Power Contract with the City of Greer, South Carolina. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FPC No. 226.

Duke Power further states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for an increase in capacity and a reallocation of SEPA capacity and energy to preference customers. Duke Power indicates that the supplement also includes an estimate of sales and revenue for the twelve months immediately preceding and for the twelve months immediately succeeding the effective date.

Duke Power requests waiver of the Commission's notice requirements to allow for an effective date of May 20.

According to Duke Power a copy of this filing was mailed to the City of Greer and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 C.F.R. 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22908 Filed 8-8-77;8:45 am]

[Docket No. ER77-443]

DUKE POWER CO.

Supplement to Electric Power Contract

AUGUST 3, 1977.

Take notice that Duke Power Company (Duke Power) tendered for filing by letter dated July 11, 1977, a supplement to the Company's Electric Power Contract with the City of Morganton. Duke Power indicates that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FPC No. 261.

Duke Power further indicates that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for reallocation of SEPA capacity and energy to preference customers. Duke Power states that the supplement also includes an estimate of sales and revenue for the twelve months immediately preceding and for the twelve months immediately succeeding the effective date.

Duke Power requests an effective date of June 20, 1977, and therefore requests waiver of the Commission's notice requirements.

According to Duke Power a copy of this filing was mailed to the City of Morganton and the North Carolina Utilities Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 C.F.R. 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-22910 Filed 8-8-77;8:45 am]

[Docket No. RP77-113]

EL PASO NATURAL GAS CO.

Petition for Extraordinary Relief

AUGUST 3, 1977.

Take notice that on July 21, 1977, El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. RP77-113 a petition pursuant to Section 2.78(c) of the Commission's General Policy and Interpretations (18 CFR 2.78(c)) for emergency relief from the operation of certain provisions of El Paso's currently effective tariff during the 1977–1978 winter heating season on behalf of sixteen custom-

ers,[1] all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

El Paso states that pursuant to the Commission orders in Docket No. RP 77–74, it has submitted data obtained from its customers and supporting prepared testimony respecting the potential magnitude and impact of curtailment on the El Paso interstate pipeline system for the period beginning November 1, 1977, and ending March 31, 1978.

El Paso further states that in the course of soliciting customer data required by the Commission's order of May 11, 1977, in Docket No. RP77–74, it has learned that the following customers, having only Priority 1 load, are forecasting Priority 1 requirements for the forthcoming winter season in excess of their respective Winter Season Base Volumes reflected in El Paso's Tariff (all volumes are expressed in Mcf at 60° F. and 14.73 psia):

It is stated that the Commission has declared that a customer's seasonal base volume will serve as the "absolute limit" on the quantity of natural gas which El Paso is authorized to deliver to that customer until further order of the Commission.[2] El Paso states that it, therefore, has no present authority to deliver quantities of natural gas next winter to any of the sixteen customers identified above

1977–78 winter season

Customer	Winter season base volume	Forecasted priority 1 requirements	Forecast as a percent of base volume
1. Big Lake, Tex.	136,063	139,270	102.342
2. Community Public Service Co.	197,915	251,438	127.043
3. Denver City, Tex.	199,200	210,079	105.458
4. Goldsmith, Tex.	23,703	26,110	110.155
5. Grandfalls, Tex.	26,801	36,510	136.226
6. Mountainair, N. Mex.	63,781	63,963	100.337
7. Rankin, Tex.	55,535	56,901	101.001
8. Southern Utilities Co. of Patagonia	21,488	24,210	112.668
9. Spur, Tex.	76,977	78,006	102.536
10. Vaughan Well Corp.	191,217	203,414	106.379

El Paso also states that the following customers, having only Priority 1 and 2 load, are forecasting Priority 1 and Priority 2 requirements in excess of their respective Winter Season Base Volumes:

1977–78 winter season

Customer	Winter season base volume	Forecasted priority 1 and priority 2 requirements	Forecast as a percent of base volume
11. Deming, N. Mex.	385,600	439,831	114.064
12. EMW Gas Association	194,386	204,866	105.389
13. Las Cruces, N. Mex.	1,343,881	1,469,305	109.333
14. Socorro, N. Mex.	260,153	277,994	106.857
15. Tri-County Gas Co., Inc.	65,918	69,600	105.586

It is further asserted that in addition to the fifteen customers identified above, Ramgas, Inc. (which did not respond to El Paso's data request) also has only Priority 1 load and a Priority 1 requirement for natural gas which exceeds its Winter Season Base Volume, based upon El Paso's records for last winter:

1976–77 winter season

Customer	Winter season base volume	Actual 1976–77 winter season priority 1 requirements	Requirement as a percent of base volume
16. Ramgas, Inc.	26,367	35,070	133.030

in excess of their respective Winter Season Base Volume, even though the "excess gas" would be needed to prevent the curtailment of the highest priorities prescribed by the Commission and even though El Paso may be providing a 100 percent level of service for the Priority 1 and Priority 2 requirements of all other customers on the system.

El Paso states that its Tariff provides that any quantity of natural gas taken by a customer from El Paso's system during a season in excess of the total quantity that it is entitled to take shall constitute "Seasonal Unauthorized Overrun Gas" with a current penalty of $5.00 imposed for each Mcf of seasonal unauthorized overrun gas taken by a customer. El Paso further states that the tariff provides that payment of the penalty for seasonal unauthorized overrun gas would not vest any right in a customer to take unauthorized gas, nor would such payment preclude El Paso from pursuing other available remedies to prevent the taking of unauthorized overrun gas.

El Paso, therefore, proposes to waive the winter season base volumes of each of the sixteen identified customers for the period beginning November 1, 1977, and ending April 30, 1978, and further proposes to deliver each day to each of such customers during that period, and without penalty, a quantity of natural gas sufficient to provide it with the same level of service being enjoyed by other East of California customers having the same priority requirements.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77–524]

FLORIDA GAS TRANSMISSION CO. AND UNITED GAS PIPE LINE CO.

Application

AUGUST 3, 1977.

Take notice that on July 25, 1977, Florida Gas Transmission Company (Florida Gas), P.O. Box 44, Winter Park, Florida 32790, and United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, (Applicants) filed in Docket No. CP77–524 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing an additional delivery point for the exchange of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants request authorization to exchange up to 5,200 Mcf of natural gas per day pursuant to an exchange agreement dated June 24, 1977, between Applicants. It is stated that Florida Gas would deliver natural gas to United for redelivery to Florida Gas at any mutually agreeable authorized and existing point of interconnection between their respective system.s Applicants state that the new and additional delivery point is to be located at a mutually agreeable point on United's 16-inch Lirette-Mobile line located in St. Charles Parish, Louisiana. At this point Florida Gas proposes to deliver to United up to 5,200 Mcf of natural gas per day, and United proposes to redeliver to Florida Gas on a daily basis, a total quantity of natural gas equal to the volumes of gas delivered to United at the existing authorized interconnection of Florida Gas' and United's systems in St. Landry Parish, near Arnaudville, Louisiana. All exchanges of gas made under the subject agreement would be made on a gas-for-gas basis and no charge would be incurred therefor, it is indicated.

It is stated that Florida Gas has contracted for a supply of natural gas from Florida Gas Exploration Company (Exploration) a producing affiliate, in the North St. Rose Field Area, St. Charles Parish, Louisiana, and that said quantities of natural gas are to be delivered to Florida Gas at a mutually agreeable point at or near each of Seller's wells located on Seller's leases. It is further stated that Florida Gas would construct or would cause the construction of the facilities required to deliver natural gas to United at the proposed St. Charles Parish delivery point, and would bear all expenses associated with the construction of said facilities. It is indicated that United would construct, or cause the construction of, and retain title to the facilities necessary to receive gas from Florida Gas at the point of delivery, and Florida Gas would reimburse United for all expenses so incurred.

Applicants state that the facilities required for the interconnection and exchange of natural gas proposes herein, consist of approximately 7,000 feet of 4-inch pipeline and a meter station, side valve assembly, and related facilities. Applicants indicate that upon receipt of the requested authorization herein, Florida Gas would construct the instant facilities under the authorization granted in its currently effective gas purchase budget-type certificate, issued by the Commission on May 23, 1977, in Docket No. CP77–292.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) as the Regulations under the National Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-22911 Filed 8-8-77;8:45 am]

[Dockets Nos. G-2801, CI72-50, G-10020, and CI71-722]

GETTY OIL CO. ET AL.

Order Clarifying Order Rejecting Settlement

AUGUST 3, 1977.

In the matter of Getty Oil Company (Operator) et al., Docket Nos. G-2801 and CI72-50; Phillips Petroleum Company (Operator) et al., Docket Nos. G-10020 and CI71-722.

On July 19, 1976, the Presiding Administrative Law Judge in the instant proceeding certified a settlement agreement to the Commission. That settlement would have divided Phillips Petroleum Company's (Phillips) interest in the Erath Field: one-third to Columbia Gas Transmission Corporation (Columbia); one-third to Trunkline; and one-third to Trunkline for redelivery to Phillips. At the same time, the Judge certified to the Commission an interim settlement pending final disposition in this proceeding. The proposed interim settlement, which was approved by a Commission order issued December 29, 1976, divided the Phillips interest in the Erath Field equally between Columbia and Trunkline. Each of the parties was however, to "bank" a one-sixth interest for the account of Phillips in the event that the primary settlement was approved. The one-sixth interest would operate as Phillips' proportionate one-third share of the total production available in the event that the primary settlement was approved and payback ordered.

On April 13, 1977, the Commission issued an Order Rejecting Settlement in which the primary settlement agreement, dividing the total interest of Phillips Petroleum in the Erath Field one-third to Columbia, one-third to Trunkline and one-third to Trunkline for redelivery to Phillips was rejected. A similar settlement in the Getty proceeding was also rejected by the order. The unaccepted Getty settlement would have divided Columbia Gas Transmission's present entitlement to all of Getty's interest in the Erath Field 50 percent to Columbia and 50 percent to Transco. The Commission decision on both settlements was reaffirmed on June 10, 1977, by Order on Rehearing.

On June 20, 1977, Phillips Petroleum filed a Motion for Clarification and Implementation of Settlement Agreement, and on June 28, 1977, Trunkline Gas Company filed a motion in which it urged the Commission to issue a protective order authorizing the interim disposition of Phillips' share of the gas produced from the Erath Field units one-half to Columbia and one-half to Trunkline.

On July 5, 1977, Transco filed an Answer to Motion for Protective Order in which it states that it does not oppose Phillips' and Trunkline's motions. Transco then argues that the Commission should approve the Getty settlement which was unopposed by any party or the Commission Staff. Transco suggests that the Commission inappropriately failed to apply the test set forth in Hilda B. Weinert, et al., Docket No. G-2730, et al. with respect to the evidentiary showing necessary to justify abandonment of an interstate pipeline in favor of another interstate pipeline.

On July 6, 1977, Staff filed its response in which it noted no objection to implementing the interim settlement. Columbia Gas Transmission Corporation filed its answer opposing Phillips' and Trunkline's pleadings on July 7, 1977. In this answer, Columbia contends that the April 13 Order Rejecting Settlement extinguished sub silentio the viability of the interim settlement and terminated the rights of the parties granted by that interim agreement.

Discussion

It was clearly stated in the December 29 Order Granting Motion for Interim Order that approval of the interim settlement was merely an accommodation to the parties and that the Commission was not bound to any determination on the merits of the contested primary settlement. It was the Commission's understanding that the interim settlement would be operative only from the date of approval to the issuance of a Commission decision on the contested primary settlement.[1] In our view the issuance of the April 13 Order Rejecting Settlement marked the end of the interim period.

Insofar as the interim settlement was designed to preserve the rights of the parties pending adoption or other action on the primary settlement agreement, the issuance of the April 13 order created a "locked-in" period in which the interim settlement could have been effectuated. The fact that Trunkline and Phillips were unable to enter into a replacement contract until April 29, 1977, is not persuasive.

To the extent that it is necessary to clarify the April 13 Order or the June 10 Order on Rehearing, suffice it to say that the period covered by the interim settlement ended on April 13, 1977. This is true notwithstanding Trunkline's argument that it will be irreparably damaged unless the Commission issues an order pro-

[1] See, e.g., Order Granting Motion for Interim Order issued December 29, 1976, at 3.

tecting its rights to the production attributable to Phillips' interest in the Erath Field. It should be noted that the Commission addressed this problem in the April 13 Order wherein we stated,

> As a matter of law, the Trunkline certificate could not supersede the outstanding certificate to sell to Columbia absent abandonment authorization with respect to the Columbia sale. That question was neither before the Commission nor was it considered in 1971, nor are we able to grant abandonment on this record before us now. A more appropriate construction of that certificate for the sale to Trunkline is that it allowed the excess of Phillips' interest not committed to Columbia to be sold to Trunkline. To the extent there is no excess, Trunkline's rights are non-existent.[2]

We will "clarify" our April 13 Order by stating that the interim settlement is no longer viable and has not been viable since April 13, 1977. That settlement clearly contemplated its own extinction upon the issuance of a Commission Order on the merits of the primary settlement. Thus, the Phillips' interest in the Erath Field shall continue to go to Columbia until abandonment is granted or production from Phillips' interest exceeds 100,000 Mcf/d at which point Trunkline shall be entitled to the excess pursuant to its certificate.

Concerning Transco's contention that the Commission misunderstood the factual state of affairs when distinguishing the *Hilda B. Weinert* case, we confess error. It is true that Staff did *not* oppose the Getty settlement herein. This is apparently due to the distinguishable nature of the two settlements with regard to the producer reservation. The Getty settlement contains a force majeure clause which gives Getty a right to emergency reservations of up to 100% of its interest for a period not to exceed ninety days per year. One of Staff's primary objections to the Phillips settlement was the fact that Phillips' reservation was absolute and the volumes reserved were to be used as boiler fuel.

In the April 13 Order Rejecting settlement, the Commission found that the La Gloria Field[3] test must be met before abandonment of the present pipeline purchases could be obtained. On rehearing the Commission was cited to Hilda B. Weinert, et al., Docket No. G–2730 with respect to the legal test to be applied in evaluating settlement offers. There in a January 19, 1977, Order on Rehearing the Commission concluded that in unanimously supported settlements, the La Gloria Field test was inapplicable. The question posed by unanimous settlements is whether they are in the general interest of the public.[4] It appears that in light of the Commission's misunderstanding of the facts (notably Staff's total concurrence) the inappropriate legal test was applied. Upon reconsideration we are persuaded that the Getty settlement agreement is in the public interest and should be approved. We will reverse our previous orders insofar as they reject the Getty settlement.

The Commission orders: (A) That the order issued April 13, 1977, and Order on Rehearing issued June 10, 1977, in this docket are clarified as set forth more fully above.

(B) The order issued April 13, 1977, and Order on Rehearing issued June 10, 1977, are reversed insofar as they reject the settlement agreement certified to the Commission in Docket No. G–2801 and CI72–50.

(C) The settlement agreement certified to the Commission in Docket Nos. G–2801 and CI72–50 is hereby approved.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22897 Filed 8-8-77;8:45 am]

[Docket No. ER76–555]

INTERSTATE POWER CO.

Order Approving Settlement Agreement

AUGUST 3, 1977.

On June 10, 1977, Interstate Power Company (IPC) submitted for filing in this docket a proposed Settlement Agreement. Notice of the filing of the Settlement Agreement was issued on June 1, 1977, with all protests due on or before July 6, 1977. No protests were received. Staff filed comments in support of the agreement on July 6, 1977.

IPC initially filed a rate schedule in this docket on April 23, 1976. According to that schedule, IPC proposed to increase its transmission service charges to the municipal electric systems of Adrian, Jackson, Lakefield, Luverne, Westbrook, Windom and Worthington, Minnesota. The source of the energy wheeled is the United States Bureau of Reclamation, Upper Missouri Region, Billings, Montana. The proposed rates would have increased revenues from IPC's wholesale customers by approximately $361,395.

In an order issued May 21, 1976, the Commission accepted the filing, suspended it, made it effective subject to refund, and set the matter for hearing, for the municipalities of Luverne, Adrian, Westbrook, and Worthington. With respect to the municipals of Jackson, Windsor and Lakefield, however, the Commission noted that their contracts with IPC contained no provisions for changes in rate; thus these customers were being served under currently effective, fixed rate contracts. In accordance with the rule of Mobile-Sierra,[1] the Commission rejected the filing as it relates to Jackson, Windsor and Lakefield.

At a Settlement Conference held on October 19, 1976, IPC, the Municipalities, and the Commission Staff agreed to a settlement in this proceeding. The Settlement Agreement reduces the revenue increase to Interstate's municipal wheeling customers to $300,890 to be effective July 23, 1976, or upon the expiration of the abovementioned fixed rate contracts,[2] and provides for a refund, at an annual interest rate 9 percent, of the difference between the settlement rate and the amounts actually collected by IPC. Additionally, the Agreement states that IPC is not precluded from filing future rate increase applications.

Staff analysis indicates that the settlement rate level produces an earned rate of return of 8.573 percent, including 12.33 percent for common equity. This rate is below Staff's recommendation of 8.79 percent rate of return, including 13.0 percent for common equity.

Based on our review of the record in these proceedings, including the Settlement Agreement itself, the Commission finds that the proposed Settlement Agreement represents a reasonable resolution of all the issues in this proceeding, and that such settlement is in the public interest. Acordingly, the Settlement Agreement between IPC and the municipal customers should be approved.

The Commision finds: The proposed Settlement Agreement submitted to the Commission in this docket should be approved and made effective as hereinafter ordered and conditioned.

The Commisison orders: (A) The Settlement Agreement filed June 10, 1977, in these proceedings is hereby acepted, incorporated herein by reference and approved subject to the following conditions.

(B) IPC shall file within 30 days of the issuance of this order revised tariff sheets in conformance with the Settlement Agreement.

(C) Within 30 days after the settlement tariff sheets are accepted for filing, IPC shall refund amounts collected in excess of the settlement rates with interest computed at 9 percent per annum.

(D) Within 15 days after refunds have been made, Interstate shall file with the Commission a compliance report showing monthly billing determinants and revenues under prior, present and settlement rates; the monthly revenue refund; and the monthly interest computation together with a summary of such information for the total refund period. A copy of such report shall also be furnished to each State Commission within whose jurisdiction the wholesale customers distribute and sell electric energy at retail.

(E) This order is without prejudice to any findings or orders which have been made or which will hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its staff, or any party or person affected by this order, in any proceeding now pending or hereafter instituted by or against IPC or any person or party.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22896 Filed 8-8-77;8:45 am]

[Project No. 1440]

LAKE SUPERIOR DISTRICT POWER CO.

Order Granting Application for Surrender of License (Transmission Line)

AUGUST 3, 1977.

On January 6, 1977, Lake Superior District Power Company (LSDPC), licensee for Project No. 1440, filed an application under section 6[1] of the Federal Power Act (Act) for surrender of its license for Project No. 1440, an 88-kV transmission line with a right-of-way 100 feet wide extening about 33 miles in a general easterly direction from Ashland, Wisconsin, to Ironwood, Michigan. The right-of-way traverses lands of the United States, held in trust for the Bad River Indian Tribe, in Ashland County, Wisconsin. The license for Project No. 1440 was issued on July 29, 1938, for a period of fifty years, and was amended on Setpember 18, 1942.

On January 7, 1974, LSDPC wrote the Commission that it had become necessary to improve the subject transmission line by rebuilding it and increasing its operating voltage from 88 kV to 161 kV. The Secretary of the Commission responded, by direction of the Commission, on February 25, 1974, notifying LSDPC that a Commission staff study indicated that the subject transmission line transmitted power principally from a steam-electric station and consequently was not subject to licensing or relicensing under section 3(11)[2] of the Act. The Secretary's letter suggested that if LSDPC wished to rebuild the transmission line, it should obtain a permit from the Department of the Interior and file an application for surrender of its FPC license pursuant to part 6[3] of the Commission's Regulations under the Federal Power Act (Regulations). LSDPC filed the instant application as a result of the Secretary's letter.

Public notice of the application was issued in accordance with section 6 of the Act on March 17, 1977, with May 9, 1977 given as the last date for filing protests or petitions to intervene. The notice was published in the FEDERAL REGISTER[4] on March 23, 1977, and in newspapers in the counties in which the project is located. No protests, notices of intervention, or petitions to intervene were received.

LSDPC has obtained a grant of easement for right of way from the Bureau of Indian Affairs of the U.S. Department of the Interior, thus satisfying section 6.2[5] of the Commission's Regulations with regard to approval from the department having supervision over the lands in question. LSDPC has filed a copy of the grant, dated February 19, 1975, with the Commission, and has also returned all original license and amendment documents to the Commission. Annual charges have been paid through December 31, 1976. Accordingly, the acceptance of the surrender of the license will be effective January 1, 1977.

Because surrender of the license, per se, will not entail or permit any new construction or change in project operation, our acceptance of the instant application will not constitute a major federal action significantly affecting the quality of the human environment. Accordingly, preparation of an environmental impact statement pusuant to section 102(2)(C)[6] of the National Environmental Policy Act of 1969 will not be necessary.

The Commission finds: (1) Acceptance by the Commission of the surrender of the license for transmission line Project No. 1440 is appropriate because the subject line is not a primary line as defined in section 3(11) of the Federal Power Act.

(2) Acceptance of surrender of the license is not a major federal action significantly affecting the quality of the human environment; therefore, an environmental impact statement is not required.

(3) The effective date for surrender of the license for Project No. 1440 should be January 1, 1977.

The Commission orders: Surrender of the license for transmission line Project No. 1440 is hereby accepted as of January 1, 1977.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22893 Filed 8-8-77;8:45 am]

[Docket No. ER76–830]

MISSISSIPPI POWER & LIGHT CO.

Order Approving Settlement Agreement

AUGUST 3, 1977.

On June 1, 1977, Mississippi Power & Light Company (MP&L) by motion filed a proposed settlement agreement, executed by MP&L and the five Municipals and seven Electric Power Association customers intervening in this proceeding (Wholesale Customers),[1] requesting that the agreement be certified to the Commission for approval. On June 3, 1977, the Presiding Judge certified the proposed settlement agreement to the Commission for consideration and disposition. Pursuant to public notice of the certification issued on June 17, 1977, Staff filed comments in support of the agreement. No comments in opposition have been filed. The Commission finds that the settlement agreement is in the public interest and accepts and approves it as hereinafter ordered and conditioned.

Proceedings in this docket were initiated on July 30, 1976, when MP&L tendered for filing a proposed rate increase of $3,406,196 (13.25%), applicable to the Wholesale Customers, based on a projected Period II 1976 test year.

By order issued August 27, 1976, the Commission accepted MP&L's submittal for filing, suspended its operation until December 1, 1976, subject to refund, established hearing procedures and required MP&L to file revised rates reflecting the elimination of Construction Work in Progress (CWIP) from rate base.[2]

On October 26, 1976, MP&L tendered for filing proposed revised rates to comply with the Commission's August 27 order which would increase revenues collected from the Wholesale Customers by $2,566,532 (10.06%) for Period II. These rates went into effect subject to refund on December 1, 1976.

On March 1, 1977, Staff filed top sheets as required by the Commission's August 27 order, and a formal prehearing conference was held on March 29, 1977, after which the parties including Staff, met to discuss the issues in dispute. At a subsequent prehearing conference held on April 28, 1977, MP&L and the Wholesale Customers reported to the Presiding Judge that they had reached an agreement in principle. At a final conference held on June 1, 1977, the parties submitted the subject proposed settlement agreement for copying into the record, and MP&L by motion requested that the proposed agreement be certified to the Commission. On June 3, 1977, the Presiding Judge certified the proposed agreement to the Commission, and on June 30, 1977, Staff submitted comments in support of it.

The settlement agreement provides (1) for a proposed Period II increase of $1,200,000 (4.70%) to become effective December 1, 1976; (2) for December 1, 1976, compliance with the Office of Chief Accountant Audits' Division Report recommendations related to MP&L's fuel clause billing practices[3]; (3) for a revised fuel clause, and revised base demand and energy rates to effectuate compliance with the fuel clause audit

report; (4) for refunds to be made with interest at 9% per annum; (5) for a moratorium on filing a further rate change until July 28, 1978; and (6) for no concession to be made with respect to any rate making principle or laws.

Based on our review of the record in this docket including the settlement agreement itself, the filings, documents and pleadings submitted, we find that the proposed settlement agreement represents a reasonable resolution of the issues in the proceeding and is in the public interest.[4] Accordingly, the proposed settlement agreement filed in this docket on June 1, 1977, should be approved.

The Commission finds: The proposed Settlement Agreement Regarding Rates For Wholesale Electric Service filed by MP&L and the Wholesale Customers on June 1, 1977, should be approved and made effective as hereinafter ordered.

The Commission orders: (A) The negotiated Settlement Agreement Regarding Rates For Wholesale Electric Service filed by MP&L and the Wholesale Customers in this docket on June 1, 1977, is hereby approved and made effective as of December 1, 1976.

(B) MP&L is hereby directed pursuant to Section 35.1(a) of the Commission's Regulations to file within 30 days revised tariff sheets in accordance with the terms of the approved settlement agreement. Therein, MP&L is further directed to include specific reference of compliance with the Office of Chief Accountant Audits Division Report released May 17, 1977.

(C) In accordance with the terms of the subject settlement agreement and consistent with the Commission's regulations, MP&L is hereby directed to refund within 30 days after acceptance of the compliance filing required by the preceding paragraph, the difference in revenues collected under the rates made effective December 1, 1976, and the revenues authorized to be collected pursuant to the terms of the settlement agreement filed on June 1, 1977, with interest at 9% per annum.

(D) MP&L is hereby directed to file a compliance report within 15 days after refunds have been made, such report to show monthly billing determinants and revenues under prior, present, and settlement rates. The report should also show the monthly settlement rate increase, the monthly revenue refund, and the monthly interest computation, together with a summary of such information for the total refund period. A copy of such report shall also be furnished to each State Commission within whose jurisdiction the wholesale customers distribute and sell electric energy at retail.

(E) This order is without prejudice to any findings or orders which have been made or which will hereafter be made by the Commission, and is without prejudice to any claim or contentions which may be made by the Commission, its staff, or any party or person affected by this order, in any proceeding now pending or hereinafter instituted by or against MP&L or any person or party.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22904 Filed 8-8-77;8:45 am]

[4] The earned rate of return under the proposed settlement rates will not exceed Staff's recommendation of 9.07%, including 13.25% on common equity.

[Docket No. CP77-514]

MOUNTAIN FUEL SUPPLY CO.

Application

AUGUST 2, 1977.

Take notice that on July 21, 1977, Mountain Fuel Supply Company (Applicant) 180 East First South Street, Salt Lake City, Utah 84139, filed in Docket No. CP77-514 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction, installation and operation of six taps on its interstate transmission system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authorization to construct, install and operate six taps on its interstate transmission system in order to make gas sales to its customers in existing distribution areas including three customers in isolated areas traversed by the transmission pipeline.

Applicant states that it has adequate gas supplies to provide the minor additional service required by three new customers and the additional service to the Western Wyoming Junior College which is already served by Applicant. The two other taps requested herein are to improve service reliability, it is indicated.

Applicant states that it installed one of these taps in 1975 in anticipation of its firm requirements as a part of the original construction of Applicant's 20-inch pipeline authorized in Docket No. CP73-213, and that it now requests authorization to connect this tap to its distribution system to maintain balanced reliable service to its existing customers in Bountiful, Utah. It is indicated that a tap for an additional delivery point is needed to balance distribution pressure in the town of Green River, Wyoming, and that expanding educational facilities at Western Wyoming Junior College near Rock Springs, Wyoming require a new tap for this existing customer.

Applicant indicates that the other three taps are for service to new gas customers requesting high priority service along the route of Applicant's pipeline. These sales are primarily for residential and commercial heating uses, it is said. Applicant states that all of the sales from the six proposed taps would be made under rate schedules authorized by the Public Service Commissions of Utah or Wyoming.

The estimated cost of the proposed facilities is $16,000, which cost would be financed from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) as the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22887 Filed 8-8-77;8:45 am]

[Docket No. E-7022]

NIAGARA MOHAWK POWER CORP.

Filing of an Application for Authorization to Transmit Electrical Energy to Canada

AUGUST 3, 1977.

Take notice that Niagara Mohawk Power Corporation (Niagara) on July 11, 1977, tendered for filing an application for authorization to transmit electrical energy to Canada.

Niagara indicates that this authorization to transmit electric energy to Canada provides for sale and transmission of electrical energy up to a maximum of 40,000 kilowatts and a maximum 200,000 megawatthours to St. Lawrence Power Company, Cornwall, Ontario.

Niagara further indicates copies of this filing have been served on St. Lawrence Power Company, the only customer presently proposed to be served under this

tariff, and upon the Public Service Commission of the State of New York, Empire State Plaza, Albany, New York 12223.

Any person desiring to be heard or to protest said application should file a petition or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with paragraphs 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22890 Filed 8-8-77;8:45 am]

[Docket No. ER77-515]

PUBLIC SERVICE CO. OF OKLAHOMA

Filing

AUGUST 3, 1977.

Take notice that Public Service Company of Oklahoma (PSCO) on July 12, 1977, tendered for filing a request for suspension of the Notice of Cancellation filed by Public Service Company of Oklahoma on May 9, 1977, and accepted by the Commission to be effective June 30, 1977, and designated as supplement No. 1 to Rate Schedule FPC No. 191 under Docket No. ER77-368.

PSCO submits in this filing an agreement dated July 8, 1977, between PSCO and the United States of America, acting through the Secretary, Department of the Interior, as represented by the Administrator, Southwestern Power Administration (SPA), in which SPA concurs in PSCO's request for a suspension.

PSCO indicates that the reason for this request is that SPA presently has a capacity shortage SPA has not foreseen and that PSCO is willing to sell emergency service to provide the unforeseen power and energy to SPA.

PSCO requests waiver of the Commission's notice requirements to allow for an effective date of July 1, 1977.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22909 Filed 8-8-77;8:45 am]

[Docket No. RI77-113]

SUN GAS CO.

Petition for Special Relief

AUGUST 3, 1977.

Take notice that on July 11, 1977, Sun Gas Co., a Division of Sun Oil Co., Delaware (Petitioner), P.O. Box 20, Dallas, Tex. 75221, in Docket No. RI77-113, filed a petition for special relief pursuant to Section 2.76 of the Commission's Regulations. Petitioner requests relief from the nation-wide flowing gas rate prescribed in Opinion No. 749 for the sale of Natural gas to Valley Gas Transmission, Inc. from the Hidalgo Willacy Unit, South Elsa Field, Hidalgo County, Tex. Petitioner is currently collecting a rate of 32.1165 cents per Mcf at 14.65 psia for the subject gas and requests an increase to the total rate of 49.2733 cents per Mcf at 14.65 psia. Petitioner states that the rate increase is necessary to recoup the incremental costs associated with the installation of a two-stage compressor which has resulted in an increase in the rate of gas production.

Any person desiring to be heard or to make any protest with reference to said petition should on or before August 26, 1977, file with the Federal Power Commission, 825 North Capitol Street, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22898 Filed 8-8-77;8:45 am]

[Docket No. CP77-520]

TENNESSEE GAS PIPELINE CO. AND NORTHERN NATURAL GAS CO.

Application

AUGUST 3, 1977.

Take notice that on July 25, 1977, Tennessee Gas Pipeline Co., a Division of Tenneco Inc. (Tennessee), Tenneco Building, Houston, Tex. 77002, and Northern Natural Gas Co. (Northern), 2223 Dodge Street, Omaha, Nebr. 68102 (Applicants), filed in Docket No. CP77-520, a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants request authorization to exchange up to 26,668 Mcf of natural gas per day pursuant to an exchange agreement dated June 30, 1977 between Applicants. The daily volumes of gas which Applicants propose to exchange are the additional daily volumes of gas, less the incremental volumes required in the handling thereof, which Midwestern Gas Transmission Co. (Midwestern) has requested authorization to import from Canada at Docket No. CP77-458 and to sell to Tennessee at Docket No. CP77-459, it is said.

It is indicated that Tennessee would cause Midwestern to deliver the gas proposed to be purchased from Midwestern to Northern for Tennessee's account at one or more of the existing points of interconnection between the facilities of Midwestern and Northern in the State of Minnesota near Genola, Morrison County; Cambridge, Isanti County; and North Branch, Chisago County, and Northern would redeliver equivalent daily volumes to Tennessee by utilizing daily volumes of gas available to Northern in southern Louisiana, at the western terminus of the Blue Water Project near Egan, La. and/or other mutually agreeable existing points where gas can be redelivered to Tennessee by or for the account of Northern. It is stated that there would be no charge by or to either party for exchanging gas.

No additional facilities are required for the exchange of gas as proposed herein, it is said.

It is indicated that pursuant to the Interim Gas Sales Agreement between Midwestern and Tennessee (Exhibit P to the application at Docket No. CP77-459), Tennessee would purchase gas from Midwestern at the point where such gas is delivered by Midwestern to Northern for Tennessee's account. The monthly charge to be paid by Tennessee for such gas, pursuant to provisions of such agreement, would be the sum of the amount paid by Midwestern to TransCanada during such month for gas purchased and delivered pursuant to the provisions of its Contract Agreement with TransCanada; plus, the amount Midwestern pays to TransCanada during such month as a compression charge pursuant to its Delivery Pressure Agreement dated July 2, 1975, as amended; plus, a transportation charge for each Mcf delivered to Northern for Tennessee's account at the respective delivery points and a monthly compressor facilities rental charge which charge would reimburse Midwestern for all costs payable to the Lessor and others pursuant to the provisions of the Lease Contracts between Midwestern and Crawford Enterprises, Inc.

Any person desiring to be heard or to make any protest with reference to said

application should on or before August 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) as the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22891 Filed 8-8-77;8:45 am]

[Docket No. RP75-73 (Advance Payments)]

TEXAS EASTERN TRANSMISSION CORP.

Order Initiating Hearing

AUGUST 3, 1977.

On June 6, 1977, the Commission issued an order modifying and accepting Texas Eastern Transmission Corp.'s (Texas Eastern) rate settlement proposal in the above-captioned proceeding.

In its order of June 6th, the Commission found that advance payments of $7.4 million included in the settlement should be excluded from Texas Eastern's rate base. However, in the alternative, Texas Eastern was afforded the opportunity to elect to sever this aspect of the settlement and request that the matter be set for formal hearing. The Commission stated that a decision by Texas Eastern to elect a hearing would not affect the Commission's approval of the remainder of the settlement.

On July 6, 1977, Texas Eastern notified the Commission that it accepts the settlement as modified and approved by the Commission, and that it wishes to exercise its option to request a formal hearing on the advance payments issue.

In light of the foregoing, the Commission shall establish procedures for the requested formal hearing, as hereinafter ordered.

The Commission orders: (A) Pursuant to the authority of the Natural Gas Act, particularly sections 4, 5, 8, and 15 thereof, and the Commission's rules and regulations, a public hearing shall be held concerning whether the subject $7.4 million of advance payments shall be permitted to be included by Texas Eastern in its rate base.

(B) Pending hearing and decision, Texas Eastern shall be permitted to retain the $7.4 million of advance payments in rate base subject to refund.

(C) A Presiding Administrative Law Judge, to be designated by the Chief Administrative Law Judge pursuant to 18 CFR 3.5(a), shall convene a prehearing conference in this proceeding on August 18, 1977, for the purpose of establishing procedures for the hearing to be held pursuant to this order. The Presiding Judge shall be authorized to establish procedures for the hearings, including setting dates for the serving of evidence by the parties and for the commencement of hearing. The Presiding Judge shall also be authorized to rule upon all motions except motions to consolidate, sever, or dismiss, as provided for in the rules of practice and procedure.

(D) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22905 Filed 8-8-77;8:45 am]

[Docket No. CP77-522]

TEXAS EASTERN TRANSMISSION CORP. AND TRANSCONTINENTAL GAS PIPE LINE CORP.

Application

AUGUST 3, 1977.

Take notice that on July 25, 1977, Texas Eastern Transmission Corp. (Texas Eastern), P.O. Box 2521, Houston, Tex. 77001, and Transcontinental Gas Pipe Line Corp. (Transco), P.O. Box 1396, Houston, Tex. 77001 (Applicants), filed in Docket No. CP77-522, a joint application pursuant to Section 7 (c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing an additional point of exchange of natural, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants seek authorization to establish an additional exchange point where Texas Eastern's 30-inch pipeline No. 16 interconnects with the facilities of Texas Gas Pipe Line Corp. (Texas Gas), Jefferson County, Tex. It is stated that at such point, Texas Gas would not only deliver volumes which it sells to Texas Eastern as at present, but would also deliver to Texas Eastern, for the account of Transco, volumes which it sells to Transco but which are now delivered to Transco in Cameron Parish, La., and that Texas Eastern would in turn deliver Transco's volumes to it at authorized existing exchange points.

Applicant proposes to exchange the gas at the additional exchange point pursuant to an agreement dated February 3, 1977, between Transco and Texas Eastern, which agreement amends the existing exchange agreement between Applicants previously authorized in Docket Nos. G-4610, CP73-60, CP74-224, CP75-282, and CP76-189. Under the subject agreement dated February 3, 1977, Transco or its representative would operate and maintain the existing interconnection and metering facilities between Texas Eastern and Texas Gas.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) as the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22889 Filed 8-8-77;8:45 am]

[Docket No. CP77-525]

UNITED GAS PIPE LINE CO.

Application

AUGUST 3, 1977.

Take notice that on July 25, 1977, United Gas Pipe Line Co. (Applicant), P.O. Box 1478, Houston, Tex. 77001, filed in Docket No. CP77-525, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the delayed exchange of gas between itself and Delhi Gas Pipeline Corporation (Delhi), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that due to the severe shortage of natural gas it anticipates a supply deficiency which would affect its ability to meet the winter season requirements of its high priority customers, and that in order to mitigate this problem to the maximum extent possible, Applicant has entered into a gas exchange agreement with Delhi whereby Delhi would deliver up to 25,000 Mcf of gas per day to Applicant at the outlet of the Champlin Plant located in Panola County, Tex. and at other mutually agreeable points of interconnection on Applicant's system. Applicant indicates that during the months of November, December, February, and March, Applicant would retain 90 percent of the gas so delivered by Delhi and would redeliver to Delhi on a daily basis a quantity of gas equal to the million Btu's of gas received from Delhi at a rate not to exceed 16,000 Mcf during the months of April, May, June, July, August, September, and October, in addition to the volume which it is otherwise obligated to redeliver, by delivering such gas into the Victoria-Blessing system of Delhi at a point of interconnection located in Victoria County, Tex.

Applicant asserts that the proposed exchange of gas on a delayed basis would enable it to meet the requirements of its high priority customers, and that it would make volumes of gas available during winter months when the need is greatest and would allow Applicant to make up to imbalance in deliveries during warmer weather.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) as the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on August 2, 1977. See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FCC requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before August 29, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street, NW., Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

FEDERAL COMMUNICATIONS COMMISSION

The FCC is requesting extension no change clearances for the following:

Application for Radio License or Modification Thereof Under Parts 21, 23 or 25, Form 403. This form is used by applicants for a radio station or a modification of a station license. FCC estimates approximately 5,500 applications are received annually and that the average burden per response is five hours.

Application for Ground Station Authorization in the Aviation Services, Form 406. Potential respondents are those applying for a station or for assignment of grounds station authorization. These services are covered under Section 87.31 of the FCC Rules and Regulations. FCC estimates approximately 5,000 applications are filed annually and that the average burden per response is one and one-half hours.

Common Carrier Radio Licensee Qualification Report, Form 430. Form 430 is a report of licensee general type qualification information. The form will be filed initially with the application for a construction permit and will be updated thereafter on a yearly basis, unless there is a significant change in the carrier's position or an application for modification. FCC estimates approximately 550 reports are received annually and that respondent burden is two hours per response.

Application for New or Modified Common Carrier Microwave Radio Station Construction Permit Under Part 21, Form 435. This form is used by communications carriers to apply for facilities in the Point-to-Point Microwave Radio Service, the Multipoint Distribution Service, and the Local Television Transmission Service. These services are covered under Part 21, Section 21.14 of the FCC Rules and Regulations. FCC estimates approximately 750 applications are received annually and that respondent burden is two hours per response.

Application for Civil Air Patrol Radio Station Authorization, Form 480. This form must be filed by applicants for a land station used exclusively for communications of the Civil Air Patrol. FCC estimates approximately 2,000 applications are received annually and that respondent burden is three-fourth hour per response.

Application for Station License in the CB or R/C Service, Form 505. This form is required by Part 95.19 of the FCC Rules and Regulations. Applicants applying for a Radio Control License or a Citizens Band Service License must complete this form. FCC estimates approximately 7,150,000 applications are received annually and that respondent burden averages five minutes per response.

Application for Individual Amateur Radio Station and/or Operator License, Form 610. This form is required by Part 97, Sections 97.11, 97.13, and 97.47 of the FCC Rules and Regulations. The form is used to apply for or modify an amateur radio station license. FCC estimates approximately 375,000 applications are received annually and that respondent burden is five minutes per response.

Application for Alien Amateur Radio Licensee for Permit to Operate in the United States, Form 610-A. This form is required by Parts 1 and 97 of FCC's Rules to apply for or modify a reciprocal amateur radio license. Before an alien can operate an amateur radio station in the United States, an alien amateur licensee must obtain a permit for such operation from the FCC. A permit for such operation is issued only to an alien holding a valid amateur operation and station authorization from his/her government, and only when there is in effect a bilateral agreement between the U.S. and that government for such operation on a reciprocal basis by U.S. amateur radio operators. Approximately 5,000 applications

are recived annually as estimated by FCC and respondent burden is estimated to be five minutes per response.

Application for Amateur Club or Military Recreation Station License, Form 610–B. This form is required by Parts 1.922, 97.41, 97.47 of the FCC's Rules and Regulations. The application is used to apply for an amateur radio club or military recreation station license. FCC estimates approximately 5,000 applications are received annually and that respondent burden is five minutes per response.

Supplement to Application for New or Modified Radio Station Authorization, Form 714. This form must be filed as a supplement to applications for construction of antennas, except broadcast, when the antenna exceeds specifications in the Commission's Rules. Sections 1.922, 17.4(f), 81.31(b), 81.32(b), 95.37(a), 97.45 (a), and 99.13(a) of the FCC's Rules and Regulations require the use of this form. Approximately 156 applications are received annually as estimated by FCC and respondent burden is estimated to be one and one-half minutes per response.

Application for Restricted Radiotelephone Operator Permit by an Alien, Form 755. This form is used by aliens to obtain a radio operator license. Public Law 93–505 enacted November 30, 1974, removed the restriction in the Communication's Act concerning licensing of aliens and alien-affiliated entities in the Safety and Special Experimental Radio Services. Prior to this action only aliens entitled to apply for a Restricted Radiotelephone Operator Permit were those who held FAA Pilot Certificates and used the permit in connection with piloting duties. This form is required under Sections 1.89 and 13.11(b) of the Commission's Rules and Regulations. FCC estimates approximately 5,000 applications are received annually and that respondent burden averages four minutes per response.

Application for Provisional Radiotelephone 3rd Class Operator Certificate with Broadcast Endorsement, Form 756–C. This form provides for a certification by a holder of a radiotelephone 1st class operator license that he/she is responsible for technical maintenance of a radio broadcast station and that instruction has been given to the applicant in the operation of a broadcast station and that it is believed the operator is capable of performing the duties expected of a person holding a radiotelephone 3rd class operator permit with broadcast station operator endorsement. FCC estimates approximately 11,000 applications are received annually and that respondent burden averages three minutes per response.

Special Temporary Authority Rules in the Cable Television Service, Section 76.29 of FCC Rules. This section requires that in circumstances requiring temporary use of cable television facilities for operations not authorized pursuant to a valid certificate of compliance, a cable television service may request special temporary authority to operate. The FCC may grant special temporary authority, upon a finding that the public interest would be served, for a period not to exceed 90 days and may extend such authority upon a like finding for one additional period not to exceed 90 days. Specific statutory authority for this rule is derived from Section 309(f) of the Communications Act of 1934, as amended, as well as Sections 2, 4 (i) and (j), 30, 303, and 307 of the Communications Act. FCC estimates approximately 50 requests are received annually and that respondent burden averages one hour per response.

NORMAN F. HEY,
Regulatory Reports, Review Officer.

[Docket No. 77N–0163]

LEMMON PHARMACAL CO.; STATOBEX (PHENDIMETRAZINE TARTRATE 70 MILLIGRAM) DOSAGE FORMS

Refusal to Approve Parts of New Drug Application

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: This notice announces that the Director of the Bureau of Drugs refuses to approve those parts of an abbreviated new drug application (ANDA) pertaining to Statobex (phendimetrazine tartate 70 milligrams) Tablets and Capsules (ANDA 85–095) submitted by Lemon Pharmacal Co., P.O. Box 30, Sellersville, PA 18960 ("Lemon"). A notice of opportunity for hearing on the issue of the approvability of the application was published in the FEDERAL REGISTER of May 20, 1977 (42 FR 25917). Lemon Pharmacal did not request a hearing.

DATE: Effective August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert H. Hahn, Bureau of Drugs (HFD–32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, (301–443–3650).

SUPPLEMENTARY INFORMATION: On March 23, 1976, Lemon submitted an ANDA (assigned number ANDA 85–095) for the following products:

Statobex Tablets (phendimetrazine tartrate, 35 milligram and 70 milligram), Statobex-D Tablets (phendimetrazine tartrate, 35 milligram and 70 milligram), and Statobex-D Capsules (phendimetrazine tartrate, 35 milligram and 70 milligram).

On December 28, 1976, the firm requested that the application, insofar as it pertains to the 70-milligram dosage forms, be filed over protest. On May 20, 1977 (42 FR 25917), the Director of the Bureau of Drugs published a notice of opportunity for hearing on his proposal to refuse approval of the 70-milligram dosage forms. Lemmon elected not to request a hearing on the issue and, by letter dated June 3, 1977, withdrew its request to file the application over protest.

The Director of the Bureau of Drugs, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053, as amended (21 U.S.C. 355)), and under authority delegated to him (21 CFR 5.82), finds that (1) the application does not contain any reports of investigations or adequate tests, by all methods reasonably applicable, to show whether or not the 70-milligram dosage forms of Statobex are safe for use under the conditions prescribed, recommended, or suggested in the proposed labeling thereof, and (2) upon the basis of the information submitted as part of the application, FDA has insufficient information to determine whether the drugs are safe for use under such conditions.

Therefore, pursuant to the foregoing findings, approval of those parts of abbreviated new drug application 85–095 pertaining to dosage forms of Statobex containing 70 milligrams of phendimetrazine tartrate is refused.

Dated: August 2, 1977.

CARL M. LEVENTHAL,
Acting Director, Bureau of Drugs.

[Docket No. 77N–0225]

VITARINE CO.

Phendimetrazine Tartrate 105-Milligram Time Release Capsules; Opportunity for Hearing on Proposal to Refuse to Approve New Drug Application

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: The Director of the Bureau of Drugs proposes to refuse approval of an abbreviated new drug application for Phendimetrazine Tartrate 105-milligram Time Release Capsules (ANDA 83–736) by The Vitarine Co., 227–15 North Conduit Ave., Springfield Gardens, NY 11413 ("Vitarine") on the grounds that (1) the application does not contain any reports of investigations or adequate tests, by all methods reasonably applicable, to show whether or not the product is safe for use under the conditions of use prescribed, recommended, or suggested in the proposed labeling thereof; (2) upon the basis of the information submitted as part of the application, FDA has insufficient information to determine whether the product is safe for use under such conditions; and (3) evaluated on the basis of the information submitted as part of the application and other public information before FDA, there is a lack of substantial evidence that the drug will have the effect it purports or is represented to have under such condition of use.

DATES: Any request for a hearing must be submitted on or before September 8, 1977. In support of any such request, all data and information relied upon to justify a hearing and any other comments from interested persons must be submitted on or before October 11, 1977.

ADDRESSES: Requests, supporting data and information, and other comments shall be submitted, with FDA Docket No. 77N–0225 clearly indicated in the filings, to the FDA Hearing Clerk, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Robert H. Hahn, Bureau of Drugs (HFD–32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, (301–443–3650).

SUPPLEMENTARY INFORMATION:

BACKGROUND

As required by the Drug Amendments of 1962, FDA is engaged in a Drug Efficacy Study Implementation (DESI) program under which each drug covered by a new drug application (NDA) that was approved by FDA on the basis of safety between 1938 and 1962 is review to determine whether substantial evidence exisits to demonstrate that the drug is effective for its labeled indications. As reviews are completed, notices are published in the FEDERAL REGISTER announcing the agency's conclusions on the effectiveness of the drugs reviewed.

In the FEDERAL REGISTER of February 12, 1973 (38 FR 4280), FDA published DESI Notice 11673 stating that Plegine Tablets containing 35 milligrams of phendimetrazine tartrate as a single active ingredient and marketed by Ayerst Laboratories is effective "in the management of exogenous obesity as a short-term adjunct (a few weeks) in a regimen of weight reduction based on caloric restrictions." The Indications section further was to read: "The limited usefulness of agents of this class * * * should be measured against possible risk factors inherent in their use * * *." The DESI notice also stated that Plegine Tablets is regarded as a "new drug" as defined in section 201(p) of the Federal Food, Drug, and Cosmetic Act (the "act"), and that "a new drug application is required from any person marketing such drug without approval." Furthermore, "all identical, related, or similar drugs, not the subject of an approved new drug application * * * are subject to this notice," citing the current 21 CFR 310.6. Finally, referring to a prior general announcement by FDA published in the FEDERAL REGISTER of July 14, 1970 (35 FR 11273), DESI Notice 11673 advised that "marketing of such drugs may be continued * * * (by) any person who does not hold an approved or effective new drug application, (upon) the submission of an abbreviated new drug application" (ANDA) within 60 days of the notice. The July 14, 1970 announcement also permitted manufacturers to commence marketing upon the filing of an NDA or ANDA. (On September 22, 1975, FDA published in the FEDERAL REGISTER a general notice (40 FR 43531) that, in effect, revoked those portions of the July 14, 1970 announcement that were inconsistent with the District Court's order in *Hoffmann-LaRoche, Inc.* v. *Weinberger*, 425 F. Supp. 890 (D.D.C., 1975), reprinted in the September 22, 1975 notice. That order, and the September 22, 1975 notice, withdrew any "permission" from FDA for a new supplier of a drug listed in DESI notice 11673 to commence marketing upon submission of an NDA or ANDA but prior to the approval of an NDA or ANDA.)

APPLICATION FOR PHENDIMETRAZINE TARTRATE 105-MILLIGRAM TIME RELEASE CAPSULES

On May 7, 1973, Vitarine submitted an ANDA (assigned number ANDA 83–736) for the following product:

Phendimetrazine Tartrate 105-Milligram Time Release Capsules

The ANDA form of a new drug application does not contain preclinical or clinical studies demonstrating the safety or effectiveness of the drug product. 21 CFR 314.1(f). The proposed labeling for the drug product contained a statement of indications identical to that set forth in DESI Notice 11673. On June 14, 1973, January 3, 1974, and February 7, 1977, FDA informed Vitarine that an abbreviated new drug application is not acceptable for a controlled release form of phendimetrazine tartrate.

On February 28, 1977, the firm requested that the application be filed over protest, as provided for in 21 CFR 314.110(d). Under that regulation, FDA is required to reevaluate the application and either approve the application or give written notice of an opportunity for a hearing on the question of whether the application is approvable. This notice is provided pursuant to that regulation.

STATUS OF PHENDIMETRAZINE TARTRATE 105-MILLIGRAM TIME RELEASE CAPSULES AS NEW DRUGS

Section 201(p) of the act defines a "new drug" as any drug for human use "the composition of which is such that su h drug is not generally recognized, among experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs, as safe and effective for use under the conditions prescribed, recommended, or suggested in the labeling thereof," or any drug for human use "the composition of which is such that such drug, as a result of investigations to determine its safety and effectiveness for use under such conditions, has become so recognized, but which has not, otherwise than in such investigations, been used to a material extent or for a material time under su h conditions." Section 201(p)(1) of the act exempts from the definition of "new drug," through a "grandfather clause," a drug marketed in 1938 and subject to the Food and Drug Act of 1906. Section 107(c) of the Drug Amendments of 1962 further exempts certain new drugs from the effectiveness standards of section 201 (p).

The Food and Drug Administration has consistently asserted that the "newness" of a drug product arises from many factors. First, and most obvious, is whether the individual chemical entity contained in the product is a "new drug." 21 CFR 310.3(h)(1). As noted above, phendimetrazine tartrate has been treated by FDA as a "new drug" for many years, and has not yet been formally determined by FDA to be generally recognized as safe and effective and no longer to be a "new drug."

Second, even if the individual drug substance is not itself a "new drug," the newness of the dosage, or the method or duration of administration, may cause a drug product to be regarded as a "new drug." 21 CFR 310.3(h)(5). In the case of timed release dosage forms, the FDA deemed those which contained a quantity of active ingredients which is not generally recognized as safe for administration as a single dose under the conditions set forth in the labeling to be "new drugs" even prior to the Drug Amendments of 1962. 21 CFR 200.31. This decision was based upon the risk that the active ingredient might be released at one time or over too short an interval, resulting in an unsafe overdosage to the patient. Since the effectiveness requirements have been added to the act, concern that an inadequate or uneven release of the active ingredient would reduce or vitiate the therapeutic effect of the drug underlined the need for premarketing review of timed release products as "new drugs" under section 505 of the act.

The Bureau Director notes that the labeling approved in DESI Notice 11673 for conventional oral tablets containing 35 milligrams phendimetrazine tartrate provides for a usual dose of one 35-milligram tablet two or three times daily. It further states that dosage should be

individualized to obtain an adequate response with the lowest effective dose; that in some cases one-half tablet (17.5 milligrams) is adequate; and that dosage should not exceed two tablets (70 milligrams) three times a day. Thus, the highest dose to be given at one time is 70 milligrams. The amount of phendimetrazine tartrate in the proposed controlled release capsule (105 milligrams) is one and one-half times that amount, and three times the recommended usual dose. The Director further notes that phendimetrazine tartrate is related chemically and pharmacologically to amphetamine and appears to have a similar potential for abuse and risk of causing dependence in the user. Actual abuse of the 35-milligram dosage was a significant factor in the decision of the Department of Justice to schedule phendimetrazine under the Controlled Substances Act (see 38 FR 15721; June 15, 1973), as well as in FDA's decision to require a drug dependence warning in the labeling (see DESI Notice 11673). Because higher strength dosage forms would be even more attractive for abuse purposes, this safety problem increases if the active ingredient is "dumped" or can otherwise be extracted for immediate use.

Section 201(p)(2) of the act provides a further condition to "not new drug" status for a drug that becomes generally recognized by experts as safe and effective. It also requires that the drug have been used to a material extent or for a material time. This has generally been measured by the duration and volume of commercial marketing in the United States. There was no controlled release dosage form of phendimetrazine tartrate in the DESI program, and no such product has ever been approved for marketing under section 505 of the act. The Director is not aware that any phendimetrazine tartrate controlled released product is now generally recognized by experts as safe and effective for the indications set forth in DESI Notice 11673, nor is he aware of any such product's having been used to a material extent or for a material period in the United States.

Based on the facts set forth above, the Director of the Bureau of Drugs finds that Phendimetrazine Tartrate 105-Milligram Time Release Capsules is a "new drug" as defined in section 201(p) of the act, on the grounds that the controlled release dosage form at this dosage is not generally recognized as safe and effective and has not been used to a material extent or for a material time.

Question of Appropriate Type of Application for Controlled Release Forms of Phendimetrazine Tartrate

Vitarine's submission of an ANDA for this product is based on an interpretation of DESI Notice 11673 that phendimetrazine tartrate in a controlled release dosage form containing 105 milligram per capsule is an "identical, related, or similar drug covered by the DESI notice, which provided that an ANDA would be accepted by FDA for an identical, related, or similar drug." The Director of the Bureau of Drugs believes that this argument is founded on a misinterpretation of 21 CFR 310.6 and a misunderstanding of the nature and purpose of the ANDA.

Section 310.6 was promulgated by FDA in light of experience gathered in the DESI program. As explained in paragraph (a) of the section:

> The specific products listed in these (DESI) notices include only those that were introduced into the market through the new-drug procedures from 1938–62 and were submitted for review by the National Academy of Sciences-National Research Council (NAS-NRC), Drug Efficacy Study Group. Many products which are identical to, related to, or similar to the products listed in these notices have been marketed under different names or by different firms during the same period or since 1962 without going through the new-drug procedures or the Academy review. Even though these products are not listed in the notices, they are covered by the new drug applications reviewed and thus are subject to these notices. All persons with an interest in a product that is identical, related, or similar to a drug listed in a drug efficacy notice or a notice of opportunity for a hearing will be given the same opportunity as the applicant to submit data and information, to request a hearing, and to participate in any hearing. It is not feasible for the Food and Drug Administration to list all products which are covered by an NDA and thus subject to each notice. However, it is essential that the efficacy conclusions be applied to all identical, related, and similar drug products to which those conclusions are reasonably applicable.

The Director notes that the concept of "identical, related, or similar drug products" was expressed in terms of giving interested persons "the same opportunity as the applicant to submit data and information, to request a hearing, and to participate in any hearing"; that is, to participate in the process of classifying their products as "effective" or "ineffective." The last sentence quoted from 21 CFR 310.6(a) emphasizes that the scope of the phrase "identical, related, or similar" depends on the extent to which conclusions that a reviewed drug is effective or ineffective may be applied to other nonreviewed drugs. Paragraph (b) expands on this to say:

> Where experts qualified by scientific training and experience to evaluate the safety and effectiveness of drugs would conclude that the findings in a drug efficacy notice or notice of opportunity for hearing concerning effectiveness are applicable to an identical, related, or similar drug product, such product is affected by the notice.

The Director is not aware that experts qualified by training and experience to evaluate the safety and effectiveness of drugs have concluded that the findings in DESI Notice 11673 on the effectiveness of phendimetrazine tartrate in a noncontrolled release, 35-milligrams dosage form are applicable to a controlled release 105-milligram dosage form, nor was any evidence offered by the applicant to establish this point. Therefore, the Director finds that the controlled release product is not an identical, related, or similar drug to that described in DESI Notice 11673, and that that notice does not authorize the submission of ANDA's for such controlled release products.

Use of Abbreviated New Drug Applications by FDA

The history of the new drug provisions of the act and the agency's implementation of them, including introduction of the ANDA, is described in detail in the preamble to a notice of proposed rulemaking published in the Federal Register on June 20, 1975 (40 FR 26142). The Director will not reiterate that history here. He believes, however, that several points bear emphasizing. First, an ANDA is a new drug application; it represents a form of application in which certain information normally part of an NDA is not required because it is not essential to the agency's reaching a decision on the approvability of the drug product under section 505 of the act. This information requirement is waived because the agency already has sufficient publicly available data and information in its files to make appropriate conclusions on those elements of the drug approval decision. (Information contained in other approved NDA's may or may not be public. See 21 CFR 314.14. If not public, it may be relied upon by a second applicant only with the express permission of the first applicant. 21 CFR 314.11.) Generally, information allowed to be omitted relates to preclinical and clinical studies regarding the safety and effectiveness of the active ingredients. As the Commissioner stated in the June 20, 1975 notice:

> (A)n abbreviated NDA is appropriate only for those drugs which, from a generic standpoint, are generally recognized as safe and effective when they are properly labeled and manufactured. The submission of an abbreviated NDA has thus been required only to assure the quality of drug products and their proper labeling and manufacture, not to show the basic safety and effectiveness of the generic chemical entity involved. (40 FR 26147).

The purpose of an ANDA is to provide a means to eliminate unnecessary animal and human experimentation, to reduce the burdens on manufacturers in attempting to market duplicates of established drugs, and to ease the workload of FDA in reviewing and processing applications.

Second, in order for FDA to waive such requirements, it must affirmatively conclude that it has sufficient public information to make the requisite conclusions. Because the ANDA is an exception to the general rule requiring a complete NDA, the decision to allow use of an ANDA must be consciously and prospectively made by the agency. (See 21 CFR 314.1(a): "if the drug * * * is one for which an abbreviated new drug application has been found by the Food and Drug Administration to be sufficient * * *." (emphasis added).) These decisions are formal and are officially issued, generally by a notice in the Federal Register but on rare occasions by other public notice. These decisions cannot extend to products for which little or no public information is available and which were not considered by FDA in making the ANDA decision. The product covered by this notice illustrates why this is so. No controlled release form of phendimetrazine tartrate was reviewed in the Drug Efficacy Study and no such product has been approved for marketing in the United States. Appropriate information is needed to determine, for example, whether any medically significant differences exist in factors such as absorption rates, blood levels, metabolism and excretion between the controlled release dosage form and the conventional dosage form when used in accordance with the labeling approved in DESI Notice 11673. Other examples of unforeseen variations in drugs reviewed in the DESI program have also recently been uncovered in the process of implementing the court order in the "Hoffman-La-Roche" case (discussed earlier), including untested combinations of two or more drugs and substantial increases in the strength of the drug. Clearly, it is contrary to the public interest, as well as the language of sections 201(p) and 505 of the act and implementing regulations cited above, for FDA to waive any information essential to determine the approvability of such a drug without even being aware that such a drug may potentially be, or actually is being, marketed.

Third, the choice between NDA (including a supplemental NDA) and ANDA is not an "either-or" option. For many years, the agency has imposed on applicants using either application process a variety of requirements depending on the nature of the drug product, the types of information publicly available regarding the drug, and similar factors. Thus, some NDA's require chronic animal toxicology testing, and others do not; some ANDA's require detailed manufacturing data, and others do not; some NDA's and ANDA's require bioavalability data, and others do not. As noted, the most common distinction between the NDA and the ANDA relates to requirements for preclinical and clinical data. But this distinction should not blur the close similarity on most matters. To repeat, both the traditional "full" NDA and the most "abbreviated" ANDA are merely types of applications described in section 505 of the act.

Fourth, the fact that FDA does not waive any of the requirements of an NDA for a particular product does not necessarily mean that an applicant must conduct its own preclinical and clinical studies regarding safety or effectiveness. The applicant may be able to include in its applications published articles and other publicly available data and information that provide an adequate basis for the agency's making the evaluation and approvability decision required under section 505. An NDA can be approved on such a submission.

The Director finds that the use of an ANDA for a controlled release from of phendimetrazine tartrate would be inconsistent with the purposes of the abbreviated form of a new drug application, has not been authorized by the Food and Drug Administration, and would not fulfill the requirements of section 505 of the act regarding the requisites for approval of such a product. Because of this, the Director finds that Vitarine must submit an application in the form described in 21 CFR 314.1(c) containing reports of investigations and adequate tests to show whether or not its product is safe and effective for use under the conditions in the proposed labeling.

Lack of Information in Application

The Director finds that the ANDA for Phendimetrazine Tartrate 105-Milligram Time Release Capsules lacks any reports of preclinical or clinical investigations on the product. Because the application lacks safety and effectiveness data, the information therein has not been evaluated to determine whether it satisfies the other requirements of the act and new drug regulations. If, as a result of this notice, a hearing is requested and it is determined that a hearing will be ordered, the Bureau of Drugs will then review the other parts of the application and raise any remaining issues in the notice of hearing.

Notice of Opportunity for Hearing

Therefore, notice is given to Vitarine and all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505(d) of the act refusing to approve ANDA 83–736 on the following grounds: (1) The application does not contain any reports of investigations or adequate tests, by all methods reasonably applicable, to show whether or not the product is safe for use under the conditions prescribed, recommended, or suggested in the proposed labeling thereof; (2) upon the basis of the information submitted as part of the application, FDA has insufficient information to determine whether the drug is safe for use under such conditions; and (3) evaluated on the basis of the information submitted as part of the application and other public information before FDA with respect to the drug, there is a lack of substantial evidence that the drug will have the effect it purports or is represented to have under such conditions of use.

If Vitarine elects to avail itself of the opportunity for hearing pursuant to section 505(d) of the act and 21 CFR 314.200, it must file with the Hearing Clerk, Food and Drug Administration, (1) written notice of appearance and request for hearing by September 8, 1977, and (2) the data, information, and analyses on which it relies to justify a hearing, as specified in § 314.200, by October 11, 1977. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of the applicant to file a timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election not to avail himself of the opportunity for a hearing, and the Director of the Bureau of Drugs will summarily enter a final order refusing to approve application.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact that precludes the refusal to approve the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgement against the person who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice shall be filed in quintuplicate with the Hearing Clerk, Food and Drug Administration.

All submissions pursuant to this notice, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the Office of the Hearing Clerk (address given above) between the hours of 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053, as amended (21 U.S.C. 355)), and under authority dele-

gated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: July 26, 1977.

J. RICHARD CROUT,
Director, Bureau of Drugs.

DRAFT GUIDELINES FOR THE DEVELOPMENT OF THE STATE MEDICAL FACILITIES PLAN

Availability

Notice is hereby given that the Department of Health, Education, and Welfare regional offices have available for distribution to the public "Draft Guidelines for the Development of the State Medical Facilities Plan" on which the Department is seeking comments during a 45-day comment period. Final guidelines will be developed based upon comments received on the draft guidelines. Title XVI of the National Health Planning and Resources Development Act of 1974 (Pub. L. 93-641), provides assistance to States through allotments, loans, loan guarantees, and interest subsidies for the construction, conversion, and modernization of medical facilities. Except for projects designed to eliminate or prevent imminent safety hazards or to prevent noncompliance with State or voluntary licensure or accreditation standards, a State must have submitted, and have approved by the Secretary, a State medical facilities plan before an application for assistance under this Title can be approved. The draft guidelines, for which comments are solicited, are the guidelines for the development of a State medical facilities plan required by section 1603 of the Act.

Comments or suggestions for improvement of the draft guidelines should be sent to: Bureau of Health Planning and Resources Development, Division of Facilities Development, Room 6-41, 3700 East-West Highway, Hyattsville, Md. 20782. Copies of the "Draft Guidelines for the Development of the State Medical Facilities Plan" may be obtained from the DHEW regional offices listed below:

DHEW Regional Office I, John F. Kennedy Federal Building, Boston, Mass. 02203.
DHEW Regional Office II, 26 Federal Plaza, New York, N.Y. 10007.
DHEW Regional Office III, P.O. Box 13716, Philadelphia, Pa. 19108.
DHEW Regional Office IV, 50 Seventh Street NE., Atlanta, Ga. 30323.
DHEW Regional Office V, 300 South Wacker Drive, Chicago, Ill. 60606.
DHEW Regional Office VI, 1200 Main Tower Building, Dallas, Tex. 75202.
DHEW Regional Office VII, 601 East 12th Street, Kansas City, Mo. 64106.
DHEW Regional Office VIII, 2017 Federal Office Building, Denver, Colo. 80294.
DHEW Regional Office IX, 50 Fulton Street, San Francisco, Calif. 94102.
DHEW Regional Office X, 1321 Second Avenue, Arcade Plaza, Seattle, Wash. 98101.

Dated: July 29, 1977.

DANIEL I. ZWICK,
Acting Deputy Administrator, Health Resources Administration.

GRADUATE MEDICAL EDUCATION NATIONAL ADVISORY COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of September 1977:

Name: Graduate Medical Education National Advisory Committee.
Date and time: September 22-23, 1977, 9 a.m.
Place: Conference Room G & H, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857. Open for entire meeting.
Purpose: The Graduate Medical Education National Advisory Committee is responsible for advising and making recommendations with respect to: (1) present and future supply and requirements of physicians by specialty and geographic location; (2) ranges and types of numbers of graduate training opportunities needed to approach a more desirable distribution of physician services; (3) the impact of various activities which influence specialty distribution and the availability of training opportunities including systems of reimbursement and the financing of graduate medical education.
Agenda: Attention will be devoted to discussion of the findings and observations of several technical panels which were established at the previous meeting. These include a redefinition of the manpower problem, the assumptions which might be developed to govern future Committee deliberations; and the implications of the GAO Report on "Problems in Training and Appropriate Mix of Physician Specialists". Discussions of specialty manpower requirements, National Health Policy Planning guidelines, and issues associated with the financing of Graduate Medical Education are contemplated. A portion of the meeting will be available for comments and participation by the public.

Limited seating will be available to the public on a first come, first served basis.

Anyone wishing to obtain a roster of members, minutes of meeting, or other relevant information should contact Dr. Frederick V. Featherstone, Bureau of Health Manpower, Room 4-42, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782, telephone 301-436-6430.

Agenda items are subject to change as priorities dictate.

Date: August 2, 1977.

JAMES A. WALSH,
Associate Administrator for Operations and Management.

EXPERMIMENTAL DESIGN SUBGROUP OF THE CLEARINGHOUSE ON ENVIRONMENTAL CARCINOGENS

Cancellation of Meeting

Notice is hereby given of the cancellation of the meeting of the Experimental Design Subgroup of the Clearinghouse on Environmental Carcinogens, National Cancer Institute, National Institutes of Health, August 30, 1977, which was published in the FEDERAL REGISTER on July 8, 1977 (42 FR 35225).

Dated: JULY 29, 1977.

THOMAS E. MALONE, Ph. D.,
Deputy Director, National Institutes of Health.

NATIONAL ARTHRITIS, METABOLISM, AND DIGESTIVE DISEASES ADVISORY COUNCIL

Amended Notice of Meeting

Notice is hereby given of a change in the meeting time of the National Arthritis, Metabolism, and Digestive Diseases Advisory Council, National Institute of Arthritis, Metabolism, and Digestive Diseases, which was published in the FEDERAL REGISTER on June 29, 1977, 42 FR 33071.

The Council was to have convened at 8:30 a.m. on August 18, 1977 in Conference Room 6, Building 31, National Institutes of Health, but has been changed to 1:30 p.m. The meeting will be open to the public from 1:30 p.m. to 2:30 p.m. Attendance by the public will be limited to space available.

In addition, the below listed subcommittees will have meetings on August 17 from 1 p.m. to closing and on August 18 from 9 a.m. to noon: the Digestive Diseases Subcommittee, Room 9A52; the Arthritis, Bone and Skin Subcommittee, Room 2A52; the Diabetes, Endocrine and Metabolic Diseases Subcommittee, Room 9A51; the Kidney, Urologic and Blood Diseases Subcommittee, Conference Room 6.

In accordance with the provisions set forth under Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and Section 10(d) of Pub. L. 92-463, the subcommittees meetings will be closed to the public for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Dated: July 29, 1977.

THOMAS E. MALON, Ph. D.,
Deputy Director, National Institutes of Health.

[FR Doc.77-22400 Filed 8-8-77;8:45 am]

PERIODONTAL DISEASES ADVISORY COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Periodontal Diseases Advisory Committee, National Institute of Dental Research, National Institutes of Health, Bethesda, Md., on September 15-16, 1977, in Building 31-A, Conference Room 4.

The entire meeting will be open to the public from 9 a.m. to 5 p.m. on September 15, and from 9 a.m. to adjournment on September 16, for discussions on clinical research, the feasibility of improving instrumentation and methodology in the diagnosis, treatment, and prevention of periodontal disease will be considered. Attendance by the public will be limited to space available.

Dr. Paul F. Parakkal, Executive Secretary of the Periodontal Diseases Advisory Committee, National Institute of Dental Research, National Institutes of Health, Westwood Building, Room 519, Bethesda, Md., 20014 (phone number 301-496-7784), will furnish rosters of committee members, a summary of the meeting, and other information pertaining to the meeting.

(Catalog of Federal Domestic Assistance Program No. 13.841, National Institutes of Health.)

Dated: July 26, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer, National Institutes of Health.

REPORT ON CARCINOGENESIS BIOASSAY OF TRISODIUM ETHYLENEDIAMINETETRAACETATE TRIHYDRATE

Availability

Trisodium ethylenediaminetetraacetate trihydrate has been tested for cancer-causing activity with rats and mice in the Carcinogenesis Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay of the chelating agent, trisodium ethylenediaminetetraacetate trihydrate (Na$_3$EDTA$\cdot$3H$_2$0), for possible carcinogenicity was conducted by administering the test materials in feed to Fischer 344 rats and B6C3F1 mice. The chemical was administered to 50 males and 50 females of each species at low and high concentrations, 3,750 and 7,500 ppm, for 103 weeks. Matched-control groups were composed of 20 males and 20 females of each species.

No compound-related signs of clinical toxicity were noted. Although a variety of tumors occurred among test and control animals of both species, no tumors were related to treatment. Since survival was satisfactory and showed no consistent variation among test and control groups, the absence of treatment-related tumors could not be attributed to early mortality.

Single copies of the 88-page report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Md. 20014.

(Catalog of Federal Domestic Assistance Program Number 13.393, Cancer Cause and Prevention Research.)

Dated: July 28, 1977.

DONALD S. FREDERICKSON, M.D.
Director, National Institutes of Health.

AGING REVIEW COMMITTEE

Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Aging Review Committee, National Institute on Aging, on September 8-9, 1977, in Building 31C, Conference Room 8, National Institutes of Health, Bethesda, Md.

The meeting will be open to the public from 9 a.m. to 10 a.m. on September 8 for introductory remarks. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Public Law 92-463, the meeting will be closed to the public on September 8 from 10 a.m. to adjournment on September 9 for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mrs. Suzanna H. Porter, Committee Management Officer, NIA, Building 31, Room 5C07, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496-5345, will provide summaries of meetings and rosters of Committee members as well as substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.866, National Institutes of Health.)

Dated: August 1, 1977.

THOMAS E. MALONE,
Deputy Director, National Institutes of Health.

HIGH BLOOD PRESSURE WORKING GROUP

Meeting

Notice is hereby given of the meeting of the High Blood Pressure Working Group sponsored by the National Heart, Lung, and Blood Institute, October 7, 1977 from 9 a.m. to 5 p.m. at the National Institutes of Health, Building 31, A Wing, Conference Room 4.

This meeting will be open to the public. The purpose of the meeting is to discuss plans for community action programs for the control of high blood pressure. Attendance by the public will be limited to space available.

Mr. Graham Ward, Program Coordinator, National High Blood Pressure Education Program, Room 5C10, Federal Building, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014, 301-496-1051 will provide detailed program information. For the agenda, list of participants and meeting summary contact: Mr. York Onnen, Chief, Public Inquiries and Reports Branch, National Heart, Lung, and Blood Institute, NIH, Building 31, Room 5A03, 9000 Rockville Pike, Bethesda, Maryland 20014, 301-496-4236.

Dated: August 2, 1977.

THOMAS E. MALONE,
Deputy Director,
National Institutes of Health.

NATIONAL ADVISORY DENTAL RESEARCH COUNCIL

Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the National Advisory Dental Research Council, National Institute of Dental Research, on September 26-27, 1977, in Building 31-C, Conference Room 8, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public from 9 a.m. to adjournment on September 27 for general discussion and program presentations. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting of the Council will be closed to the public on September 26, from 9 a.m. to adjournment for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mrs. Edith G. Sharpless, Committee Management Officer, National Institute of Dental Research, National Institutes of Health, Building 31-C, Room 2C-39, Bethesda, Md. 20014, phone 301-496-6705, will furnish rosters of committee members, a summary of the meeting, and other information pertaining to the meeting.

(Catalog of Federal Domestic Assistance Program Nos. 13-840-845 and 13-878, National Institutes of Health.)

Dated: August 2, 1977.

THOMAS E. MALONE,
Deputy Director,
National Institutes of Health.

NATIONAL ADVISORY ENVIRONMENTAL HEALTH SCIENCES COUNCIL, SUBCOMMITTEE OF UNIVERSITY-BASED CENTERS SUBCOMMITTEE FOR THE REVIEW OF NIEHS RESEARCH SERVICE AWARD APPLICATIONS

Meetings

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the National Advisory Environmental Health Sciences Council, National Institute of Environmental Health Sciences, September 19-20, 1977, in Building 18 Conference Room, National Institute of Environmental Health Sciences, Research Triangle Park, North Carolina.

This meeting will be open to the public on September 19, 1977, from 9 a.m. to approximately 12 noon to discuss program policies and issues, recent legislation, interagency activities and other items of interest. Attendance by the public will be limited to space available. In addition, meetings of the Subcommittee on University-based Centers and the Subcommittee for the Review of NIEHS Research Service Award Applications of the above Council will be held on September 18, 1977 at 8 p.m. at the University Motel, Chapel Hill, North Carolina.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on September 19, from 1 p.m. to adjournment on September 20 for the review, discussion and evaluation of individual grant applications. The Subcommittee on University-based Centers and the Subcommittee for the Review of NIEHS Research Service Award Applications of the above Council will be closed from 8 p.m. to adjournment on September 18, also for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Leota B. Staff, Committee Management Officer, NIEHS, Westwood Building, Room 340, Bethesda, Maryland 20014, 301-496-7483, will provide summaries of the meetings and rosters of Council members.

Dr. Wilford L. Nusser, Associate Director for Extramural Program, National Institute of Environmental Health Sciences, Westwood Building, Room 340, Bethesda, Maryland 20014, 301-496-7483, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.872, 13.873, 13.874, 13.875, National Institutes of Health.)

Dated: August 1, 1977.

NATIONAL ADVISORY EYE COUNCIL

Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the National Advisory Eye Council, National Eye Institute, September 26, 27, and 28, 1977, Building 31, Conference Room No. 7, National Institutes of Health, Bethesda, Maryland.

This meeting will convene each day at 9 a.m. and will be open to the public from 9 a.m. until noon on September 26 for opening remarks by the Director, National Eye Institute, discussion of procedural matters, and a presentation by the intramural staff of the National Eye Institute. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Public Law 92-463, the meeting will be closed to the public from 1 p.m. until adjournment on Monday, September 26, and the entire day on Tuesday and Wednesday, September 27 and 28, until adjournment for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mr. Julian Morris, Head, Office of Scientific Reports and Program Planning, National Eye Institute, Building 31, Room 6A-25, AC 301-496-5248, will provide summaries of meetings and rosters of committee members.

Dr. William F. Raub, Associate Director for Extramural and Collaborative Programs, National Eye Institute, Building 31, Room 6A-03, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.867, 13.868, 13.869, 13.870, and 13.871, National Institutes of Health.)

Dated August 1, 1977.

THOMAS E. MALONE,
Deputy Director,
National Institutes of Health.

NATIONAL ADVISORY NEUROLOGICAL AND COMMUNICATIVE DISORDERS AND STROKE COUNCIL PLANNING SUBCOMMITTEE

Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the National Advisory Neurological and Communicative Disorders and Stroke Council Planning Subcommittee, September 16, 1977, at 8:30 a.m. in the Pennsylvania Room, The Holiday Inn, 8120 Wisconsin Avenue, Bethesda, Maryland. The meeting will be open to the public from 8:30 a.m. to 10:30 a.m. on September 16, 1977, to discuss program planning and program accomplishments. Attendance by the public will be limited to space available. In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6) of Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 10:30 a.m. on September 16, 1977, to adjournment on September 16, 1977. The portion of the meeting being closed involves the review, discussion, and evaluation of individual grant applications. These applications and the discussion could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

The Acting Chief, Office of Scientific and Health Reports, Mr. Robert N. Hinkel, Building 31, Room 8A02, NIH, NINCDS, Bethesda, Maryland, telephone 301-496-5751, will furnish summaries of the meeting and rosters of committee members.

Dr. O. Malcolm Ray, Executive Secretary of the Committee, Room 1020C, Federal Building, NIH, NINCDS, Bethesda, Maryland, telephone 301-496-9234, will provide substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.851, 13.852, 13.853, 13.854, National Institutes of Health.)

NATIONAL CANCER INSTITUTE

Meetings for the Review of Contract Proposals and Grant Applications

Pursuant to Public Law 92-463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

These meetings will be open to the public to discuss administrative details or other issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available.

These meetings will be closed to the public as indicated below in accordance with the provisions set forth in Sections 552(b)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Public Law 92-463, for the review, discussion and evaluation of individual contract proposals and grant applications, as indicated. These proposals and applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the proposals and applications.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 4B43, National Institutes of Health, Bethesda, Maryland 20014, 301-496-5708, will furnish summaries of the meetings and rosters of committee members, upon request. Other information pertaining to the meeting can be obtained from the Executive Secretary indicated. Meetings will be held at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014, unless otherwise stated.

COMMITTEE OF CANCER IMMUNOTHERAPY

Date and time: September 6-8, 1977; 7:30 a.m.
Place: Landow Building, Room C41B, 7910 Woodmont Avenue, Bethesda, Maryland 20014.
Type of meeting: Open: September 6, 7:30 a.m. to 8 p.m. Open: September 7, 8:30 a.m. to 11:30 p.m. Open: September 8 8:30 a.m. to 11:30 p.m.
Agenda: Open portion: Program planning. Closed: September 6, 8 p.m. to 11:30 p.m.
Closure Reason: To review research contract proposals.
Executive Secretary: Dr. George M. Steinberg, Building 10, Room 4B09, National Institutes of Health. Phone: 301-496-1791.

NATIONAL HEART, LUNG, AND BLOOD ADVISORY COUNCIL AND ITS MANPOWER SUBCOMMITTEE AND RESEARCH SUBCOMMITTEE

Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the National Heart, Lung, and Blood Advisory Council, National Heart, Lung, and Blood Institute, September 15–17, 1977, National Institutes of Health, Building 31, Conference Room 10, at 9 a.m.

This meeting will be open to the public on September 15 from 9 a.m. to approximately 3 p.m., to discuss program policies and issues. Attendance by the public is limited to space available. In addition, meeting of the Manpower Subcommittee and the Research Subcommittee of the above Council will be held on September 14, 1977 at 8 p.m. in Building 31, Conference Room 9 and 10 respectively.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting of the Council will be closed to the public on September 15 from 3 p.m. until recess, and on September 16 from 9 a.m. to adjournment on September 17 for the review, discussion and evaluation of individual grant applications. The Manpower Subcommittee and the Research Subcommittee of the above Council will be closed from 8 p.m. to adjournment on September 14, also for the review, discussions, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mr. York Onnen, Chief, Public Inquiries and Reports Branch, National Heart, Lung, and Blood Institute, Building 31, Room 5A03, National Institutes of Health, Bethesda, Maryland 20014, 301–496–4236, will provide summaries of the meetings and rosters of the Council members.

Dr. Jerome G. Green, Director of Extramural Affairs, NHLBI, Westwood Building, Room 7A17, 301–496–7416, will provide substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.837, 13.838, and 13.839, National Institutes of Health.)

Dated: August 2, 1977.

THOMAS E. MALONE,
Deputy Director,
National Institutes of Health.

NEUROLOGICAL AND COMMUNICATIVE DISORDERS AND STROKE SCIENCE INFORMATION PROGRAM ADVISORY COMMITTEE

Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Neurological and Communicative Disorders and Stroke Science Information Program Advisory Committee, National Institute of Neurological and Communicative Disorders and Stroke, September 19–20, 1977, at the National Institutes of Health, Building 31–C, Conference Room 7, Bethesda, Md. 20014.

This meeting will be open to the public on September 19th, from 9 a.m., to 5 p.m., to discuss the status and plans for the Institute's science information program. Attendance by the public will be limited to space available. In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Public Law 92–463, the meeting will be closed to the public on September 20th, from 9 a.m., until conclusion of the meeting, for the review, discussion, and evaluation of individual contract proposals. The portion of the meeting being closed involves the review, discussion, and evaluation of individual contract proposals. These proposals and the discussion could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the proposals.

Mr. Robert N. Hinkel, Acting Chief, Office of Scientific and Health Reports, NINCDS, NIH, Building 31, Room 8A–06, Bethesda, Md. 20014, 301–496–5751, will provide summaries of the meeting and rosters of committee members.

Mr. Alfred Weissberg, Executive Secretary, NINCDS, NIH, Building 31, Room 8A–03, Bethesda, Md. 20014, 301–496–9271, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.854, National Institutes of Health.)

Dated: August 1, 1977.

CONSENSUS COMMITTEE FOR BREAST CANCER SCREENING (TEMPORARY)

Establishment

NOTE.—This document is republished without change from the issue of Wednesday, August 3, 1977, 42 FR 39277.

The Director, National Institutes of Health, announces the establishment on July 19, 1977, of the advisory committee indicated below by the Acting Director, National Cancer Institute, under the authority of Section 410(a)(3) of the Public Health Service Act (42 U.S.C. 286d). Such advisory committees shall be governed by the provisions of the Federal Advisory Committee Act (Public Law 92–463) setting forth standards governing the establishment and use of advisory committees.

NAME: NIH Consensus Committee for Breast Cancer Screening (Temporary).

PURPOSE: The Committee shall advise the Director, NIH, and the Director, NCI, concerning the use of X-ray mammography for screening women to detect early breast cancer. Authority for this committee will expire on December 31, 1977.

Dated: July 29, 1977.

DONALD S. FREDRICKSON,
Director,
National Institutes of Health.

NATIONAL COUNCIL ON EDUCATIONAL RESEARCH

Meeting

Notice is hereby given that the next meeting of the National Council on Educational Research will be held on September 16, 1977, at the National Institute of Education, 1200 19th Street NW., Washington, D.C., in Room 823. The meeting will convene at 9:30 a.m., and adjourn at 3:30 p.m.

The National Council on Educational Research is established under Section 405(b) of the General Educational Provisions Act (20 U.S.C. 1221e(b)). Its statutory duties include:

(a) Establishing general policies for, and reviewing the conduct of the Institute;
(b) Advising the Assistant Secretary for Education and the Director of the Institute on development of programs to be carried out by the Institute;
(c) Recommending to the Assistant Secretary and the Director ways to strengthen educational research, to improve the collection and dissemination of research findings, and to insure the implementation of educational renewal and reform based upon the findings of educational research.

The entire meeting will be open to the public. The tentative agenda is as follows:

9:30 a.m.—Convene.
9:30–9:35 a.m.—Approve minutes.
9:30–9:45 a.m.—Adjustments of future calendar and agendas.
9:45–10:30 a.m.—Director's remarks.
10:30 a.m.–12 m—Action on proposed policy for fundamental research.
12 m–1 p.m.—Lunch.
1–2 p.m.—Status report on Fiscal Year 1978 budget, Fiscal Year 1979 budget and alternatives for any necessary replanning.
2–2:30 p.m.—Initial discussion of long-range planning for NIE especially Fiscal Year 1980 guidance to come from the council.
2:30–3:30 p.m.—Report of Review and Reports Committee: Review of Report on Resolution 19.6; Outline for Fiscal Year 1977 Report; Discussion of External Review Process.

Members of the public are invited to attend the sessions. Written statements relevant to an agenda item (or to any other item considered of interest to the Institute) may be submitted at any time and should be sent to the Chairman and Mrs. Ella L. Jones, Administrative Coordinator of the Council, at the address shown below.

In accordance with Council Policy (NCER Resolution No. 013074–8) copies of Council resolutions and minutes of Council meetings can be obtained by contacting the Administrative Coordinator. Resolutions are available shortly after adoption. Minutes require approval by the Council at a subsequent meeting and are available to the public one week following their approval.

In order to verify the tentative agenda, or assure adequate seating arrangements, interested persons are requested to contact the Administrative Coordinator, National Council on Educational Research, whose address and telephone number are listed below:

National Council on Educational Research, National Institute of Education, Washington, D.C., telephone 202–254–7900.

Dated: August 5, 1977.

PETER H. GERBER,
Chief, Policy and Administrative Coordinator, National Council on Educational Research.

[FR Doc.77-23025 Filed 8-9-77;8:45 am]

NATIONAL COUNCIL ON EDUCATIONAL RESEARCH

Proposed Policy Resolution on Fundamental Research Relevant to Education

Notice is hereby given that at its meeting on September 16, 1977, the National Council on Educational Research (NCER) will consider the following Proposed Policy Resolution on Fundamental Research Relevant to Education prepared by the NCER Program Committee. The Council expects to take action at that meeting related to this proposal of the Committee.

The public is invited to comment on the Proposed Resolution in writing, on or before September 8, 1977, to Mr. Peter Gerber, Chief, NCER Staff, Room 729, National Institute of Education, 1200 19th Street NW., Washington, D.C. 20208 (Telephone Number: 202–254–7900). The public is also invited to attend the Council Meeting on September 16, 1977, in Room 823 of the NIE offices. This item is tentatively scheduled for 10:30 a.m.–12 Noon. Please call the NCER staff office to confirm the time availability of seating.

NATIONAL COUNCIL ON EDUCATIONAL RESEARCH PROGRAM COMMITTEE

PROPOSED POLICY RESOLUTION ON FUNDAMENTAL RESEARCH RELEVANT TO EDUCATION FOR CONSIDERATION ON SEPTEMBER 16, 1977

I. *Allocation of Funds:* A. At least 20% of the Institute's funds shall be used to support fundamental research relevant to education by FY 1979, and by FY 1985 this shall have increased to at least 30%.

B. At least half of the minimum thus allocated (10% of the Institute's funds in FY 1979, increasing to 15% by FY 1985) shall be used for research grants to individual investigators or small groups of investigators.

II. *Research Community Involvement:* A. The major purpose of research supported under this policy shall be to extend the knowledge gained through previous or current research or to explore areas where knowledge is lacking and for which a need is evident. Since those who are most familiar with such areas of research are investigators in the field, the Institute shall, to the maximum extent possible, rely upon their assistance in identifying research needs and research to be supported. This assistance should include, but not be limited to, submission of unsolicited proposals, participation in developing guidelines, and review of proposals by groups of highly capable investigators (with multi-disciplinary and cross-disciplinary membership), including investigators close to educational practice.

B. As part of the continuing external review of NIE, the scientific quality and balance of fundamental research programs shall be evaluated regularly by outside investigators.

C. The Director shall seek to work with all major research associations and organizations whose members may be engaged in fundamental research related to education, to accumulate knowledge about such research and to coordinate the Institute's programs with such research.

III. *Coordination:* The Director shall seek through the Federal Council on Educational Research and Development and other means to coordinate fundamental research supported by Federal agencies, to identify areas of fundamental research which should have greater support by NIE or another Federal agency, and to stimulate fundamental research in such areas.

IV *Staff Responsibility for Fundamental Research.* Because the NIE staff is essential to the implementation of this policy and the support by NIE of high quality research, the Director shall insure that within NIE there is a substantial number and proportion of staff members who have competence and recent experience in fundamental research and that these researchers shall be involved in positions of responsibility affecting all decisions and activities which involve fundamental research.

V. *Reports.* Initial plans for implementation of this policy shall be conveyed to the Council within 30 days of its adoption, including resource allocations and management strategies. Similarly, by January 1, 1978 the Director shall present to the Council for its concurrence a general plan for implementation of this policy through 1985.

The Director shall include in each annual report to the Council a review of the Institute's fundamental research work and efforts to improve it, and shall present to the Council as part of the budget planning process an analysis of options for support of fundamental research under this policy including targets for the amount and proportion of funds which might be thus allocated.

Dated: August 5, 1977.

PETER H. GERBER,
Chief, Policy and Administrative Coordination, National Council on Educational Research.

Office of the Secretary

CONTROL OF PAPERWORK

Comments on Collection of Information and Data Acquisition Activity

Pursuant to Section 406(g)(2)(B), General Education Provisions Act, notice is hereby given as follows:

The National Center for Education Statistics and the U.S. Office of Education have proposed collections of information and data acquisition activities which will request information from educational agencies or institutions.

The purpose of publishing this notice in the FEDERAL REGISTER is to comply with paragraph (g)(2)(B) of the "Control of Paperwork" amendment which provides that each educational agency or institution subject to a request under the collection of information and data acquisition activity and their representative organizations shall have an opportunity, during a 30-day period before the transmittal of the request to the Director of the Office of Management and Budget, to comment to the Administrator of the National Center for Education Statistics on the collection of information and data acquisition activity.

These data acquisition activities are subject to review by the HEW Education Data Acquisition Council and the Office of Management and Budget.

Descriptions of the proposed collections of information and data acquisition activities follow below.

Written comments on the proposed activities are invited. Comments should refer to the specific sponsoring agency and form number and must be received on or before September 8, 1977, and should be addressed to Administrator, National Center for Education Statistics, ATTN: Manager, Information Acquisition, Planning, and Utilization, Room 3001, 400 Maryland Avenue SW., Washington, D.C. 20202.

Further information may be obtained from Elizabeth M. Proctor of the National Center for Education Statistics, 202–245–1022.

Dated: August 4, 1977.

IRIS GARFIELD,
Acting Administrator, National Center for Education Statistics.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of Proposed Activity. Common Core Data Survey, School Year 1977–78.

2. Agency Bureau Office. National Center for Education Statistics; Division of Elementary Secondary Education Statistics.

3. Agency Form Number(s). NCES Form 2393–2; NCES Form 2393–4.

4. Legislative Authority for This Activity. Section 406(b) of the General Education Provisions Act

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall—

(1) Collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States;

(2) Conduct and publish reports on specialized analyses of the meaning and significance of such statistics;

(3) Assist State and local educational agencies in improving and automating their statistical and data collection activities."
(Pub. L. 93–380; 20 U.S.C. 1221e–1.)

5. Voluntary Obligatory Nature of Response. Voluntary.

6. How Information Collected Will Be Used. Information collected will be placed in a data base computer file and stored on magnetic tape for use by policy analysts, educational planners and managers, and educational researchers. This data base will be used as a sampling frame by those desiring to select samples of local educational agencies for special-purpose studies. The data will be tabulated, analyzed, and published in a series of statistical reports for general distribution and reference purposes. Selected tabulations will appear in: Condition of Education Report; Digest of Educational Statistics; and Statistical Abstract of the United States.

7. Data Acquisition Plan. (a) Method of Collection. Mail. Data of record maintained by State Educational Agencies, previously reported by Local Educational Agencies will be compiled into NCES formats and transmitted by State Educational Agency personnel.

(b) Time of Collection. January 1978.

(c) Frequency. Annual.

8. Respondents. (a) Type. State Educational Agencies.

(i) NCES Form 2393–2 collects data about Local Educational Agencies reported previously to State Education Agencies and will be completed by State Educational Agency personnel from agency records and reports.

(ii) NECS Form 2393–4 collects data about State Educational Agencies and will be completed by State Educational Agency personnel.

(b) Number. (i) A total of 16,000 Local Educational Agency reports will be completed by the 57 State Educational Agencies, the number of Local Educational Agency reports per State varying from 17 in one State to more than 1,000 in four States.

(ii) Fifty-seven State Educational Agency reports will be compiled.

(c) Estimated Man-Hours Per Respondent. (i) Total estimated burden for the 16,000 Local Educational Agency reports is estimated to be 32,000 hours, an average of two hours per report. Range will then vary from 34 man-hours in one State to more than 2,000 man-hours in four States.

(ii) An average of 20 man-hours per respondent is estimated for the State Educational Agency report, with a range of from less than 10 hours to perhaps more than 100 hours in the larger, more complex agencies.

9. Information To Be Collected. (a) NCES Form 2393–2 (Local Educational Agency Report. October 1 pupil membership by level of instruction by grade; Prior year number of 12th grade graduates by sex; Number of pupils scheduled to be transported on or about October 1; Number of pupil transportation vehicles owned by the LEA on or about October 1 by size of vehicle; and List of schools operated by the Local Educational Agency showing name, address, grade span, type of school, full-time equivalent number of classroom teachers, and October 1 pupil membership for each school.

(b) NCES Form 2393–4 (State Educational Agency Report). Elected/appointed status of chief state school officer; Number of members of state board of education; Full-time equivalent number of agency employees by function served; Revenues for agency operations by source of revenue; Expenditures of agency operations by type of program or service; Expenditures for capital outlay; List of agency operated schools; and Data on school bus accidents and fatalities.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA AQUISITION ACTIVITY

1. Title of Proposed Activity. Application for Local Educational Agency Grants under the Emergency School Aid Act.

2. Agency Bureau/Office. U.S. Office of Education, Bureau of Elementary and Secondary Education, Equal Educational Opportunity Programs.

3. Agency Form Number. OE Form 116–1.

4. Legislative Authority For This Activity.

(a) *Basic Grants.* "The Assistant Secretary is authorized to make a grant to, or a contract with a local educational agency—

(A) Which is implementing a plan—

(i) Which has been undertaken pursuant to a final order issued by a court of the United States, or a court of any State, or any other State agency or official of competent jurisdiction, and which requires the desegregation of minority group segregated children or faculty in the elementary and secondary schools of such agency, or otherwise requires the elemination or reduction of minority group isolation in such schools; or

(ii) Which has been approved by the Secretary as adequate under Title VI of the Civil Rights Act of 1964 for the desegregation of minority group segregated children or faculty in such schools; or

(B) Which, without having been required to do so, has adopted and is implementing, or will, if assistance is made available to it under this title, adopt and implement, a plan for the complete elimination of minority group isolation in all the minority group isolated schools of such agency; or

(C) Which has adopted and is implementing, or will, if assistance is made available to it under this Act, adopt and implement, a plan—

(i) To eliminate or reduce minority group isolation in one or more of the minority group isolated schools of such agency,

(ii) To reduce the total number of minority group children who are in minority group isolated schools of such agency, or

(iii) To prevent minority group isolation reasonably likely to occur (in the absence of assistance under this title) in any school in such district in which school at least 20 per centum but not more than 50 per centum, of the enrollment consists of such children, or

(D) Which, without having been required to do so, has adopted and is implementing, or will, if assistance is made available to it under this title, adopt and implement a plan to enroll and educate in the schools of such agency children who would not otherwise be eligible for enrollment because of nonresidence in the school district of such agency, where such enrollment would make a significant contribution toward reducing minority group isolation in one or more of the school districts to which such plan relates; or

(E) Which will establish or maintain one or more integrated schools as defined in section 720(7) and which—

(i) Has a sufficient number of minority group children to comprise more than 50 per centum of the number of children in attendance at the schools of such agency, and

(ii) Has agreed to apply for an equal amount of assistance under section (b)."

(Pub. L. 92–318, sec. 706(a)(1); (20 U.S.C. 1605(a)(1)); (45 CFR 185.21).)

(B) *Pilot Projects.* "The Assistant Secretary is authorized to make grants to or contracts with local educational agencies * * * for unusually promising pilot programs or projects designed to overcome the adverse effects of minority group isolation by improving the academic achievement of children in one or more minority group isolated schools if * * * the local educational agency had a number of minority group children enrolled in its schools * * * which (1) is at least 15,000, or (2) constitutes more than 50 per centum of the total number of children enrolled in such schools."

(Pub. L. 92–318, sec. 706(b); (20 U.S.C. 1605(b)); (45 CFR 185.21).)

(C) *Bilingual Projects.* "The Assistant Secretary shall carry out a program to meet the needs of minority group children who are from an environment in which a dominant language is other than English * * * the Assistant Secretary is authorized to make grants to and contracts with * * *

"(B) Local educational agencies eligible for assistance under section 706 for the purpose of engaging in such activities; or

(C) Local educational agencies which are eligible to receive assistance under section 706 for the purpose of carrying out activities authorized under section 707(a) * * *."

(Pub. L. 92–318, sec. 708(c)(1) (B) and (C); (20 U.S.C. 1607(c)(1) (B) and (C)); (45 CFR 185.51).)

(D) *Special Projects.* "The Assistant Secretary is authorized to make grants to, and contracts with, State and local educational agencies, and other public agencies and organizations (or a combination of such agencies and organizations) for the purpose of conducting special programs and projects

carrying out activities otherwise authorized by this title, which the Assistant Secretary determines will make substantial progress toward achieving the purposes of this title."

(1) *Special Arts Projects.* "(a) Any public agency or organization responsible for the administration of statewide public arts programs, such as a State Arts Council or State Arts and Humanities Commission, may apply for assistance by grant * * * for special projects that would through the arts provide opportunities for interracial and intercultural communication and understanding to help meet the special needs incident to the implementation of a plan or project described in § 185.11 or § 185.31(a) * * *."

(Pub. L. 92–318, sec. 708(a)(2); (20 U.S.C. 1607(a)(2)); (45 CFR 185.91).)

(2) *Special Student Concerns Projects.* "(a) Any public agency or organization * * * other than a local educational agency may apply for assistance by grant * * * for the conduct of special student concerns projects designed to eliminate the disproportionately high incidence of suspension, expulsion, and other disciplinary action involving minority group students in the schools of cooperating local educational agencies * * *."

(Pub. L. 92–318, sec. 708(a)(2); (20 U.S.C. 1607(a)(2)); (45 CFR 185.93).)

(3) *Other Special Projects.* "(a)(1) The Assistant Secretary may assist * * * any State or local educational agency or other public agency or organization * * * for the purpose of conducting special programs or projects which the Assistant Secretary determines will make substantial progress toward achieving the purposes of the Act."

(Pub. L. 92–318, sec. 708(a); (20 U.S.C. 1607(a)); (45 CFR 185.94).)

(4) *Special Compensatory Projects.* (a) The Assistant Secretary shall, in accordance with the provisions of this title, carry out a program designed to achieve the purpose set forth in section 703(b). There are authorized to be appropriated for the purpose of carrying out this title * * * and $1,000,000,000 for the period beginning July 1, 1976, and ending September 30, 1979, except that of the sums available under section 708(a), the Assistant Secretary is limited in the use of such sums to an amount, not more than 5 percent, which may be used for providing compensatory services to students who had previously received such services funded in whole or in part under title I of the Elementary and Secondary Education Act of 1965, but who are no longer receiving such services as a result of attendance area changes under a desegregation order or plan issued after August 21, 1974."

(E) Magnet School and University/Business Cooperation, and

(F) *Neutral Site Planning.* "There are authorized to be appropriated in addition to the sums authorized under subsection (a) of this section $25,000,000 for fiscal year 1977 * * * for the purpose of carrying out activities specified in paragraphs (13) through (15) of section 707(a) of this Act * * *."

"(13) Planning and design of, and conduct of programs in, magnet schools.

(14) The pairing of schools and programs with specific colleges and universities and with leading businesses.

(15) The development of plans for neutral site schools."

(Pub. L. 92–318, sec. 704(d), section 707(a); (20 U.S.C. 16003(d), 1606(a)); (45 CFR 185.102).)

5. Voluntary/Obligatory Nature of Response. Required to obtain benefits.

6. How Information Collected Will Be Used Each application for a LEA grant under the Emergency School Aid Act will be subject to the following reviews.

A. *Statistical Data Review.* The statistical data regarding the enrollment and isolation of minority group students will be taken from the application and used to compute the extent of reduction of minority group isolation. Pilot project applications must be verified to have at least 15,000 minority group students in the district or 50 percent minority enrollment in the project schools.

B. *Eligibility/Assurances Review.* The Office for Civil Rights (OCR) has been delegated the authority to determine if districts are eligible to apply for and receive assistance under P.L. 92–318. The Office of Education is responsible for determining if the applicant has met the requirements for all other assurances.

C. *Educational Quality Review.* The educational quality score of each application will be determined by a panel of qualified persons using the criteria outlined in 45 CFR 185.14, 185.24, 185.34, 185.35, 185.54(b), 185.84, 185.91–2, 185.93–3, 185.94–3, 185.106, and 185.107, as applicable. The listing of prominent milestones outlined by the applicant will be used by OE personnel to track the progress of the project.

7. Data Acquisition Plan. (a) Method of collection: Mail. (b) Time of collection: January. (c) Frequency: Annually.

8. Respondents. (a) Type: Local educational agencies. (b) Number: 1150. (c) Estimated average man hours per respondent: 40 hours.

9. Information to be Collected. Applicants for local educational agency (LEA) grants, including basic grants, pilot projects, bilingual projects, emergency special projects, territories, special arts, special student concerns projects, magnet schools and University/Business Cooperation projects, and neutral site planning projects are required to submit the following information:

(a) A copy of the desegregation plan including attachments to document assurances. (Applicants for magnet schools and University/Business Cooperation projects and neutral site planning projects are not required to have a desegregation plan.)

(b) Enrollment data showing the number of schools currently operated by the LEA as well as the number of schools to be affected by the plan under which the LEA is operating.

(c) Enrollment data on the number and, or percentage of minority group students as defined in 45 CFR 185.02(f) currently enrolled in such school district. (Applicants for bilingual projects must also list the total non-English dominant enrollment in the LEA).

(d) Names of schools to be affected by the plan, where applicable, as well as the percentage of minority group students enrolled in such schools for

(1) School year immediately preceding the initiation of a LEA's current desegregation plan. (Applicants for magnet schools and university/business cooperation projects must provide enrollment data for two school years immediately preceding the year for which funds are requested.)

(2) School year for which funds are being requested or the next most recent school term for which such data are available.

(e) Number of schools not affected by the plan and the number and percentage of minority pupils currently enrolled.

(f) Applicants for Special Compensatory Projects Only. Names of schools, and number of students in such schools who previously received services under Title I of the Elementary and Secondary Education Act and who are not now receiving such services as a result of attendance area changes of a desegregation plan, for the project year and for the preceding year.

(g) A program narrative presented in the following manner:

Needs Assessment should be broken down into individual needs, and each need should be ranked in order of priority and presented separately. Under each component, discuss the objectives and activities associated with the particular need, the plans for evaluation of those activities, the management of resources and for pilot projects only, the plans for replication of the program. In discussing staffing, present a biographical sketch of the program director which includes his or her name, address, telephone number, background and other qualifying experience for the project. Special arts applicants must also state the prior experience in education, the arts, and interracial intercultural relations of the State director level to be employed. Also, list the name and relevant experience of other key personnel to be involved in the project.

Bilingual applicants must include a description of the plan for inservice training, and the plan for implementation of any program developed or proposed to be developed (see 45 CFR 185.52 (b) and (c)).

LEA applicants only: (1) Describe the procedures proposed for the coordination of this proposed program or project with projects, when applicable, of Titles I, III, and VII of the Elementary and Secondary Education Act of 1965 and Title IV of the Civil Rights Act of 1964 and other laws of the United States (see 45 CFR 185.13(h)).

(2) Attach a description of how nonpublic school children and staff are expected to participate in the proposed project and of the procedure by which the applicant consulted with representatives of nonpublic schools in the development of the application, and procedures for effective liaison with such persons after the receipt of the funds requested (see 45 CFR 185.42(f)).

(g) For applicants for integrated schools projects only, for each school provide the total predicted enrollment and the number and percent of minority enrollment for each school affected by the plan and each school not affected by the plan.

(h) Number of students who are expected to participate in each school, by type of project and by racial category.

(i) For each nonpublic school which enrolls students or employs staff who will participate in the proposed ESAA project (45 CFR 185.42(f)), indicate the type of grant, the total number of staff and students, by race, in each school, and the number of staff and students who will participate in each project.

(j) For 45 CFR 185.13(i), show the total local revenue and tax rate for fiscal years 1977 and 1973 and show expenditures per pupil from local revenues for the applicable fiscal years (potential 3 years), and for 45 CFR 185.103(a)(3), show expenditures per pupil for the magnet schools, by grade level organization.

(k) For 45 CFR 185.13(i)(1); list the district's transactions with nonpublic schools since June 23, 1972, including gifts, leases, loans, sales or other transactions of property or service, by name and address of nonpublic school, date of transaction and description of property or services.

(l) For 45 CFR 185.13(i)(3), give the total number of all minority or all-nonminority classes in the district and attach an educational justification of such assignments.

(m) For 45 CFR 185.13(i)(4), supply the district's current enrollment by race and type of disability in classes for the mentally retarded or for children with other learning disabilities; supply the current number and percentage of students enrolled in the first grade in the district whose primary home language is other than English. If the number of non-English dominant students is more than 100 or more than 5 percent, attach the averages of the most recent standardized reading achievement scores, by race, for students enrolled in the third and sixth grades (or the nearest grades).

(n) Provide data for advisory committees including date established; date application submitted to committee for review, date names of members and purpose published in newspaper and a copy of the minutes of the hearing must be attached. Also, indicate the names of advisory committee members, by race, organization represented, whether a parent of student affected by ESAA project or plan, classroom teacher or secondary school student. (For Special Student Concerns Projects only, indicate which members were designated by the cooperating LEAs and their advisory committees (45 CFR 185.65 (b)(2)).

(o) Provide a copy of the letter to the State Educational Agency requesting SEA comments on the application.

(p) For applicants for bilingual projects only (45 CFR 185.53(c)(3), provide (1) number and percentage of minority group children in district from an environment in which the dominant language is other than English who currently receive instruction in such language, the average number of hours per day, and the educational goals of such instruction; (2) indicate the extent to which such minority children are separated from nonminority children by or within classes for any part of the day for the provision of instructional or other services or for purposes of ability grouping or homogeneous instruction, by name of school, average number of hours of separation per day, and educational justification for separations (45 CFR 185.53(c)); and (3) explain any variation in materials used for reading instruction between the various schools in the district or between the various classrooms within such school. Variations should be described in terms of primary language, subject matter, or intended level of instruction.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of Proposed Activity. Civil Rights Technical Assistance and Training Programs.

2. Agency/Bureau/Office. U.S. Office of Education Equal Educational Opportunity Programs.

3. Agency Form Number: OE Form 296.

4. Legislative Authority for this activity.—(A) *Technical Assistance.* "Sec. 403. The Commissioner is authorized, upon the application of any school board, State, municipality, school district, or other governmental unit legally responsible for operating a public school or schools, to render technical assistance to such applicant in the preparation, adoption, and implementation of plans for the desegregation of public schools. * * *"

(B) *Training Institutes.* "Sec. 404. The Commissioner is authorized to arrange, through grants or contracts, with institutions of higher education for the operation of short-term or regular session institutes for special training designed to improve the ability of teachers, supervisors, counselors, and other elementary and secondary school personnel to deal effectively with special educational problems occasioned by desegregation. * * *"

C. *Grants to School Boards.* "Sec. 405. The Commissioner is authorized, upon application of a school board, to make grants to such board to pay, in whole or in part, the cost of—

(1) Giving to teachers and other school personnel inservice training in dealing with problems incident to desegregation, and

(2) Employing specialists to advise in problems incident to desegregation.

(P.L. 88-352, (42 U.S.C. 2000c-2; 20 U.S.C. 1231(b); 414 U.S. 563 (1974)).)

5. Voluntary/Obligatory Nature of Response. Required to obtain benefits.

6. How Information To Be Collected Will Be Used. The information will be used to determine the need for assistance and the amount of funds to be awarded.

7. Data Acquisition Plan. (a) Method of collection: Mail. (b) Time of collection: January. (c) Frequency: Annually.

8. Respondents. (a) State educational agencies, institutions of higher education, and local school districts. (b) Number: 300. (c) Estimated average man hours per respondent: 8.

9. Information To Be Collected. The standard nonconstruction application form will be used with a narrative section designed to elicit information required by the statute or regulations.

(a) (1) Applicants for State educational agency grants must furnish the total enrollment of districts which have requested assistance and which are located within the applicant's State;

(2) Applicants for training institutes must provide the number of trainees to be served, separately, in institutes for race/national origin desegregation and for desegregation pertaining to students from environments in which a dominant language is other than English, and the total public school enrollment of districts which have requested training services; and

(3) Applicants for grants to school boards must provide the total public school enrollment of the school district.

(b) Applicants for Title IV (CRA) grants, including awards for Technical Assistance to SEA's, Training Institutes, and Grants to School Boards, are required to submit a program narrative presented in the following manner:

Needs Assessment should be discussed in relation to the (1) magnitude of desegregation-related educational needs as assessed by the applicant with respect to school boards, municipalities, school districts or other governmental units and (2) the degree to which the applicant has demonstrated by objective evidence the existence of such needs.

Under each component, discuss the objectives and activities associated with the assessed needs, plans for evaluation of those activities, the management of resources; and for Grants to School Boards only, measures designed to increase community involvement.

In discussing staffing component, applications should provide a biographical sketch of the professional staff which includes background and other qualifying experience for the project. The proposed staff employed should reflect the ethnicity of the population to be served.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of Proposed Activity. Right to Read Financial Status and Performance Report.

2. Agency/Bureau/office. U.S. Office of Education Right-to-Read Program.

3. Agency Form Number. OE 361.

4. Legislative Authority for This Activity. "Sec. 422. (a)(3) The Commissioner shall * * * collect data and information on applicable programs for the purpose of obtaining objective measurements of the effectiveness of such programs in achieving their purposes * * *". (Pub. L. 92-318, as amended, 20 U.S.C. 1231a.)

"Sec. 434. (b)(3)(C) * * * shall provide for making such reports as the Commissioner may require to carry out this functions." (Pub. L. 93-380, as amended, 20 U.S.C. 1232c.)

"Sec. 3a(1) Each federal grantor agency shall require grantees to use the standard Financial Status Report to report the status of funds for all nonconstruction grant programs * * *". Attachment H, FMC 74.7.

"Sec. 3. Grantees shall submit a performance report for each grant * * *". Attachment I, FMC 74.7.

5. Voluntary/Obligatory Nature of Response. Required to obtain or maintain benefits.

6. How Information Collected Will Be Used. Program management—analysis of fund usage, and comparison of actual program performance with planned performance.

7. Data Acquisition Plan. (a) Method of Collection: Mail; (b) Time of Collection. At end of first half of grant period, and at end of grant period; (c) Frequency. Semi-annually.

8. Respondents. (a) Type: SEA's; (b) Number: 54; (c) Estimated Average Man-Hours per Respondent: 8 hours.

(a) Type: LEA's; (b) Number: 161; (c) Estimated Average Man-Hours per Respondent: 8 hours.

(a) Type: Educational Institutions and Non-Profit Organizations; (b) Number: 75; (c) Estimated Average Man-Hours per Respondent: 8 hours.

9. Information to be Collected. All grantees submit standard financial data on OMB No. 80-R0180 Financial Status Report, and a comparison of accomplishments to objectives that were laid out in the application, and an explanation for slippages.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of Proposed Activity. Financial Status and Performance Reports for Public Service Education Program, Fellowships and Institutional Grants.

2. Agency/Bureau/Office. U.S. Office of Education/Bureau of Higher and Continuing Education/Division of Training and Facilities.

3. Agency Form Number. OE 404-1 and OE 404-2.

4. Legislative Authority for this Activity. "Sec. 942. The Commissioner shall allocate fellowships under this part among institutions of higher education with programs approved under the provision of this part for the use of individuals accepted into such program, in such manner and according to such plan as will insofar as practicable:

1. Provide an equitable distribution of such fellowships throughout the United States; and

2. Attract recent college graduates to pursue a career in public service;

3. Attract persons other than recent college graduates to pursue a career in public service; and

4. Provide additional training for individuals who by past activities, occupation, or training have demonstrated a commitment to a career in public service."

(Pub.L. 92-318, 20 U.S.C. 1134J, as amended by Pub.L. 94-482.)

"Sec. 901. (a) It is the purpose of this part to make financial assistance available to institutions of higher education:

2. to establish, strengthen, and improve programs designed to prepare graduates and professional students for public service; * * *".

(Pub.L. 92-318, 20 U.S.C. 1134.)

"a. Each Federal sponsoring agency shall require recipients to use the standardized Financial Status Report to report the status of funds for all nonconstruction projects or programs." (Attachment G—OMB Circular A-110.)

"4. * * * recipients shall submit the performance or technical reports to Federal sponsoring agencies and the Financial Status Reports covering the same period * * *". (Attachment H—OMB Circular A-110.)

5. Voluntary/Obligatory Nature of Response. Required to obtain benefits.

6. How Information Collected Will Be Used. Financial information collected will be used to determine accountability of expenditure of funds. Performance report will be used to assess whether goals and objectives are achieved.

7. Data Acquisition Plan. (a) Method of Collection: Mail; (b) Time of Collection: November; (c) Frequency: Once a year.

8. Respondent. (a) Type: Institutions of higher education; (b) Number: 100; (c) Estimated Average Man-Hours per Respondent: 5 man-hours.

9. Information To Be Collected. Financial information items are those on the OMB standard Financial Status Report form (OMB Circular No. A-110, Standard Form 269). For Fellowships, the Performance Report collects information on the number of fellowships awarded, duration of awards, and employment status. For Institutional Grants, the performance Report requires a narrative describing the actual accomplishment of the goals and objectives of the funded activities.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity. Financial Status and Performance Reports for Emergency Adult Education Program for Indochina Refugees—Discretionary.

2. Agency/bureau/office. U.S. Office of Education/Bureau of Occupational and Adult Education/Division of Adult Education.

3. Agency Form Number: OE 575-1 and OE 575-2.

4. Legislative Authority for This Activity. "Section 315. (a) From the appropriations authorized for the period beginning July 1, 1976, and ending September 30, 1977, but not appropriated for other programs under this title, the Commissioner shall carry out a program of making grants to State and local education agencies for such years for the purpose of operating special adult education programs for Indochina refugees * * *"

(Pub. L. 94-405.)

"(a) Recipients shall use the standard Financial Status report * * * to report the status of funds for all non-construction projects."

(45 C.F.R. 100a.403, General Provisions for Programs.)

"(b) * * * grantees shall submit a performance report with each Financial Satus Report * * *"

(45 C.F.R. 100a.432, General Provisions for Programs.)

5. Voluntary obligatory nature of response. Required to maintain benefits.

6. How Information Collected Will Be Used. Information collected will be used to determine accountability of the expenditure of funds and to assess the effectiveness of projects.

7. Data Acquisition Plan. (a) Method of Collection: Mail; (b) Time of Collection: Fall; (c) Frequency: Single time.

8. Respondents. (a) Type: Local Education Agencies; (b) Number: 75; (c) Estimated Average Man-Hours per Respondent: 16.

(a) Type: State Education Agencies; (b) Number: 75; (c) Estimated Average Man-Hours per Respondent: 16.

9. Informaiton To Be Collected. Financial information items are those of the standard A-102 (FMC 74-7) Financial Status Report form. Performance Report requires a narrative which compares actual accomplishment to established goals, provides reasons for slippage, and describes cooperative efforts and benefits to participants.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of Proposed Activity. Call Report—Lenders Report on Guaranteed Student Loans Outstanding.

2. Agency/Bureau/Office. U.S. Office of Education/Bureau of Student Financial Assistance/Office of Guaranteed Student Loans.

3. Agency Form Number. OE 1166-3.

4. Legislative Authority for This Activity. "Sec. 428. (a)(3) Each holder of a loan with respect to which payments of interest or of administrative cost allowances are required to be made by the Commissioner shall submit to the Commissioner at such time or times and in such manner as he may prescribe, statements containing such information as may be required by or pursuant to regulation for the purpose of enabling the Commissioner to determine the amount of the payment which he must make with respect to that loan."

(Pub. L. 89-329, as amended, 20 U.S.C. 1078.)

"Lenders of federally insured loans and direct loans and direct state loan agencies shall submit such reports and information as the Commissioner may reasonably require * * *"

(45 CFR 177.8(f).)

5. Voluntary/Obligatory Nature of Response. Required to obtain or maintain benefits.

6. How Information To Be Collected Will Be Used. (a) Monitor and evaluate the performance of lenders in the collection of inrepayment accounts and to forestall the submission of defaulted claims; (b) Justify budget projections on loan volume and collections at the lender level; (c) Long range projections on the cost to the government for future payments for interest benefits and special allowances.

7. Data Acquisition Plan. (a) Method of Collection: Mail; (b) Time of Collection: Fall; (c) Frequency: Annually.

8. Respondents. (a) Type: Colleges and Universities; (b) Number: 125 (Universe); (c) Estimated Average Man-Hours per Respondent: ½.

(a) Type: Vocational/Technical Postsecondary Institutions; (b) Number: 55 (Universe); (c) Estimated Average Man-Hours per Respondent: ½.

(a) Type: Financial Institutions; (b) Number: 20 (Universe); (c) Estimated Average Man-Hours per Respondent: ½.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Disaster Assistance Administration

ALABAMA

[Docket No. NFD-517; FDAA-3045-EM]

Emergency Declaration and Related Determinations

AGENCY: Federal Disaster Assistance Administration, HUD.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of an emergency for the State of Alabama (FDAA-3045-EM), dated July 20, 1977, and related determinations.

DATED: July 20, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank J. Muckenhaupt, Chief, Program Support Staff, Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410 (202-634-7825).

NOTICE: Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that on July 20, 1977, the President declared an emergency as follows:

I have determined that the impact of a drought on the State of Alabama is of sufficient severity and magnitude to warrant a declaration of an emergency under Pub. L. 93-288. I therefore declare that such an emergency exists in the State of Alabama.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285, I hereby appoint Mr. Thomas P. Credle, FDAA Region IV, to act as the Federal Coordinating Officer for this declared emergency.

I do hereby determine the following areas to have been adversely affected by this declared emergency:

The counties of:

Barbour	Clay
Bibb	Coffee
Blount	Coosa
Butler	Elmore
Chambers	Escambia
Chilton	Fayette

Greene	Perry
Henry	Pickens
Lamar	Randolph
Lee	Russell
Lowndes	Shelby
Monroe	Tallapoosa
Montgomery	Tuscaloosa

The purpose of this designation is to provide emergency livestock feed assistance only in the aforementioned areas effective the date of this notice.

(Catalog of Federal Domestic Assistance No. 14.701, Disaster Assistance.)

WILLIAM E. CROCKETT,
Acting Director, Federal Disaster Assistance Administration.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Wyoming 60216]

WYOMING

Application

JULY 29, 1977.

Notice is hereby given that pursuant to Section 28 of the Minerals Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Company of Colorado Springs, Colorado filed an application for a right-of-way to construct a 4-inch O.D. pipeline and for a right-of-way for their existing 6-inch O.D. pipeline and existing 4-inch O.D. pipeline originally constructed under valid lease rights for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, W[illegible]

T. 20 N., R. 95 W.,
Sec. 12, E½E½, SW¼NE¼, S½NW¼, SW¼SE¼.

The proposed pipeline will connect an existing well in section 11, T. 20 N., R. 95 W., into existing natural gas pipeline facilities in the E½ of sec. 12, T. 20 N., R. 95 W., all in Sweetwater County, Wyoming. The proposed 4-inch O.D. line would extend from said existing well in sec. 11 to the point of connection with existing facilities in section 12.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, P.O. Box 670, 1300 Third St., Rawlins, Wyoming 82301.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Operations.

Geological Survey

[NTL-5]

VALUE OF NATURAL GAS FOR ROYALTY PURPOSES

On May 4, 1977, the Geological Survey published in the FEDERAL REGISTER (Vol. 42, No. 86, pp. 22610-22611) its final notice to Lessees and Operators, NTL-5. This Notice sets forth the procedures to be utilized for royalty computation purposes in determining the value of natural gas produced from Federal and Indian oil and gas leases under the jurisdiction of the Geological Survey.

Pursuant to a request by the Acting Deputy Commissioner of Indian Affairs, the application of NTL-5 to oil and gas leases on the Jicarilla Apache Indian Reservation in New Mexico is hereby suspended for an indefinite period, effective as a 7 a.m., June 1, 1977.

National Park Service

ISLE AU HAUT, ACADIA NATIONAL PARK, MAINE

Public Meetings and Availability of Assessment of Management Alternatives

Notice is hereby given that the National Park Service has prepared an assessment of management alternatives for the Isle au Haut unit of Acadia National Park. Public meetings will be held as indicated below to enable the public to comment on these management alternatives.

The assessment of management alternatives is available from or may be inspected at the North Atlantic Regional Office, 15 State Street, Boston, Massachusetts 02109 or the Superintendent's office, Acadia National Park, Bar Harbor, Maine 04609.

The assessment discusses five alternative ways of managing the Isle au Haut unit so as to conserve its natural qualities as a remote island. In addition to describing the alternatives, the assessment analyzes the impacts of each alternative and identifies various measures that could be employed to mitigate these impacts, as well as any adverse effects that could not be avoided should the alternative be implemented.

Three public meetings will be held to receive comments. The first will be held at 7 p.m., August 29, 1977, at the Town Hall, Isle au Haut, Maine; the second at 7 p.m., August 30, 1977, at the Council Chambers, Town Hall, Ellsworth, Maine, and the third at 7 p.m., August 31, 1977 at the Town Hall, Stonington, Maine. These meetings are being conducted to provide the widest possible involvement from individuals, organizations, and public officials.

Written statements regarding the assessment of management alternatives are also invited and may be submitted at the public meetings or may be addressed to the Superintendent, Acadia National

Park, Bar Harbor, Maine 04609. The official record for these written comments will close on September 30, 1977.

Dated: July 21, 1977.

JACK E. STARK,
Regional Director,
North Atlantic Region.

INTERNATIONAL TRADE COMMISSION

[Investigation No. TA-201-24]

CAST-IRON STOVES

Report to the President

JULY 25, 1977.

TO THE PRESIDENT: In accordance with section 201(d)(1) of the Trade Act of 1974 (19 U.S.C. 2251(d)(1)), the U.S. International Trade Commission herein reports the results of an investigation relating to cast-iron stoves, stove parts, and fireplace grates.

The investigation (investigation No. TA-201-24) was undertaken to determine whether stoves, stove parts, and fireplace grates, wholly or almost wholly of cast iron, provided for in item 653.50 of the Tariff Schedules of the United States (TSUS), are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

The Commission instituted the investigation, under the authority of section 201(b)(1) of the Trade Act, on March 23, 1977, following receipt of March 9, 1977, of a petition for import relief filed by the Atlanta Stove Works, Inc., Washington Stove Works, United States Stove Co., Portland Stove Foundry, Inc., and Martin Industries, Inc.

The Commission held a public hearing on this matter in Washington, D.C., on May 19 and 20, 1977.

Notice of the investigation and hearing was published in the FEDERAL REGISTER of March 30, 1977 (42 FR 16874).

The information for this report was obtained from fieldwork and interviews by members of the Commission's staff, from other Federal agencies, from responses to the Commission's questionnaires, from information presented at the public hearing, from briefs submitted by interested parties, and from the Commission's files.

A transcript of the hearing and copies of briefs submitted by interested parties in connection with the investigation are attached.[1]

DETERMINATIONS, FINDINGS, AND RECOMMENDATIONS OF THE COMMISSION

The Commission, being equally divided,[2] makes no determination as to whether stoves, stove parts, and fireplace grates, wholly or almost wholly of cast iron, provided for in item 653.50 of the Tariff Schedules of the United States (TSUS), are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

DETERMINATIONS

On the basis of the Commission investigation, Chairman Minchew determines—

That stoves, stove parts, and fireplace grates, wholly or almost wholly of cast iron, provided for in item 653.50 of the TSUS, are—as a result of their designation as eligible for duty-free treatment under the Generalized System of Preferences (GSP)—being imported into the United States in such increased quantities as to be a substantial cause of the threat of serious injury to the domestic industry producing articles like or directly competitive with the imported articles.

Commissioner Moore determines—

That stoves, stove parts, and fireplace grates, wholly or almost wholly of cast iron, provided for in item 653.50 of the TSUS, are—as a result of their designation as eligible for duty-free treatment under the GSP—being imported into the United States in such increased quantities as to be a substantial cause of serious injury to the domestic industry producing articles like or directly competitive with the imported articles.

Commissioners Bedell and Ablondi determine—

That stoves, stove parts, and fireplace grates, wholly or almost wholly of cast iron, provided for in item 653.50 of the TSUS, are not being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

FINDINGS AND RECOMMENDATIONS

Chairman Minchew and Commissioner Moore find—

That to prevent[3] or remedy[4] such serious injury, it is necessary to suspend the designation of stoves, stove parts, and fireplace grates, wholly or almost wholly of cast iron, provided for in item 653.50 of the TSUS, as eligible for duty-free treatment under the GSP.

VIEWS OF CHAIRMAN DANIEL MINCHEW AND COMMISSIONER GEORGE M. MOORE

On March 9, 1977, the U.S. International Trade Commission received a petition requesting an investigation under section 201(b)(1) of the Trade Act of 1974 with respect to imports of cast-iron stoves and cast-iron parts of stoves (including fireplace grates). On March 23, 1977, the Commission instituted an investigation to determine whether stoves, stove parts, and fireplace grates, wholly or almost wholly of cast iron, provided for in item 653.50 of the Tariff Schedules of the United States, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

Section 201(b)(1) of the Trade Act requires that each of the following criteria be met if the Commission is to make an affirmative determination in this investigation and thus find a domestic industry eligible for import relief:

(1) Imports of the articles concerned are entering the United States in increased quantities;

(2) The domestic industry producing articles like or directly competitive with the imported articles concerned is being seriously injured or threatened with serious injury; and

(3) Increased imports are a substantial cause of the serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles concerned

DETERMINATION

On the basis of the evidence obtained during this investigation, we have determined that stoves, stove parts, and fireplace grates, wholly or almost wholly of cast iron, provided for in item 653.50 of the TSUS, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

The serious injury, or the threat thereof, to the domestic industry which we have found to exist results from the designation of cast-iron stoves, cast-iron stove parts, and cast-iron fireplace grates as eligible articles for the purposes of duty-free entry under title V, Generalized System of Preferences (GSP), of the Trade Act, effective January 1, 1976.

THE DOMESTIC INDUSTRY

In this investigation we have concluded that the relevant domestic industry consists of the U.S. facilities used in the production of cast-iron stoves, cast-iron parts of stoves, and cast-iron fireplace grates. Such facilities consist primarily of foundries which produce cast-iron stove parts, including fireplace grates. There are 14 significant producers of the articles which are the subject of this investigation; of these firms, 8 produce cast-iron stoves, 10 produce cast-iron stove parts, and 10 produce cast-iron fireplace grates.

INCREASED IMPORTS

Imports of cast-iron stoves increased from 18,541 units in 1972 to 202,772 units in 1976, or tenfold; as a percentage of U.S. production, imports grew each year from 17 percent in 1972 to 157 percent in 1976. Imports of cast-iron fireplace grates increased irregularly from 206,323 units in 1972 to 279,359 units in 1976 and the ratio of imports to U.S. production rose from 127 percent in 1972 to 159 percent in 1976. In 1976, U.S. imports of cast-iron stoves and cast-iron fireplace grates entered duty free under the GSP accounted for 78 percent and 92 percent, respectively, of total U.S. imports of these articles. Thus, the statutory requirement of increased imports is clearly satisfied.

SERIOUS INJURY OR THE THREAT OF SERIOUS INJURY

As Chairman Minchew has based his affirmative finding on the threat of serious injury and Commissioner Moore has found in the affirmative based on present serious injury, the injury portion of their opinions will be discussed separately.

SERIOUS INJURY

The second criterion which must be satisfied if an industry is to be eligible for relief is that such industry be seriously injured, or threatened with serious injury. This criterion is written in the alternative, and as I find the relevant domestic industry to be seriously injured this discussion is devoted to that finding alone.

Although the Trade Act provides no precise definition of the term "serious injury," section 201(b)(2)(A) of the Trade Act provides that the Commission should take into account all relevant factors, including (but not limited to)—

the significant idling of the productive facilities in the industry, the inability of a significant number of firms to operate at a reasonable level of profit, and significant unemployment or underemployment within the industry.

Significant idling of productive facilities.—U.S. producers' utilization of their capacity for production of cast-iron

---

[1] Attached to the original report sent to the President. These materials are available for inspection at the U.S. International Trade Commission, except for material submitted in confidence.

[2] Commissioners Minchew and Moore voted in the affirmative, Commissioners Bedell and Ablondi voted in the negative, and Commissioner Parker did not participate. Sec. 330(d) of the Tariff Act of 1930, as amended (19 U.S.C. 1330(d)), provides that, where the Commissioners voting are equally divided on a determination, the Commission shall report to the President the determination of each group of Commissioners, and further, that the determination agreed upon by either group of Commissioners may be considered by the President as the determination of the Commission.

[3] Because Chairman Minchew has determined that the domestic industry is threatened with serious injury, his finding concerns the relief necessary to prevent such injury.

[4] Because Commissioner Moore has determined that the domestic industry is seriously injured, his finding concerns the relief necessary to remedy such injury.

[5] Statement of Commissioner Moore

stoves declined by almost 50 percent between 1975 and 1976 (the first year in which these articles were entitled to duty-free entry under the Generalized System of Preferences) and then declined by an additional 38 percent during the first quarter of 1977, compared with the corresponding period of 1976. U.S. producers reported that less than 25 percent of their capacity to manufacture cast-iron stoves was utilized for such purposes in January-March 1977. U.S. producers' utilization of their capacity for production of cast-iron fireplace grates declined annually during 1973–76. An overall decline of 43 percent occurred during this period. In January-March 1977, U.S. producers operated their facilities for producing cast-iron fireplace grates at only 28 percent of capacity.

The declines in capacity utilization discussed above are in part attributable to the growth in U.S. producers' capacity to produce cast-iron stoves and cast-iron fireplace grates during 1972–76; however, the principal reason for the decline was the sharp drop in U.S. production. U.S. production of stoves declined from 248,096 units in 1975 to 128,983 units in 1976, or by 48 percent. Production in 1976 was smaller than it had been in any other year since 1972—prior to the oil embargo, which led to increased fuel prices and awareness of the need to conserve energy. U.S. production of cast-iron fireplace grates declined from a high of 242,465 units in 1974 to 175,204 units in 1976. Thus it is evident that the marked decline in U.S. production of cast-iron stoves and fireplace grates has resulted in a significant idling of U.S. facilities used in the production of these articles.

The inability of a significant number of firms to operate at a reasonable level of profit.—The aggregate profit before taxes of eight U.S. producers of cast-iron stoves and stove parts on their overall company operations fell from $9.3 million in 1975 to less than $2.4 million in 1976, or by 75 percent. The ratio of net profit before taxes to net sales fell from 10.7 percent in 1975 to 3 percent in 1976, the lowest ratio reported for any year during 1972–76. Three of the eight firms reporting financial data to the Commission operated at a loss in 1976, and two other firms reported profit ratios of less than 2 percent. This performance is evidence of the inability of a significant number of firms in the industry to operate at a reasonable level of profit.

Significant unemployment or underemployment within the industry.—In 1976, average annual employment of production and related workers involved in the production of cast-iron stoves and cast-iron parts of stoves (including fireplace grates) was at the lowest level reported throughout 1972–76. In that year there were 754 employees, 19 percent fewer than the 927 employed in 1972 and 44 percent fewer than the 1,358 employed in 1975. In January–March 1977, employment declined to 691.

The number of man-hours worked by production and related workers in the manufacture of cast-iron stoves and cast-iron parts of stoves (including fireplace grates) during 1972–76 and January–March 1977 followed the same trend as that reported for the average number of production and related workers. The decline in the number of persons employed and the number of man-hours worked per employee has resulted in significant unemployment and underemployment within the industry.

It is evident from the foregoing that the sharp decline in U.S. producers' operations that occurred in 1976 and has continued in 1977 is closely tied to the implementation of the Generalized System of Preferences effective January 1, 1976. With the advent of duty-free imports from countries entitled to GSP benefits, U.S. producers' production, shipments, profits, and employment have all experienced marked declines.

Threat of Serious Injury[*]

I am in general agreement with the remarks of Commissioner Moore, and, therefore, endorse them, even though I am unable to find present serious injury.

In addition to considering the factors already discussed by Commissioner Moore in his analysis of serious injury, it is necessary to also consider other factors when considering the threat of serious injury.

Although the Trade Act provides no precise definition of what constitutes the "threat of serious injury," some factors to be considered are listed in section 201(b)(2)(B), which provides:

> with respect to threat of serious injury, a decline in sales, a higher and growing inventory, and a downward trend in production, profits, wages, or employment (or increasing underemployment) in the domestic industry concerned.

(1) *Level of sales.* From 1972 to 1976, U.S. producers' shipments of cast-iron stoves, by unit, increased steadily from 107,684, in 1972, to 225,615, in 1975. In 1976, however, there was a large decline to 120,553 units. The same trend is observed with fireplace grates, with the peak year occurring in 1974, and a steady decline since that time. The same trend lines are evident in the value of shipments of both cast-iron stoves and fireplace grates.

(2) *Higher or growing inventories.* U.S. producers of cast-iron stoves and fireplace grates have traditionally carried relatively small inventories both because of storage costs and because of their ability to respond quickly to changes in demand. Inventories of stoves ran at 6 percent of domestic shipments in 1972, 2 percent in 1973, and 3 percent in 1974. However, by the end of 1975, inventories had increased to 14 percent of shipments, and, by December of 1976, had reached 20 percent. While there are indications that this high level of inventories is now being slightly reduced, it appears that levels will remain relatively high.

[*] Statement of Chairman Minchew.

As stated earlier, I concur with Commissioner Moore's analysis of serious injury. Therefore, for an explanation of the "downward trend in production, profits, wages, or employment (or increasing underemployment)" please see the remarks of Commissioner Moore.

From looking at the information obtained I have concluded that the domestic industry is being threatened with serious injury.

Substantial Cause

The third criterion which must be met before an industry is eligible for import relief is that the increased imports found to exist must be a "substantial cause" of the serious injury, or threat thereof, being suffered by the industry. The Trade Act contains both a definition of the term "substantial cause" and certain guidelines to be considered by the Commission in determining whether increased imports are a substantial cause of the requisite serious injury. Section 201(b)(4) of the Trade Act defines the term "substantial cause" to mean "a cause which is important and lot less than any other cause." The guidelines to be considered by the Commission with regard to substantial cause are contained in section 201(b)(2)(C), which states that in making its determination the Commission shall take into account all economic factors which it considers relevant, including (but not limited to)—

> an increase in imports (either actual or relative to domestic production) and a decline in the proportion of the domestic market supplied by domestic producers.

As previously noted, annual U.S. imports of cast-iron stoves increased tenfold between 1972 and 1976, and U.S. imports of fireplace grates increased by 35 percent during the same period. The share of the U.S. market for cast-iron stoves supplied by imports increased each year during 1972–76, rising from 10.5 percent to 64.7 percent. The share of apparent U.S. consumption of cast-iron fireplace grates supplied by imports increased from about one-half of the total in 1972 to about two-thirds of the total in 1976.

While it was argued that factors other than imports were a more important cause of injury, an analysis of such factors does not support such a conclusion. It is clear that the economic recession in the United States during 1974 and 1975 was not the cause of injury sustained by the domestic industry in 1976 and January-March 1977. To the contrary, U.S. producers' shipments of cast-iron stoves were at record high levels during the height of the recession. Furthermore, contrary to allegations made at the Commission's public hearing, cast-iron stoves have not lost market share to other types of wood- or coal-burning heating stoves (such as those constructed of sheet metal). Total U.S. shipments of cost-iron stoves (both imported and U.S.-produced) grew from 50 percent of total U.S. shipments of all wood- or coal-burning heating stoves in 1972 to 60 percent of such shipments in 1975.[*] Further, there

[*] See p. A–42 of his report.

is no evidence that other economic factors were a more important cause of serious injury to the domestic industry than increased imports.

Conclusion

In view of the above, we have determined that the domestic industry producing cast-iron stoves and cast-iron stove parts (including fireplace grates) is being seriously injured or is being threatened with serious injury within the meaning of section 201 of the Trade Act of 1974, and, therefore, we have made an affirmative determination.

Finding and Recommendation With Respect to Import Relief

Section 201(d)(1) of the Trade Act provides, in part, that if the Commission finds with respect to any article, as a result of its investigation, the serious injury or threat thereof described in section 201(b)(1), it shall—

> (A) Find the amount of the increase in, or imposition of, any duty or import restriction on such article which is necessary to prevent or remedy such injury, or
>
> (B) If it determines that adjustment assistance under chapters 2, 3, and 4 can effectively remedy such injury, recommend the provision of such assistance. * * *

In view of our affirmative determination in this investigation and our finding that the serious injury or the threat of serious injury to the domestic industry was caused by the designation of cast-iron stoves, cast-iron stove parts, and cast-iron fireplace rates as eligible articles for the purposes of duty-free entry under title V of the Trade Act, we find that—

> to prevent or remedy such serious injury, it is necessary to suspend the designation of stoves, stove parts, and fireplace grates, wholly or almost wholly of cast-iron, provided for in item 653.50 of the Tariff Schedules of the United States as eligible for duty-free treatment under the Generalized System of Preferences.

Views of Commissioners Catherine Bedell and Italo H. Ablondi

On March 9, 1977, the United States International Trade Commission received a petition requesting an investigation under section 201(b)(1) of the Trade Act of 1974 with respect to imports of cast-iron stoves and cast-iron parts of stoves (including fireplace grates). On March 23, 1977, the Commission instituted an investigation to determine whether stoves, stove parts, and fireplace grates, wholly or almost wholly of cast iron, provided for in item 653.50 of the Tariff Schedules of the United States, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

Section 201(b)(1) of the Trade Act requires that each of the following criteria be met if the Commission is to make an affirmative determination in this investigation and thus find a domestic industry eligible for import relief:

> (1) Imports of an article into the United States are increasing (either actually or relative to domestic production);
>
> (2) The domestic industry producing an article like or directly competitive with the imported article is being seriously injured or threatened with serious injury; and
>
> (3) Increased imports are a substantial cause (i.e., an important cause and not less than any other cause) of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

Determination

On the basis of the evidence obtained during this investigation, we have determined that stoves, stove parts, and fireplace grates, wholly or almost wholly of cast iron, provided for in item 653.50 of the TSUS, are not being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles. Specifically, we find in this case that the second criterion has not been satisfied, i.e., that the domestic industry producing articles like or directly competitive with the imported article is not being seriously injured nor is it threatened with serious injury.

The Domestic Industry

In this investigation we have concluded that the relevant domestic industry consists of the U.S. facilities used in the production of cast-iron stoves, cast-iron parts of stoves, and cast-iron fireplace grates. Such facilities consist primarily of foundries which produce cast-iron stove parts, including fireplace grates. There are 14 significant producers of the articles which are the subject of this investigation; of these firms, 8 produce cast-iron stoves, 10 produce cast-iron stove parts, and 10 produce cast-iron fireplace grates.

Serious Injury or the Threat Thereof

When making its determination of serious injury or threat thereof, the Commission is directed by the Trade Act to take into account all economic factors which is considers relevant, including the significant idling of productive facilities in the industry, the inability of a significant number of firms to operate at a reasonable level of profit, and significant unemployment or underemployment within the industry. We believe that "serious injury" is an injury which if not remedied would have permanent or lasting consequences. Such injury can be found only after examining the performance of an industry over a period of time of sufficient length to establish trends and thereby put temporary conditions into prespective. The evidence developed during this investigation shows that the U.S. cast-iron stove industry grew rapidly and prospered during the years 1972–75 before experiencing a decline in the level of operations in 1976. In our opinion, the 1976 downturn is not of sufficient magnitude and duration to support a finding of serious injury.[*] Furthermore, we believe the current outlook for the industry does not warrant a finding that the industry is being threatened with serious injury.

As indicated in the report, it is difficult to provide a precise statistical analysis of the domestic industry's capacity utilization. However, an analysis of the figures, whether or not they are exact, does reveal that U.S. producers increased their capacity to produce cast-iron stoves each year from 1972 through 1975 with a concomitant increase in the use of such capacity. In 1976, there seems to have been a decline in the ratio of U.S. production to capacity, but the sharp reduction in U.S. producers' inventories of cast-iron stoves and fireplace grates that occurred in the first quarter of 1977 should result in a significant improvement in capacity utilization during the full year 1977.

Profit on overall company operations of U.S. producers of cast-iron stoves, cast-iron parts of stoves, and cast-iron fireplace grates increased from $1.7 million in 1972 (seven firms reporting) to $9.3 million in 1975 (eight firms reporting), or by more than 440 percent. All eight firms reporting financial data to the Commission were profitable in 1974 and 1975. Although there was a decline in the profit position of the industry in 1976, the trend in overall financial performance has been positive, and it is anticipated that this trend will continue as production increases to fill depleted stocks.

The average number of production and related workers engaged in the production of cast-iron stoves, cast-iron parts of stoves, and cast-iron fireplace grates increased annually during 1972–75, rising from 927 to 1,358. Man-hours worked by these employees followed a similar trend, increasing from 1.8 million in 1972 to 2.8 million in 1975. Employment levels in 1976 reflected the downturn of capacity utilization in that year.

With respect to the threat of serious injury, the 5-year trends in sales (shipments), production, and profit are all positive, as shown in the attached figure. Furthermore, as a result in part of the unusually cold weather experienced in most of the United States during the 1976–77 winter, U.S. producers' inventories of cast-iron stoves as of March 31, 1977, has been reduced to a very favorable level of 18,950 units, compared with 45,816 units on the same date in 1976

[*] Commissioner Bedell finds, however, that the domestic industry producing cast-iron stoves, cast-iron parts of stoves, and cast-iron fireplace grates is being adversely affected by imports and such articles entered duty free under the Generalized System of Preferences (GSP). During 1976, 78 percent of all U.S. imports of cast-iron stoves and 92 percent of all U.S. imports of cast-iron fireplace grates, in terms of quantity, entered duty free under the GSP. Commissioner Bedell notes that although these imports injure the domestic industry, they do not affect it to the extent that "serious injury, or the threat thereof," can be found within the meaning of sec. 201 of the Trade Act.

U.S. producers' inventories of cast-iron fireplace grates were also reduced substantially, decreasing from 55,207 units on March 31, 1976, to 21,879 units on March 31, 1977.

It is anticipated that the following factors will have a favorable impact on demand for fuel-efficient cast-iron stoves and cast-iron fireplace grates: The renewed emphasis on conserving energy, the continuing threat of future shortages of natural gas and fuel oil, and the rapidly increasing costs of natural gas and fuel oil. U.S. producers' low inventories, their expanding production capacity, and their recent capital-intensive foundry modifications required by safety and antipollution laws provide a solid basis for U.S. producers to capitalize on any increase in U.S. demand for cast-iron stoves and fireplace grates.

CONCLUSION

On the basis of the above considerations, we have determined that the domestic industry producing cast-iron stoves and cast-iron stove parts (including fireplace grates) is not being seriously injured or threatened with serious injury by increased imports of the articles under investigation.

By order of the Commission.

Issued: August 4, 1977.

KENNETH R. MASON,
Secretary.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 76-34]

JAMES R. FANT, M.D.

Revocation of Registration

On August 16, 1976, the Administrator of the Drug Enforcement Administration (DEA) directed to James R. Fant, M.D., the Respondent herein, an Order to Show Cause as to why Respondent's DEA Certificate of Registration (AF3921156) should not be revoked for the reason that on June 4, 1976, in the United States District Court for the Eastern District of Wisconsin, Respondent had been convicted of one count of unlawfully prescribing controlled substances, a felony violation of 21 U.S.C. 841(a)(1). Through counsel, Respondent requested a hearing on the Order to Show Cause. After preliminary procedures, including a Prehearing Conference conducted by telephone in which the Administrative Law Judge and counsel for the Government and the Respondent participated, a hearing was conducted by the Honorable Francis L. Young, Administrative Law Judge, in Washington, D.C., on March 1, 1977. Subsequent to the hearing a copy of the Wisconsin Medical Examining Board's Findings of Fact, Conclusions of Law and Decision was received by the Administrative Law Judge and placed in the record as a Government exhibit.

On June 1, 1977, Judge Young certified to the Administrator, pursuant to 21 CFR § 1316.65, the record of the proceedings in this matter, together with his recommended findings of fact and conclusions of law, and a recommended decision. Pursuant to 21 CFR § 1316.66, the Administrator hereby publishes his Final Order in this proceeding based upon the findings of fact and conclusions of law set forth below.

The Administrative Law Judge found, inter alia, that as a result of complaints received from retail pharmacies concerning possible overprescribing practices of Respondent, the Drug Enforcement Administration initiated an investigation. The investigation included a review of the Schedule II controlled substance prescription files maintained by various pharmacies within the Milwaukee, Wisconsin area for prescriptions written by Respondent. Judge Young found that Respondent was overprescribing for four named individuals, that is, giving them prescriptions enabling them to obtain drugs in much larger quantities than those reasonably required for legitimate medical purposes. Respondent acknowledged said overprescribing at the hearing. Judge Young further found that on October 7, 1975, Respondent was indicted on 22 counts by the United States District Court for the Eastern District of Wisconsin (*United States v. James R. Fant*, Docket No. 75-CR-152), for knowingly and intentionally dispensing a controlled substance pursuant to prescriptions written without a legitimate medical purpose in violation of Title 21, Section 841(a)(1), United States Code and Title 21, Code of Federal Regulations, Section 1306.04(a). On June 4, 1976, in the United States District Court for the Eastern District of Wisconsin, on a plea of nolo contendere, Respondent was convicted on one count in violation of 21 U.S.C. § 841(a)(1) and 21 CFR § 1306.04(a), as charged in Count XVII of the indictment.

Judge Young further found that on May 5, 1977, the State of Wisconsin Department of Regulation and Licensing Medical Examining Board ordered that the "license of Respondent to practice medicine in the State of Wisconsin be and it is hereby revoked." In his discussion Judge Young stated that the conviction on Respondent's plea of nolo contendere to a felony relating to controlled substances provides lawful grounds for the Administrator in his discretion to revoke Respondent's registration even if Respondent's license to practice medicine in Wisconsin had not been revoked.

Judge Young concluded that Respondent's DEA registration must be revoked by virtue of the provisions of Section 823(f) of Title 21, United States Code since Respondent's license to practice medicine in Wisconsin, the State in which he practiced, has been revoked. Additionally, Respondent's DEA registration should be revoked because of his overprescribing of drugs for four named individuals in the light of his conviction on June 4, 1976, in the United States Court for the Eastern District of Wisconsin of a felony relating to a controlled substance.

Having reviewed the record of these proceedings in its entirety, the Administrator adopts the Administrative Law Judge's findings of fact; concurs that the subject registration must be revoked since Respondent's license to practice medicine in Wisconsin has been revoked; concurs that the subject registration may lawfully be revoked on the grounds of the felony conviction relating to controlled substances; and agrees that, based on Respondent's overprescribing of drugs for four named individuals, the subject registration should be revoked.

Having found that Respondent has had his Wisconsin license to practice medicine revoked; having found that Respondent has been convicted of a felony offense relating to controlled substances; and having found that under all of the circumstances of this case, that said registration should be revoked on both grounds cited, it is the Administrator's decision that the full revocation of Respondent's controlled substances registration is required. Therefore, under the authority vested in the Attorney General and redelegated to the Administrator of DEA, the Administrator hereby orders that the Certificate of Registration of James R. Fant, M.D. (DEA AF3921156) be revoked, effective immediately.

Dated: August 1, 1977.

PETER B. BENSINGER,
Administrator.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

APPROVED STATE PLANS FOR ENFORCEMENT OF STATE STANDARDS

Approval of Oregon Plan Supplement

AGENCY: Occupational Safety and Health Administration.

ACTION: Change in level of Federal enforcement.

SUMMARY: This document approves a State initiated change supplement which reflects the State's election to return jurisdiction for on-shore longshoring regulation under the Occupational Safety and Health Act of 1970 (hereinafter called the Act) (29 U.S.C. 667) to the Federal Government effective June 15, 1977.

EFFECTIVE DATE: June 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Veronica Allen, Project Officer, Office of State Programs, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Room N-3608, Washington, D.C. 20210, (202-523-8031).

SUPPLEMENTARY INFORMATION: By letter dated May 25, 1977, the State submitted a State-initiated plan change effective June 15, 1977, to OSHA's Seattle Regional Office to provide notice of repeal of its longshoring standards which are comparable to 29 CFR Part 1918 and withdraw the longshoring (1918) issue under the maritime standards from the State's developmental plan approved under section 18(b) of the Act. Coverage of public employees under the longshoring issue will be provided through Oregon's general industry rules. Therefore, Federal enforcement authority will be resumed with regard to on-shore longshoring activities in the State of Oregon.

DESCRIPTION OF THE SUPPLEMENT

Pursuant to Subpart E of 29 CFR Part 1953, the State submitted a State-initiated plan change to return jurisdiction for occupational safety and health coverage for on-shore longshoring activities to the Federal government, effective June 15, 1977.

LOCATION OF THE PLAN AND ITS SUPPLEMENT FOR INSPECTING AND COPYING

A copy of the State's plan and its supplement may be inspected and copied during normal business hours at the following locations: Office of State Programs, Occupational Safety and Health Administration, U.S. Department of Labor, Room N-3608, 200 Constitution Avenue NW., Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6048, Federal Office Building, Seattle, Washington, 98174; and the Workmen's Compensation Board, Labor and Industries Building, Salem, Oregon 97310.

PUBLIC PARTICIPATION

Under § 1953.2(c) of this chapter the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) may prescribe alternative procedures to expedite the review process or for any other good cause which may be consistent with applicable law. The Assistant Secretary finds that the Oregon supplement described above is consistent with the criteria contained in § 1902.2(c)(1) of this chapter which provides that a State plan may cover any occupational safety and health issue with respect to which a Federal standard has been promulgated under section 6 of the Act. An "issue" is considered to be an industrial, occupational or hazard grouping which is at least as comprehensive as a corresponding grouping contained in (1) one or more sections in Subpart B or R of Part 1910 of this chapter, or (2) one or more of the remaining subparts of Part 1910. Also, this change was adopted after a public hearing held in the State of Oregon. Accordingly, it is found that further public comment and notice is unnecessary.

DECISION

After careful consideration, the Oregon plan supplement described above is hereby approved under Subpart E of Part 1953 of this chapter. In view of the fact that the State took action and gave notice of its termination of jurisdiction over longshoring as of June 15, 1977, and in view of the fact that employee protection should not be prejudiced and any delay in notice of Federal assumption of jurisdiction this decision is effective as of the date of cessation of State jurisdiction over longshoring activities. This decision incorporates the requirements of the Act and implementing regulations applicable to State plans generally.

Signed at Washington, D.C., this 2nd day of August, 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

[V-77-7 and V-77-1]

BAKER TANK CO., ET AL.

Grant of Variance

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Grant of variance.

SUMMARY: This notice announces the grant of a variance to Baker Tank Company and Richmond Engineering Company, Inc., from the standards prescribed in 29 CFR 1926.451(a) (4), (5) and (10) concerning scaffolding.

DATES: The effective date of the variance is August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

James J. Concannon, Director, Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, 3rd and Constitution Avenue NW., Room N-3668, Washington, D.C. 20210, Telephone: 202-523-7121.

or the following Regional and Area Offices:

U.S. Department of Labor, Occupational Safety and Health Administration, Gateway Building, Suite 15220, 3535 Market Street, Philadelphia, Pa. 19104.

U.S. Department of Labor, Occupational Safety and Health Administration, Federal Building, P.O. Box 10186, Room 8018, 400 North 8th Street, Richmond, Virginia 23240.

U.S. Department of Labor, Occupational Safety and Health Administration, 555 Griffin Square Building, Room 602, Dallas, Texas 75202.

U.S. Department of Labor, Occupational Safety and Health Administration, 1425 W. Pioneer Drive, Irving, Texas 75061.

I. BACKGROUND

Baker Tank Company, P.O. Box 40, Arp, Texas 75750 and Richmond Engineering Company, Inc., Box 25189, 7th and Hospital Streets, Richmond, Virginia 23260 made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance from the safety and health standards prescribed in 29 CFR 1926.451(a)(4), (5) and (10). The standard sets general requirements for scaffolding.

The facilities affected by this application are present and future tank building projects of these companies:

Baker Tank Company, P.O. Box 40, Arp, Texas 75750.

Richmond Engineering Company, Inc., 7th and Hospital Streets, Richmond, Virginia 23260.

Notice of the application, and of the granting of the interim order, was published in the FEDERAL REGISTER on May 13, 1977 (42 FR 24343) for Baker Tank Company and on January 28, 1977 (42 FR 5440) for Richmond Engineering Company, Inc. The notices invited interested persons, including affected employers and employees, to submit written data, views, and arguments regarding the grant or denial of the variance requested. In addition, affected employers and employees were notified of their right to request a hearing on the application for a variance. No written comments or requests for a hearing have been received.

II. FACTS

The applicants' business, which is part of the tank building industry, involves the erection of relatively large steel plate segments of circumferential rings. Due to the unique nature of the construction involved, special procedures, including special scaffolding, have been developed. For example, as opposed to more conventional scaffolds, tank scaffolds must be highly portable and have a relatively low density of occupancy by workmen. These scaffolds are raised up the shell of the tank as new rings of steel are added and work is completed at the level below.

Most plate structures are fabricated from standard length plates obtained from steel mills. These plates, each approximately 31.416 feet long, normally have brackets welded to them while they are on the ground prior to being placed into position on the tank wall. Scaffolding and guardrail supports are then attached to these brackets. If the applicants were to comply with § 1926.451(a)(5) which requires that guardrail supports be at intervals not to exceed 8 feet, and Table L-3 in § 1926.451(a)(10) which sets the maximum permissible span (distance between planking supports) for 2 x 10 inch full thickness undressed lumber at 10 feet, they assert it would be necessary to lay out each steel plate into sections with the brackets located approximately 7.854 feet apart. Instead, the applicants wish to lay out the plate into three equal sections with brackets located approximately 10'6" apart.

The planks used on the scaffolds by the applicants are rough full-dimensioned 2"×12"×12' planks of Douglas Fir or its equivalent. Douglas Fir has a

fibrer stress of 1,900 and a modulus of elasticity of 1,900,000. These characteristics of the planking meet the requirements of Scaffold Grade in § 1926.451(a)(10).

The tank scaffolds do not have toeboards as required by § 1926.451(a)(4) and (5). Instead, the applicants have stated that most tools are placed in well-designed "loose tool" containers provided for that purpose. The area directly below and far enough away from the base of the scaffold to contain anything that falls from above is roped off. Because the contour of the steel plates of the tank face is curved and the adjacent edge of the scaffold platform is straight, there is an open space between them. As a result, applicants have installed taut wire rope on the scaffold brackets that extends midway between the innermost edge of the scaffold platform and the curved plate structure of the tank face to serve as a safety line in lieu of an inner guardrail assembly. According to the applicants, less than 10 percent of the plank surface on the scaffold serves as a work location at any one time, and is normally occupied by approximately one person per 30 feet of scaffold length. About one-third of the employees work alone on the scaffolds, and the others work in groups of 2 or 3 with only one group located within a 10'6" bracket span. The employees carry their tools and equipment from one location to the next as work progresses.

III. Decision

Section 1926.451(a)(4) and (5) requires toeboards with a minimum height of 4" on all open sides and ends of platforms more than 10 feet above the ground floor. This is intended to keep tools and equipment from falling off the scaffold injuring people below. The applicants' system of keeping most tools in containers and roping off the area under and in close proximity to the scaffold accomplishes this purpose and thus provides a place of employment as safe as that required by the toeboard requirements of § 1926.451(a)(4) and (5).

Table L–3 in § 1926.451(a)(10) sets the maximum permissible span between planking supports at 10 feet for 2 × 10 inch or wider planks of full thickness undressed lumber. The applicants have proposed to use Douglas Fir or its equivalent. The increased strength of the full thickness Douglas Fir over other commonly used types of scaffold planking would provide safe scaffolding even though the span is 6" longer than the maximum span allowed under the standard.

Section 1926.451(a)(5) also requires that guardrail supports be placed at no more than 8 foot intervals. While applicants could comply with this requirement by attaching guardrail supports to the scaffolds, the applicants normally attach the guardrail supports, as well as the scaffolding supports to the brackets which are welded to the steel plates at 10'6" intervals. This practice affords considerably more stable attachments for the guardrail assembly than would exist with wooden 2 by 4s attached to the scaffold at 8 foot intervals. Moreover, the wire rope cables used for guardrails and the angle irons used for supports are at least as strong as the wooden 2 by 4s permitted by § 1926.451(a)(5). Therefore, it is determined that the guardrail assemblies supported by the brackets at 10'6" intervals are as safe as those required by § 1926.451(a)(5).

IV. Order

Pursuant to authority in section 6(d) of the Occupational Safety and Health Act of 1970, and in the Secretary of Labor's Order No. 8–76 (41 FR 25059) it is ordered that the applicants be, and they are hereby, authorized to use scaffolds in accordance with the following conditions, in lieu of complying with the toeboard and span requirements in § 1926.451(a)(4), (5), and 10):

(1) The applicants' loose tools and equipment shall be kept in well-designed tool containers. This does not include fitup bars, key plates, key channels, or long handled mauls which may be placed on the scaffold plank during the time they are required for work. The loose tool containers shall be secured to prevent their upset or dislodgment from the scaffold area.

(2) Areas beneath and far enough away from the base of the scaffold to contain anything that falls from above shall be roped off and posted with clearly visible signs stating: "Danger Overhead Work."

(3) The space between the innermost edge of the scaffold platform and the curved plate structure of the tank shell shall not exceed 12" without protective measures. A taut wire rope supported on scaffold brackets at plank level may be used to divide any space exceeding 12" in lieu of using a guardrail or tie-off system.

(4) Not more than three employees shall be working on a 10'6" span of scaffold planking at any time.

(5) The maximum distance between brackets to which scaffolding and guardrail supports are attached shall be 10'6". These brackets shall be welded to the steel plates.

(6) Scaffold planks or rough full-dimensioned 2" × 12" × 12' Douglas Fir or equivalent planking shall be used. The Douglas Fir shall have at least a 1,900 fiber stress and 1,900,000 modulus of elasticity. Three planks with full thickness 2" × 10" × 12' dimensions may be used in lieu of two 2" × 12" × 12' planks provided that they are clamped or bonded together at the midpoint of the span, in order to spread the weight of the employees.

(7) All planking shall be secured from movement or overlapped in accordance with 1926.451(a)(12).

(8) Guardrails shall be constructed of taut wire rope, and shall be supported by angle irons attached to brackets welded to the steel plates. These guardrails shall be at least of equivalent strength, stability and height as those required for the 8 foot span of 2" × 4" wood rails by 29 CFR 1926.451(a)(15). Guardrail supports shall be located at no greater than 10'6" intervals.

As soon as possible, the applicants shall give notice to affected employees of the terms of this order by the same means used to inform them of the application for variance.

This order shall become effective on August 9, 1977, and shall remain in effect until modified or revoked in accordance with section 6(d) of the Occupation Safety and Health Act of 1970.

Signed at Washington, D.C. this 2nd day of August, 1977.

EULA BINGHAM
Assistant Secretary of Labor.

INMONT CORP.

Application for Variance and Interim Order

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTIONS: I. Notice of application for variance and interim order; II. Grant of interim order.

SUMMARY: This notice announces the application of Inmont Corp. for a variance and interim order pending a decision on the application for a variance from the standard prescribed in 29 CFR 1910.106(h)(4)(i)(c) concerning aboveground storage tanks. It also announces the granting of an interim order until a decision is rendered on the application for variance.

DATES: The effective date of the interim order is August 9, 1977. The last date for interested persons to submit comments is September 8, 1977. The last date for affected employers and employees to request a hearing on the application is September 8, 1977.

ADDRESSES: Send comments or requests for a hearing to: Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Avenue NW., Room N–3668, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT:

Mr. James J. Concannon, Director, at the above address, telephone 202–523–7121;

or the following Regional and Area Offices

U.S. Department of Labor, Occupational Safety and Health Administration, 32nd Floor, Room 3263, 230 South Dearborn Street, Chicago, Ill. 60604.

U.S. Depatrment of Labor, Occupational Safety and Health Administration, 1400 Torrence Avenue, 2nd Floor, Calumet City, Ill. 60409.

I. Notice of Application

Notice is hereby given that Inmont Corp., 3030 West 51st Street, Chicago, Ill. 60632, has made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance and interim order pending a decision on the application for a variance, from the standards prescribed in 29 CFR 1910.106(h)(4)(i)(c) which sets forth the conditions for the storage of flammable and combustible liquids in aboveground tanks inside of buildings. The address of the place of employment that will be affected by the application is as follows:

Inmont Corp., 3030 West 51st Street, Chicago, Ill. 60632.

The applicant certifies that employees who would be affected by the variance have been notified of the application by giving a copy of it to their authorized employee representative, and by posting a copy at all places where notices to employees are normally posted. Employees have also been informed of their right to petition the Assistant Secretary for a hearing.

Regarding the merits of the application, the applicant contends that it is providing a place of employment as safe as that required by § 1910.106(h)(4)(i)(c) which requires that storage tanks inside of buildings shall be located at or above grade with adequate drainage and separated from the processing area by construction having a fire resistance rating of at least two hours.

The purpose of the standard is to prevent fire and/or explosions by eliminating vapors which are heavier than air from accumulating in spaces below grade level or pits.

The applicant uses various flammable solvents in the manufacture of printing inks. These solvents include barium lithol pigment, exempt lactol spirits, toluene, metal resinate of wood rosin, ethyl cellulose, and wax compound. The applicant states that the solvents are stored and shipped in tank trucks and railroad tank cars. These tanks are located inside its South Finished Ink Tanl. Storage Building where 26 are stored approximately 6 feet 8 inches below the earth's grade level.

The applicant asserts that it is unable to comply with the standard because sufficient space is not available to relocate the storage tanks. However, the applicant contends that it has installed a mechanical exhaust ventilation system which is designed to remove floor level vapors from spaces below grade. The applicant further contends that this exhaust which exceeds one cubic foot of air movement per minute per square foot of building area, will provide protection to employees as safe as that which would be provided if it were complying with the requirements of § 1910.106(h)(4)(i)(c).

The applicant states that the storage building is protected by a sprinkler system and the adjacent yard is protected by large wheeled dry chemical fire extinguishers.

The applicant has submitted copies of its Fire Brigade Assignments and Tank Cleaning Procedures which include sound safety practices and proper personal protective equipment for use in emergency situations.

In addition, according to the applicant, the storage building is equipped with the following safeguards:

(1) Explosion-proof electrical equipment and wiring;

(2) Extensive bonding and grounding;

(3) Tank diking;

(4) Emergency lighting;

(5) Smoke, heat, and explosion relief; and,

(6) A pumping system to handle any ground water seepage.

II. Grant of Interim Order

It appears from the application for a variance and interim order that, as required by section 6(d) of the Act, the storage of flammable solvents inside of the building in storage tanks as specified in the application will provide to the affected employees a place of employment as safe as that which would be provided if the applicant complied with 29 CFR 1910.106(h)(4)(i)(C). It further appears that an interim order is necessary to prevent undue hardship to the applicant and its employees pending a decision on the variance. Therefore it is ordered, pursuant to the authority in section 6(d) of the Occupational Safety and Health Act of 1970, in 29 CFR 1905.–11(c) and in Secretary of Labor's Order No. 8–76 (41 FR 25059), that Inmont Corp. be, and it is hereby, authorized to store its flammable solvents inside its South Finished Ink Tank Storage building in storage tanks below the earth's grade level in lieu of complying with the requirements in 29 CFR 1910.–106(h)(4)(i)(c) for abovegaround tanks inside of buildings, under the following conditions:

(1) The applicant shall install and properly maintain a vapor detection system.

(2) Exhaust ventilation across the storage area, in those places where flammable vapors may collect, shall maintain a level of vapor concentration below 25 percent of the lower flammable limit (LFL).

(3) Constant monitoring of the storage room atmosphere shall be conducted to assure that the level of flammable vapor concentrations is below 25 percent of the LFL. 3

(4) If the specified levels are exceeded, a distinctive alarm perceivable above ambient noise or light levels shall alert the employees when there is an emergency situation. Employees shall immediately evacuate the storage building and its surrounding area.

(5) Employees shall be trained to recognize the emergency evacuation alarm.

(6) An emergency action plan shall be implemented and enforced. The plan shall include the following procedures:

(a) Only employees, trained and educated to handle flammable liquid vapor leaks, shall be allowed to reenter the storage area to reestablish safe vapor concentrations.

(b) All untrained employees shall remain out of the area until vapor concentrations are below 25 percent of the LFL.

(c) Only upon reestablishment of the safe limit shall normal work operations resume.

(d) All employees shall be instructed in the emergency action plan procedures.

(7) Storage tanks shall not be more than 6 feet 8 inches below the earth's grade level.

(8) "No Smoking" signs shall be conspicuously displayed near the storage tanks.

(9) All exits shall be properly marked by a readily visible sign.

Inmont Corp. shall give notice of this interim order to employees affected thereby by the same means required to be used to inform them of the application for a variance.

This interim order shall remain in effect until a decision is rendered on the application for a variance.

Signed at Washington, D.C., this 2nd day of August 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

INTERPACE CORP.

Grant of Variance

I. Background

Interpace Corp., 260 Cherry Hill Road, Parsippany, NJ. 07054, made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance, and for an interim order pending a decision on the application for a variance, from the safety standards prescribed in 29 CFR 1910.180(h)(3)(v). The standard requires that no hoisting, lowering, swinging or traveling shall be done while anyone is on the hook or load of a crane. Facilities affected by this application are:

Lock Joint Pipe Co. of Puerto Rico, Km. 0.6, S.R. 887, Carolina, P.R. 00630.

Lock Joint Pipe Co. of Puerto Rico, Km. 11.2 S.R. 14, Ponce-Juana Diaz Road, Juana Diaz, P.R. 00665.

Interpace Corp., 5622 Kansas Avenue, Kansas City, Kans. 66106.

Interpace Corp., 70001 Powell Road, Romeo, Mich. 48065.

Interpace Corp., Prairie Hill Road, South Beloit, Ill. 61080.

Interpace Corp., Edgeboro Road, East Brunswick, N.J. 08816.

Interpace Corp., Shop Road, Columbia, S.C. 29250.

Interpace Corp., 1501 Perryman Road, Perryman, Md. 21130.

Interpace Corp., Bower and Chatham Street, Lacoochee, Fla. 33537.

Notice of the application, and of the granting of an interim order, were published in the FEDERAL REGISTER on July 15, 1975 (40 FR 29771). The notice invited interested persons, including af-

fected employers and employees, to submit written data, views, and arguments regarding the grant or denial of the variance requested. In addition, affected employers and employees were notified of their right to request a hearing on the application for a variance. No written comments or requests for a hearing have been received.

II. FACTS

The applicant uses locomotive cranes equipped with outriggers to place and remove metal forms (casings) used in the vertical pouring of concrete pipe. The casings range from 8 to 24 feet in height.

In order to attach and detach the casings as they are moved by the crane, employees ride in safety cages which are a component part of the casing handling bar. Three different cages are in use at the various locations, two circular and one oval. The two circular cages are used for the smaller diameter pipes and house one employee during the operation. The oval cage is used for larger diameter pipes. It was originally anticipated that two employees would work from this cage. However, the company now states that it will be used by only one employee.

The employees in the cages attach the chains from the casing handling bar to the casings, and then ride in the cage above the casings as they are lifted into position in order to be able to detach the chains. This process is repeated for stripping the casings from the completed pipe. The casing handling chains are equipped with spring loaded mechanisms. When the hooks of the chains are attached to the casing, the spring forces a sleeve over the mouths of the hooks.

The cages are constructed with guardrails and toeboards around the perimeter. On three quadrants, the perimeter is enclosed with heavy steel mesh. The fourth quadrant consists of four rungs approximately 10 inches apart to provide the means of entering the cage. These rungs are of non-slip surface material. According to the applicant, the cage with the smallest diameter will be equipped with heavy steel mesh to the height of the midrail of the guardrail (21 inches) to permit freedom of movement for the employee. The other two cages, having a larger diameter, will have the steel mesh to the height of the topmost rail of the guardrail (42 inches). The floor of the cages are four-way safety plate (diamond plate) to provide a non-slip surface, and the cages are equipped with a steel plate roof.

The casing handling bar is equipped with a safety lanyard secured by a safety anchor for each employee. All employees are equipped with a safety harness for attachment to the lanyard. The safety harness is worn at all times during the operation and insures that the employee remains securely within the confines of the cage. While the cage is moving the employees wear safety harnesses, stand and grasp the guardrail and vertical bars.

The casing handling bar and cage are attached to the load block of the locomotive crane. There is a safety latch across the mouth of the crane hook which is bolted in place. The beam into which the crane hook is inserted to lift the casing handling bar and cage is equipped with a preformed wire rope as a back-up safety device. All components of this apparatus have a tensile safety factor in excess of 5 to 1. The crane is equipped with a load indicating device.

III. DECISION

Section 1910.180(h)(3)(v) prohibits the hoisting, lowering, swinging, or traveling of a crane while anyone is on the load or hook. This prohibition is made because riding the load or the hook exposes the employees to hazards of falling or being struck against objects.

In the work situation described, the applicant is using a safety cage to protect the employee from the normal hazards of riding the load.

The roof and guardrails and the general structure of the cage would protect the employee from injury in the event the cage struck against an object. The employee is also protected from falling by the cage rails and by the safety harness attached to the lanyard which is worn both during a move and while hooking and unhooking the forms.

The safety cage has a tensile safety factor of 5 to 1 which is considered sufficient for a steel cage for this type of an operation.

The safety device by which the cage is attached to the crane is designed so that the cage cannot be accidentally released. In addition, the employee in the cage is in full view of the crane operator at all times.

The applicant has well-developed procedures for the use of this safety cage which require the crane operater to place and remove the forms according to an established method, eliminating any sudden or unusual movement which could cause accidents.

Accordingly, it is determined that the applicant is providing a place of employment as safe as that which would be obtained by complying with § 1910.180(h)(3)(v).

The application for variance was reviewed by the States of South Carolina, Michigan, and Maryland who have their own occupational safety and health plans. Their comments were considered in making this determination. Accordingly, they are made parties to this decision.

IV. ORDER

Pursuant to authority in section 6(d) of the Occupational Safety and Health Act of 1970, and in Secretary of Labor's Order No. 8-76 (41 FR 25059), it is ordered that Interpace Corp. be, and it is hereby, authorized to move employees in the above described safety cages suspended from the crane during the process of placing and removing the casings used in the vertical pouring of concrete pipes, *Provided*, That the following conditions are observed:

1. The cages shall be constructed as described in the application with guardrails, toeboards, a steel plate roof, and a four-way safety plate floor;

2. All cages, regardless of size, shall be enclosed with steel mesh or expanded metal to the height of the top guardrail;

3. The safety latch across the crane hook shall be in place and bolted;

4. The cage may house only one employee during operation;

5. The employee in the cage shall wear the safety harness and lanyard attached to the proper location at all times when being moved in the cage or when hooking or unhooking the casings and must not allow any part of the body to extend beyond the exterior of the cage during movement;

6. Crane operators shall be experienced, and lifts shall be made in accordance with established methods;

7. The crane operator shall remain at the controls at all times when employees are in the cage;

8. The safety procedures submitted as part of the application shall be followed on all lifts involving employees;

9. A ladder shall be available at all times for emergency purposes.

10. If the load indicating device indicates that the stripping of the casings will exceed ½ the rated load of the crane, the lift shall be halted and the casing handling chains detached until the casing can be manually separated from the pipe to provide a normal lift;

11. During lifts involving an employee, the crane shall not travel at speeds that would allow excessive oscillation of the cage and/or load while moving along the tracks, and raising or lowering of employees shall not exceed that speed necessary for the immediate halting of the operation by the crane operator;

12. No lifts involving an employee shall be made in areas where there are no outrigger tracks;

13. Each hoisting unit shall have at least one holding brake mounted on the motor shaft or on a shaft in the hoist gear train. This brake shall apply automatically on power removal. The minimum torque rating of the holding brake in relation to motor torque at the point of application shall be:

125 percent when used with control braking means other than mechanical;

100 percent when used with a mechanical control braking means;

100 percent for each brake if two holding brakes are provided.

14. Inspection and maintenance procedures as described in § 1910.180 and in the variance application shall be followed to assure that the cages and cranes are in good repair.

As soon as possible Interpace Corporation shall give notice to affected employees of the terms of this order by the same means required to be used to inform them of the application for variance.

Effective date: This order shall become effective on August 9, 1977, and shall remain in effect until modified or revoked in accordance with section 6(d) of the Occupational Safety and Health Act of 1970.

Signed at Washington, D.C., this 2nd day of August, 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

[FR Doc.77-22935 Filed 8-8-77;8:45 am]

[V-77-2]

SCHIAVONE CONSTRUCTION CO.

Grant of Variance

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Grant of variance.

SUMMARY: This notice announces the grant of a variance to Schiavone Construction Company from the standards prescribed in 20 CFR 1926.904(e) concerning underground storage of explosives.

DATES: The effective date of the variance is August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Dorothy Pohlman, Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Room N-3668, Washington, D.C. 20010. Telephone: 202-523-7121.

or the following Regional and Area Offices:

U.S. Department of Labor, Occupational Safety and Health Administration, 1515 Broadway (1 Astor Plaza), Room 3445, New York, New York 10036.

U.S. Department of Labor, Occupational Safety and Health Administration, 90 Church Street, Room 1405, New York, New York 10007.

I. BACKGROUND

Schiavone Construction Co., Impresit Girola Lodigiani, Inc., Thomas Crimmins Contracting Co., A Joint Venture, Barbizon Hotel, Box 5140, FDR Station, New York, New York 10022 made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance, and for an interim order pending a decision on the application for a variance, from the safety standards prescribed in 29 CFR 1926.904(e). The standard requires that permanent underground storage magazines be at least 300 feet from any shaft, adit or active underground working area. The facility affected by this application is:

Tunnel on East 63rd Street between Lexington Avenue and Third Avenue, Borough of Manhattan, New York, New York.

Notice of the application, and of the granting of an interim order, was published in the FEDERAL REGISTER on February 8, 1977 (42 FR 8013). The notice invited interested persons, including affected employers and employees, to submit written data, views, and arguments regarding the grant or denial of the variance requested. In addition, affected employers and employees were notified of their right to request a hearing on the application for a variance. One written comment was received; there were no requests for hearing.

II. FACTS

The applicant is engaged in the construction of a subway tunnel for which explosives are necessary. Rather than comply with the storage requirements of § 1926.904(e), the applicant is storing the explosives in three 5' by 5' chambers cut into the rock at about 100', 200' and 235' distances from the access shaft. Access to these storage chambers is through a tunnel known as a coyote hole which has been excavated from the rock for a distance of about 247'. The first 75' of the coyote hole is a temporary section, as the area will be excavated out for the installation of a compressor plant. At the time this area is excavated the nearest chamber will be about 25' from the nearest working area.

The temporary and permanent portions of the tunnel are separated by doors of ½" plate steel lined with 4" of hardwood rather than the ¼" plate steel and 2" of hardwood required by the OSHA standards. There is also a second access tunnel that forks off of the main portion of the coyote hole. This section is also separated by a door of ½" plate steel and 4" of hardwood. These doors are bolted into the rock and reinforced concrete.

The caps and explosives have been placed in approved magazines and stored in the chambers. The caps are stored in the first chamber, approximately 100' along the coyote hole. The explosives are stored in the second and third chambers, approximately 200' and 235' from the manshaft. The applicant is using water-gel explosives which are insensitive and is limiting the amount of water-gels stored in each chamber to 500 lbs.

The applicant is complying with the other requirements for storage of explosives, such as proper ventilation and maintaining the 50' distance between caps and explosives.

III. DECISION

29 CFR 1926.904(e) requires that permanent underground storage magazines be at least 300 ft. from any shaft, adit, or active underground working area. This is intended to prevent hazard to employees should an unintended explosion occur.

One comment letter was received from the Fire Department of the City of New York supporting the application for variance. A visit was made to the worksite by members of the OSHA New York Regional Office. Aa a result of this visit they support granting the variance.

In this situation the applicant is using a low sensitivity type of explosive and is storing the explosives and caps in approved magazines in chambers which are set off at right angles from the coyote hole, or tunnel. Thus the magazines are protected from impact, making an accidental explosion highly unlikely. The chance of any accidental explosion is also made remote by the fact that the explosives which the applicant is using are cap-senstitive cartridge water-gels. These are insensitive and are highly unlikely to detonate accidentally. They are stored in approved magazines and placed in two of the chambers, with a limit of 500 lbs. per chamber, although the OSHA standards do not limit the amounts which may be stored. The caps are stored in the chamber closet to the working area and are separated from the nearest chamber containing explosives by 160 feet, rather than 50 feet as required by § 1926.904(f).

The fact that the coyote hole is cut into solid rock with the chambers at right angles means that the tunnel and chamber walls would absorb the direct impact should an unexpected explosion occur. In addition, the coyote hole is partitioned off from the access shaft adit or working areas by doors of ½" plate steel lined with 4" of hardwood rather than ¼" plate steel lined with 2" hardwood as required by 27 CFR 181.187 (a)(8) which is adopted by reference in 29 CFR 1926.904(a). These doors will be bolted into the rock and reinforced concrete and would provide additional protection to employees from the force of an explosion in one of the chambers.

In addition, the applicant is complying with the other OSHA requirements concerning storage of explosives, and with the requirmeents of the City of New York Fire Department.

For these reasons it is determined that the applicant is providing a place of employment as safe as that which would be obtained by complying with § 1926.904(e).

IV. ORDER

Pursuant to authority in section 6(d) of the Occupational Safety and Health Act of 1970, and in Secretary of Labor's Order No. 8-76 (41 FR 25059), it is ordered that Schiavone Construction Co., Imuresit Girola Lodigiani, Inc., Thomas Crimmins Contracting Co., A Joint Venture be, and it is hereby, authorized to store explosives less than 300 feet from a shaft, adit, or underground working area, provided that:

1. Ventilation in accordance with § 1926.800(c)(2) shall be maintained to the end of the coyote hole for the duration of the project.

2. The caps and explosives shall be placed in approved magazines and stored in the designated chambers cut into the rock.

3. The permanent section of the coyote hole shall be partitioned off with doors of ½" steel plate and 4" of hardwood bolted into rock and reinforced concrete.

4. The passageway shall be maintained free of loose objects.

5. Only capsensitive cartridge water gel explosives may be stored in the designated chambers.

6. Construction shall proceed according to the schedule submitted:

a. The entire length of the coyote hole and the three chambers shall be excavated;

b. Doors shall be installed separating the temporary and permanent portions of the coyote hole as described in the application;

c. The area around the temporary portion of the tunnel shall be excavated beginning with pilot tunnels on the North and South, then the entire perimeter, and finally the center core including the temporary portion of the coyote hole.

7. Access to the magazine area shall be limited to magazine keepers, powder carriers and authorized inspection personnel. Watchmen certified by the New York City Fire Department shall be on duty at all times when the magazines are loaded.

8. Explosives shall be used in delivery sequence in order to prevent deteriorated material from accumulating on the job.

As soon as possible Schiavone Construction Co., Impresit Girola Lodigiani, Inc., Thomas Crimmins Contracting Co., a joint venture shall give notice to affected employees of the terms of this order by the same means required to be used to inform them of the application for variance.

Effective date: This order shall become effective on August 9, 1977, and shall remain in effect until modified or revoked in accordance with section 6(d) of the Occupational Safety and Health Act of 1970.

Signed at Washington, D.C. this 2nd day of August, 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

[V-76-10]

AMERICAN TOBACCO CO.

Grant of Variance

I. BACKGROUND

The American Tobacco Co., 245 Park Avenue, New York, N.Y. 10017, made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance, and for an interim order pending a decision on the application for a variance, from the safety standards prescribed in 29 CFR 1910.159(e)(2). The standard requires that a clearance of at least 18 inches be maintained between sprinkler deflectors and top of storage to reduce the possibility of obstruction to the distribution of water.

The facilities affected by this application are:

Richmond Leaf Department, The American Tobacco Co., Lucky Strike Storage, 14th and Ingram Street, Richmond, Va. 23224.

Richmond Leaf Department, The American Tobacco Co., Tom Walker Storage, 800 Jefferson Davis Highway, Richmond, Va. 23260.

Reidsville Leaf Department, The American Tobacco Co., Lucky Strike Storage, U.S. Route 29 North, Reidsville, N.C. 27320.

Durham Leaf Department, The American Tobacco Co., Lucky Strike Storage, Ellis Road, Durham, N.C. 27702.

Lexington Leaf Department, The American Tobacco Co., Lexington Storage, Leestown Pike, Lexington, Ky. 40501.

Notice of the application, and of the granting of the interim order, was published in the FEDERAL REGISTER on August 27, 1976 (41 FR 36283-85). The notice invited interested persons, including affected employers and employees, to submit written data, views, and arguments regarding the grant or denial of the variance requested. In addition, affected employers and employees were notified of their right to request a hearing on the application for a variance. No written comments or requests for a hearing have been received.

II. FACTS

The applicant operates 72 warehouses in Richmond, Va.; 62 warehouses in Reidsville, N.C.; 57 warehouses in Durham, N.C.; and 26 warehouses in Lexington, Ky. The warehouses are used to store tobacco hogsheads. According to the applicant, data and information are listed from the Richmond, Va., warehouses which are representative of the other warehouses.

The warehouses are constructed of wood, approximately 194' long with two sliding doors (8'8" wide by 9'6" high and 8'9" wide and 7'6" high) that are located at each end of the 9' center aisle. When work is being performed, the entrance doors are left open. The warehouses are only occupied when tobacco hogsheads are brought into or removed from storage. Normally, two employees operate industrial trucks in any one of the warehouses.

There is very little electrical wiring in the warehouses and the housekeeping is excellent with no debris or foreign material. "No Smoking" signs are posted, employees have ample clearance on either side of the industrial trucks to use the aisles as exitways, and a freestanding four hour fire resistant brick wall separates adjacent warehouses.

The tobacco hogsheads are 4' in diameter by 4'6" high, normally of Douglas Fir wood. They are stacked 3 high, 4 rows to a bay and 15 stacks per row, with 8"x8" wood columns separating each bay. The hogsheads stacking pattern does not allow an employee to penetrate into the storage area. However, in the outer bays of each warehouse where approximately one-third clearance exist, vertical spacing permits the sprinklers to clear the hogsheads at least 8 inches.

The applicant requested a variance to allow a clearance of at least 8 inches between the sprinkler heads and top of storage in approximately one-third of the area in each warehouse. Although §1910.159(e)(2) requires a clearance of at least 18 inches be maintained, the applicant's sprinkler systems differ from those used in other warehouses in that its protection area per sprinkler, spacing of sprinkler heads, available supply and pressure of water and pipe size used provide better coverage than that required by NFPA No. 13-1969 (the source standard for § 1910.159(e)(2)), as follows:

The protection area per sprinkler is 97.5 square feet and storage heights never exceed 13½ feet. The maximum protection area per sprinkler permitted by NFPA No. 13-1969 is 130 square feet for storage heights not in excess of 15 feet.

NFPA No. 13-1969 permits a maximum distance of 15 feet between sprinkler branch lines and sprinklers on a branch line. The distance between the applicant's sprinkler branch lines is 10 feet and between sprinklers on a branch line is 9 feet 9 inches.

The fire protection system is supplied with water from two connections to a 10 inch public water pipe: a 100,000 gallon water storage tank 150 feet above ground (for fire protection only) and a 200,000 gallon ground level water storage tank which provides suction for 100 psi, 100 gpm fire pumps.

NFPA No. 13-1969 requires that a maximum of 750 gpm of water be distributed over an area of 3,750 square feet with water available for a duration of at least two hours and an average density of 0.20 gallons of water per minute. The applicant's sprinklers distribute water over 3,750 square feet for a duration of three and one-half hours with an average density of 0.24 gpm, which is 20 percent greater than that required by the standards.

Data obtained from fire tests conducted by Factory Mutual Engineering Corporation indicates that a fire in tobacco storage warehouses can be adequately controlled with a sprinkler system designed and maintained in the manner that the applicant has done.

Sprinkler systems protecting the warehouses are dry pipe systems that are filled with compressed air which releases when a sprinkler head opens, reducing pressure at the control valve and allowing water to enter the sprinkler piping, actuating the water flow alarm. The water flow alarm sounds in three places —at the warehouse affected, where the guard or on-duty personnel would place a call to the local fire department, and over a coded paging system that is audible throughout the warehouse site to summon help from far reaches of the property.

The application for variance was reviewed by the States of Kentucky and North Carolina who have their own occupational safety and health plans. In addition to the review, a personal investigation at the Lexington, Ky., warehouses by representatives of the State of Kentucky revealed that the conditions, means, and practices to which the employees of American Tobacco Co. are exposed provide protection equal to or greater than the protection to be assured by compliance with the requirements of § 1910.159(e)(2) of the occupational safety and health standards. Both States concur with the granting of the variance.

III. DECISION

Section 1910.159(e)(2) requires that a clearance of at least 18 inches be maintained between sprinkler deflectors and top of storage to reduce the possibility of obstruction to the distribution of water.

In approximately one-third of the area of each warehouse, a clearance of at least 8 inches exists between the sprinkler heads and top of tobacco hogsheads. The applicant's sprinklers are provided with a reliable water supply from two independent sources connected to a 10 inch public water pipe—a 100,000 gallon water storage tank used for fire protection only and a 200,000 gallon water storage tank which provides 1000 gpm working at a water pressure of 100 psi. Sketches were submitted by the applicant showing the water connections, locations, and piping. Water is immediately available for fire suppression for three and one-half hours. This available supply and pressure of water, protection area per sprinkler, and a clearance of at least 8 inches between the sprinkler head and the hogshead storage, develop an average density of unobstructed water discharge of .24 gpm over an area of 3,750 square feet. This exceeds the requirements of NFPA No. 13-1969 by 20 percent.

Since the stacking pattern does not permit the employees to penetrate into the storage area, the primary function of the sprinkler systems in the tobacco storage warehouses are to protect the tobacco hogsheads. In the event of a fire, the employees would be notified first by observation or by the audible water flow alarm; thereby evacuating the warehouses by the two means of egress routes.

Tests conducted by Factory Mutual Laboratories reveal that the sprinkler systems in the applicant's tobacco warehouses are designed and maintained to provide adequate fire control.

The Emergency Organization Procedures Plan is representative of OSHA's intent to permit fire brigades where there is adequate training, organization, and planning to assure that the safety and health of employees are not jeopardized.

Accordingly, it is determined that the applicant is providing a place of employment as safe as that which would be obtained by complying with § 1910.159 (e)(2).

The application for variance was reviewed by the States of North Carolina and Kentucky who have their own occupational safety and health plans. Their evaluation, along with the investigation conducted by Kentucky, were considered in making this determination. Accordingly, they are made parties to this decision.

IV. ORDER

Pursuant to authority in section 6(d) of the Occupational Safety and Health Act of 1970, and in Secretary of Labor's Order No. 8-76 (41 FR 25059), it is ordered that the American Tobacco Company be, and it is hereby, authorized to maintain at all of the warehouses listed in the application, a clearance of at least 8 inches between the sprinkler heads and top of storage in one-third of the warehouse are and a clearance of 18 inches in the remaining area, provided that the following conditions are met:

1. The sprinkler system shall be maintained to provide a water flow over a 3,750 sq. ft. area for a duration of three and one-half hours with an average density of 0.24.

2. All employees shall be instructed in the procedures of the employer's Emergency Organization and Procedures Plan. Those employees not specifically designated as participating members of the fire brigade shall be instructed to immediately evacuate a warehouse upon detection of a fire. Those members of the fire brigade who remain behind to control or extinguish any fire shall be provided with the proper amount of equipment which has been installed, maintained, and tested in accordance with the applicable OSHA standards.

3. New employees shall be instructed in the procedures of the employer's plan immediately upon employment.

4. All exits shall be properly marked by a readily visible sign.

5. As described in the application, the conditions within the warehouses (particularly the storage of tobacco hogsheads and housekeeping) shall be maintained at all times.

As soon as possible, the American Tobacco Co. shall give notice to affected employees of the terms of this order by the same means required to be used to inform them of the application for variance.

Effective date: This order shall become effective on August 9, 1977, and shall remain in effect until modified or revoked in accordance with section 6(b) of the Occupational Safety and Health Act of 1970.

Signed at Washington, D.C., this 2nd day of August 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

Occupational Safety and Health Administration

MARYLAND STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under Section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Register Administrator) under a delegation of authority from the Assistant Secretary of Labor of Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with Section 18(c) of the Act and 29 CFR Part 1902. On July 5, 1973, notice was published in the FEDERAL REGISTER (38 FR 17834) of the approval of the Maryland plan and the adoption of Subpart O to 29 CFR Part 1952 containing the decision.

The Maryland plan provides for the adoption of Federal standards as State standards after comments and public hearing. Section 1952.210 of Subpart O sets forth the State's schedule for the adoption of Federal standards. By letter dated January 28, 1977, from Harvey Epstein, Commissioner, Maryland Division of Labor and Industry, to David H. Rhone, Regional Administrator, and incorporated as part of the plan, the State submitted a standard for Chlordecone (Kepone). This standard was promulgated after public comment was requested on September 15, 1976, hearings held on October 20, 1976, and a resolution adopted by the Commissioner on January 19, 1977, pursuant to the Maryland Occupational Safety and Health Law of 1973.

2. *Decision.* Since there are no Federal standards regulating kepone, it has been determined that the State standard is not in conflict with other Federal standards.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Suite 2100, Gateway Building, 3535 Market Street, Philadelphia, Pennsylvania 19104; Office of the Commissioner, Maryland Division of Labor and Industry, 203 E. Baltimore Street, Baltimore, Maryland 21202; and Office of the Director, Federal Compliance and State Programs, Room N-3605, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

4. *Public Participation.* Under § 1953.2(c) of this chapter, the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be inconsistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Maryland State Plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason:

The standard was adopted in accordance with the procedural requirements of State law and further public participation and notice would not be necessary.

This decision is effective August 9, 1977.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Philadelphia, Pennsylvania, this 25th day of May 1977.

DAVID H. RHONE,
Regional Administrator

[FR Doc.77-22924 Filed 8-8-77;8:45 am]

MARYLAND STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under Section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Adminstrator) under a delegation of authority from the Assistant Secretary of Labor of Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in ac-

cordance with Section 18(c) of the Act and 29 CFR Part 1902. On July 5, 1973, a notice was published in the FEDERAL REGISTER (38 FR 17834) of the approval of the Maryland plan and the adoption of Subpart O to 29 CFR Part 1952 containing the decision.

The Maryland plan provides for the adoption of Federal standards as State standards after comments and public hearing. Section 1952.210 of Subpart O sets forth the State's schedule for the adoption of Federal standards. By letter dated February 1, 1977, from Harvey A. Epstein, Commissioner, Maryland Division of Labor and Industry, to David H. Rhone, Regional Administrator, and incorporated as part of the plan, the State submitted amendments to the State standards identical to the additions, revisions, amendments and corrections to the Federal standards for carcinogens or toxic and hazardous substances of 29 CFR 1910.1003 through 1910.1004 and §§ 1910.1006 through 1910.1016. Also in accordance with the changes in the Federal standards was the deletion of the 4.4 methylene bis standards of 29 CFR 1910.1005. The Federal standards changes were published in the FEDERAL REGISTER on August 20, 1976 (41 FR 35184). The State standards were promulgated after public comment requested on September 15, 1976, hearings held on October 26, 1976 and a resolution adopted by the Commisssioner on January 19, 1977, pursuant to the Maryland Occupational Safety and Health Law of 1973.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards changes are identical to the Federal standards changes.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Suite 2100, Gateway Building, 3535 Market Street, Philadelphia, Pennsylvania 19104; Office of the Commissioner, Maryland Division of Labor and Industry, 203 E. Baltimore Street, Baltimore, Maryland 21202 and Office of the Director, Federal Compliance and State Programs, Room N-3605, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

4. *Public Participation.* Under § 1953.2 (c) of this chapter, the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Maryland State Plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

a. The standards are identical to the Federal standards and are therefore deemed to be at least as effective.

b. The standards were adopted in accordance with the procedural requirements of State law and further public participation and notice would not be necessary.

This decision is effective August 9, 1977.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Philadelphia, Pennsylvania, this 25th day of April 1977.

DAVID H. RHONE,
Regional Administrator.

[FR Doc 77-22925 Filed 8-8-77;8:45 am]

MINNESOTA STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator), under delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4), will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On June 8, 1973, notice was published in the FEDERAL REGISTER (38 FR 15076) of the approval of the Minnesota plan and the adoption of Subpart N of Part 1952 containing the decision.

The Minnesota plan provides for the adoption of Federal standards as State standards by reference after an opportunity for public comment and/or requests for public hearings. By notice published on May 2, 1977, in the Minnesota State Register (cited as 1 S.R. 1560) and incorporated as part of the plan, Minnesota has adopted State standards comparable to:

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards it has been determined that the State standards are identical to the Federal standards and accordingly should be approved.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, 230 South Dearborn Street, Chicago, Illinois 60604; State of Minnesota, Department of Labor and Industry, 444 Lafayette Road, St. Paul, Minnesota 55101; and the Office of the Directorate of Federal Compliance and State Programs, Room N3608, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Minnesota State Plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards are identical to the Federal standards and are therefore deemed to be at least as effective.

1. The amendments and revisions made to the Occupational Safety and Health Standards for Agriculture and published as 29 CFR 1928.57 (a)(5), (7), (8)(i), (9), (10), (11)(ii) and (iii), (b)(1)(iii) and (c)(1)(ii) in the FEDERAL REGISTER, Volume 41, No. 206, October 22, 1976, page 46598.

2. A new standard, 29 CFR 1910.1029 Coke Oven Emissions, published in the FEDERAL REGISTER, Volume 41, No. 206, pages 46784 through 46790, October 22, 1976.

3. Changes pertaining to carcinogen standards, published in the FEDERAL REGISTER, Volume 41, No. 163, page 35184, on August 20, 1976, deleting 29 CFR 1910.-1005 in its entirety, and deleting the laboratory provisions, paragraph (c)(6), of the following standards: §§ 1910.1003, 1910.1004 and 1910.1006 through 1910.-1016.

4. Changes made in 29 CFR Parts 1910 and 1926 as published in the FEDERAL REGISTER, Volume 41, No. 246, pages 55703 and 55704 on December 21, 1976, to revise Ground-Fault Circuit Interrupters (GFCI) protection requirements by amending 29 CFR 1910.309(c) and 29 CFR 1926.400(h).

These standards, which are contained in the Minnesota Occupational Safety and Health Codes and Rules, were promulgated after notice was published offering an opportunity for public comments and/or requests for public hearings. No written comments or requests for hearing or objections were received concerning the proposed standards. The order of adoption was published in the State Register (1 S.R. 1560) on May 2, 1977, pursuant to Minn. Stat. 182.655 (1974).

2. The standards were adopted in accordance with the procedural requirements of State law and further participation and notice would be unnecessary.

This decision is effective August 9, 1977.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Chicago, Illinois, this 17th day of June 1977.

BARRY J. WHITE,
Regional Administrator

[FR Doc 77-22926 Filed 8-8-77;8:45 am]

MINNESOTA STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator), under delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4), will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On June 8, 1973, notice was published in the FEDERAL REGISTER (38 FR 15076) of the approval of the Minnesota plan and the adoption of Subpart N to Part 1952 containing the decision.

The Minnesota plan provides for the adoption of Federal standards as State standards by reference after an opportunity for public comment and/or requests for public hearings. On May 3, 1977, the Occupational Safety and Health Administration (OSHA) adopted pursuant to section 6(c) of the Act an emergency temporary standard for occupational exposure to benzene (Volume 42, No. 85 of the FEDERAL REGISTER, pages 22525 through 22529, amended, Volume 42, No. 90 of FEDERAL REGISTER on Tuesday, May 10, 1977, page 23601). By notice published on June 13, 1977, in the Minnesota State Register (cited as 1 S.R. 1976) and incorporated as part of the plan, Minnesota has adopted this emergency temporary standard. This standard, which is contained in the Minnesota Occupational Safety and Health Codes and Rules was promulgated by order of adoption effective June 13, 1977, pursuant to Minn. Stat. Section 182.655, Subd. 11 (1976).

2. *Decision.* Having reviewed the State submission in comparison with the Federal standard it has been determined that the State standard is identical to the Federal standard and accordingly should be approved.

3. *Location of supplement for inspection and copying.* A copy of the Minnesota emergency temporary standard, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, 230 S. Dearborn Street, Chicago, Illinois 60604; State of Minnesota Department of Labor and Industry, 444 Lafayette Road, St. Paul, Minnesota 55101; and the Office of the Directorate of Federal Compliance and State Programs, Room N3608, 200 Constitution Avenue NW., Washington, D.C. 20210.

4. *Public Participation.* 29 CFR 1953.-22(b)(1) provides that emergency temporary standards which are identical to or "at least as effective as" the comparable Federal standards may be approved effective upon publication under the Administrative Procedure Act requirements for good cause, 5 U.S.C. 553(b)(3)(B), for the following reasons:

1. The standard was adopted in accordance with the procedural requirements of State law which authorizes promulgation without public participation for emergency standards and participation at the Federal level would be impracticable.

2. The emergency nature of the standard requires that its approval be implemented immediately.

This decision is effective August 9, 1977.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Chicago, Illinois this 28th day of June 1977.

BARRY J. WHITE,
Regional Administrator.

[FR Doc 77-22297 Filed 8-8-77;8:45 am]

OREGON STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On December 28, 1972, notice was published in the FEDERAL REGISTER (37 FR 28628) of the approval of the Oregon plan and the adoption of Subpart D to Part 1952 containing the decision.

The Oregon plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under Section 6 of the Act. Section 1953.20 provides that "where any alteration in the Federal program could have an adverse impact on the at least as effective status of the State program, a program change supplement to a State plan shall be required."

In response to Federal standards changes, the State has submitted by letter dated April 22, 1977 from M. Keith Wilson to James W. Lake and incorporated as part of the plan. State standards, comparable to 29 CFR 1928.57 as published in the FEDERAL REGISTER (41 FR 10195 through 10197) dated March 9, 1976.

These State standards, which are contained in the Oregon Code for Agricultural Operations and Farming, were promulgated after public hearings held on December 3, 1976.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are at least as effective as the comparable Federal standards and accordingly should be approved. Rules addressing Cotton Ginning equipment have not been covered because there is no cotton ginning industry in the State. The State has agreed that if such equipment is introduced into Oregon, the State will adopt rules identical to or at least as effective as 29 CFR 1928.57(d). The detailed standards comparison is available at the locations specified below.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003, Federal Office Building, 909 First Avenue, Seattle, Washington 98174; Workmen's Compensation Board, Labor and Industries Building, Room 204, Salem, Oregon 97310; and the Technical Data Center, Room S6212, 200 Constitution Avenue NW., Washington, D.C. 20210.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Oregon plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason:

The standards were adopted in accordance wtih the procedural requirements of State law which included public comment and further public participation and notice would be repetitious.

This decision is effective August 9, 1977.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Seattle, Washington, this 14th day of July 1977.

JAMES W. LAKE,
Regional Administrator, Occupational Safety and Health Administration.

[FR Doc.77-22928 Filed 8-8-77;8:45 am]

WYOMING STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State Plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On May 3, 1974, notice was published in the FEDERAL REGISTER (39 FR 15394) of the approval of the Wyoming plan and the adoption of Subpart BB to Part 1952 containing the decision.

Section 1952.340 of Subpart BB sets forth the State's intentions with regard

to promulgation of Federal standards covering all the issues contained in 29 CFR Parts 1910 and 1926 (with the exception of those pertaining to ship repairing, ship building, ship breaking and longshoring) and the adoption of additional vertical standards not provided by the Federal program.

Section 1952.343 of Subpart BB sets forth the State's schedule for the adoption of Federal standards as State standards. By letter dated June 14, 1977 from William W. Wilkins, State Health and Safety Administrator, to Curtis A. Foster, Regional Administrator, to be incorporated as part of the plan in accordance with 29 CFR Part 1953, the State submitted the following amended State standards comparable to OSHA amended standards 29 CFR part 1910; amendment to §§ 1910.40, 1910.100, 1910.116, 1910.165b, 1910.171, 1910.184, and 1910.-254 dated April 28, 1975; § 1910.184(e)(9)(i) dated July 28, 1975; § 1910.184(f)(6) dated March 30, 1976; §§ 1910.1005, 1910.1003(c)(6), 1910.1004(c)(6), 1910.1006(c)(6), 1910.1007(c)(6), 1910.1008(c)(6), 1910.1009(c)(6), 1910.1010(c)(6), 1910.1011(c)(6), 1910.1011(c)(6), 1910.-1012(c)(6), 1910.1013(c)(6), 1910.1014(c)(6), 1910.1015(c)(6), and 1910.1016(c)(6) dated August 20, 1976; § 1910.101 dated January 17, 1977; § 1910.213(h)(4) dated January 17, 1977.

These standards were promulgated by the State after public hearings on December 17, 1976, and are published in the Wyoming Occupational Health and Safety General Rules and Regulations.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are at least as effective as the comparable Federal standards. In addition, the State standards are more specific in two areas, particularly with respect to the rules and regulations which apply to compressed gas cylinder storage and radial saws installation.

3. *Location of supplements for inspection and copying.* A copy of the standards supplements, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 15010, Federal Building, 1961 Stout Street, Denver, CO 80202; the Occupational Health and Safety Department, 200 East Eighth Avenue, Cheyenne, Wyoming 82001; and the Technical Data Center, Room S 6212, 200 Constitution Avenue NW., Washington, D.C. 20210.

4. *Public participation.* Under § 1953.2(c) of 29 CFR Part 1953, the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Wyoming State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason:

The standards were adopted in accordance with the procedural requirements of State law which included public comments and further public participation would be unnecessary.

This decision is effective August 9, 1977.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Denver, Colorado, this 17th day of June 1977.

CURTIS A. FOSTER,
Regional Administrator.

[FR Doc.77-22929 Filed 8-8-77;8:45 am]

WASHINGTON STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On January 26, 1973, notice was published in the FEDERAL REGISTER, 38 FR 2421, of the approval of the Washington plan and the adoption of Subpart F to Part 1952 containing the decision.

The Washington plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgted under section 6 of the Act.

Sections 1952.120–124 of Subpart F sets forth the State's schedule for the adoption of at least as effective State standards. By letter dated March 11, 1977 from James Sullivan, Assistant Director, to James Lake ,Regional Administrator, and incorporated as part of the plan, the State submitted State standards comparable to 29 CFR 1928.21, as published in the FEDERAL REGISTER (39 FR 23780) dated June 27, 1974. These standards, which are contained in Chapter 296–306 WAC, Safety Standards for Agriculture, were promulgated by emergency adoption of Temporary Labor Camp standards by reference into Chapter 296–306 WAC pursuant to RCW 34.-04.030 on February 22, 1977 by James Sullivan, Assistant Director, Department of Labor and Industries. State standards comparable to the remainder of 29 CFR 1928.21 were promulgated after public hearing in Yakima, Washington on January 16, 1975.

2. *Decision.* Having reviewed the State submission in comparison with Federal standards, it has been determined that the State standards are at least as effective as the comparable Federal standards and accordingly they are approved. The detailed standards comparison is available at the locations specified below.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003, Federal Office Building, 909 First Avenue, Seattle, Washington 98174; Department of Labor and Industries, General Administration Building, Olympia, Washington 98501, and the Technical Data Center, Room S6212, 200 Constitution Avenue N.W., Washington, D.C. 20210.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Washington plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason:

The standards were adopted in accordance with the procedural requirements of State law which included public comment and further public participation would be repetitious.

This decision is effective August 9, 1977.

(Sec. 18, Pub L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Seattle, Washington, this 14th day of July 1977.

JAMES W. LAKE,
Regional Administrator, Occupational Safety and Health Administration.

[FR Doc.77-22930 Filed 8-8-77;8:45 am]

WASHINGTON STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On January 26, 1973, notice was published in the FEDERAL REGISTER, Vol. 38 FR 2421, of the approval of the Washington State plan and the adoption of Subpart F to Part 1952 containing the decision.

The Washington plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the Act.

Section 1952.123 of Subpart F sets forth the State's schedule for the adoption of at least as effective State standards. By letter dated Feb. 14, 1976 from John Hillier, Assistant Director, to James Lake, Regional Administrator, and incorporated as part of the plan, the State submitted State standards comparable to 29 CFR Part 1910, Subpart H Hazardous Materials, as published in the FEDERAL REGISTER (39 FR 23602) dated June 27, 1974. These standards, which are contained in Chapter 296-24 Washington Administrative Code, General Safety and Health Standards, were promulgated after public hearings held on February 19, 1976 and by adoption of Emergency Rules for Possession, Handling, and Use of Explosives on July 19, 1976, per Administrative Order No. 76-22 pursuant to Chapter 34.04 RCW.

2. *Decision.* Having reviewed the State submisssion in comparison with Federal standards, it has been determined that the State standards are at least as effective as the comparable Federal standards and accordingly should be approved. The major differences are in Anhydrous Ammonia where the State adopted the 1972 Revision of ANSI K61.1, and in Explosives and Blasting Agents where the State adopted the Bureau of Alcohol Tobacco and Firearms requirements. The detailed standards comparison is available at the locations specified below.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003, Federal Office Building, 909 First Avenue, Seattle, Washington 98174; Department of Labor and Industries, General Administration Building, Olympia, Washington 98504; and the Technical Data Center, Room N3620, 200 Constitution Avenue N.W., Washington, D.C. 20210.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Washington plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason:

The standards were adopted in accordance with the procedural requirements of State law which included public comment and further public participation would be repetitious.

This decision is effective August 9, 1977.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Seattle, Washington, this 14th day of July 1977.

JAMES W. LAKE,
Regional Administrator, Occupational Safety and Health Administration OSHA.

[TA-W-2098]

ATLAS POWDER CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2098: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 25, 1977 in response to a worker petition received on May 23, 1977 which was filed on behalf of workers producing a blasting agent from ammonium nitrate and diesel fuel oil at the White Pine, Michigan field facility of Atlas Powder Company, a wholly owned subsidiary of the Tyler Corporation, Dallas, Texas.

The notice of investigation was published in the FEDERAL REGISTER on June 10, 1977 (42 FR 30013). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Atlas Powder Company and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any other criteria have been met, criterion (3) has not been met.

Evidence developed in the Department's investigation reveals that imports of blasting agents like or directly competitive with those produced by Atlas Powder Company are negligible.

The question raised by the petition is whether White Pine Copper Company, i.e., a firm at which the Labor Department has already certified some workers, can be considered the "workers' firm." See Notice of Determination in Nu-Car Driveway, Incorporated (TA-W-393, 41 FR 12749).

The White Pine, Michigan field facility of Atlas Powder Company produces a blasting agent from ammonium nitrate and diesel fuel oil which is sold to White Pine Copper Company and other companies.

Neither Atlas Powder Company, nor White Pine Copper Company is financially or otherwise involved in the business of the other. Atlas Powder Company owns or leases the facilities necessary to the operation of its business.

The workers upon whose behalf this petition was filed were hired and are paid by Atlas Powder Company. They are supervised by and subject to the control of Atlas Powder Company personnel only. All employment benefits which they enjoy are provided and maintained by Atlas Powder Company.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of blasting agents like or directly competitive with those produced at the White Pine, Michigan field facility of Atlas Powder Company have not increased as required in Section 222 of the Trade Act of 1974, and that White Pine Copper Company cannot be considered the "workers' firm". The petition is, therefore, denied.

Signed at Washington, D.C. this 28th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc 77-22737 Filed 8-8-77;8:45 am]

[TA-W-2061]

BALLETS, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2061: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 11, 1977 in response to a worker petition received on May 10, 1977 on behalf of workers and former workers producing ballet, gym, custom dance, jazz and tap shoes at the Lynn, Massachusetts plant of Ballets, Inc.

The Notice of Investigation was published in the FEDERAL REGISTER on May 24, 1977 (42 FR 26481). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Ballets, Inc.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof. The term "contributed importantly" means a cause which is important, but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (2) has not been met.

Evidence developed in the Department's investigation reveals that sales and production at the plant have not declined.

Sales and production are equal, since all shoes are produced to order. The sales data have been adjusted for price increases. Sales adjusted increased 27 percent in value from 1975 to 1976. Beginning in the fourth quarter of 1975 and continuing through the first quarter of 1977, sales adjusted increased each quarter compared to the same quarter of the previous year.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that sales and production of ballet, gym, custom dance, jazz and tap shoes at the Lynn, Massachusetts plant of Ballets, Inc. have not declined as required in Section 222 of the Trade Act of 1974. The petition is, therefore, denied.

Signed at Washington, D.C. this 28th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-98T]

CARLISLE TIRE AND RUBBER CO.

Termination of Investigation

Pursuant to Section 223(d) of the Trade Act of 1974 and 29 CFR Part 90.17 (d) a termination investigation was initiated on May 27, 1976 to determine, with respect to the certification issued on September 30, 1975, whether total or partial separations from the Carlisle Tire and Rubber Company, Carlisle, Pennsylvania are no longer attributable to the conditions specified in such certification.

Notice of Investigation Regarding Termination of Certification of Eligibility to Apply for Worker Adjustment Assistance was published in the FEDERAL REGISTER on June 25, 1976 (41 FR 26294), correction document published July 6, 1976 (41 FR 27800). No public hearing was requested and none was held.

The existing certification will expire on September 30, 1977. Since workers newly separated, totally or partially, after September 30, 1977 would be ineligible to apply for adjustment assistance, termination of the certification by the Secretary of Labor within 90 days from statutory termination would serve no purpose; consequently the investigation has been terminated.

Signed at Washington, D.C. this 21st day of July 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc 77-22739 Filed 8-8-77;8:45 am]

[TA-W-1709]

C. & P. COAT CO., INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1709: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 3, 1977 in response to a worker petition received on February 28, 1977 which was filed by the International Ladies Garment Workers Union on behalf of workers and former workers producing women's, misses' and children's woven coats at the Hammonton, New Jersey plant of C. & P. Coat Company, Inc.

The notice of investigation was published in the FEDERAL REGISTER on March 15, 1977 (42 FR 14185). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of C. & P. Coat Co., Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely:

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales to production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

Significant Total or Partial Separations

The average number of production workers at C. & P. Coat Co., Inc. decreased 50.0 percent from 1975 to 1976. The average number of hours per week declined 7.1 percent from 1975 to 1976.

Sales or Production, or Both, Have Decreased Absolutely

Production at C. & P. Coat Company in terms of quantity decreased 56.6 percent and in terms of value decreased 42.7 percent from 1975 to 1976.

Increased Imports

Imports of women's, misses' and children's woven coats decreased from 1972 to 1973, from 1,519 thousand dozen units to 1,517 thousand dozen units. In 1974, the volume of imports declined to 1,163 thousand dozen units and increased to 1,211 thousand dozen units in 1975. From 1975 to 1976, imports increased to 1,787 thousand dozen units. The ratios of imports to domestic production and consumption increased from 35.9 percent and 26.4 percent, respectively, in 1975 to 51.7 percent and 34.1 percent, respectively, in 1976.

Contributed Importantly

The manufacturer who supplied two-thirds of C. & P. Coat Company's orders in 1976, increased its contracts with foreign firms from 89.9 percent in 1975 to 95.3 percent in 1976. The share of total contracts held by domestic firms, including C. & P. Coat Company, fell in 1976 from the 1975 levels.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's, misses' and children's coats produced by C. & P. Coat Company, Inc. contributed importantly to the separations of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of C. & P. Coat Company, Inc., Hammonton, New Jersey, who became totally or partially separated from employment on or after February 16, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 28th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-22740 Filed 8-8-77;8:45 am]

[TA-W-1987]

DACO MANUFACTURING, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1987: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 18, 1977, in response to a worker petition received on that date which was filed on behalf of workers and former workers producing men's and boy's trousers at the New Bedford, Mass., warehouse and offices of Daco Manufacturing, Inc.

The petition was expanded by the Department of Labor to include workers at the New York, N.Y., sales office of Daco Manufacturing, Inc., and the Kennedy, Ala., plant of Kennedy Manufacturing, Inc., a wholly-owned subsidiary of Daco Manufacturing, Inc.

The notice of investigation was published in the FEDERAL REGISTER on May 6, 1977 (42 FR 23215). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Daco Manufacturing, Inc., it customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened or become totally or partially separated:

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

Significant Total or Partial Separations

For purposes of this determination, the firm is defined as Daco Manufacturing, Inc., together with its wholly-owned subsidiary, Kennedy Manufacturing, Inc.

Average employment increased 7 percent in 1975 from 1974, decreased 8 percent in 1976 from 1975, and decreased 22 percent in the first quarter of 1977 compared to the first quarter of 1976.

Sales or Production, or Both, Have Decreased Absolutely

Daco's total sales, in value, declined 3 percent, from 1974 to 1975, 30 percent from 1975 to 1976 and 59 percent in the first quarter of 1977 compared to the first quarter of 1976.

Daco's sales of trousers declined 15 percent in quantity from 1974 to 1975, 31 percent from 1975 to 1976, and increased less than 0.5 percent in the first quarter of 1977 compared to the first quarter of 1976.

Daco's sales of leisure suits declined 72 percent in quantity from 1975 to 1976 when sales were discontinued.

Production of trousers (including the slacks sold as part of leisure suits) increased 17 percent in 1975 from 1974, decreased 30 percent in 1976 from 1975 and decreased 46 percent in the first quarter of 1977 compared to the first quarter of 1976.

Increased Imports

Imports of men's and boy's dress and sport trousers and shorts, in absolute terms and relative to domestic production, decreased in 1973 from 1972 and in 1974 from 1973 and increased in 1975 from 1974. Imports increased 32 percent from 55,508,000 units in 1975, 34.1 percent of domestic production, to 73,209,000 units in 1976, 41.9 percent of domestic production. Imports in the first quarter of 1977 were 17,152,000 units, 20 percent higher than the 14,623,000 units imported in the first quarter of 1976.

Contributed Importantly

Customers of Daco indicated that they have decreased purchases of trousers from Daco and have increased purchases of imported trousers.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's and boys' trousers produced at Daco Manufacturing, Inc., contributed importantly to the total or partial separation of workers at Daco and its affiliate and subsidiary. In accordance with the provisions of the Act, I make the following certification:

All workers at the New Bedford, Mass. warehouse and corporate office and the New York, N.Y., sales office of Daco Manufacturing, Inc., and the Kennedy, Ala., plant of Kennedy Manufacturing, Inc., who became totally or partially separated from employment on or after April 15, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 28th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-22741 Filed 8-8-77;8:45 am]

[TA-W-1675]

GAYTONE FABRICS, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1675: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 24, 1977, in response to a worker petition received on February 7, 1977, which was filed on behalf of workers and former workers at Gaytone Fabrics, Inc., New York, N.Y.

The notice of investigation was published in the FEDERAL REGISTER on March 8, 1977 (42 FR 13085). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Gaytone Fabrics, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, the American Textile Manufacturers Institute, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

Significant Total or Partial Separations

Average employment at Gaytone increased 10.0 percent from 1974 to 1975 and increased 9.1 percent from 1975 to 1976. Employment began to decline in the second quarter of 1976. Employment declined 16.7 percent in the most recent four quarter period, from April 1976 to March 1977 compared to the like period of the previous year (April 1975 to March 1976).

Sales or Production, or Both, Have Decreased Absolutely

Total sales of printed fabric at Gaytone increased 101.6 percent from 1974 to

1975 and then declined 65.7 percent from 1975 to 1976. Sales increased in the first quarter of 1976 compared to the same period in 1975 and then declined in each of the subsequent quarters in 1976 compared to the respective quarter in 1975.

INCREASED IMPORTS

Imports of cotton broadwoven print cloth declined absolutely from 1972 to 1973, increased from 1973 to 1974, declined 10.5 percent from 1974 to 1975 and then increased 55.6 percent from 1975 to 1976. The ratio of imports to domestic production and consumption increased from 13.5 percent and 12.9 percent, respectively, in 1975 to 20.6 percent and 19.8 percent, respectively, in 1976.

Imports of man-made woven printed fabric declined absolutely from 1972 to 1973, increased from 1973 to 1974, declined 0.8 percent from 1974 to 1975 and then increased 23.5 percent from 1975 to 1976. The ratio of imports to domestic production and consumption remained less than one percent from 1972 through 1976.

CONTRIBUTED IMPORTANTLY

The petition alleges that increased imports of apparel adversely affected sales and employment at Gaytone Fabrics. Manufacturers, who are customers of Gaytone, stated that imports of apparel have been a factor in reduced business with Gaytone. Imported wearing apparel cannot be considered to be like or directly competitive with printed fabric. Imports of fabrics must be considered in determining import injury to workers producing printed fabric.

Customers of Gaytone are manufacturers who purchase finished fabric for use in the manufacture of men's and women's wearing apparel. The customers stated that imports of fabric have been a definite influence in the market for finished fabric. During the course of several investigations of firms involved in the printing and finishing of fabric (see TA–W–1628 through 1633), apparel manufacturers and converters were contacted. Converters, in general, do not import printed or finished fabric. However, some converters have recently begun to import fabric. The Department's survey of apparel manufacturers revealed that manufacturers are importing printed or finished fabric. There is a growing trend toward manufacturers bypassing converters and purchasing finished fabric offshore or purchasing the finished fabric domestically through foreign trading companies.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with printed textiles produced at Gaytone Fabrics, Inc., New York, N.Y., contributed importantly to the total or partial separations of the workers at that company. In accordance with the provisions of the Act, I make the following certifications:

All workers at Gaytone Fabrics, Inc., New York, N.Y., who became totally or partially separated from employment on or after April 1, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 28th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77 22742 Filed 8–8–77;8:45 am]

[TA–W–1887]

H & M DRESS

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA–W–1887: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 23, 1977, in response to a worker petition received on March 23, 1977, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' and children's sportswear at the two Wilkes-Barre, Pa., plants of H & M Dress.

The notice of investigation was published in the FEDERAL REGISTER on April 12, 1977 (42 FR 19176). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of H & M Dress, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers at both plants of H & M declined 41 percent in 1975 compared to 1974 and 17.4 percent in 1976 compared to 1975. Employment declined 10.3 percent in the first five months of 1977 compared to the same period in 1976. H & M closed its smaller plant on June 24, 1977.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production at both of H & M's plants increased 18.8 percent in 1975 compared to 1974 and then declined 2.4 percent in 1976 compared to 1975. Production declined 22.9 percent in the first quarter of 1977 compared to the same quarter in 1976.

INCREASED IMPORTS

Imports of woven women's, misses', and children's slacks and shorts declined from 5.655 million dozens in 1972 to 4.584 million dozens in 1974, and then increased to 5.439 million dozens in 1975 and to 6.922 million dozens in 1976. Imports increased from 1.912 million dozens in the first quarter of 1976 to 2.034 million dozens in the same quarter in 1977.

CONTRIBUTED IMPORTANTLY

The evidence developed during the course of the Department's investigation revealed that the sportswear manufacturer which accounted for most of H & M's production from 1974 to the present started contracting production of children's slacks in 1975 with foreign sources and has been doing so up to the present. Production contracted by the manufacturer to foreign sources approximately doubled in 1976 compared to 1975. This manufacturer's contracts to H & M Dress declined 19 percent in 1975 compared to 1974 and 18 percent in 1976 compared to 1975.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with ladies' and children's sportswear produced at the Wilkes-Barre, Pa., plants of H & M Dress contributed importantly to the total or partial separation of the workers of those plants. In accordance with the provisions of the Act, I make the following certification:

All workers at the Wilkes-Barre, Pa., plants of H & M Dress, who became totally or partially separated from employment on or after May 24, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 28th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77–22743 Filed 8–8–77;8:45 am]

[TA–W–1848]

INTERNATIONAL SHOE CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA–W–1848: Investigation regarding certification of eligibility to apply for

adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 22, 1977, in response to a worker petition received on March 21, 1977, which was filed on behalf of workers and former workers transporting men's, women's and children's shoes for the International Shoe Co. based at the Gratiot Street Truck Terminal, St. Louis, Mo.

The notice of investigation was published in the FEDERAL REGISTER on April 4, 1977 (42 FR 18156). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the International Shoe Co., its customers, the Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relatively to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average employment of truck drivers at the Gratiot Street Truck Terminal declined 32 percent from 1974 to 1975 and increased 6 percent from 1975 to 1976. Employment declined 22 percent in the first quarter of 1977 compared to the first quarter of 1976. Since the truck drivers transport shoes and supplies between International's production plants and the warehouse, employment at the Terminal is dependent on the production levels at all of International's plants.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Total shoe production for all of International's plants declined 27 percent in quantity from 1974 to 1975 and declined 3 percent from 1975 to 1976. Production declined 37 percent in the first two months of 1977 compared to the same period of 1976.

INCREASED IMPORTS

Imports of men's, youths' and boys' dress and casual footwear increased absolutely from 1972 to 1973, declined from 1973 to 1974 and increased from 1974 to 1975. Imports increased 33.1 percent in quantity from 1975 to 1976, and increased 8.1 percent in the first quarter of 1977 compared to the first quarter of 1976.

The ratio of imports to domestic production increased from 69.4 percent in the first quarter of 1976 to 89.1 percent in the first quarter of 1977.

Imports of women's and misses' nonrubber footwear, except athletic, increased absolutely from 1972 to 1973, declined from 1973 to 1974 and increased from 1974 to 1975. Imports increased 2.5 precent in quantity from 1975 to 1976, and then declined 18.9 percent in the first quarter of 1977 compared to the first quarter of 1976. The ratio of imports to domestic production increased from 111 percent in the first quarter of 1976 to 119.9 percent in the first quarter of 1977.

Imports of children's nonrubber footwear, except athletic declined absolutely each year from 1972 to 1975. Imports increased 42.3 percent in quantity from 1975 to 1976, and declined 4 percent in the first quarter of 1977 compared to the first quarter of 1976. The ratio of imports to domestic production increased from 76.9 percent in the first quarter of 1976 to 106.7 percent in the first quarter of 1977.

CONTRIBUTED IMPORTANTLY

The truck fleet at the Gratiot Street Terminal is owned and operated exclusively by International. The shipment of shoes and supplies between the company's plants and the warehouse are part of an integrated multi-plant shoe production operation. The decline in employment of truck drivers during the first quarter of 1977 was due to the reduced produciton of footwear by International Shoe Co. plants.

Evidence developed in the Department's investigation of this petition and other petitions on behalf of workers producing women's, men's and children's shoes at various International Shoe Co. plants revealed that increased imports of footwear like or directly competitive with footwear produced by international contributed importantly to the absolute decline in sales or production and to the separation of employees from International Shoe Co. plants producing and transporting such footwear.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's, women's and children's footwear transported by workers at the Gratiot Street Truck Terminal of the International Shoe Co. contributed importantly to the total or partial separation at the workers of that terminal. In accordance with the provisions of the Act, I make the following certification:

All workers at the Gratiot Street Truck Terminal of the International Shoe Co., St Louis, Mo., who became totally or partially separated from employment on or after January 1, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C., this 28th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc 77–22744 Filed 8–8–77;8:45 am]

[TA–W–82T]

INTERNATIONAL SHOE CO.

Termination of Investigation

Pursuant to Section 223(d) of the Trade Act of 1974 and 29 CFR Part 90.17(d) a termination investigation was initiated on July 28, 1976 to determine, with respect to the certification issued on September 12, 1975 whether total or partial separations from the Jackson, Missouri plant of International Shoe Company are no longer attributable to the conditions specified in such certification.

Notice of Investigation Regarding Termination of Certification of Eligibility to Apply for Worker Adjustment Assistance was published in the FEDERAL REGISTER on August 10, 1976 (41 FR 33596). No public hearing was requested and none was held.

The existing certification will expire on September 12, 1977. Since workers newly separated, totally or partially, after September 12, 1977 would be ineligible to apply for adjustment assistance, termination of the certification by the Secretary of Labor within 90 days from statutory termination would serve no purpose; consequently the investigation has been terminated.

Signed at Washington, D.C. this 21st day of July 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc 77–22745 Filed 8–8–77;8:45 am]

[TA–W–1489] and [TA–W–1490]

MAHONING VALLEY DISTRICT, WARREN AND NILES, OHIO, PLANTS, REPUBLIC STEEL CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the result of TA–W–1489, 1490: Investigations regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigations were initiated on December 15, 1976 in response to worker petitions received on that date which were filed by the United Steelworkers of America on behalf of workers and former workers producing various steel products at the Mahoning Valley District, Warren and Niles, Ohio plants of the Republic Steel Corporation, Cleveland, Ohio.

The notice of investigation was published in the FEDERAL REGISTER on January 11, 1977 (42 FR 2379). No public hearing was requested and none was held.

The information upon which the determinations were made was obtained principally from officials of the Republic Steel Corporation and its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, the United Steelworkers of America, the American Iron and Steel Institute, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that without regard to whether any of the other criteria have been met, criterion (2) has not been met.

FINDINGS OF THE INVESTIGATION

Raw steel production at the Warren, Ohio plant declined 25.3 percent from 1974 to 1975 and then increased 30.3 percent from 1975 to 1976.

Total shipments at the Warren and Niles plants combined declined 32.9 percent from 1974 to 1975 and then increased 32.9 percent from 1975 to 1976.

The following three products accounted for 83 percent of total shipments in 1976: Hot rolled carbon sheet, cold rolled carbon sheet, and galvanized steel. Hot rolled carbon strip, silicon steel, hot and cold rolled alloy sheet and strip and alloy and carbon plate accounted for the remaining portion of shipments.

Shipments of hot rolled carbon sheet declined 18.0 percent from 1974 to 1975 and then increased 48.6 percent from 1975 to 1976.

Shipments of cold rolled carbon sheet declined 33.8 percent from 1974 to 1975 and then increased 66.3 percent from 1975 to 1976.

Shipments of galvanized steel declined 54.8 percent from 1974 to 1975 and then increased 27.4 percent from 1975 to 1976.

Total shipments of hot rolled carbon sheet, cold rolled carbon sheet and galvanized steel increased in each quarter of 1976 compared to the respective quarter in 1975.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that sales or production of hot and cold rolled carbon sheet and galvanized steel at the Warren and Niles, Ohio plants in the Mahoning Valley District of the Republic Steel Corporation, Cleveland, Ohio have not declined as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 28th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-22746 Filed 8-8-77;8:45 am]

[TA-W-1786]

MEADE KNITTING MILLS, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1786: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 10, 1977 in response to a worker petition received on March 10, 1977 which was filed on behalf of workers and former workers producing children's sweaters at the Cherryville, North Carolina plant of Meade Knitting Mills, Incorporated.

The notice of investigation was published in the FEDERAL REGISTER on March 25, 1977 (42 FR 16200). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Meade Knitting Mills, Incorporated, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, the investigation revealed that criterion (1) has not been met.

Average employment of production workers at the Cherryville, North Carolina plant of Meade Knitting Mills increased 37.5 percent in 1976 compared to 1975, increasing in each quarter of 1976 compared to the same quarters in 1975. Average employment increased 1.3 percent in the first quarter of 1977 compared to the same quarter in 1976. There is no indication that current workers are threatened with any involuntary separations from employment at the Cherryville, North Carolina plant.

As stated in the petition, the workers at Meade Knitting Mills, Incorporated are seeking adjustment assistance benefits for unemployment experienced during 1975. Section 223(b)(1) of the Trade Act of 1974 states that a certification shall not apply to workers separated more than one year before the date of the petition. The petition was dated March 10, 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, it is concluded that a significant number or proportion of workers engaged in the production of children's sweaters at the Cherryville, North Carolina plant of Meade Knitting Mills, Incorporated have not become totally or partially separated as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 28th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-22747 Filed 8-8-77;8:45 am]

[TA-W-1416]

NEW JERSEY STEEL AND STRUCTURAL CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1416: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 14, 1976 in response to a worker petition received on December 14, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing carbon steel reinforcing bar at New Jersey Steel and Structural Corporation, Sayreville, New Jersey.

The Notice of Investigation was published in the FEDERAL REGISTER on January 4, 1976 (42 FR 892). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from the United Steelworkers of America and New Jersey Steel and Structural Corporation.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any other criteria have been met, criteria (1) and (2) have not been met.

New Jersey Steel and Structural Corporation produces carbon steel reinforcing bar at its Sayreville, New Jersey plant. Dollar sales and unit production increased 33.9 percent and 52.9 percent, respectively, from 1975 to 1976. Production in each quarter of 1976 was higher than production in the corresponding quarter of 1975.

Employment at the Sayreville, New Jersey plant increased 12.5 percent from 1975 to 1976. Employment in each quarter of 1976 was greater than or equal to employment in the corresponding quarter of 1975.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that sales and production have not declined and that separations of workers have not occured as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 28th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-90T]

NICE DIVISION OF SKF INDUSTRIES, INC.

Termination of Investigation

Pursuant to Section 223(d) of the Trade Act of 1974 and 29 CFR Part 90.17 (d) a termination investigation was initiated on May 27, 1976 to determine, with respect to the certification issued on September 22, 1975, whether total or partial separations from the Nice Bearing Division of SKF Industries, Philadelphia, Pennsylvania are no longer attributable to the conditions specified in such certification.

Notice of Investigation Regarding Termination of Certification of Eligibility to Apply for Worker Adjustment Assistance was published in the FEDERAL REGISTER on June 25, 1976 (41 FR 26296), correction document published July 6, 1976 (41 FR 27800). No public hearing was requested and none was held.

The existing certification will expire on September 22, 1977. Since workers newly separated, totally or partially, after September 22, 1977 would be ineligible to apply for adjustment assistance, termination of the certification by the Secretary of Labor within 90 days from statutory termination would serve no purpose; consequently the investigation has been terminated.

Signed at Washington, D.C., this 21st day of July 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc 77-22749 Filed 8-8-77;8:45 am]

[TA-W-2126]

STEPHEN P. PARSON CO., INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1226: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on June 7, 1977 in response to a worker petition received on June 6, 1977 which was filed by employees of the Stephen P. Parson Company on behalf of workers and former workers of the Stephen P. Parson Company, Incorporated, Woburn, Massachusetts who were engaged in providing sales services for leather and footwear firms.

The Notice of Investigation was published in the FEDERAL REGISTER on June 17, 1977 (42 FR 30936). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Stephen P. Parson Company, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

If any one of the criteria is not met, a negative determination must be made.

The Stephen P. Parson Company is a manufacturer's sales representative in the New England area for the Gutman Leather Company, a manufacturer of shoes and related leather items. The Gutman Leather Company is located at 1511 Webster Avenue, Chicago, Illinois. The Stephen P. Parson Company is not owned by nor is it a subsidiary of the Gutman Leather Company. The Stephen P. Parson Company sells shoes manufactured by the Gutman Leather Company.

The Stephen P. Parson Company, Inc. does not produce an article within the meaning of Section 222 (3) of the Act and this Department has already determined that the performance of services are not covered by the adjustment assistance program. See Notice of Negative Determination *Pan American World Airways, Incorporated* (TA-W-153, 40 FR 54639). The only question in this case is whether the Gutman Leather Company, i.e., a firm which produces an article, namely footwear, and for whom the service is provided, can be considered the "workers' firm". See Notice of Determination in *Nu-Car Driveaway, Incorporated* (TA-W-393, 41 FR 12749).

Stephen P. Parson Co., Inc. provides sales services for the Gutman Leather Co., Inc., Chicago, Illinois.

Neither Stephen P. Parson Co., Inc. on the one hand, nor Gutman Leather Co., Inc. on the other, is financially or otherwise involved in the business of the other.

The workers for whose benefit this petition was filed were hired and are paid by Stephen P. Parson Co., Inc. They are supervised by and subject to the control of Stephen P. Parson Co., Inc. per-

sonnel only. All employment benefits which they enjoy are provided and maintained by the Stephen P. Parson Co., Inc.

CONCLUSION

After careful review of the facts obtained in the investigation, I have determined that services of the kind provided by the Stephen P. Parson Co., Inc. are not "articles" within the meaning of Section 222 (3) of the Trade Act of 1974 and that the Gutman Leather Co., Inc. cannot be considered the "workers' firm." The petition for trade adjustment assistance is, therefore, denied.

Signed at Washington, D.C. this 28th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-22750 Filed 8-8-77;8:45 am]

[TA-W-1756]

TERRI LEE

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1756: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 3, 1977 in response to a worker petition received on March 1, 1977 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing women's coats at the Upland, California plant of Terri Lee.

The Notice of Investigation was published in the FEDERAL REGISTER on March 22, 1977 (42 FR 15477). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Terri Lee, its customers, the National Cotton Council, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm, or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average weekly employment declined 18 percent in 1975 from 1974, remained the same in the first quarter of 1976 as the first quarter of 1975 and ceased in May 1976 when the plant closed.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales and production declined 19 percent in 1975 from 1974 and 84 percent in 1976 from 1975. The company closed in May 1976. Quarterly production was not available.

All production was to order, so production equals sales.

INCREASED IMPORTS

Imports of women's, misses' and children's coats and jackets increased in absolute terms in 1973 from 1972, decreased in 1974 from 1973 and increased in 1975 from 1974. Imports increased from 1,517,000 dozen in 1975 to 2,252,000 dozen in 1976, an increase of 48 percent. Relative to domestic production imports decreased from 1972 to 1973 and from 1973 to 1974 an increased from 1974 to 1975. Imports increased from 35.4 percent of domestic production in 1975 to 52.2 percent in 1976.

CONTRIBUTED IMPORTANLY

Terri Lee produced exclusively for one manufacturer. This manufacturer does not buy imported women's coats. Customers of the manufacturer were contacted and they indicated that they had decreased purchases from the manufacturer and increased purchases of imported women's coats.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's coats produced at the Upland, California plant of Terri Lee contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Upland, California plant of Terri Lee who became totally or partially separated from employment on or after February 15, 1976 and before August 1, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 29 of the Trade Act of 1974.

Signed at Washington, D.C. this 28th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

INVESTIGATIONS REGARDING CERTIFICATIONS OF ELIGIBILITY TO APPLY FOR WORKER ADJUSTMENT ASSISTANCE

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relates, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 19, 1977.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 19, 1977.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 25th day of July 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

NATIONAL SCIENCE FOUNDATION

AD HOC ADVISORY PANEL FOR THE VERY LARGE ARRAY

Open Meeting

In accordance with the Federal Advisory Committee Act, Public Law 92-463, the National Science Foundation announces the following meeting:

NAME: Ad Hoc Advisory Panel for the Very Large Array.

DATE: August 31, 1977.

TIME: 9:30 a.m.

PLACE: Room 628, National Science Foundation, 1800 G Street, N.W., Washington, D.C. 20550.

TYPE OF MEETING: Open.

CONTACT PERSON:

Mr. Claud M. Kellett, Executive Secretary, Ad Hoc Advisory Panel for the Very Large Array, Room 618, National Science Foundation, Washington, D.C. 20550, telephone 202-632-7340. Anyone who plans to attend should notify Mr. Kellett prior to the meeting.

SUMMARY MINUTES: May be obtained from the Committee Management Coordination Staff, Management Analysis Office, Room 248, National Science Foundation, Washington, D.C. 20550.

PURPOSE OF ADVISORY PANEL: To advise the Director of the National Science Foundation concerning the management and future planning of the Very Large Array (VLA) Program of the National Radio Astronomy Observatory.

SUMMARY AGENDA

9:30 a.m.—Chairman's Remarks Concerning Preparation of Report.

9:45 a.m.—Presentation and Discussion of Findings—VLA Program Management (Including Transition to Operations).

10:45 a.m.—Break.

11 a.m.—Presentation and Discussion of Findings—VLA Technical Plans, Activities, and Achievements.

Noon—Recess.

1 p.m.—Presentation and Discussion of Findings—VLA Long-Range Plans.

2 p.m.—Discussion of Conclusions and Recommendations.

2:30 pm.—Break.

2:45 p.m.—Continued Discusison of Conclusions and Recommendations.

3:30 p.m.—Assignment of Writing Tasks and Scheduling.

4 p.m.—Adjourn.

Dated: August 3, 1977.

M. REBECCA WINKLER,
Acting Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

RISK ASSESSMENT REVIEW GROUP

Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of an open meeting of the Risk Assessment Review Group of the U.S. Nuclear Regulatory Commission (NRC), to be held at 9:00 a.m. on August 24 and 25, 1977 in Room 1062 of the Matomic Building, 1717 H Street NW., Washington, D.C.

On July 7, 1977 (42 FR 34955), NRC announced the establishment of the Review Group for the purpose of providing advice and information to the Commission regarding the final report of the Reactor Safety Study, WASH 1400 (NUREG-75/014), and the peer comments on the Study, advice and recommendations on developments in the field of risk assessment methodology and future courses of action which should be taken to improve this methodology and its application. The Review Group will submit a report to the Commission on or before December 31, 1977.

In carrying out these assignments, it is anticipated that a number of working sessions will be scheduled at different locations, with notification to the public well in advance of each meeting. It is anticipated that all sessions of the Review Group will be open to the public.

The purpose of the instant meeting is to review peer comments on the final report of the Reactor Safety Study. Peer group comments on the final report of the Study include testimony presented to Congressional Committees and the Advisory Committee on Reactor Safeguards, letters to NRC, technical articles such other information as may come to the attention to the Review Group. The Review Group will hear presentations by and hold discussions with representatives of the NRC Staff and their consultants and with commentators on the Study. At the conclusion of these presentations, the Review Group may caucus to determine whether the matters identified have been adequately covered. The Chairman of the Review Group is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted session from one day to the next.

With respect to public participation in the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing 15 readily reproducible copies to the Review Group at the beginning of the meeting. Comments should be limited to areas within the Group's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than August 17, 1977 to Dr. John H. Austin, Office of Policy Evaluation, NRC, Washington, D.C. 20555, will normally be received in time to be considered at this meeting. Comments should be based on the final report of the Reactor Safety Study, copies of which are available for public inspection at:

1. The NRC Public Document Room, 1717 H Street, N.W., Washington, 20555
2. The NRC's five Regional Offices of Inspection and Enforcement:

Region I, 631 Park Avenue, King of Prussia, Pa. 19406.
Region II, Suite 1217, 230 Peachtreet Street, Atlanta, Ga. 30303.
Region III, 799 Roosevelt Road, Glen Ellyn, Ill. 60137.
Region IV, Suite 1000, 611 Ryan Plaza Drive, Arlington, Tx. 76012.
Region V, Suite 202, 1990 N. California Boulevard, Walnut Creek, Calif. 94596.

Copies of the Final Report may be obtained from:

U.S. Nuclear Regulatory Commission, Office of Nuclear Regulatory Research, Probabilistic Analysis Branch, Att: Melea S. Fogle (telephone: 301-492-8377), 7735 Old Georgetown Road, Bethesda, Md. 20014.

(b) Persons desiring to make an oral statement at the meeting should make a

request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangement can be made. The time allotted for such statements will be at the discretion of the Chairman. The Review Group will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on August 23, 1977 to the Office of Policy Evaluation (telephone 202/254-5184, Attn: Dr. John H. Austin) between 8:15 a.m. and 5:00 p.m., EDT.

(d) Questions may be propounded only by members of the Review Group.

(e) Statements of views or expressions of opinion made by members of the Review Group at open meetings are not intended to represent final determinations or beliefs.

(f) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session. Recordings will not be permitted during the meeting.

(g) A copy of the minutes of the meeting will be available for inspection on or after October 24, 1977, at the NRC Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555. Copies may be obtained upon payment of appropriate charges.

Dated: August 8, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-13821; File No. SR-NYSE-76-34]

[Release No. 34-13821; File No. SR-NYSE-76-34]

NEW YORK STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on July 29, 1977 the NYSE filed Amendment No. 1 to the proposed change to Rule 405 which was initially filed with the Securities and Exchange Commission on June 14, 1976 and published in Securities Exchange Act Release No. 34-12674 (July 30, 1976) and 41 FR 34136 (August 12, 1976). The following incorporates the revisions to the Supplementary Material and constitutes the text of the proposed rule change.

TEXT OF PROPOSED RULE CHANGES

Rule 405. (a)—(1) *Every member organization is required to make reasonable effort to ascertain the essential facts relative to every customer, every account and every person holding power of attorney over any account serviced by such member organization.*

(2) Every member, *allied member, registered representative,* or other sales person [organization] is required [through a general partner, a principal executive or a person or persons designated under the provisions of Rule 342(b)(1) (¶2342)] to [(1) Use due diligence] *make reasonable effort to ascertain* [learn] the essential facts relative to every customer, [every order,] every [cash or margin] account [accepted or carried by such organization] and every person holding power of attorney over any account [accepted or carried by such organization] *serviced by such member, allied member, registered representative, or other sales person.*

[SUPERVISION OF ACCOUNTS]

(b)—*Every member organization which services an account is required, through a person or persons designated under the provisions of Rule 342 (b)(1) to:*

[(2)] (1) Supervise *compliance with the provisions of Rule 405(a) by every member, allied member, registered representative or other sales person of such member organization* [diligently all accounts handled by registered representatives of the organization].

[(3)] (2) Specifically approve the opening of an account prior to or promptly after the completion of any transaction for the account of or with a customer, provided, however, that in the case of branch offices, the opening of an account for a customer may be approved by the manager of such branch office but the action of such branch office manager shall within a reasonable time be approved by [a general partner, a principal executive officer or] a person [or persons] designated under the provisions of Rule 342(b)(1)(¶2342). The [member, general partner, officer or] designated person approving the opening of the account shall, prior to giving [his] approval, be [personally] informed as to the essential facts relative to the customer and [to the nature of] the proposed account and shall indicate [his] approval in writing on a document which is part of the permanent records of [his office or] *the member* organization.

* * * *Supplementary Material:*

.10 Application of Rule 405 (a) and (b)

For purposes of this rule: (a) the member, allied member, registered representative or other sales person servicing an account shall be deemed to be the person having direct contact with the customer, i.e., the person accepting orders or rendering reports;

(b) in the case of accounts that are introduced to a member or member organization on a disclosed basis, the introducing organization shall be deemed to be servicing the account.

.20 Common Purchase and Sale Accounts

To facilitate the isolated and unsolicited purchase or sale of securities valued at $2,000 or less for a person who does not have an account, member organizations are not required to comply with Rule 405 (a) and (b) or Rule 409. Instead a common purchase or sale account may be established for this purpose provided:

(a) In the case of a purchase:

(1) Full payment is received prior to the execution of the order, except in the case of securities being distributed pursuant to a prospectus or offering circular;

(2) A confirmation is sent to the customer; and

(3) Prompt delivery of the security is made to the customer.

(b) In the case of sales:

(1) The securities are not part of any distribution and are received in good delivery form at or prior to the entry of the order in the exact amount to be sold;

(2) The customer is identified as the individual in whose name the securities are registered;

(3) A confirmation is sent to the customer; and

(4) Full payment to the customer is made on or immediately following settlement date.

The record for transactions executed in common purchase and sale accounts shall include: customer's name and address, name and amount of securities, date and amount of deposit, if any, date securities are received or delivered, date bought or sold, amount per share, total amount debited or credited to the account, total amount of check issued or received by customer, and date of disbursement.

For purposes of this rule the term "isolated" shall mean no more than five (5) common purchase and sale account transactions for a customer during any 12 month period, unless otherwise approved in writing by the Exchange.

[(4) Common Sales Accounts]

[To facilitate the isolated liquidation of securities valued at $1,000 or less registered in the name of an individual who does not have an account, and which are not part of any distribution, a member organization may sell the securities through a common sales account set up for the specific purpose of handling such sales without sending a periodic statement to the customer as required by Rule 409, provided:

(a) The customer is identified as the individual in whose name the securities are registered,

(b) The securities are received by the member, at or prior to the time of the entry of the order, in the exact amount to be sold in good delivery form.

(c) A confirmation is sent to each customer.

(d) All proceeds of such sales are paid out on or immediately following settlement date, and

(e) The record made in the common sales account includes as to each transaction: customer's name and address, name and amount of securities to be sold, date received, date sold, amount per share, total amount credited to the account, total amount of check issued to the customer and the date of disbursement.].

[* * * Supplementary Material:]

[.10 Application of Rule 405 (1) and (3) (¶2405).—In the case of a margin account carried by a member organization for a non-member corporation, definite knowledge should be had to the effect that the non-member corporation has the right under its Charter and By-laws to engage in margin transactions for its own account and that the persons from whom orders and instructions are accepted have been duly authorized by the corporation to act on its behalf. It is advisable in each such case for the carrying organization to have in its possession a copy of the corporate Charter, By-laws and authorizations. Where it is not possible to obtain such documents, a member or allied member in the member organization carrying the account should prepare and sign a memorandum for its files indicating the basis upon which he believes that the corporation may properly engage in margin transactions and that the persons acting for the corporation have been duly authorized to do so.]

[In the case of a cash account carried for a non-member corporation, the carrying member organization should assure itself through a general partner or an officer who is a holder of voting stock that persons entering orders and issuing instructions with respect to the account do so upon the proper authority.]

[When an agency account is carried by a member organization its files should contain the name of the principal for whom the agent is acting and written evidence of the agent's authority.]

[When Estate and Trustee accounts are involved a member organization should obtain counsel's advice as to the documents which should be obtained.]

[In the case of accounts which are introduced by one member or member organization to another and are carried on a disclosed basis, the introducer will not be held to any responsibility under Rule 405 (1) and (3) (¶ 2405) when the essential facts concerning a particular customer are obtained directly by the clearing organization and the opening of the account is approved by a member or allied member in the clearing organization "prior to or promptly after the completion of any brokerage transaction" and that is the understanding between the two.]

[As an alternative method of handling the investigation and approval of such accounts the clearing organization may treat the introducing organization, for the purposes of Rule 405 (1) and (3) (¶ 2405), as though it were its branch office. Under these circumstances, the introducer will learn the essential facts with respect to each customer, and a general partner, a principal executive officer or a person or persons designated under the provision of Rule 342(b)(1) (¶ 2342) of the introducing organization will give give an approval for the opening of the account. The information obtained must subsequently be passed upon by a member or allied member in the clearing organization and any further inquiry which the clearing organization might feel is desirable should be made. However, the mere fact that the account is being introduced by another member, or member organization is not sufficient information to permit a member or allied member in the carrying organization to approve the opening of the account.]

[Information as to the country of which a customer is a citizen is deemed to be an essential fact.]

NYSE STATEMENT OF PROPOSED RULE CHANGES

Rule 405 currently requires every member organization, through a general partner, principal executive officer or other designated person to use due diligence to learn the essential facts relative to every customer, order, and account accepted or carried by a member organization. The Rule further provides for the supervision of accounts handled by registered representatives and the approval of all new accounts. The supplementary material of the Rule contains provisions for common sales accounts, treatment of cash and margin accounts carried for non-member corporations, and delineation of responsibilities of introducing and carrying member organizations for compliance with the provisions of the Rule for accounts carried on a disclosed basis.

Because the essential facts and methods of supervision involve so many variables, the requirements have intentionally been left somewhat broad. The Exchange's approach has been to provide member organizations with a set of basic guidelines upon which they must expand appropriately in order to protect the firm's financial position, thereby insuring, in any situation, that the Exchange's facilities are being utilized properly.

Since the inception of Rule 405, substantially increased product lines, greatly expanded markets and a dramatic growth in the number of broker dealer participants in the industry have significantly changed the complexion of the business. Continuing technological advances, proliferation of legal liabilities, and the trend toward broker/dealer specialization in specific aspects of the business, point to the appropriateness of reviewing the applicability and effectiveness of the various provisions of the Rule. The proposed amendments contained herein are designed to conform the Rule with the numerous interpretations of the many facets of Rule 405.

1. *Place initial responsibility to learn the essential facts upon the individual handling the account.* Rule 405 currently places the responsibility for learning the essential facts relative to every customer, order, cash or margin account or person holding power of attorney upon a *general partner, a principal executive officer, or person designated supervisory responsibility under Rule 342.* These procedures would be more efficiently and expeditiously accomplished if initial responsibility to obtain the essential facts rested with the individual handling the account (usually a registered representative). A more thorough initial investigation would avert many problems that can arise if detailed investigation is put off until final approval of an account.

Member organization procedures for collecting and learning essential facts and recommending securities transactions are, for the most part, accomplished by the individual registered representative, member or allied member who actually services the account. As a practical matter, the Exchange has taken the position that, where a member organization requires a registered representative to obtain the essential facts and the registered representative fails to do so, the representative as well as the individual charged with the supervisory responsibility under the Rule, may be charged with a violation of the Rule. The proposed amendments will conform the Rule with its actual interpretation and enforcement.

The proposed amendments would replace the term, "due diligence", with "make reasonable inquiry" because of the implications attached to "due diligence" in connection with underwritings. Also, since initial responsibility for ascertaining the essential facts will now rest with that individual with direct customer contact, a new term "other sales persons" is being introduced to encompass all individuals who may handle customer accounts but who are not required to be registered with the Exchange, such as individuals engaged exclusively in the sale of commodities or insurance.

2. *Provide for common purchase accounts in addition to common sales accounts for the isolated purchase or sale of securities and increase the maximum valuation of securities eligible to be purchased or sold for an individual without opening an account from $1,000 to $2,000.*

The existing provisions permitting the isolated liquidation of securities valued at $1,000 or less would be moved from the amended rule to the Supplementary Material and would be increased from $1,000 to $2,000 to reflect the impact of inflation since the provisions were adopted in 1969. These provisions were originally intended to allow member organizations to sell securities for individuals who had acquired small amounts of stock other than through the member organization, e.g., through inheritance, stock of employer, etc. The Rule allows individuals to dispose of such securities through a member organization without requiring the member organization to incur the expense involved in opening and maintaining an account for the individual. The Exchange believes similar procedures should be established for individuals wishing to make small isolated purchases of securities on a cash basis. The text of these provisions has been rewritten to improve clarity, but the procedures remain unchanged.

3. *Eliminate Supplementary Material which is no longer applicable.* The amendments would eliminate the Supplementary material (Rule 405.10) dealing with the responsibilities of introducing and carrying member organizations for ascertaining the essential facts and approving new accounts. The amended Rule would assign these responsibilities to the servicing member organization—i.e., the member organization accepting the account from the customer. This change would be consistent with establishing a logical progression of responsibility, since the introducing firm generally undertakes the gathering of new

account information; collection of all documentation and agreements necessary to sustain the account, supervision of personnel handling accounts, responsibility for recommendations made by salesmen and, in most instances, executes the order, reporting the execution to the carrying member organization. The carrying member organization, however, would retain responsibility for compliance with Regulation T (margins) and would continue to bear the capital burden for the introduced accounts. Other functions and responsibilities inherent in the carrying relationship could still be contractually allocated.

In the past, the Exchange has always had a higher net capital minimum dollar amount requirement for its members than non-members have had under SEC regulations. However, the new SEC Uniform Net Capital Rule [17 CFR § 240.-15c3-1] imposes similar capital requirements on all requirements on all registered broker/dealers who do business with the public. This uniform capital requirement, coupled with the proposed amendments to Rule 405, underlie the proposal that member organizations not be required to be responsible for ascertaining detailed essential facts for accounts introduced by non-member organizations for which they perform carrying functions only.

Supplementary material containing suggested procedures for the handling of cash and margin accounts for non-member corporations, agency, estate and trust accounts, is being deleted from the Rule and will be more appropriately handled through an Information Memo.

NYSE STATEMENT OF BASIS UNDER THE ACT OF PROPOSED RULE CHANGES

The proposed amendments are consistent with the principles embodied within Section 6(b)(5) of the Act which provides that an exchange shall not be registered as a national securities exchange unless its rules are designed to "prevent fraudulent and manipulative acts and practices." The proposed amendments are consistent with this section in that they enhance the ability of Exchange organizations to protect their capital from undue risks resulting from fraudulent and manipulative acts of customers.

(i) Inapplicable.
(ii) Inapplicable.
(iii) Inapplicable.
(iv) Inapplicable.
(v) The proposed amendments would serve to protect Exchange member organizations' capital from undue risks resulting from fraudulent and manipulative acts. (See Discussion above.)
(vi) Inapplicable.
(vii) Inapplicable.
(viii) Inapplicable.

COMMENT RECEIVED FROM MEMBERS, PARTICIPANTS OF OTHERS ON PROPOSED RULE CHANGES

One comment on the proposed amendments was received from a member organization through the Securities Industry Association with respect to a listing of minimum essential facts, contained in a preliminary draft of the proposed amendments that has subsequently been removed.

NYSE STATEMENT OF BURDEN ON COMPETITION

Inapplicable.

On or before September 13, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and all written submissions will be available for inspection in the Public Reference Room, 1100 L Street NW., Washington, D.C.

Copies of such filing will also be available for inspection at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number reference in the caption above and should be submitted on or before August 29, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

AUGUST 2, 1977.

[Rel. No. 9874; 812-4144]

CONNECTICUT GENERAL LIFE INSURANCE CO. AND CG EQUITY SALES CO.

Application for an Order of Exemption

JULY 29, 1977.

NOTICE IS HEREBY GIVEN that Connecticut General Life Insurance Company ("CG Life"), a Connecticut stock life insurance company, CG Variable Annuity Account I ("VAA-I") and CG Variable Annuity Account II ("VAA-II"), separate accounts of CG Life registered under the Investment Company Act of 1940 ("Act") as unit investment trusts, and CG Equity Sales Company ("Equity Sales"), 900 Cottage Grove Road, Bloomfield, Connecticut 06115; the principal underwriter for VAA-I and VAA-II (hereinafter collectively referred to as "Applicants"), filed an application on June 8, 1977, pursuant to Section 6(c) of the Act for an order exempting Applicants from the provisions of Sections 22(e), 27(c)(1), 27(d), and 27(a)(3) of the Act to the extent necessary to permit compliance by Applicants with certain provisions of the Education Code of the State of Texas, to permit a reduction in sales load where contributions consist of proceeds payable under insurance contracts issued by CG Life and to permit a variance in sales load based upon a schedule of quantity discounts. All interested persons are referred to the application on file with the Commission for a statement of the representations therein which are summarized below.

VAA-I and VAA-II are separate accounts of CG Life established under the laws of Connecticut to facilitate the issuance of certain variable annuity contracts. VAA-I and VAA-II are registered under the Act as unit investment trusts. Assets of VAA-I and VAA-II are invested in shares of Companion Fund, Inc., and Companion Income Fund, Inc., diversified, open-end management investment companies registered under the Act. Contract owners of VAA-I and VAA-II are permitted to allocate purchases and accumulations between Companion Fund, Inc. and Companion Income Fund, Inc. Equity Sales, a broker/dealer registered under the Securities Exchange Act of 1934, as amended, is the principal underwriter of the Contracts. All of the outstanding shares of Equity Sales are owned by CG Investment Management Company, the advisor of Companion Fund, Inc. and Companion Income Fund, Inc. Both CG Life and CG Investment Management Company are wholly-owned subsidiaries of Connecticut General Insurance Corporation.

In 1967, the State of Texas directed the governing boards of all Texas institutions of higher education to make available to certain employees an Optional Retirement Program ("Program"), codified as Subchapter G of Chapter 51 of the Texas Education Code. The statute provides as the funding media for the Program fixed or variable annuity contracts purchased from any insurance or annuity company qualified to do business in Texas. In 1973, the Texas legislature made two amendments in the Program legislation, which amendments became effective on June 14, 1973. The statutory definition of the Program was amended to provide that the benefits of such annuities are to be available only upon termination of employment in the Texas public institutions of higher education, retirement, death or total disability of the participant. The other amendment added a new Section 51.358 to Subchapter G which also provides that the benefits of such annuities will be available only if the participant dies, terminates his employment due to total disability, accepts retirement, or terminates employment in the Texas public institutions of higher education.

Because of uncertainty regarding the effect of these amendments, the University of Texas System ("System") requested the opinion of the Attorney General of Texas with respect to several questions concerning such amendments. The Attorney General rendered an opinion dated February 18, 1975, in response to the System's letter. The Attorney General interpreted Section 51.358 to prohibit provisions in a variable annuity contract issued in connection with the Program on or after June 14, 1973, which provide for making available the redemption value of such contract prior to the occurrence of one of the conditions specified in the statute, i.e., termination of employment, retirement, death or total disability. Moreover, the opinion further stated that the prohibitions of Section 51.358 were impliedly in effect upon the establishment of the Program (in 1967) and that notwithstanding any language which may be contained in existing contracts, a participant in the Program has never had the right to redeem his annuity contract otherwise than in accordance with the limitations described above. The opinion did not affect the right of a participant to transfer the redemption value of his annuity contract from one carrier to another; accordingly, the granting of the relief requested in the application would not affect such right.

Sections 27(c)(1), 22(e) and 27(d). Section 27(c)(1) of the Act makes it unlawful for any registered investment company issuing periodic payment plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate unless such certificate is a redeemable security. Section 2(a)(32) of the Act defines "redeemable security" to mean any security under the terms of which the holder upon its presentation to the issuer or to a person designated by the issuer is entitled to receive approximately his proportionate share of the issuer's current net assets, or the cash equivalent thereof.

Section 22(e) of the Act provides that no registered investment company shall suspend the right of redemption or postpone the date of payment or satisfaction upon redemption of any redeemable security in accordance with its terms for more than seven days after the tender of such security to the company or its agent designated for that purpose for redemption except in certain prescribed circumstances.

Section 27(d) of the Act makes it unlawful for any registered investment company issuing periodic payment plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate unless the certificate provides that the holder thereof may surrender the certificate at any time within the first eighteen months after the issuance of the certificate and receive in payment thereof, in cash, the sum of (1) the value of his account, and (2) an amount, from such underwriter or depositor, equal to that part of the excess paid for sales loading which is over 15 per centum of the gross payments made by the certificate holder.

Applicants request exemptions from the provisions of Sections 22(e), 27(c)(1) and 27(d) of the Act to the extent necessary to permit compliance with Section 51.358 as it pertains to redemption values under Contracts issued to participants in the Program subsequent to the date of such exemptive order.

Applicants assert that if such exemptions are not granted, persons participating in the Program effectively will be denied an opportunity to select as a funding medium for their retirement benefits one of two funding media (the other being fixed annuity contracts) specifically provided in the Texas statute for such purpose. Additionally, participants will be unable to obtain the State's matching contributions for the purchase of an equity-based retirement vehicle. In this respect, the Attorney General's opinion indicated that these matching contributions will encourage participation in the retirement plan but that unrestricted withdrawals prior to retirement might be detrimental to an effective retirement plan. In view of the foregoing, Applicants assert that the Commission should grant the requested exemptions because: (1) The limited restriction on redemption would be voluntarily assumed by participants, i.e., eligible employees are not required to participate in the Program; (2) the restrictions were not formulated nor suggested by Applicants; and (3) participants' relinquishment of the full right of redemption is a reasonable requirement in exchange for the benefits bestowed by the matching contributions of the State of Texas.

Applicants will ensure that appropriate disclosure is made to persons who consider participation in the Program, informing them of the restriction on the availability of redemption values under Contracts to be issued to them. This disclosure will take the form of an appropriate reference in each Prospectus to the restrictions on redemption of these Contracts, as well as requiring each participant, as a part of the determination that the sale of these Contracts is suitable for that participant, to sign a statement indicating that he she is aware that these restrictions will be placed on his her Contract when it is issued. In addition, Equity Sales will review all sales literature that is to be used in conjunction with the sales of these contracts for the existence of material reprsentations that are inconsistent with the restrictions to be placed on these contracts and will instruct the salespeople involved in soliciting in this market specifically to bring this restriction to the attention of the potential participants.

Reduced Sales Load for Insurance Proceeds. Under the Contracts issued by both VAA-I and VAA-II, sales and administration charges are deducted from contributions as indicated by the chart b low:

Amount of total investment[1]	Percentage of deduction (percent)	Portion representing sales charge (percent)	Portion representing administration charge (percent)
Less than $10,000	7.40	6.30	1.20
$10,000 but less than $25,000	6.60	5.40	.60
$25,000 but less than $50,000	5.00	4.50	.40
$50,000 but less than $100,000	4.00	3.80	.10
$100,000 but less than $250,000	2.40	2.20	.30
$250,000 but less than $500,000	.60	1.80	.10
$500,000 but less than $1,000,000	1.50	1.35	.15
$1,000,000 or more	1.00	.90	.10

[1] The amount of total investment refers to the total of the contributions made plus the current value of the account, if there is any.

If a contribution consists of proceeds payable under insurance contracts issued by Connecticut General (the death benefit under life insurance policies, the maturity value of endowment contracts, the cash value of fixed-dollar life insurance and annuity contracts and lump sum cash options available to beneficiaries), a reduced sales and administration charge is deducted from all such contributions as indicated by the following table:

Amount of total investment[1]	Percentage of deduction (percent)	Portion representing sales charge (percent)	Portion representing admin-tration charge (per c
Less than $10,000	5.25	4.05	[illegible]
$10,000 but less than $25,000	4.20	3.60	[illegible]
$25,000 but less than $50,000	3.50	3.00	.50
$50,000 but less than $100,000	2.80	2.30	.50
$100,000 but less than $250,000	2.10	1.80	.30
$250,000 but less than $500,000	1.50	1.35	.15
$500,000 but less than $1,000,000	1.05	.90	.15
$1,000,000 or more	.70	.60	.10

[1] The amount of total investment refers to the total of the [illegible] made plus the current value of the account, if there is any.

Section 27(a)(3). Section 27(a)(3) of the Act makes it unlawful for any registered investment company issuing periodic payment plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate if the amount of the sales load deducted from any one of the first twelve monthly payments exceeds proportionately the amount deducted from any other such payment or if the amount of sales load deducted from any subsequent payment exceeds proportionately the amount deducted from any other subsequent payment.

With respect to Flexible Payment Deferred Contracts, which are non-tax-qualified individual variable annuity contracts participating in VAA-II, it is possible that the percentage of sales load deducted from subsequent payments, if any, could be higher than the percentage deducted from prior payments. This could occur in two instances. First, there would be a variance in sales loads if insurance proceeds constituted part of the payments made. Thus, if payments during the first contract year amounted to $2,000, the deduction for sales and administrative expenses would be at the

rate of 7.50 percent. If an additional $2,000 were contributed later, and that amount represented insurance proceeds, the percentage deduction would be at a rate of 5.25 percent. Finally, if a third $2,000 were contributed after the above two contributions, and if that amount did not consist of insurance proceeds, a 7.5 percent deduction would be applied to that payment. This would violate Section 27(a)(3). Second, there is a possibility that the percentage of sales load deducted against a later payment could increase due to a significant loss in the accumulation value of units of VAA–I or VAA–II. For example, if the contract owner contributed $10,000 as his first payment, a charge of 6 percent would be deducted. If, due to a decline in the value of the shares of Companion Fund, Inc. and/or Companion Income Fund, Inc., the value of units of either account were to decline to a level less than $9,000 and if an additional contribution of $1,000 were made, then the deduction from the second contribution would be at a rate of 7.50 percent since the amount of total investment, as defined, would be less than $10,000.

Section 27(a)(3) of the Act was designed to curb abuses associated with front-end load arrangements in mutual fund contractual plans. Applicants assert that the sales deduction schedule proposed to be used here should be exempted from Section 27(a)(3) of the Act since the schedule does not involve a front-end load arrangement, does not exceed 9 percent and therefore cannot lead to the abuses intended to be curbed by that Section. Moreover, Applicants assert that the sales load applied against insurance proceeds has been reduced in accordance with the provisions of Rule 22d–3 which is designed to permit certain variations in variable annuity contract charges which reflect differences in costs or services, are not unfairly discriminatory against any person and which are fully disclosed. Applicants assert that the purpose behind the adoption of Rule 22d–3 would be defeated if reductions in sales load were to be disallowed because of conflict with Section 27(a)(3). Accordingly, Applicants assert that sufficient grounds exist for the issuance or an order of exemption from Section 27(a)(3). An exemption is therefore requested from Section 27(a)(3) of the Act to permit the schedule of sales load deductions proposed by Applicants.

Section 6(c) authorizes the Commission to exempt any person, security or transaction or any class or classes of persons, securities or transactions, from the provisions of the Act and Rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than August 23, 1977, at 5:30 p.m. submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit, or in the case of an attorney at law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following August 23, 1977, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 13810; SR-DTC-77-4]

DEPOSITORY TRUST CO.

Order Approving Rule Change Submitted by the Depository Trust Company Relating to Correction of Erroneous Input

JULY 29, 1977.

On April 21, 1977, The Depository Trust Company ("DTC"), 55 Water Street, New York, New York 10041; submitted, pursuant to Rule 19b–4 under the Securities Exchange Act of 1934 (the "Act"), Amendment No. 1[1] to a proposed rule change which would establish, and set fees for, a service in which DTC employees will correct evident errors or omissions in input submitted by participants.

In accordance with Section 19(b) of the Act and Rule 19b–4 thereunder, notice of the proposed rule change was published in the FEDERAL REGISTER (42 FR 24781, May 16, 1977), and the public was invited to comment thereon. Notice of the filing and an invitation for comments also appeared in Securities Exchange Act Release No. 34–13509, May 5, 1977. No letters of comment were received.

In addition, by letter dated July 21, 1977, which has been incorporated in the proposed rule change and included in the public file, DTC amended the requirements for participant authorization of the correction service.

The Commission has reviewed the proposed rule change and finds that it is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies.

[1] SR-DTC-77-4 was originally filed on March 28, 1977.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change contained in File No. SR–DTC–77–4 be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[Rel. No. 20120 70-6033]

GENERAL PUBLIC UTILITIES CORP.

Proposed Issue and Sale of Common Stock Pursuant to Employee Stock Ownership Plan and Request for Exemption From Competitive Bidding

AUGUST 1, 1977.

NOTICE IS HEREBY GIVEN that General Public Utilities Corporation ("GPU"), 260 Cherry Hill Road, Parsippany, New Jersey 07054; a registered holding company, has filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 6(a) and 7 of the Act and Rule 50(a)(5) promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

GPU proposes to issue and sell from time to time through December 31, 1980, up to 2,000,000 shares of its authorized but unissued common stock pursuant to a GPU system companies ("Employers") Employee Stock Ownership Plan ("Plan") and related trust agreement ("Trust"). The proceeds of the sale will be used by GPU for additional investment in its subsidiaries, to reimburse its treasury for prior investments in its subsidiaries, and/or to repay short-term indebtedness.

The Plan provides that for each Plan year for which the Employers elect to take the additional 1% investment tax credit under Section 46(a)(2)(B)(i) of the Internal Revenue Code ("Code"), they shall contribute to the Trust an amount equal to the amount of the additional 1% investment tax credit, but only to the extent that the credit may actually be utilized by the Employers. If such contributions during the Plan year equal the full amount of the additional 1% investment tax credit, the Plan provides that for Plan years beginning on or after January 1, 1977, the Employers will contribute an additional amount equal to the amount of the ½% investment tax credit under Section 46(a)(2)(B)(ii) of the Code, but only to the extent that such contributions are matched, on a dollar for dollar basis, by employee contributions under the Plan. All such contributions by the Employers must be made not later than 30 days following the due date (including any extensions of time) for the filing of GPU's consolidated federal income tax return.

All permanent employees of the Employers with one year of service will participate in the Plan. Employee contributions to the Plan will be completely voluntary, and will not be a condition of employment or of participation in the allocation of shares represented by the initial 1% additional tax credit.

An eligible employee will be permitted to contribute to the Plan any amount which he elects, up to 6% of his total compensation received during any Plan year. Such employee contributions may be made not later than the due date (including any extensions of time) for the filing of GPU's consolidated federal income tax return.

All cash contributions to the Plan will be used by the trustee to purchase shares of GPU common stock from GPU. The trustee will be required to make purchases with Employer contributions not later than 30 days following the due date (including any extensions of time) for the filing of GPU's federal income tax return, and to make purchases with employee contributions forthwith. The shares of GPU common stock held by the trustee will participate in GPU's dividend reinvestment plan.

Under the Plan, GPU common stock representing the basic 1% additional investment tax credit will be allocated to participants in proportion to their compensation, excluding any compensation exceeding $100,000. Amounts representing the further ½% investment tax credit contributed by the Employers will be allocated in an amount equal to the contributions made by each participant. If, however, total employee contributions for a Plan year exceed the amount of the additional ½% investment tax credit available to the Employers for that Plan year, then allocations will be made in proportion to the compensation of those employees who have made matching contributions. Thus, for example, if the amount of ½% investment tax credit available to the Employers during a Plan year is such as to match contributions by employees who contribute up to 3% of their compensation, but not above, there would be no allocation with respect to any employee contributions in excess of 3% compensation. A participant who contributed more than 3% of his compensation would be permitted either to withdraw the shares purchased with the excess amount and with dividends on such shares, or to leave them deposited in the Plan without any additional matching contributions by the Employers. The Plan further provides that all allocations of Employer contributions are subject to the overall contribution limitations imposed by Section 415 of the Code.

The right of a participant to his allocated share of GPU common stock purchased under the Plan will be nonforfeitable, but such shares may not be distributed prior to 84 months after their allocation, except in cases of termination of employment, death, or disability. Each participant may direct the trustee as to the manner in which the shares of GPU common stock allocated to his account are to be voted and as to the exercise or sale of any rights to subscribe to additional shares of GPU common stock. Proceeds from the sale of such subscription rights will be invested in additional shares of GPU common stock for the benefit of the participant.

For purposes of the Plan the fair market value of shares of GPU common stock purchased with cash contributed shall be determined by the average of the high and low sales prices of GPU common stock on the New York Stock Exchange-Composite Transactions listing on the date of purchase.

Administration of the Plan will be vested in a Plan Administrator designated by the Employers; his duties will include administration and interpretation of the Plan, establishing and maintaining individual employee accounts and the making of allocations thereto and distributions therefrom. Under the Trust, the trustee will be vested with responsibility for investing contributions made under the Plan in shares of GPU common stock and will have custody of the assets of the Trust.

Adoption of the Plan and Trust will be subject to qualifications of the Plan under the Tax Reduction Act of 1975 and Section 401(a) of the Code. The Plan and Trust will also be subject to all applicable provisions of the Employee Retirement Income Security Act of 1974.

GPU requests an exemption from the competitive bidding requirements of Rule 50 under Rule 50(a)(5) for the proposed issuance and sale of common stock to the Plan.

A statement of the fees and expenses to be incurred in connection with the proposed transaction will be filed by amendment. It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than August 25, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant-declarant at the above stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commision may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[Rel. No. 9876 812-4140]

MERRILL LYNCH BASIC VALUE FUND, INC.; ET AL.

Filing of Application for an Exemption to Permit Offers of Exchange

JULY 29, 1977.

Notice is hereby given that Merrill Lynch Ready Assets Trust ("Trust"), Fund"), Merrill Lynch Capital Fund, Inc. ("Capital Fund"), and Merrill Lnch Ready Assets Trust ("Trust"), each of which is registered as an open-end, diversified, management investment company under the Investment Company Act of 1940 (the "Act") (such investment companies together with any management investment company organized subsequent to the date of the application for which Merrill Lynch Funds Distributor, Inc., One Liberty Plaza 165 Broadway, New York, New York 1006; acts as principal underwriter are referred to as the "Funds"), and Merrill Lynch Funds Distributor, Inc. (the "Distributor") (collectively referred to with the Funds as "Applicants") filed an application on May 25, 1977, and an amendment thereto on July 25, 1977, for an order of the Commission (1) pursuant to Section 11(a) of the Act to permit offers to exchange shares of the Funds on a basis other than their relative net asset values, and (2) pursuant to Section 6(c) of the Act granting an exemption from Section 22(d) of the Act in connection with such exchanges. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

Applicants state that the Distributor is a wholly-owned subsidiary of Merrill Lynch Asset Management, Inc., which is a wholly-owned subsidiary of Merrill Lynch & Co., Inc. which is the parent of Merrill Lynch, Pierce, Fenner & Smith Incorporated. The Distributor serves as principal underwriter for each of the existing Funds. Applicants state that it is anticipated that the Distributor will act as the principal underwriter for additional registered management investment companies, the shares of which may be sold at varying sales charges or on a no-load basis.

Shares of the Capital Fund have been publicly offered since October, 1973, and are sold with a sales charge of 6.5%, subject to reduction for purchases of $10,000 or more. Shares of the Trust have been publicly offered since February, 1975, and are currently sold without a sales charge although a sales charge of 0.8% was imposed from the commencement of the public offerings until January 29, 1976. Both the Bond Fund and the Value Fund have filed registration statements under the Securities Act of 1933 which had not become effective at the date of filing the application. It is contemplated that shares of the Bond Fund will be sold with a sales charge of 3.5%, subject ot reduction for purchases of $10,000 or more, and that shares of the Value Fund will be sold with a sales charge of 4.0%, subject to reduction for purchases of $20,000 or more.

Applicants state that on May 12, 1975, an order requested by Capital Fund and Trust (Investment Company Act Release No. 8788) was granted by the Commission pursuant to Sections 11 and 6(c). The application states that the order pursuant to Section 11 permitted Capital Fund to offer to exchange its shares for shares of Trust at net asset value, plus an amount equal to the difference between the sales charge described in the prospectus of Capital Fund and the sales charge that was paid on the Trust shares being exchanged. The order did not extend to shares of the Trust previously acquired by exchange of Capital Fund or shares of the Trust acquired by reinvestment of dividends and distributions on shares of the Trust acquired by an exchange of Capital Fund shares. Applicants further state that the order pursuant to Section 6(c) of the Act exempted sales of shares of Capital Fund pursuant to such offers of exchange from the provisions of Section 22(d) of the Act. Applicants submit that the order sought in this application is substantially consistent with the earlier order granted by the Commission.

To eliminate the necessity of obtaining further orders each time a new investment company is organized for which the Distributor acts as "principal underwriter", as such term is defined in Section 2(a)(29) of the Act, the Applicants propose that the orders sought herein be applicable to exchanges of shares of any of the existing Funds and to exchanges of shares of any new open-end diversified management investment company subsequently organized for which the Distributor acts as the principal underwriter. It is contemplated that new funds will be added to the Merrill Lynch family of funds and the Applicants contend that to require that a new order be sought each time such a fund is organized would be unnecessary and burdensome for both the Funds and the Commission.

Applicants propose that each of the Funds may elect to offer to exchange its shares ("new shares") for share ("outstanding shares") of any of the other Funds on the basis of relative net asset value at the time of the exchange, plus an amount equal to the difference, if any, between the sales charge previously paid on the outstanding shares and the sales charge payable on the new shares if such new shares were purchased at the time of the exchange at their then public offering price. The sales charge on outstanding shares which were acquired through previous exchanges shall include the aggregate of the sales charge paid on such shares at the time of the initial purchase and subsequent exchanges. The application states that for purposes of the exchange privilege, dividend reinvestment shares, which are sold on a no-load basis in each of the Funds, shall be treated as having been sold with a sales charge equal to the sales charge paid previously on the shares on which the dividend was paid. To be exchanged under the Applicants' proposal, outstanding shares must have a value of $1,000 or more and have been outstanding for at least 60 days. In the event that a shareholder of a Fund wishes to exchange less than all of his shares and the exchange involves a sales charge differential, the shares exchanged first will be those with the least sales charge differential.

Section 11(a) of the Act provides, in part, that it shall be unlawful for any registered open-end company or any principal underwriter for such company to make, or cause to be made, an offer to the shareholder of a security of such company or of any other open-end investment company to exchange his security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged, unless the terms of the offer have first been submitted to and approved by the Commission.

Section 22(d) of the Act provides, in part, that no registered investment company or principal underwriter thereof shall sell any redeemable security issued by such company to any person except at a current offering price described in the prospectus. Applicants state that use of the exchange privilege would arguably violate Section 22(d) of the Act since an investor would be able to purchase shares of the Funds without paying the sales charge described in their respective prospectuses.

Applicants state that the purpose of the exchange privilege proposed in the application is to provide shareholders of the Funds with flexibility in their financial planning. When their investment objectives change, the shareholders of the Funds would be permitted to exchange their shares for shares of other Funds without paying the full sales charge otherwise applicable. Applicants further submit that the exchange privilege is fair and equitable to all shareholders of the participating Funds. Shareholders will be prevented from acquiring shares of a Fund with a higher sales charge simply by purchasing shares of a Fund with a lower or no sales charge and exchanging such shares for shares in the Fund with the higher sales charge on the basis of relative net asset value.

Section 6(c) of the Act provides, in part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act or any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provision of the Act.

Notice is further given that any interested person may, not later than August 23, 1977, at 5:30 p.m., submit to Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant(s) at the address(es) stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

OPTIONS CLEARING CORP.

Order Approving Rule Change Submitted by the Options Clearing Corporation to Delete From Its By-Laws Certain Obsolete Provisions

AUGUST 1, 1977.

On May 26, 1977, The Options Clearing Corp. ("OCC"), 5950 Sears Tower, Chicago, Ill. 60606, submitted, pursuant to Rule 19b-4 under the Securities Exchange Act of 1934 (the "Act"), a proposed rule change to delete from OCC's By-Laws certain obsolete provisions relating to option contracts expiring in 1975.

In accordance with Section 19(b) of the Act and Rule 19b-4 thereunder, the proposed rule change was published in the FEDERAL REGISTER (42 FR 31855, June 23, 1977), and the public was invited to submit comments until July 14, 1977. Notice of the filing and an invitation for comments also appeared in Securities Exchange Act Release No. 13632, June 15, 1977. No letters of comment were received.

The Commission has reviewed the OCC submission and finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies, and in particular, the requirements of Section 17A and the rules and regulations thereunder.

It is Therefore Ordered, Pursuant to Section 19(b)(2) of the Act, that the proposed rule change contained in File No. SR-OCC-77-6 be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[Rel. No. 9873, 812-4145]

PRUDENTIAL INSURANCE CO. OF AMERICA AND PRUDENTIAL'S ANNUITY PLAN ACCOUNT-2

Application for Order of Exemption

JULY 29, 1977

Notice is hereby given that Prudential's Annuity Plan Account-2 ("APA-2"), The Prudential Insurance Company of America, Central Atlantic Home Office, Welsh Road (Rte. 63) at the Pennsylvania Turnpike, Dresher, Pa. 19025, a separate account of the Prudential Insurance Co. of America ("Prudential"), Prudential Plaza, Newark, N.J. 07101, and Prudential's Annuity Plan Account-2, registered under the Investment Co. Act of 1940 ("Act") as a unit investment trust, and Prudential, a New Jersey mutual life insurance company that serves as depositor and underwriter for APA-2 (hereinafter collectively referred to as "Applicants"), filed an application on June 8, 1977, and an amendment thereto on July 26, 1977, pursuant to Section 6(c) of the Act for an order granting exemptions from Section 27(a)(3) of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that among the variable annuity contracts offered by Prudential are Flexible Purchase Payment Contracts and Single Purchase Payment Contracts ("Contracts") that participate in APA-2 and are offered for use in connection with pension, profit-sharing and annuity purchase plans, including Individual Retirement Annuities, intended to qualify for special federal income tax treatment under the Internal Revenue Code of 1954, as amended. Values and payments under the Contracts will vary in accordance with the investment result of APA-2, the assets of which consist of voting shares of Prudential's Gibraltar Fund ("Fund"), which is registered as an open-end management investment company under the Act.

Under the Flexible Purchase Payment Contracts each purchase payment made by or on behalf of the contractholder during any single contract year is subject to a sales charge equal to the amount of such purchase payment, less any applicable taxes, multiplied by the applicable percentage shown below:

Total amount of purchase payment(s) received during the contract year:	Percentage of payment applicable as sales charge
First $5,000	8.00
Next $5,000	6.50
Next $10,000	4.50
Excess over $20,000	3.50

Contract years commence on the contract date printed on each contract and on anniversaries thereof. In addition, a charge equal to 0.25% of the purchase payment is deducted from each purchase payment for the supplemental death benefit provided for by the Contract. A transaction charge of $1 will also be deducted from each purchase payment, and an annual contract fee of $7 will be deducted from the first purchase payment received by Prudential during each contract year.

Applicants represent that no sales charge will be made upon that part of any purchase payment consisting of the proceeds of any other Prudential policy or contract that qualifies for special federal income tax treatment under the Internal Revenue Code of 1954, as amended other than proceeds consisting of any policy or contract loan, periodic payment, cash dividend or dividend designated to reduce premiums or purchase payments. Furthermore, applicants state that any such part of a purchase payment that is not subject to a sales charge will not be counted in determining the total amount of purchase payments received during the contract year for purposes of calculating the sales charge with respect to any part of any purchase payment that is subject to the sales charge.

Section 27(a)(3).—Section 27(a)(3) of the Act provides that no registered investment company issuing periodic payment plan certificates and no depositor of or underwriter for such company may sell any such certificate if the amount of sales load deducted from any one of the first twelve monthly payments exceeds proportionately the amount deducted from any other such payment, or if the amount deducted from any subsequent payment exceeds proportionately the amount deducted from any other subsequent payment.

Rule 27a–2 under the Act exempts a registered separate account, and any depositor of or underwriter for such account, from Section 27(a)(3) if the proportionate amount of sales load deducted from any payment during the contract period does not exceed the proportionate amount deducted from any prior payment during the contract period.

Applicants assert that since, under the Flexible Purchase Payment Contracts, no sales charge is assessed with respect to that portion of any purchase payment consisting of certain proceeds from other Prudential contracts or policies that qualify for special federal income tax treatment, and since such proceeds may be used to make any one or more purchase payments under the Contracts, it is possible that the sales load paid upon a purchase payment made during the contract period will exceed the sales load on one or more purchase payments made earlier in the contract period because no such proceeds are used to make the later payment. Thus, the proportionate amount of sales load deducted from the later payment would exceed the proportionate amount of sales load deducted from the earlier payment.

Moreover, applicants state that since the volume discount in the sales load charged under the Contracts is applied separately to purchase payments made during each contract year, it is possible that purchase payments made late in any given contract year will be subject to a sales load that is lower than the sales load applicable to purchase payments made at the beginning of any subsequent contract year. Again, the proportionate amount of sales load deducted from the later payment would exceed the proportionate amount deducted from the earlier payment.

Applicants request an exemption from Section 27(a)(3) of the Act to permit the deductions for sales charges as described herein.

Applicants state that Section 27(a) of the Act was designed to limit the losses that may be incurred by the purchasers of front-end load contractual plans, who do not complete their purchases but instead terminate their plans prior to completion. Applicants further assert that the maximum deduction from sales load under the Contracts does not exceed the statutory maximum of 9% and that the Contracts do not provide for any front end loading arrangement to which Section 27(a) is directed. Thus, applicants say, the abuses sought to be curbed by this provision of the Act cannot arise in connection with the sales load deductions under the Contracts. Applicants represent that the lack of uniformity in sales load under the Contracts is attributable not to front-end loading, but rather to a reduction of the loading for purchase payments consisting of specified proceeds of other Prudential policies or contracts that qualify for special federal income tax treatment, or to a reduction of the loading by reason of the volume discount provided with respect to each year's purchase.

Section 6(c).—Section 6(c) of the Act authorizes the Commission by order upon application to exempt any person, security or transaction or any class or classes of persons, securities or transactions, from any provisions of the Act or rules thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than August 24, 1977 at 5:30 p.m., submit to the Commission in writing, a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the addresses stated above. Proof of service (by affidavit or in the case of an attorney at law by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following August 24, 1977, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 9875; 812-4130]

PUTNAM OPTION INCOME TRUST

Filing of Application for Exemption

JULY 29, 1977.

Notice is hereby given that Putnam Option Income Trust ("Applicant"), 265 Franklin Street, Boston, Massachusetts 02110, a Massachusetts business trust which is registered under the Investment Company Act of 1940 ("Act") as a diversified, open-end management investment company, filed an application on April 29, 1977 and an amendment thereto on July 15, 1977, pursuant to Section 6(c) of the Act, for an order declaring that Mr. Avery Rockefeller, Jr. ("Rockefeller"), Mr. Donald J. Hurley ("Hurley"), and Mr. Hans H. Estin ("Estin"), proposed trustees of Applicant, each shall not be deemed to be an "interested person" of the Applicant, or its investment adviser, The Putnam Management Company, Inc. ("Adviser"), or its principal underwriter, Putnam Fund Distributors, Inc. ("Underwriter"), with respect to Rockefeller, by reason of his being a director of The Home Insurance Company ("Home Insurance") and, with respect to Hurley and Estin, by reason of their being directors of The Boston Company, Inc. and or Boston Safe Deposit and Trust Company ("Boston Safe"). All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is intended that Rockefeller, Hurley and Estin will become trustees as soon as practicable (without calling a shareholders meeting for that purpose alone) if each of them is deemed not to be an "interested person" of the Applicant, the Adviser and the Underwriter within the meaning of Section 2(a)(19) of the Act. Sections 2(a)(19) (A)(v) and (B)(v) define an "interested person" of an investment company and of an investment adviser of or principal underwriter for an investment company to include any affiliated person of any broker or dealer registered under the Securities Exchange Act of 1934 ("Exchange Act") Section 2(a)(3) of the Act includes in the definition of an "affiliated person" any person directly or indirectly controlling, controlled by or under common control with such other person.

Applicant states that Rockefeller is a director of Home Insurance and of its subsidiary, Seaboard Surety Corporation; and Home Capital Services, Inc. ("Home Capital"), another wholly-owned subsidiary of Home Insurance, is a registered broker-dealer under the Exchange Act. Applicant also states that by reason of Rockefeller's position as a director of Home Insurance, Rockefeller might be considered, for purposes of Section 2(a)(19) of the Act, to be an affiliated person of Home Capital and, thus, an interested person of the Applicant, the Adviser, and the Underwriter.

Applicant states that Hurley is a director of The Boston Company, Inc. and of its subsidiary, Boston Safe; Estin also is a director of Boston Safe; and The Boston Company Financial Strategies, Inc., another subsidiary of The Boston Company, Inc., in turn has a subsidiary, TBCFS, Inc., which is a registered broker-dealer under the Exchange Act. Applicant also states that because of Hurley's position as a director of The Boston Company, Inc., and of Boston Safe, and because of Estin's position as a director of Boston Safe, each might be considered, for purposes of Section 2(a)(19) of the Act, to be an affiliated person of TBCFS, Inc., and thus, an interested person of the Applicant, the Adviser, and the Underwriter.

Section 10(a) of the Act prohibits an investment company from having a board of trustees more than 60% of the members of which are its interested persons. Section 10(b)(2) of the Act in part prohibits an investment company from using as a principal underwriter any person unless a majority of its board of directors are not interested persons of such principal underwriter.

The Commission has previously granted orders (Investment Company Act Release No. 8755, April 11, 1975; and Investment Company Act Release No. 9610, January 17, 1977) upon application declaring that Rockefeller would not be deemed an "interested person" solely by reason of his relationship with Home Insurance and Home Capital. Applicant submits that the facts and representations set forth in these prior applications (File Nos.: 812–3759 and 812–4026) continue to be true and correct and the basis upon which the prior orders were granted would apply equally to Applicant. The representations contained in the prior applications as applied to Rockefeller include the following:

1. Rockefeller's principal business is as Senior Vice President, Finance and a Director of Grolier, Inc., a publishing firm, and he is not involved in the day-to-day operation of Home Capital and does not control nor is controlled by Home Capital. Home Capital trades in the accounts of members of The Home Group and also acts as an underwriter and dealer in bonds.

2. Rockefeller's independence in acting on behalf of such investment companies would in no way impaired because of his affiliation with Home Insurance. Rockefeller has no connection with Home Capital other than in his capacity as a Director of Home Insurance and Seaboard Surety Corporation.

3. Neither the Adviser nor any of the then existing registered investment companies being advised by the Adviser have ever done any business with Home Capital, and such applicants undertake not to transact any business with Home Capital should the requested exemption be granted. In view of the large number of other bond dealers available, such applicants represent that its portfolio transactions would not be adversely affected by such undertaking.

The Commission has also previously granted orders (Investment Company Act Release No. 9284, May 10, 1976; and Investment Company Act Release No. 9610, January 17, 1977) upon application declaring that Hurley and Estin would not be deemed to be "interested persons" solely by reason of their relationships with The Boston Company, Inc. and/or Boston Safe. Applicant submits that the facts and representations set forth in the prior applications (File Nos.: 812–3921 and 812–4026) continue to be true and correct, and the basis upon which the prior orders were granted would apply equally to Applicant. The representations contained in the prior applications as applied to Hurley and Estin include the following:

1. Hurley, a partner in the law firm of Goodwin, Procter & Hoar, serves as a director of The Stop & Shop Companies, Inc., The Continental Corporation, and Boston Old Colony Insurance Company, trustee and member of the Board of Investment of Charlestown Savings Bank, and President of the Committee of the Permanent Charity Fund, Inc., Boston. Estin, Vice Chairman of North American Management, Inc., is a director of Allied Foods, Inc., Massachusetts General Life Insurance Company, and Yellowknife Bear Mines, Ltd., and Trustee of Children's Hospital Medical Center.

2. The relationship of Hurley and Estin with The Boston Company, Inc., Boston Safe, The Boston Company Financial Strategies, Inc., and TBCFS, Inc., will not impair their independence in acting on behalf of such investment companies and their shareholders; Hurley and Estin will not be directors or officers of TBCFS, Inc., and will have no authority or responsibility for management of the operation of TBCFS, Inc.

3. The business of TBCFS, Inc., will relate primarily to the structuring and placement or sale of oil and gas programs and other investment programs and ventures. Due to the special nature of the type of investments with which TBCFS, Inc. will be involved, such applicants could not legally purchase or sell such investments from or through TBCFS, Inc. because of investment restrictions. Such applicants do not intend to make any such investments and, moreover, undertake not to transact any business with TBCFS, Inc.

Applicant requests that an order be issued, pursuant to Section 6(c) of the Act, declaring that (1) Rockefeller shall not be deemed an interested person of Applicant, the Adviser or the Underwriter within the meaning of Section 2(a)(19) of the Act solely by reason of his being a director of Home Insurance and Seaboard Surety Corporation, (2) Hurley shall not be deemed to be an interested person of Applicant, the Adviser or the Underwriter within the meaning of Section 2(a)(19) of the Act solely by reason of his being a director of The Boston Company, Inc., and Boston Safe, and (3) Estin shall not be deemed to be an interested person of Applicant, the Adviser or the Underwriter within the meaning of Section 2(a)(19) of the Act solely by reason of his being a director of Boston Safe.

Section 6(c) of the Act provides in part that the Commission, by order upon application, may conditionally or unconditionally exempt any person from any provision of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than August 22, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 9976; 812-4082]

PUTNAM CONVERTIBLE FUND, INC., ET AL.

Filing of Application for an Order Granting an Exemption From Section

AUGUST 1, 1977.

Notice is hereby given that Putnam Convertible Fund, Inc., Putnam Equities Fund, Inc., The George Putnam Fund of Boston, The Putnam Growth Fund, The Putnam Income Fund, Inc., Putnam Investors Fund, Inc., Putnam Vista Fund, Inc., Putnam Voyager Fund, Inc. and Putnam Option Income Trust ("Putnam Funds"), and Putnam Fund Distributors, Inc. ("Distributors"), 265 Franklin Street, Boston, Massachusetts 02110; (collectively referred to as "Applicants"), filed an application on January 27, 1977, and amendments thereto on May 16, and July 29, 1977, for an order, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting Applicants from the provisions of Section 22 (d) of the Act and Rule 22d-1 thereunder to the extent necessary to permit sales of shares of the Putnam Funds at net asset value plus a flat sales charge of 4.5% of the offering price to members of qualified groups. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The Putnam Funds are each registered under the Act as diversified, open-end investment companies, and are organized as Massachusetts corporations or established as Massachusetts business trusts. The Putnam Funds are currently engaged in continuous public offerings of their shares at public offering prices equal to net asset value plus a sales load which varies with the size of the purchase from 8.5% on an investment of less than $10,000 to 1.0% on an investment of $1,000,000 or more. Shares of the Putnam Funds which are being offered to the general public in continuous offerings may be purchased from investment dealers who are members of the National Association of Securities Dealers, Inc. ("NASD") and who have sales agreements with Distributors, as well as directly from Distributors.

Applicants propose to offer shares of the Putnam Funds to members of qualified groups, as defined below, at a sales charge rate which would differ from the sales charge rate currently in effect for sales to nongroup purchasers. Applicants state that, if the application is granted, the prospectuses of the Putnam Funds would be revised to provide initially that members of qualified groups may buy shares of such funds at a flat group sales charge rate of 4.5% of the offering price without regard to the size of the group investment. The application states that the Putnam Funds reserve the right to suspend or discontinue group sales at any time, and to vary the group sales charge rate by increasing it to as much as 5.5% of the offering price or decreasing it to as low as 3.5%. Applicants propose that to be eligible for the group sales charge rate, purchases by group members would have to be made through a single investment dealer designated by the group, and initial purchases would have to be transmitted by such investment dealer, although subsequent purchases could be sent directly to Distributors. In addition, the minimum investment requirements described in the Putnam Funds' prospectuses would be applicable to purchases by any single group member.

Under Applicants' proposal, a "qualified group" will include the employees of a corporation or a sole proprietorship, members and employees of a partnership or association, or other organized groups of persons (the members of which may include other qualified groups) provided that: (i) The group has at least 25 members of which at least 10 members participate in the initial purchase; (ii) the group has been in existence for at least least six months; (iii) the group has some purpose in addition to the purchase of investment company shares at a reduced sales charge; (iv) the group's sole organizational nexus or connection is not that the members are credit cardholders of a company, policy holders of an insurance company, customers of a bank or a broker-dealer, clients of an investment adviser or security holders of a company; (v) the group agrees to provide its designated investment dealer access to the group's membership by means of written communication or direct presentation to the membership at a meeting or not less frequently than an annual basis; (vi) the group or its investment dealer will provide annual certification in form satisfactory to the Putnam Funds' shareholder servicing agent to the effect that the group then has at least 25 members and that at least 10 members participated in group purchases during the immediately preceding twelve calendar months; and (vii) the group or its investment dealer will provide periodic certification in a form satisfactory to the Putnam Funds' shareholder servicing agent as to the eligibility of the purchasing members of the group.

The application provides that a "member" of a qualified group will be: (i) Any group which meets the requirements stated above and which is a constituent member of a qualified group; (ii) any individual purchasing for his or her own account who is carried on the records of the group or on the records of any constituent member of the group as being a good standing employee, partner, member or person of like status of the group or constituent member; or (iii) any fiduciary purchasing shares for the account of a member of a qualified group or a member's beneficiary. It is represented that Putnam Funds prospectuses would also provide that a member of a qualified group may, depending upon the value of Putnam Funds shares owned or proposed to be purchased by the member, be entitled to purchase shares of the Putnam Funds pursuant to the lower sales charge rate applicable to non-group purchases rather than at the group sales charge rate, provided the member qualifies as a person entitled to reduced non-group sales charges. Applicants submit that such members would be entitled to purchase at the lower rate provided that, at the time of purchase, the member or his or her investment dealer furnishes information sufficient to permit verification that the purchase qualifies for the lower rate.

Section 22(d) of the Act makes it unlawful for any mutual fund, principal underwriter or dealer to sell shares of such fund to the public "except at a current public offering price described in the prospectus." Rule 22d-1 under the Act provides for exemption from Section 22(d) to permit sales at reduced or no sales charges in specified circumstances. Subsection (b) of Rule 22d-1 permits sales to groups at reduced sales loads based upon quantity discounts but does not permit different sales charge rates for groups and non-groups or sales charges which do not vary with the quantity of shares purchased. Applicants assert that, absent an exemption from Section 22(d) of the Act and Rule 22d-1 thereunder, the offering of Putnam Funds shares to qualified groups at sales charge rates which do not vary with the quantity of shares purchased and which are different from the rates applicable to non-groups may not be permissible.

Applicants submit that the provision of Rule 22d-1(b) that sales be based upon a scale of reducing sales loads applicable to all purchasers was included to prevent unjust discrimination in the distribution of mutual fund shares. According to the application, there would be no unjust discrimination among investors under the group sales proposal because differences in sales charges would relate to differences in both costs and services. It is stated that the criteria for group sales were selected because of their relation to anticipated realization of economies of scale in sales effort and sales related expense.

Applicants represent that the flat rate of 4.5% was selected with a view toward providing sufficient incentive to investment dealers to market the group sales plan and to continue to service plans which have been started and to afford to group members a non-discriminatory incentive to invest under a group plan. Applicants assert that group sales under Rule 22d-1(b) have not occurred to any significant degree principally for three reasons: first, there is little incentive for investors who are members of relatively small groups to be the initial group investors because the benefits of reduced sales charges are not available under Rule 22d-1(b) until the aggregate quantity of securities owned or being purchased by the group reach certain levels; second, the greatest benefits of reduced sales loads will be realized by those investors who do not participate in group purchases until after substantial purchases have been made by other group members; and third, the incentive declines for investment dealers to solicit actively group purchases as aggregate quantities of shares purchased by a group increase and sales charges are reduced. Applicants contend that by fixing the sales load at a flat rate, the perceived disincentives of group marketing under Rule 22-1(b) would be removed (a) by providing increased incentive for initial participation in group purchases, (b) by eliminating "windfall' sales charge savings by subsequent participants in group purchases, and (c) by providing sufficient incentives for ongoing sales efforts by investment dealers.

Applicants submit that a sales load scale which declines below 4.5% as aggregate group purchases increase would not appear now to be appropriate because it is unlikely that subsequent group sales efforts will be significantly lower than initial group sales efforts. It is asserted that as group memberships change, dealers will have to expand a sales effort equivalent to their initial sales effort in order to attract new group members as purchasers. Applicants further state that, as sales loads decrease under such a proposal, dealer incentive to make subsequent group sales will also be reduced. Applicants' proposal provides that individual group members will continue to be able to receive the benefits of the present scale of reducing sales load applicable to non-group members if their individual purchases within the group would entitle them to a sales load below the flat group rate. It is submitted that this is appropriate because, in most cases, individuals who are purchasing large quantities of shares do so on their own initiative with very little sales effort required.

Applicants represent that they have reserved the right to revise the group sales charge rate within certain limits because the proposal is unique and Applicants cannot be certain as to the rate which would be most effective in terms of providing incentive to both dealers and group sales prospects and which would be competitive as other similar marketing plans are developed.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person or class of persons from any or all provisions of the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than August 26, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

By the Commission.

SHIRLEY E. HOLLIS,
Assistant Secretary.

SOUTHERN ATLANTIC CORP.

[File No. 500-1]

Suspension of Trading

JULY 27, 1977.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the securities of Southern Atlantic Corporation being trade on a national securities exchange or otherwise is required in the public interest and for the protection of investors;

Therefore, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities on a national securities exchange or otherwise is suspended, for the period from 3 p.m. (E.D.T.) on July 27, 1977 through August 5, 1977.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-22842 Filed 8-8-77;8:45 am]

[Release No. 34-13811; File No. SR-Amex-77-17]

AMERICAN STOCK EXCHANGE, INC.

Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on July 27, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

AMEX'S STATEMENT OF TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Proposed Section 1007 of the Amex Company Guide would provide a listed company with an opportunity for a hearing with respect to an Exchange determination to halt or suspend trading in its securities.

The text of the proposed rule change is attached as Exhibit A.

AMEX'S STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of the proposed rule change is to provide a procedure whereby a listed company may obtain a review of an Exchange determination to halt or suspend trading in its securities.

Section 1007 of the Amex Company Guide is proposed pursuant to SEC Rule 12d2-1, which empowers a national securities exchange to adopt rules concerning the suspension of trading of a security in its market.

No comments were solicited or received with respect to the proposed rule change.

The Amex has determined that no burden on competition will be imposed by the proposed rule change.

By September 13, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549

Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by August 29, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

August 1, 1977.

SHIRLEY E. HOLLIS,
Acting Assistant Secretary.

EXHIBIT A

AMERICAN STOCK EXCHANGE, INC.

Part 10 (Suspension and Delisting) of the Amex Company Guide is proposed to be amended by adding thereto a new Section 1007 as follows:

§ 1007. Suspension Procedures. (a) Whenever a security has been suspended from dealings on the Exchange, the issuer of the security shall be given notice of, and provided an opportunity to be heard upon, the specific grounds for such suspension. A written record shall be kept of any such proceeding. Any final determination to continue the suspension of the security shall be supported by a statement setting forth the specific grounds on which the determination is based.

(b) For the purpose of this Section, a security in which trading has been halted pursuant to Rule 22 of the American Stock Exchange shall be deemed, as of the commencement of business on the thirty-first

day following the day on which trading therein was halted, to be suspended from dealings on the Exchange.

(c) Nothing contained herein shall require the Exchange to resume trading in a security until such time as the Exchange determines that market conditions permit such resumption.

COMMITTEE ON OCEAN DUMPING

Meeting

The Committee on Ocean Dumping, a subcommittee of the Shipping Coordinating Committee, will hold an open meeting at 9 a.m. on Tuesday, September 13, 1977, in Room 2117 Waterside Mall, Environmental Protection Agency, 401 M Street SW., Washington, D.C.

The purpose of the meeting is to review position documents for the second consultative meeting of the Contracting Parties of the Convention on the Prevention of Marine Pollution by Dumping of Waste and Other Matter, scheduled to be held in London September 26–30, 1977.

Requests for further information should be directed to Mr. Alan Sielen, Oceans Division, Office of International Activities, Environmental Protection Agency, Washington, D.C. 20460. Mr. Sielen may be reached by telephone on (202) 755–0533.

The Chairman will entertain comments from the public as time permits.

CARL TAYLOR, JR.,
Acting Director
Office of Maritime Affairs.

Agency for International Development

PRIVACY ACT OF 1974

Amendment to System of Records

AGENCY: Agency for International Development.

ACTION: Amendment to system of record.

SUMMARY: The system of record, AID–19, "Travel and Transportation Records," is being amended to include two categories of records which were omitted in our original publication, due to an administrative oversight. The two categories are: (a) Travel Advance, Employee Case File; and (b) Travel Advance Control History File.

EFFECTIVE DATE: August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

James L. Harper, Department of State, Agency for International Development, Office of Personnel and Manpower, Washington, D.C. 20523.

SUPPLEMENTARY INFORMATION: Pursuant to 5 U.S.C. 552a(e)(4), the Agency for International Development published its systems of records at 40 FR 39463 on August 27, 1975, and amendments on October 2, 1975, November 3, 1975, and September 13, 1976.

In reviewing the systems for annual publication, it was discovered that an administrative oversight caused two categories of records to be omitted from our system AID–19, Travel and Transportation Records. The two categories are travel advance, employee case file and travel advance control history file. The travel advance, employee case file is a manual file containing copies of travel authorizations and related paid vouchers and coorespondence. The travel advance control history file is an automated file containing name, social security account number, appropriation code, date isssued, and advance outstanding. The amended system is published below for your ready reference.

The prior notification procedure has been waived by the Office of Management and Budget. However, due consideration will be given to any substantive comments and should be addressed to: Department of State, Agency for International Development, 320 21st Street NW., Washington, D.C. 20523.

Attention: Privacy Liaison Office.

ROBERT H. NOOTER,
Deputy Aministrator, Designate.

A.I.D.–19

System name:

Travel and Transportation Records.

System locations:

a. Central Records, Travel and Transportation Records: Office of Management Operations, 320–21st Street NW., Washington, D.C.

b. Decentralized Records: Various Washington offices and offices abroad having responsibilities for initiating requests for travel or transportation of things. See Appendix A for actual location of these offices.

c. Travel Advance Control Records for Automated Files: Office of Data Management, 1875 Connecticut Avenue NW., Washington, D.C.

d. For Employee Case File: Employee Services Division, Office of the Controller, 1875 Connecticut Avenue NW., Washington, D.C.

Categories of individuals covered by the system:

A.I.D. employees and their dependents, individuals whose travel is sponsored or paid for by A.I.D., and visitors to A.I.D. offices abroad.

Categories of records in the system:

a. Central Records, Travel and Transportation Records; travel authorizations; itineraries; government bills of lading; government transportation requests; card file pertaining to passports, travel and shipment of effects; and correspondence.

b. Decentralized Records: Copies of documents maintained in the central records; export/import permits; baggage declarations; customs declarations; passports and records of applications for visas; travel advance requests; arrival and departure notices; record of clearances prior to departure from post abroad; packing lists and information on meetings abroad including meeting schedules and biographical sketch of attendees.

c. Travel Advance, Employee Case File: A manual file containing copies of travel authorizations and related paid vouchers and correspondence.

d. Travel Advance Control History File: Automated file containing name, social security account number, appropriation code, date issued, advance issued and advance outstanding.

Authority for maintenance of the system:

Foreign Assistance Act of 1961 as amended, esp. Sec. 621, 636 (a) and (b); Foreign Service Act of 1946 as amended, Sec. 911; and Chapter 57, 5 U.S.C.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To commercial travel, transportation and shipping companies and agents for making travel, transportation and shipping arrangements.

To U.S. Treasury for payment of bills and vouchers.

To U.S. Dispatch Agents to arrange shipment and clearance of effects.

To law enforcement agencies, U.S. Government agencies, courts, the Department of State, foreign governments and international agencies, Members of Congress, and individuals' medical advisers for the purposes scet forth in the Statement of General Routine Uses immediately preceding these specific notices of systems of records.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper copy in file folder, magnetic disc and magnetic tape.

Retrievability:

Individual's name or other personal identifier.

Safeguards:

a. Travel and Transportation Records: Biographic information and passports kept in metal cabinets with three-way combination lock; records kept in areas with access limited to those whose official duties require access.

b. Travel Advance Control Records: For automated system, a "password" is assigned to employees who must have access in order to perform their official function. For manual files, stored in metal file cabinet in secure area with access limited to those whose official duties require access.

Retention and disposal:

a. Travel and Transportation Records: Retained for four years and then destroyed by shredding or burning.

b. Travel Advance Control Records: Retained or disposed of in accordance with A.I.D. Handbook 21, Part III, normally seven (7) years after audit.

System manager(s) and address:

For Travel and Transportation Records: a. Central Records: Director, Office of Management Operations, Agency for International Development, 320 21st Street NW., Washington, D.C. 20523.

b. Decentralized Records: Administrative and Executive officers and office supervisors in A.I.D. Washington offices and offices abroad. See Appendix A for actual location of offices.

For Travel Advance Control Records: c. Assistant Controller, Employees Services Division, 1875 Connecticut Avenue NW., Washington, D.C.

Notification procedure:

Requests by individuals concerning the existence of a record may be addressed to: Director, Office of Personnel and Manpower (SER/PM), Attn: Privacy Liaison Officer, Agency for International Development, 320 21st St. NW., Washington, D.C. 20523. or presented in person at State Annex No. 2, 515 22nd Street NW., Washington, D.C.

For offices abroad, to the Privacy Liaison Officer at the applicable address in Appendix A.

Information required:

Individual's name, place an date of birth. The determination as to the existence of a record will be facilitated by the provision of the individual's Social Security number and dates and places of service.

Record access procedures:

Requests from individuals should be addressed or presented in person to the same addresses as stated in the Notification Section above.

Requests should be accompanied by information sufficient to identify the individual pursuant to § 215.4(c) or (d) of the Agency's Regulations as published in this issue of the FEDERAL REGISTER.

Contesting record procedures:

Written requests from individuals to amend their record should be mailed or presented in person to the same addresses as stated in the Notification Section above.

Requests for review of a refusal to amend a record should be made in writing and mailed or delivered to: Administrator, Agency for International Development, 320 21st Street NW., Washington, D.C. 20523. Attention: Executive Secretary—Privacy Review Request.

Both the envelope and the letter should be clearly marked Attention: Executive Secretary—Privacy Review Request.

Record source categories:

The individual concerned and A.I.D. employees acting in their offical capacities.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

EXPORT AUTHORIZATION LEVELS FOR CERTAIN COTTON, WOOL AND MAN-MADE FIBER TEXTILE PRODUCTS FROM HONG KONG

AUGUST 5, 1977.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Announcing export authorization levels for Categories 39 (cotton gloves), 120 (men's and boys' wool suits), 122 (women's, misses' and children's wool coats and suits), 124 (wool slacks and trousers), 228 (man-made fiber blouses, not knit), and 234 235 (man-made fiber shirts) from Hong Kong during the fifteenth-month period which began on October 1, 1976.

SUMMARY: In an exchange of notes, dated July 25, 1977, the Governments of the United States and Hong Kong extended through December 31, 1977 the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement, as amended, which would have expired on September 30, 1977. Pursuant to the extension, the United States has agreed that Hong Kong may issue export authorizations for the indicated categories during the fifteen-month period which began on October 1, 1976 and extends through December 31, 1977 up to the following levels:

Category:	*Fifteen-month export authorization level*
39	3,900,000 doz pair.
120	102,534 numbers
122	125,000 pieces
124	250,000 pieces
228	742,689 doz.
234 235	812,500 doz.
238	375,000 doz

EFFECTIVE DATE: July 27, 1977.

[FR Doc.77-23063 Filed 8-8-77;8:45 am]

INCREASING IMPORT RESTRAINT LEVELS FOR CERTAIN COTTON AND MAN-MADE FIBER TEXTILE PRODUCTS FROM THE REPUBLIC OF CHINA

AUGUST 5, 1977.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Increasing the levels of restraint applicable to Categories 45 46 47 (shirts), 50 51 (trousers, slacks and outer shorts), and 221 (knit sweaters and cardigans) to account for unused carryforward granted during the agreement year which began on January 1, 1976.

SUMMARY: Paragraph 8(a)(ii) of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 21, 1975, as amended, between the Governments of the United States and the Republic of China provides for the application of carryforward to certain specific category ceilings. Carryforward is an amount borrowed from the level of restraint applicable to the affected category in the succeeding agreement year and is deducted from that year's level. The purpose of this notice is to advise that the levels of restraint established for Categories 45 46 47, 50 51, and 221 during the agreement year which began on January 1, 1977 are being increased by increments of carryforward granted in those categories last year, but not used. The current-year levels for these categories reflected reductions for the full amount of the carryforward.

EFFECTIVE DATE: August 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Donald R. Foote, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, 202–377–5423.

SUPPLEMENTARY INFORMATION: On December 27, 1976, a letter dated December 20, 1976 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs was published in the FEDERAL REGISTER (41 F.R. 56213), which established the levels of restraint applicable to certain specific categories of cotton and man-made fiber textile prod-

ucts, produced or manufactured in the Republic of China and exported to the United States during the twelve-month period beginning on January 1, 1977 and extending through December 31, 1977. The notice which accompanied the letter, also dated December 20, 1976, stated that the levels of restraint established for Categories 45/46/47, 50/51 and 221, among others, had been reduced to account for the full amount of carryforward applied to those categories during the agreement year which began on January 1, 1976.

In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the levels of restraint established for Categories 45/46/47, 50/51, and 221 by the amounts of unused carryforward.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C.

AUGUST 5, 1977.

DEAR MR. COMMISSIONER: On December 20, 1976, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry of cotton and man-made fiber textile products in certain specified categories, produced or manufactured in the Republic of China and exported to the United States during the agreement year which began on January 1, 1977, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to paragraphs 6 and 8(a)(ii) of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 21, 1975, as amended, between the Governments of the United States and the Republic of China, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed to amend, effective on August 9, 1977, the levels of restraint established in the directive of December 20, 1976 for cotton textile products in Categories 45/46/47, and 50/51 and man-made fiber textile products in Category 221 to the following amounts:

Category:	*Amended 12-month level of restraint*[2]
45/46/47	13,582,447 sq yd equivalent.
50/51	696,087 doz.
221	3,953,982 doz.

[2] The levels of restraint have not been adjusted to reflect any entries made after December 31, 1976.

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 21, 1975, as amended, between the Governments of the United States and the Republic of China which provide, in part, that: (1) Within the aggregate and applicable group limits, specific levels of restraint may be exceeded by designated percentages; (2) these levels may be increased for carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems.

The actions with respect to the Government of the Republic of China and with respect to imports of cottton and man-made fiber textile products from the Republic of China have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

[FR Doc.77-23065 Filed 8-8-77;8:45 am]

REPUBLIC OF THE PHILIPPINES

Amending and Extending Bilateral Textile Agreement

AUGUST 5, 1977.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Amending and extending the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 15, 1975, as amended, between the Governments of the United States and the Republic of the Philippines.

SUMMARY: Notes have been exchanged between the Governments of the United States and the Republic of the Philippines extending the Cotton, Wool and Man-Made Fiber Textile Agreement of October 15, 1975, as amended, for three months, through December 31, 1978. The second agreement year will constitute the 15-month period which began on October 1, 1976 and extends through December 31, 1977. Accordingly, the specific levels of restraint previously established for cotton textile products in Categories 39 (gloves, 45/46/47 (men's and boys' shirts), 50/51 (trousers, slacks and shorts), and man-made fiber textile products in Categories 214 (gloves), 221 (sweaters and cardigans), parts of 224 (suits and suit-type coats), 225 (body supporting garments), 229 (coats), and 237 (suits) are being increased to reflect the extended agreement period.

Under the terms of the amendment specific levels of restraint are also being established for man-made fiber textile products in Categories 218 (knit T-shirts) and part of 224 (tops and vests) in combination with Category 219 (other shirts, including blouses). Coats in Category 63 are being combined with coats in Category 49, and dress shirts (not knit) in Category 234 are being combined with other shirts in Category 235. (A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), as amended on December 31, 1975 (40 FR 60220), December 30, 1976 (41 FR 56881), January 21, 1977 (42 FR 3888), and March 7, 1977 (42 FR 12898).)

EFFECTIVE DATE: August 10, 1977.

FOR FURTHER INFORMATION CONTACT:

Donald R. Foote, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-5423.

SUPPLEMENTARY INFORMATION: On September 27, 1976, there was published in the FEDERAL REGISTER (42 FR 42234) a letter dated September 22, 1976 from the Chairman of the Committee for the Implementation of Textile Agreements, which established the levels of restraint applicable to certain specified categories of cotton and man-made fiber textile products, produced and manufactured in the Philippines and exported to United States during the twelve-month period which began on October 1, 1976 and extends through September 30, 1977. In the letter of August 5, 1977, published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to limit entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 39, 45/46/47, 49/63 (part), 50/51, and man-made fiber textile products in Categories 214, 218/219/224 (part), 221, parts of 224, 225, 229, 234/235 and 237, produced or manufactured in the Philippines, to the designated levels of restraint during the fifteen-month period which began on October 1, 1976 and extends through December 31, 1977.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury, Washington, D.C.

AUGUST 5, 1977.

DEAR MR. COMMISSIONER: This directive amends, but does not cancel, the directive issued to you on September 22, 1976 by the Chairman of the Committee for the Implementation of Textile Agreements concerning imports into the United States of certain specified categories of cotton and man-made fiber textile products, produced or manufactured in the Philippines. It cancels the directive of May 16, 1977.

Paragraph 1 of the directive of September 22, 1976 is amended, effective on August 10, 1977 to read as follows: "Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 15, 1975, as amended, between the Governments of the United States and the Republic of the Philippines, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective on August 10, 1977, and for the fifteen-month period extending from October 1, 1976 through December 31, 1977, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 39, 45/46/47, 49/63 (part), 50/51, and man-made fiber textile products in Categories 214, 218/219/224 (part), 221, parts of 224, 225, 229, 234/235 and 237, in excess of the following levels of restraint:

Category:	*Fifteen-month level of restraint*[1]
39	587,604 doz pairs.
45/46/47	5,601,210 sq yd equivalent.
49/63 (part)[2]	85,136 doz.
50/51	290,232 doz (with sublimits of 169,528 doz each for Categories 50 and 51).
214	1,356,225 doz pairs.

[1] The levels of restraint have not been adjusted to reflect any imports after September 30, 1976.

[2] In Category 63, only T.S.U.S.A. Nos. 380.0043, 380.0046, 382.0054 and 382.0056.

[3] In Category 224, only T.S.U.S.A. Nos. 382.0455 and 382.7879.

Cotton textile products in part of Category 63 (only T.S.U.S.A. Nos. 380.0043, 380.0046, 382.0054 and 382.0056) and man-made fiber textile products in Categories 218, 221, part of 224 (only T.S.U.S.A. Nos. 382.0455 and 382.7879) and 234, produced or manufactured in the Philippines, which have been exported to the United States before October 1, 1976, shall not be subject to this directive.

Cotton textile products in part of Category 63 (only T.S.U.S.A. Nos. 380.0043, 380.0046 382.0054 and 382.0056) and man-made fiber textile products in Categories 218, 221, part of 224 (only T.S.U.S.A. Nos. 382.0455 and 382.7879) and 234 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) before the effective date of this directive shall not be denied entry under this directive.

The levels of restraint set forth above are subject to possible future adjustment pursuant to the provisions of the bilateral agreement of October 15, 1975, as amended, between the Governments of the United States and the Republic of the Philippines which provide, in part, that: (1) Within the group limits, specific levels of restraint may be exceeded by 7 percent in any agreement year; (2) specific levels of restraint may be increased for carryover and carryforward up to 11 percent of the receiving year's applicable limits; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Appropriate adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

A detailed description of the categories and rates of conversion into square yards equivalent was published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), as amended on December 31, 1975 (40 FR 60220), December 30, 1976 (41 FR 56881), January 21, 1977 (42 FR 3888), and March 7, 1977 (42 FR 12898).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Republic of the Philippines and with respect to imports of cotton and man-made fiber textile products from the Philippines have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

[Notice No. 204]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission within 30 days after the date of this publication. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC–FC–76857, filed March 25, 1977. Transferee: DEAN OF ITHACA, INC., 311 E. State Street, Ithaca, New York 14850. Transferor: Wayne C. Stevens, Inc., 990 Sullivan Street, Elmira, New York 14901. Applicant's representative: John Moore, Attorney at Law, 200 William Street, Elmira, New York 14901. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 43318 and MC 43318 (Sub-No. 1), both issued April 9, 1951, as follows: Household goods as defined by the Commission between Elmira, N.Y. and points within 25 miles thereof, on the one hand, and, on the other, points in Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Pennsylvania, Maryland, Virginia, Ohio, Indiana, Michigan, Illinois, West Virginia, and the District of Columbia. Transferee is presently authorized to operate as a common carrier under Certificate No. MC 45672 and subs thereafter. Application has been filed for temporary authority under Section 210a(b).

No. MC–FC–76971, filed May 9, 1977. Transferee: Kenneth W. Jensby, Rural Route 2, Hardy, Nebraska 68943. Transferor: Dale Ross, Rural Route 3, Concordia, Kansas 66901. Applicant's representative: Clyde N. Christey, attorney at law, 514 Capitol Federal Building, Topeka, Kansas 66603. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 77542, issued August 2, 1972, as follows: Livestock from specified counties in Kansas to specified points in Nebraska and Iowa; agricultural commodities from specified points in Missouri to Mahaska, Kans. and points within 30 miles of it: livestock between Mahaska, Kans. and 30 miles of it, on the one hand, and, on the other, Kansas City, Kans., Kansas City and St. Joseph, Mo. and points in Nebraska; and junk, agricultural machinery, grain bins and parts, and windmill pumps and tanks between Mahaska, Kans. on the one hand, and, on the other, Lincoln and Beatrice, Nebr. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77012, filed May 14, 1977. Transferee: EUREKA TERMINALS, INC., P.O. Box 124, 1000 Jericho Turnpike, New Hyde Park, New York 11040. Transferor: Bernard Miller, (Tillie Miller, heir-at-law) doing business as Barney Miller, 125 Ormonde Boulevard, Valley Stream, New York 11580. Applicant's representative: Arthur J. Piken, Esq., One Lefrak City Plaza, Flushing, New York 11368. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 76536, issued September 8, 1967, as follows: New furniture from New York, N.Y. to points in Monmouth, Middlesex, Somerset, Union, Morris, Essex, Passaic, Bergen, and Hudson Counties, N.J. and Rockland County, N.Y. Transferee is presently authorized to operate as a contract carrier under Permit No. MC 134896. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77094, filed July 22, 1977. Transferee: East-West Motor Freight, Inc., 7270 Hobgood Road, Fairburn, Georgia, 30213. Transferor: Columbine Carriers, Inc., 1720 East Garry Avenue, Santa Ana, California 92705. Transferor's representative: Charles J. Kimball, Kimball & Williams, P.C., 1600 Sherman Street, Denver, Colorado 80203. Transferee's representative: Bruce Mitchell, Suite 375, 3379 Peachtree Rd., NE., Atlanta, Georgia, 30326. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit, No. MC 135185 (Sub-No. 7), issued October 31, 1972, as follows: Materials, supplies, and equipment utilized by hospitals, nursing homes, health care centers, and laboratories, from points in that part of California, in and south of the San Luis Obispo, Kern, and San Bernardino Counties, Calif., to Chamblee, Ga., and Miami, Fla., and from points in Georgia and Florida to points in that part of California in and south of San Luis Obispo, Kern, and San Bernardino Counties, Calif. The operations are restricted to the transportation of shipments originating at or destined to the plant site or distribution facilities of American Hospital Supply Corporation and are limited to a transportation service to be performed, under a continuing contract or contracts, with American Hospital Supply Corporation, of McGraw Park, Ill. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77097, filed April 27, 1977. Transferee: Joseph L. Escobedo and Holly C. Escobedo, d.b.a. CHOZEN TRUCKING CO., 1400 E. Anaheim Street, Wilmington, Calif. 90744. Transferor: Chozen Trucking Co., Inc., 1400 E. Anaheim Street, Wilmington, Calif. 90744. Authority sought for purchase by transferee of the operating rights of transferor, a set forth in Certificate No. MC 9057, issued April 25, 1955, as follows: Building materials, from Los Angeles Harbor and Long Beach, Calif., to points in the Los Angeles Commercial Zone. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77112, filed May 10, 1977. Transferee: E Z FREIGHT LINES, a corporation, 348 Ocean Avenue, Jersey City, New Jersey 07305. Transferor: Jaymar Trucking Co., Inc., 348 Ocean Avenue, Jersey City, New Jersey 07305. Applicant's representative: Robert B. Pepper, 168 Woodbridge Avenue, Highland Park, New Jersey 08904. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Permit No. MC 139349 (Sub-No. 2) issued November 8, 1974, as follows: Lamps, lighting fixtures, and equipment, materials, and supplies used in their manufacture and sale between Jersey City, N.J., on the one hand, and, on the other, points in Nassau, Suffolk, Westchester, Rockland, and Orange Counties N.Y., Fairfield County, Conn., and Philadelphia, Pa.; between Jersey City and Kearny, N.J., on the one hand, and, on the other, points in Louisiana, Minnesota, and Texas and those points in the United States east of the Mississippi River; between Clifton, North Bergen, and Secaucus, N.J., on the one hand, and, on the other, points in Louisiana, Minnesota, and Texas and those points in the United States east of the Mississippi River; and between Fall River, Mass. on the one hand, and, on the other, specified states and a portion of the United States east of the Mississippi River. Transferee presently holds no authority from this Commission; application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77113, filed May 6, 1977. Transferee: MOLLOY BROS. TRUCKING, INC., 151 South 14th Street, Lindenhurst, New York 11757. Transferor: Murphy Moving & Storage, Inc., 200 Middleneck Road, Great Neck, New York 11022. Applicant's representative: Ronald I. Shapss, attorney at law, 450 Seventh Avenue, New York, New York 10001: Richard Gates, attorney at law, 400 Jericho Turnpike, Jericho, New York 11753. Authority sought for purchase by transferee of a portion of the operating rights of transferor, as set forth in Certificate No. MC 22208, issued April 30, 1959, as follows: Household goods as defined by the Commission between New York, N.Y. and points on Long Island, on the one hand, and, on the other, points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and the District of Columbia. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77147, filed May 25, 1977. Transferee: D & T TRANSPORT, INCORPORATED, R.R. No. 4, Box 54A, Mooresville, Indiana 46158. Transferor: John Thomas Loudermilk, d.b.a. D & T Transport, R.R. No. 4, Box 54A, Mooresville, Ind. 46158. Applicants' representative: Stephen M. Gentry, 1500 Main Street, Speedway, Indiana 46224. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit No. MC 141640 (Sub-No. 2), issued November 15, 1976, as follows: Molten aluminum, in containers, from the plant site of the Anaconda Company, Aluminum Division, at or near Sebree, Ky., to points in Illinois, Indiana, and Tennessee, with no transportation for compensation on return except as otherwise authorized, under contract with Anaconda Company, Aluminum Division of Louisville, Ky. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77191, filed July 6, 1977. Transferee: Allen Beyer, Box 1, Stetsonville, Wisconsin 54480. Transferor: Norbert Geiger, 213 Washington, Dorchester, Wisconsin 54425. Applicant's representative: Norbert Geiger, 213 Washington, Dorchester, Wisconsin 54425. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit No. MC 123641 (Sub-No. 3), issued March 20, 1967, as follows: Lumber products between Dorchester, Wisc., on the one hand, and, on the other, points in Minnesota, Iowa, Indiana, Illinois, and the Lower Peninsula of Michigan. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77196 filed June 30, 1977. Transferee: NEWELL TRUCK LINE, INC., Wakefield, Kansas, 67487. Transferor Dale Newell, d.b.a. Newell Truck Line, Wakefield, Kansas, 67487. Applicants' representative: Ryan and Ryan, P.A., Attention: Tim W. Ryan and Court Street, Clay Center, Kansas, 67432. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificates No. MC 1805 and MC 1805 (Sub-No. 2), issued February 19, 1965, and January 7, 1970, respectively, as follows: General commodities, with normal exceptions, between Wakefield, Kans., and Kansas City, Mo., serving the intermediate point of Kansas City, Kans., over specified regular routes; Livestock and agricultural commodities, over irregular routes, from Wakefield, Kans., and points within ten miles thereof, to Kansas City, Kans., and Kansas City, Mo.; Livestock, feed, building materials, fencing materials, petroleum products in containers, agricultural implements and parts, and farm machinery and parts, from Kansas City, Mo., and Kansas City, Kans., to Wakefield, Kans., and points within ten miles thereof; and twine and dry feed, dry feed ingredients, and dry fertilizer, from Kansas City, St. Joseph, and Joplin, Mo., to Wakefield, Kans., and points within 25 miles thereof. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77210, filed July 11, 1977. Transferee: VACA VALLEY BUS LINES, INC., 321 State Street, Fairfield, California 94533. Transferor: Horace Simmons, d.b.a. Vaca Valley Bus Lines, 321 State Street, Fairfield, California 94533. Applicants' representative: Daniel W. Baker, attorney at law, 100 Pine Street, Suite 2550, San Francisco, California 94111. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 99581 (Sub-No. 1) and MC 99581 (Sub-No. 3) issued May 26, 1974 and March 9, 1976 respectively, as follows: Passengers and their baggage over a specified regular route between Suisun, Calif. and Travis Air Force Base, Calif. serving all intermediate points and between Vacaville, Calif. and Travis Air Force Base, Calif. serving all intermediate points; passengers and their baggage in special and charter operations beginning and ending at points in Marin, Napa, Solano, and Sonoma Counties, Calif. and extending to points in the United States (except Alaska and Hawaii). Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77212, filed July 13, 1977. Transferee: Henry C. Potter, 2818 Hamilton Ave., Baltimore, Maryland 21214. Transferor: Potter Transfer, Inc., (c/o General Delivery) Box 127, White Plains, Maryland 20695. Applicant's representative: Harry J. Jordan, attorney at law, 1000 16th St., NW., Washington, D.C. 20036. Authority sought for purchase by transferee of a portion of the operating rights of transferor, as set forth in Certificate No. MC 127147 (Sub-No. 3), issued November 23, 1972, as follows: Wood chips, bark, and mulch, from points in Calvert, Anne Arundel, Charles and St. Mary Counties, Md., to points in Pennsylvania, New Jersey, New York, Delaware, Virginia, West Virginia, Ohio, North Carolina, and the District of Columbia, with no transportation for compensation on return except as otherwise authorized. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77213, filed July 11, 1977. Transferee: EASTERN CARTAGE SERVICES, INC., 18–20 Dale Street, Andover, Massachusetts 01810. Transferor: D & O Transportation Co., Inc., 3 Sanborn Court, Somerville, Massachusetts 02143. Applicant's representative: Frank J. Weiner, 15 Court Square, Boston, Massachusetts 02108. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate of Registration No. MC 97888 (Sub-No. 1), issued December 13, 1963, authorizing the transportation of general commodities anywhere in the Commonwealth of Massachusetts. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

[Notice No 97]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

August 3, 1977

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 30000 (Sub-No. 3TA), filed July 15, 1977. Applicant: KENTUCKY TRANSPORT CORP., Suite 381, 400 Sherburn Lane, Louisville, Ky. 40207. Applicant's representative: Wm. L. Willis, Suite 708, McClure Building, Frankfort, Ky. 40601. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs and related products*, (except in bulk, moving in vehicles equipped with mechanical refrigeration, between the warehouse sites of Louisville Freezer Center, in Jefferson County, Ky., on the on hand, and, on the other, all points and places in Alabama, Arkansas, District of Columbia, Georgia, Illinois, Indiana, Kentucky, Maryland, Michigan, Missouri, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia and W. Va., restricted to transportation of freight having and origin or destination at the warehouse sites of Louisville Freezer Center, under a continuing contract, or contracts, with Louisville Freezer Center, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Mr. Clifton Juckett, Vice President, Sales and Distribution, 2000 South Ninth Street, Louisville, Ky. 40208. Send protests to: Linda H. Sypher, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 426 P.O. Building, Louisville, Ky. 40202.

No. MC 48958 (Sub-No. 135TA), filed July 15, 1977. Applicant: ILLINOIS-CALIFORNIA EXPRESS, INC., 510 E. 51st Avenue, P.O. Box 16404, Denver, Colo. 80216. Applicant's representative: Lee E. Lucero, 510 E. 51st Avenue, P.O. Box 16404, Denver, Colo. 80216. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat products, meat by-products, and articles distributed by meat packinghouses*, as described in Sections A & C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from all points in Iowa, Dakota City, Fremont, Schuyler, Scottsbluff and West Point, Nebr.; Holton and Kansas City, Kan.; and Kansas City, Mo., to all points to Arizona, California, Connecticut, New Mexico and Utah, for 180 days. Supporting shipper(s): American Beef Packers, Inc., Highway 59 North, Oakland, Iowa. 51560. Farmland Foods, Inc., Dept. 44, 3315 N. Oak Trafficway, Kansas City, Mo. 64116. Send protests to: Roger L. Buchanan, District Supervisor, Interstate Commerce Commission, 492 U.S. Customs House, 721 19th Street, Denver, Colo. 80202.

No. MC 56679 (Sub-No. 98TA), filed July 20, 1977. Applicant: BROWN TRANSPORT CORP., 352 University Avenue, S.W., Atlanta, Ga. 30315. Applicant's representative: John T. Coon, 352 University Avenue, S.W., Atlanta, Ga. 30315. [Notice No. 98]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

August 4, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Motor Carriers of Property

[Notice No 99TA]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 5, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 63417 (Sub-No. 107TA), filed July 15, 1977. Applicant: BLUE RIDGE TRANSFER COMPANY, INCORPORATED, P.O. Box 13447, Roanoke, Va. 24034. Applicant's representative: William E. Bain (same address as applicant). Baylor District Supervisor, Interstate Commerce Commission, Room 2020 Federal Building, 230 N. First Avenue, Phoenix, Ariz 85025

Passenger Application

No. MC 1515 (Sub-No. 234TA), filed July 19, 1977. Applicant: GREYHOUND LINES, INC., Greyhound Tower, Phoenix, Ariz. 85077. Applicant's representative: W. L. McCracken (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage* in the same vehicle with passengers, in one-way and round-trip special operations; Route No. 1. Between Sun City, Ariz., and the junction of Dysart Road and U.S. Highway 80 serving all intermediate points: From Sun City over 111th Avenue to Olive Avenue, thence over Olive Avenue to Dysart Road, thence over Dysart Road to junction U.S. Highway 80 and return over the same route. Route No. 2. Between Glendale, Ariz., and the junction of Glendale Avenue and Dysart Road serving all intermediate points: From Glendale, Ariz., over 67th Avenue to Glendale Avenue, thence over Glendale Avenue to junction Dysart Road and return over the same route, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: (1) Lou Ann Morgan, Greyhound Ticket Agent, 7044 Carol Ann Way, Peoria, Ariz. 85345. (2) Joseph Byron Wilson, 10933 Sequoia Dr., Sun City, Ariz. 85351. (3) Herbert F. Koehn, 10937 Sequoia Dr., Sun City, Ariz. 85351. (4) Ken Morgan, Jr., Ken's Pharmacy, 4834 W Frier, Glendale, Ariz. 85351. Send protests to: Andrew V. Baylor, District Supervisor, Interstate Commerce Commission, Room 2020 Federal Bldg., 330 N. First Ave., Phoenix, Ariz. 85025.

By the Commission.

H. G. Homme, Jr.,
Acting Secretary.

[Ex Parte No. MC-43]

LEASE AND INTERCHANGE OF VEHICLES BY MOTOR CARRIERS

Order. At a session of the Interstate Commerce Commission, Motor Carrier Leasing Board, held at its offices in Washington, D.C., on the 29th day of July 1977.

It appearing, that a petition has been filed by R. O. Wetz Transportation, Inc. (MC-31438 and various subs), and Hub Freight Systems, Inc. (MC-136728 and Sub 1), under temporary common control, for waiver of paragraph (a)(3) and (c) of § 1057.4 of the Lease and Interchange of Vehicles Regulations (49 CFR Part 1057), concerning equipment leased between petitioners;

It further appearing, that petitioners maintain a jointly supervised program applying the same standards of inspection maintenance to equipment in accordance with the motor carrier safety regulations of the Department of Transportation;

It further appearing, that the Department offers no objections to granting the petition;

It further appearing, that no enforcement action is pending involving the fitness of petitioners;

It is ordered, That waiver of paragraphs (a)(3) and (c) of § 1057.4 be, and it is hereby granted: *Provided,* That the equipment is inspected on the day it is to be leased and found to meet the requirements of the motor carrier safety regulations of the Department of Transportation and that the petitioners remain in satisfactory compliance with these regulations and under common control.

By the Commission, Motor Carrier Leasing Board, Board Members Burns, Turkington, and Sibbald.

H. G. Homme, Jr.,
Acting Secretary.

1

FEDERAL ELECTION COMMISSION.

DATE AND TIME: Thursday, August 11, 1977 at 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C.

STATUS: Portions of this meeting will be open to the public and portions of this meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public:

I. Future meetings.
II. Correction and approval of minutes—July 28, 1977.
III. Advisory opinions: AD 1977-29 (Memorandum No. 1412).
IV. Appropriations and budget—Budget Execution Report.
V. Pending legislation.
VI. Liaison with other Federal agencies.
VII. Report on pending litigation.
VIII. Promotion procedures/agency position descriptions (if not concluded at meeting of August 8, 1977).
IX. Routine administrative matters.

Portions closed to the public (Executive Session):

F.O.I.A. appeals (if not concluded at meeting of August 8).
Compliance matters.
Personnel.

PERSON TO CONTACT FOR INFORMATION:

David Fiske, Press Officer, telephone: 202-523-4065.

Marjorie W. Emmons,
Secretary to the Commission.

[S-1063-77 Filed 8-4-77;1:30 pm]

2

FEDERAL POWER COMMISSION.

TIME AND DATE: August 11, 1977, 1:30 p.m.

PLACE: 825 North Capitol Street.

STATUS: Open.

MATTERS TO BE CONSIDERED: (Agenda).

Note.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth F. Plumb, Secretary, telephone: 202-275-4166.

This is a list of the matter to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda. However, all public documents may be examined in the Office of Public Information, Room 1000.

Power Agenda, 7653rd Meeting, August 11, 1977, Regular Meeting, Part I (1:30 p.m.)

P-1.—Docket No. E-7734, Mid-Continent Area Power Pool Agreement.
P-2.—Docket No. E-8176, Southern California Edison Company.
P-3.—Docket No. E-9571, Potomac Edison Company.
P-4.—Docket Nos. ER77-102 and ER77-277, Pennsylvania Power Company.
P-5.—Docket No. ER76-320, Connecticut Light and Power Company.
P-6.—Docket No. ER77-388, Superior District Power Company.
P-7.—Docket No. ER77-489, El Paso Electric Company.
P-8.—Docket No. ER76-533, Central Vermont Public Service Corporation.
P-9.—Project Nos. 233, 2106, 2155, California, Pacific Gas and Electric Company.
P-10.—Project No. 362, Minnesota Ford Motor Company.
P-11.—Hydroelectric development in their area.
M-1.—Docket No. R-417, Disposal of Interests in Project Lands, and Applications for Certain Uses of Project Property Requiring Commission Approval.
M-2.—Docket No. RM75-16, Electric Utility Questionnaire on Plans and Costs for Meeting Current Air Pollution Standards.

4

TENNESSEE VALEY AUTHORITY.

TIME AND DATE: 10:30 a.m., Thursday, August 11, 1977.

PLACE: Conference Room B–32, West Tower, 400 Commerce Avenue, Knoxville, Tennessee.

SATUS: Open.

MATTERS TO BE CONSIDERED:

A—Personnel Actions

1. Resolution relating to recommendations resulting from mediation proceedings of the Twenty-Sixth Annual Salary Negotiations—1977.

B—Consulting and Personal Service Contracts

1. Renewal of personal service contract with Nuclear Services Corporation, Campbell, California—Office of Engineering Design and Construction.

C—Purchase Awards

1. Req. No. 145410—Number 2 diesel fuel oil for Johnsonville and Colbert Steam Plants.
2. Req. No. 535531—Indefinite quantity term contract for crushed stone, filter material and riprap for Hartsville Nuclear Plant.
3. Req. No. 821594—Indefinite quantity term contract for fittings, pipe, flanges, tubing, and accessories for Watts Bar and Bellefonte Nuclear Plants.
4. Req. No. 820557 (Reissue)—480-volt motor control centers for Hartsville and proposed Phipps Bend Nuclear Plants.
5. Req. No. 820750—Butterfly valves for Hartsville and Phipps Bend Nuclear Plants.
6. Req. No. 551274—Tractor-Scraper for construction pool equipment, Muscle Shoals, Alabama.
7. Req. No. 820592—480-volt switchgear and transformers for Hartsville and Phipps Bend Nuclear Plants.
8. Req. No. 822339—Indefinite quantity term contract for steel roof decking and accessories for any TVA project or warehouse.
9. Req. No. 144601—Spindle blading for Shawnee Steam Plant.
10. Req. No. 822980—Repair of cooling towers for Browns Ferry Nuclear Plant.
11. Amendment to Contract No. 75X5–57633–1 with General Electric Supply Company, Chattanooga, Tennessee, for conduit fittings and accessories for any TVA project or warehouse.

D—Project Authorizations

1. No. 3257—Flume rehabilitation at Ocoee No. 2 hydro plant.
2. No. 3258—Replace four feedwater heaters at Cumberland Steam Plant.

E—Fertilizer Items

None.

F—Power Items

1. Application for renewal of Access Permit No. 2748 for restricted isotope separation data.
2. Interagency agreement between TVA and the Energy Research and Development Administration (ERDA) for fluidized combustion demonstration plant.
3. Lease-purchase and amendatory agreement with Olin Corporation covering arrangements for 161–kV delivery at TVA's Charleston, Tennessee, 161–kV substation.
4. New power contract with Tennessee River Pulp & Paper Company, Counce, Tennessee.

G—Real Property Transactions

1. Resolution relating to sale of permanent easement for a coal loading barge terminal, affecting approximately 1.25 acres of Melton Hill Reservoir land—Tract No. XMHR–401E.
2. Resolution relating to grant of permanent easement to the city of Sheffield, Alabama, affecting approximately 44 acres of Muscle Shoals Reservation land—Tract XT2NPT–8E.
3. Resolution relating to reconveyance to TVA of public park land on Douglas Reservoir from the town of Dandridge, Tenn.
4. Filing of condemnation suits.

H—Unclassified

1. Resolution relating to settlement agreement with Island Creek Coal Sales Company in connection with alleged breach of contract.

Following the formal meeting, the Board will hold the preliminary discussion in its quarterly power system financial review. The Board will complete its quarterly review on Thursday, August 25, at 10:30 a.m. in Conference Room B–32, West Tower, 400 Commerce Avenue, Knoxville, Tennessee.

Dated: August 4, 1977.

CONTACT PERSON FOR MORE INFORMATION:

John Van Hol, Director of Information, or a member of his staff can respond to requests for information about this meeting. Call: 615–632–3257, Knoxville, Tennessee. Information is also available at TVA's Washington Office, 202–343–4537.

TUESDAY, AUGUST 9, 1977

PART II

DEPARTMENT OF LABOR

Employment and Training Administration

TITLE VI OF THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT OF 1973

Income Levels to be Used for Participant Eligibility Determination

DEPARTMENT OF LABOR

Employment and Training Administration

[Field Memorandum No. 296–77]

TITLE VI OF THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT OF 1973

Income Levels To Be Used for Participant Eligibility Determination

Notice is hereby given that the Department of Labor, Employment and Training Administration has provided prime sponsors under the Comprehensive Employment and Training Act (CETA) of 1973, as amended, with income levels to be used for determining the eligibility of persons applying for certain public service jobs under title VI.

The text of Field Memorandum No. 269–77 is published here to inform all interested parties of the criteria that prime sponsors will use to certify individuals applying for certain public service employment as eligible.

Directive: Field Memorandum No. 269–77.

To: All Regional Administrators.

From: Floyd E. Edwards, Administrator, Field Operations.

Subject: Lower Living Standard Income Level for CETA Title VI.

1. *Purpose.* To provide updated maximum income levels which are 70 percent of the "lower living standard income level" to be used by prime sponsors for determining the eligibility of persons applying for certain public service jobs under title VI of CETA.

2. *Reference.* Regulations sections 94.4(ss), 94.4(nn), 99.40(b), and 96.42(a) of 29 CFR Parts 94, 96, and 99, ET Handbook 311, Standard Metropolitan Statistical Areas 1975, revised.

3. *Background.* Section 608 of the Emergency Jobs Extension Act requires that the total annual family income of persons applying for certain public service jobs be equal to or less than 70 percent of the lower living standard budget published by the Bureau of Labor Statistics (BLS). It also requires that these income levels be " * * * adjusted for regional and metropolitan and urban and rural differences and family size.* * * " The BLS provided ETA with:

An average lower level budget for an urban family in the United States and each of the four census geographic regions (Northeast, North Central, South, and West) into which the United States is divided;

An average lower level budget for metropolitan and non-metropolitan urban areas in both the U.S. and each of the four census geographic regions; and

An average lower level budget for 40 specific metropolitan areas.

The size of the four regions into which the United States is divided is so large that it is impossible to accurately reflect cost of living differentials within each of the regions. Further, the availability of information for only 40 specific metropolitan areas within these four regions compounded the difficulties of treating all prime sponsors equitably. Accordingly, the available data were used to provide prime sponsors with eligibility income levels which best approximate the cost of living in their areas.

4. *Lower living standard income levels.* Attachment I contains a listing of all prime sponsors and the updated income level(s) to be used for determining the eligibility of persons from four-person families who are applying for certain public service jobs under title VI. The four-person family eligibility income level provided is equal to 70 percent of the appropriate lower living standard income level and in all cases is the highest eligibility level possible for the geographic area in question. These levels are greater than the levels previously provided in Field Memorandum No. 75–77. They have been updated to reflect changes in prices and personal taxes between autumns 1975 and 1976. Where the prime sponsor's jurisdiction contains, or is in its entirety, a metropolitan area, an eligibility income level for metropolitan areas is provided in Attachment I. Where the prime sponsor's jurisdiction contains, or is in its entirety, a non-metropolitan area, an eligibility income level for non-metropolitan area is supplied.

(a) *Metropolitan areas* of 50,000 or more population are urban places as defined in either the 1970 Census of Population or subsequent census updates. All jurisdictions within Standard Metropolitan Statistical Areas (SMSA), regardless of size, are considered metropolitan areas. For a listing of jurisdictions in SMSA's, consult the 1975 edition of Standard Metropolitan Statistical Areas. Title VI prime sponsors and program agents which are cities, villages, or towns are, because of their population size, also are considered to be metropolitan areas. Where specific eligibility income levels for one of the 40 metropolitan areas for which data are available are greater than the average eligibility levels for all metropolitan areas in the region, the specific metropolitan area levels which are contained in Attachment I are to be applied to all residents of the specific metropolitan area. Where eligibility income levels for any of the 40 specific metropolitan areas are less than the average of all eligibility income levels for metropolitan areas in the region, the higher regional levels which are contained in Attachment I are to be applied.

(b) *Non-metropolitan and rural areas* are places with less than 50,000 persons which are outside SMSA's. The income levels provided in Attachment I for these areas are the non-metropolitan area levels for the appropriate census region. Since data are not available for rural areas, the higher non-metropolitan income levels will be used in these areas.

(c) *Consortium prime sponsors.* Where a member of a consortium is partially located within a specific metropolitan area which has an eligibility income level greater than the eligibility income level for metropolitan areas in the region, all metropolitan areas within the consortium prime sponsor's jurisdiction may use the higher specific metropolitan area level supplied in Attachment I. The eligibility income levels supplied in Attachment I for non-metropolitan areas in the region will be applied to all non-metropolitan and rural areas in the consortium.

(d) *Balance of State prime sponsors.* Where parts of balance of State prime sponsors are located within a specific metropolitan area which has eligibility income levels greater than the eligibility income levels for metropolitan areas in the region, the higher level must be used for only those jurisdictions located within the specific areas identified in Attachment I. Other jurisdictions will use, as appropriate, the eligibility income levels for either metropolitan areas or non-metropolitan areas in the region.

(e) *Puerto Rico, Virgin Islands, American Samoa, Guam, and the Trust Territories of the Pacific.* No information is available for these areas. The metropolitan and non-metropolitan levels supplied in Attachment I for prime sponsors, other than Guam and the Virgin Islands, are those provided for the South region, the lowest of the four regional levels. The level supplied for Guam is the non-metropolitan level for Hawaii. The level supplied for Virgin Islands is the non-metropolitan level for the Northeast.

5. *Adjustments for varying family size.* Attachment II contains adjustments to be made to four-person family eligibility income levels for family sizes up to six persons. For families larger than six persons, an amount equal to the difference between the six- and five-person family eligibility income levels should be added to the six-person family eligibility income level for each additional person in a family.

6. *Relationship to poverty level.* Where the appropriate poverty level for a particular family size is greater than the level contained in Attachment II, prime sponsors shall use the poverty level for eligibility determinations.

7. *Annualization of family income.* In computing a person's income level for title VI, the prime sponsor is to annualize the applicant's family income based on the 3 months preceding application. However, in instances where it is distorted by seasonal factors such as seasonal unemployment (e.g., teachers), summer employment for youth, or employment in the last three-months which is unrepresentative of the previous 12-month period, the prime sponsor is to total all family income received during the twelve months prior to application.

8. *Inclusion and exclusion in annual family incomes.* When recording family income, the inclusions and exclusions are the same as those contained on pages VI–3, through VI–5 of the CETA Forms Preparation Handbook (ET Handbook 311).

9. *Action required.* RAs are to provide prime sponsors with the appropriate updated levels to be used for participant eligibility determinations in metropolitan and non-metropolitan areas within their jurisdictions. These updated levels are effective immediately.

10. *Inquiries.* Questions should be directed to either Hugh S. Davies or Jack Rapport on 8–376–7006.

11. *Attachments.* (RA's only.)

Signed at Washington, D.C., this 5th day of July 1977.

PIERCE A. QUINLAN,
Administrator, Office of Comprehensive Employment Development.

PART III

DEPARTMENT OF STATE

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

Applications for Permits To Fish Off the Coasts of the United States

DEPARTMENT OF STATE

[Public Notice 599]

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

Applications for Permits To Fish Off the Coasts of the United States

The Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) (the "Act") provides that no fishing shall be conducted by foreign fishing vessels in the Fishery Conservation Zone of the United States after February 28, 1977, except in accordance with a valid and applicable permit issued pursuant to Section 204 of the Act.

The Act also requires that all applications for such permits be published in the FEDERAL REGISTER.

Applications for fishing during 1977 have been received from the Government of Cuba, and are published herewith.

Dated: July 29, 1977.

LARRY L. SNEAD,
Acting Director, Office of Fisheries Affairs.

THE UNITED STATES OF AMERICA
DEPARTMENT OF COMMERCE
NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

APPLICATION FOR VESSEL PERMITS TO FISH WITHIN THE FISHERY CONSERVATION ZONE OF THE UNITED STATES, OR FOR ANADROMOUS SPECIES OR CONTINENTAL SHELF FISHERY RESOURCES

DATE _____ APPLICATION NO. _____
for use of issuing Officer

In accordance with the provision of Section 204 of the Fishery Conservation and Management Act of 1976, (16 U.S.C. 1801-1882), and the governing international fisheries agreement entered into with the Government of the United States of America, which entered into force on _____,
date

the government (or competent authority) of CUBA

hereby submits this application for permits for fishing vessels under its jurisdiction to fish within the fishery conservation zone of the United States, or beyond that zone for anadromous species or Continental Shelf fishery resources subject to the jurisdiction of the United States.

The following information is submitted in support of this application (Use additional sheets as required).

A completed Fishing Vessel Identification Form for each permit that is requested; and a compilation of data contained in questions 5 and 20 in the attached Fishing Vessel Identification Form.

Submitted May the 3th, 1977
Date

Signature of Authorized Official J. A. Varea.

FISHERY MINISTRY REPRESENTATIVE.

5. Type of Vessel [illegible]
6. Tonnage (Gross) [illegible] (Net) [illegible]
7. Length [illegible] ft. 8. Breadth [illegible] ft. 9. Draft [illegible] ft.
10. Horsepower [illegible] 11. Maximum Speed [illegible] kt.
11. Propulsion: Diesel ( ), Steam ( ), Diesel/Electric ( ).
    Other _____
12. Date Built [illegible]
13. Number and Nationality of Personnel [illegible]
    Officers [illegible] Crew [illegible] Other(Specify) [illegible]
14. Communications: VHF-FM ( ), AL/SSB, Voice (X), Telegraphy ( ),
    Other _____
    International Radio Call Sign [illegible]
    Radio Frequencies Monitored [illegible]
    Other Working Frequencies [illegible]
    Schedule [illegible]

CU-77-0081

15. Navigation Equipment: Loran C ( ), Loran A ( ), Omega ( ).
    Decca ( ), Navaid ( ), Radar ( ), Fathometer ( ).
    Other _____
16. Cargo Capacity (LT) / 17. Cargo Space Number, Name
    Salted Fish _____ Freezer
    Fresh Fish _____ Dry Hold
    Frozen Fish _____ Tanks
    Fish Meal _____ Other
    Other _____
18. Processing Equipment (indicate daily capacity, LT)
19. Fisheries for which Permit is Requested:

Ocean Area	Period (From-To)	Species	Contemplated Catch (LT)	Gear to be Used
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]

20. Name and Address of Agent appointed to receive any legal process issued in the United States:

FISHING VESSEL IDENTIFICATION FOR (FOREIGN)

Permit Period Applied For: _____

Application No. CU-77-0082 For Use of Issuing Office

State: [illegible]

1. Name of Vessel [illegible]
2. Vessel No. Hull No. [illegible] Registration No. [illegible]
3. Name and Address of Owner / Name and Address of Charterer
   Name: [illegible]
   Address: [illegible]
   Cable Address: [illegible]
4. Homeport and State of Registry: [illegible]
5. Type of Vessel [illegible]
6. Tonnage (Gross) [illegible] (Net) [illegible]
7. Length [illegible] ft. 8. Breadth [illegible] ft. 9. Draft [illegible] ft.
10. Horsepower [illegible] 11. Maximum Speed [illegible] kt.
11. Propulsion: Diesel ( ), Steam ( ), Diesel/Electric ( ).
    Other _____
12. Date Built [illegible]
13. Number and Nationality of Personnel [illegible]
    Officers [illegible] Crew [illegible] Other(Specify) [illegible]
14. Communications: VHF-FM ( ), AL/SSB, Voice (X), Telegraphy ( ),
    Other _____
    International Radio Call Sign [illegible]
    Radio Frequencies Monitored [illegible]
    Other Working Frequencies [illegible]
    Schedule [illegible]

CU-77-0082

15. Navigation Equipment: Loran C ( ), Loran A ( ), Omega ( ).
    Decca ( ), Navaid ( ), Radar ( ), Fathometer ( ).
    Other _____
16. Cargo Capacity (LT) / 17. Cargo Space Number, Name
    Salted Fish _____ Freezer
    Fresh Fish _____ Dry Hold
    Frozen Fish _____ Tanks
    Fish Meal _____ Other
    Other _____
18. Processing Equipment (indicate daily capacity, LT)
19. Fisheries for which Permit is Requested:

Ocean Area	Period (From-To)	Species	Contemplated Catch (LT)	Gear to be Used
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]

20. Name and Address of Agent appointed to receive any legal process issued in the United States:

FISHING VESSEL IDENTIFICATION FOR (FOREIGN)

Permit Period Applied For: _____ Application No. CU-77-0083 For Use of Issuing Office

State: _____

1. Name of Vessel: _____
2. Vessel No. Hull No. _____ Registration No. _____
3. Name and Address of Owner: _____ Name and Address of Charterer
   Name _____
   Address _____
   Cable Address _____
4. Homeport and State of Registry: _____
5. Type of Vessel: _____
6. Tonnage (Gross): _____ (Net): _____
7. Length: _____ Breadth: _____ Draft: _____
8. Horsepower: _____ No. 10. Maximum Speed _____
9. Propulsion: Diesel ( ), Steam ( ), Diesel/Electric ( ).
   Other _____
10. Date Built: _____
11. Number and Nationality of Personnel: _____
    Officers _____ Crew _____ Other (Specify) _____
12. Communications: VHF-FM ( ), AM/SSB, Voice ( ), Telegraphy ( ),
    Other _____
    International Radio Call Sign _____
    Radio Frequencies Monitored _____
    Other Working Frequencies: 1650 Kc.
    Schedule _____

13. Navigation Equipment: Loran C ( ), Loran A ( ), Omega ( ).
    Decca ( ), Navaid ( ), Radar ( ), Fathometer ( ).
    Other _____
14. Cargo Capacity (MT) 15. Cargo Space Number, Name
    Salted Fish _____ Freezer
    Fresh Fish _____ Dry Hold
    Frozen Fish _____ Tanks
    Fish Meal _____ Other
    Other _____
16. Processing Equipment (Indicate daily capacity, MT)
17. Fisheries for which Permit is Requested:

Ocean Area	Species	Contemplated Catch (MT)	Gear to be Used

18. Name and Address of Agent appointed to receive any legal process issued in the United States:

CU-77-0083

FISHING VESSEL IDENTIFICATION FOR (FOREIGN)

Permit Period Applied For: _____ Application No. CU-77-0084 For Use of Issuing Office

State: _____

1. Name of Vessel: _____
2. Vessel No. Hull No. _____ Registration No. _____
3. Name and Address of Owner: _____ Name and Address of Charterer
   Name _____
   Address _____
   Cable Address _____
4. Homeport and State of Registry: _____
5. Type of Vessel: _____
6. Tonnage (Gross): _____ (Net): _____
7. Length: _____ Breadth: _____ Draft: _____
8. Horsepower: _____ No. 10. Maximum Speed _____
9. Propulsion: Diesel ( ), Steam ( ), Diesel/Electric ( ).
   Other _____
10. Date Built: _____
11. Number and Nationality of Personnel: _____
    Officers _____ Crew _____ Other (Specify) _____
12. Communications: VHF-FM ( ), AM/SSB, Voice ( ), Telegraphy ( ),
    Other _____
    International Radio Call Sign _____
    Radio Frequencies Monitored _____
    Other Working Frequencies: 1650 Kc.
    Schedule _____

13. Navigation Equipment: Loran C ( ), Loran A ( ), Omega ( ).
    Decca ( ), Navaid ( ), Radar ( ), Fathometer ( ).
    Other _____
14. Cargo Capacity (MT) 15. Cargo Space Number, Name
    Salted Fish _____ Freezer
    Fresh Fish _____ Dry Hold
    Frozen Fish _____ Tanks
    Fish Meal _____ Other
    Other _____
16. Processing Equipment (Indicate daily capacity, MT)
17. Fisheries for which Permit is Requested:

Ocean Area	Species	Contemplated Catch (MT)	Gear to be Used

18. Name and Address of Agent appointed to receive any legal process issued in the United States:

CU-77-0084

FISHING VESSEL IDENTIFICATION FOR (FOREIGN)

Permit Period Applied For: _____ Application No. CU-77-0085 For Use of Issuing Office

State: Cuba

1. Name of Vessel: [illegible]
2. Vessel No. Hull No. [illegible] Registration No. [illegible]
3. Name and Address of Owner: [illegible] Name and Address of Charterer
   Name [illegible]
   Address [illegible]
   Cable Address [illegible]
4. Homeport and State of Registry: [illegible]

PART IV

THE NATIONAL ARCHIVES OF THE UNITED STATES • 1934 •

PANAMA CANAL COMPANY

PRIVACY ACT OF 1974

Systems of Records; Addition

CANAL ZONE GOVERNMENT—PANAMA CANAL COMPANY

PRIVACY ACT OF 1974

Proposed New System of Records

The Canal Zone Government and the Panama Canal Company propose to establish a new system of records called "Race and Ethnic Data, PCC-CZG/GVEO-1." A description of the proposed new system is published below.

These agencies filed a report on the proposed new system with the Office of Management and Budget, the Senate, the House of Representatives and the Privacy Protection Study Commission on July 19, 1977.

These agencies invite the submission of written data, views or arguments on any aspect of this proposed new system by any member of the public. To be considered, comments must be received on or before September 8, 1977.

Send comments to:
Joseph J. Wood,
Agency Records Officer,
(Chief, Administrative Services Division)
Panama Canal Company
Box M
Balboa Heights, Canal Zone
Mark all comments: "GVEO-1."

Thomas M. Constant,
Assistant to the Governor of the Canal Zone Secretary, Panama Canal Company.

PCC-CZG/GVEO-1

System name: Race and Ethnic Data, PCC-CZG/GVEO-1

System location: Office of Equal Opportunity, Balboa Heights, Canal Zone, and Data Processing Division, Administration Building, Balboa Heights, Canal Zone.

Categories of individuals covered by the system: Active employees of the Panama Canal Company/Canal Zone Government.

Categories of records in the system: A minority group designator, together with information in the payroll system of the Panama Canal Company/Canal Zone Government, including such information as name, employee identification number, date hired, roll and gang, position number, occupation, pay level, base rate, position security classification, work week, social security code and number, residence, citizenship, sex, marital status, birth date, Federal service date, Canal service date and employee status.

Authority for maintenance of the system: 5 U.S.C. Chapter 55; 42 U.S.C. 2000e-16; 2 C.Z.C. 31-33, 65, 66, 101, 121, 141 et. seq., 76A Stat. 7, 11, 14, 15 ff.; E.O. 11478 of August 8, 1969; 5 CFR 713.301 and 713.302; Bylaws of the Panama Canal Company, Section 6.8.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See General Routine Use paragraphs published at 41 FR 41358 and in 35 CFR Part 10, Appendix A. The System Manager is prohibited, by the provisions of 5 CFR 713.302(b), from disclosing minority group data in the system except in the form of gross statistics (except insofar as an individual is entitled, under the Privacy Act, to access to information pertaining to him which is contained in the system.)

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

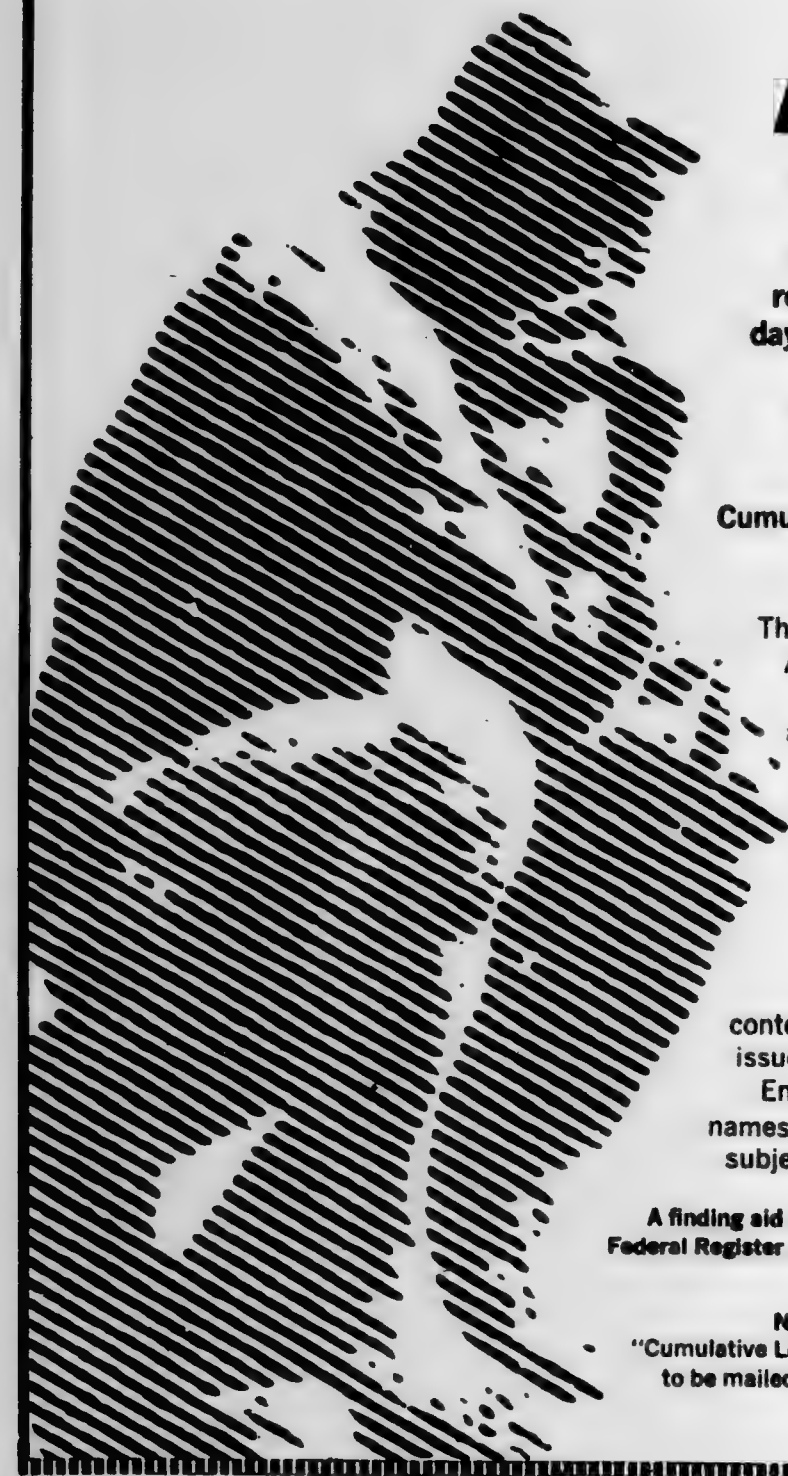
Storage: Magnetic tapes or discs, computer printouts and Panama Canal forms No. 2823, used for computer input.

Retrievability: By any or all of the categories of records in the system.

Safeguards: Printouts containing names or other personal identifiers together with the minority group designator code maintained in locked file cabinet and accessible only to the Director of the Office of Equal Opportunity or that official's designated representative. Magnetic tapes stored in locked rooms when not in use; access and use restricted to authorized personnel. Printouts will be produced only upon written request from the Director of the Office of Equal Opportunity.

Retention and disposal: Printouts retained up to five years and then destroyed. Records on magnetic tape retained until six weeks after the end of the calendar year in which the employee terminates. Tapes and discs erased and reused. Panama Canal forms No. 2823 destroyed after minority group information entered in computer and checked for accuracy.

System manager(s) and address: Director of Equal Opportunity, Office of Equal Opportunity, Box M, Balboa Heights, Canal Zone.



Notification procedure: Information may be obtained from the System Manager or the Agency Records Officer, Administration Building, Balboa Heights, Canal Zone. Rules are published in 35 CFR Part 10.

Record access procedures: Requests should be addressed to either of the officials designated in Notification Procedure, preceding.

Contesting record procedures: Rules governing how an individual may request the amendment of any information about him in this system are published in 35 CFR 10.7.

Record source categories: Minority group designator code: A visual identification of the employee's race and ethnic category made by the employee's supervisor for those employed as of June 30, 1977 and, for those entering service after June 10, 1977, by staff of the Employee Processing Unit of the Personnel Bureau. All other data: Subject employee, personnel action forms (SF 50), employing unit, time reports, computer-generated and manual calculations from varied input data.

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected
$10.00
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index $8.00
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed $_____ for _____ subscription(s) to the publications checked below:

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

PART 1427—COTTON

Subpart—1977 Crop Supplement to Cotton Loan Program Regulations

AGENCY: Commodity Credit Corporation, U.S.D.

ACTION: Final rule.

SUMMARY: Commodity Credit Corporation (CCC), is publishing the 1977 crop supplement to the Cotton Loan Program regulations. The supplement contains the loan rates and premiums and discounts applicable to the 1977 crop cotton. Price support loans will be available to eligible producers on 1977 crop cotton under such rates.

EFFECTIVE DATE: August 10, 1977.

FOR FURTHER INFORMATION CONTACT:

Dalton Ustynik (ASCS), 202-447-9224.

SUPPLEMENTARY INFORMATION: On December 27, 1976, a notice was published in the FEDERAL REGISTER (41 FR 56204) regarding certain determinations CCC was to make with respect to the loan programs for the 1977 crops of upland and extra long staple cotton. Five comments were received concerning the loan rates, discounts, and micronaire differentials for upland cotton. Two recommended that consideration be given to reducing the number of premiums and discounts in line with market needs. One response recommended that color, as an element of grade, be evaluated. One suggested that micronaire discounts are unfair and should be terminated. One recommended a widening of the differences in the lower micronaire groups. No comments were received concerning the other determinations included in the notice. After considering all responses, it is determined that the loan rates, premiums, discounts, and differentials proposed by CCC are fair and equitable and will be applicable to the 1977 crop of cotton. Accordingly, the 1977 program will remain basically unchanged from the 1976 loan program. The Cotton Loan Program Regulations issued by CCC, containing loan operation provisions are supplemented as shown below for the 1977 crop of cotton.

Sections 1427.101–1427.105 contain the schedules of base loan rates for upland cotton, premiums and discounts for grade and staple length of upland cotton, micronaire differentials for upland cotton and base loan rates and micronaire differentials for eligible qualities of extra long staple cotton which were announced by press release on May 12, 1977. Upland rates are based on the national loan rate applicable to Middling one-inch cotton (micronaire 3.5 through 4.9) net weight, at average location in the U.S. adjusted to Strict Low Middling $1^{1}/_{16}$ inch cotton as the base quality for computing loans. Extra long staple rates are based on the national average loan rate for extra long staple cotton. Both such rates were announced by press release as preliminary on October 15, 1976, and as final on February 16, 1977.

Accordingly, 7 CFR 1427.100 through 1427.105 and the title of the subpart are revised to read as follows, effective as to the 1977 crops of upland and extra long staple cotton. The material previously appearing in these sections remains in full force and effect as to the crop years to which it was applicable.

Subpart—1977 Crop Supplement to Cotton Loan Program Regulations

Sec.

1427.100 Purpose.
1427.101 Schedule of base loan rates for eligible 1977 crop upland cotton by warehouse location.
1427.102 Schedule of premiums and discounts for grade and staple length of eligible 1977 crop upland cotton.
1427.103 Schedule of micronaire differentials for 1977 crop upland cotton.
1427.104 Schedule of loan rates for eligible qualities of 1977 crop extra long staple cotton by warehouse location.
1427.105 Schedule of micronaire differentials for 1977 crop extra long staple cotton.

AUTHORITY: Secs. 4, 5, 62 Stat. 1070 (15 U.S.C. 714 (b and c); secs. 101, 103, 401, 63 Stat. 1051 (7 U.S.C. 1441, 1444, 1421).

Subpart—1977 Crop Supplement to Cotton Loan Program Regulations

§ 1427.100 Purpose.

This subpart is for the purpose of announcing that loans will be available on upland and extra long staple cotton of the 1977 crop under the terms and conditions stated in the Cotton Loan Program regulations issued by CCC and contained in this Part 1427. This subpart also contains schedules to be used in determining loan rates on 1977 crop cotton.

§ 1427.101 Schedule of base loan rates for eligible 1977-crop upland cotton by warehouse location.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. B; Docket No. R-0109]

PART 202—EQUAL CREDIT OPPORTUNITY

Interpretation

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Interpretation.

SUMMARY: In response to requests for guidance concerning the meaning of the term "expressly authorized by Federal or State law" in Regulation B, the Board interprets it to mean expressly authorized either by statute or lawfully promulgated regulation. Therefore, a government agency implementing a loan program authorized either by law or regulation may determine whether it benefits an economically disadvantaged class of persons and qualifies as a special purpose credit program under Regulation B. Participating creditors will not violate Regulation B by complying with regulations promulgated by a government agency to implement a special purpose credit program.

EFFECTIVE DATE: August 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Anne Geary, Chief, Equal Credit Opportunity Section, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-3946.

§ 202.801 SPECIAL PURPOSE CREDIT PROGRAM MAY BE AUTHORIZED BY LAW OR LAWFULLY PROMULGATED REGULATION. PARTICIPATING CREDITORS WILL NOT VIOLATE REGULATION B BY COMPLYING WITH REGULATIONS IMPLEMENTING SPECIAL PURPOSE CREDIT PROGRAMS

(a) In order to provide guidance concerning the intended coverage of § 202.8(a) [1] of Regulation B, the Board interprets a term used in that section as follows: A credit program is considered to be "expressly authorized by Federal or State law" if it is authorized by the terms of a Federal or State statute or by a regulation lawfully promulgated by the administering agency (i.e., the agency responsible for implementing the program).

(b) It is the responsibility of the administering agency to ensure that implementing regulations are consistent with applicable Federal and State law. A creditor participating in a loan program expressly authorized by Federal or State law will not violate Regulation B by complying in good faith with the law authorizing a program or with a regulation promulgated by an administering agency to implement a program that the agency has determined is a special purpose credit program under § 202.8(a)(1) of Regulation B.

(c) In addition, the Board announces that it will not make determinations as to whether particular programs benefit an "economically disadvantaged class of persons." The Board believes that such a determination is more properly made by the agency charged with the administration of the loan program.

By order of the Board of Governors, effective August 3, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc 77-22977 Filed 8-9-77;8:45 am]

[1] Standards for programs. Subject to the provisions of subsection (b), the Act and this Part are not violated if a creditor refuses to extend credit to an applicant solely because the applicant does not qualify under the special requirements that define eligibility for the following types of special purpose credit programs: (1) Any credit assistance program expressly authorized by Federal or State law for the benefit of an economically disadvantaged class of persons.

[Reg. Z; FC-0100 through FC-0101]

PART 226—TRUTH IN LENDING

Official Staff Interpretations

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Official Staff Interpretations.

SUMMARY: The Board is publishing the following official staff interpretations of Regulation Z, issued by a duly authorized official of the Division of Consumer Affairs.

EFFECTIVE DATE: August 8, 1977.

FOR FURTHER INFORMATION CONTACT:

D. Edwin Schmelzer, Chief, Fair Credit Practices Section, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-2412.

SUPPLEMENTARY INFORMATION: (1) Identifying details have been deleted to the extent required to prevent a clearly unwarranted invasion of personal privacy. The Board maintains and makes available for public inspection and copying a current index providing identifying information for the public subject to certain limitations stated in 12 CFR 261.6.

(2) Official staff interpretations may be reconsidered upon request of interested parties and in accordance with 12 CFR 226.1(d)(2). Every request for reconsideration should clearly identify the number of the official staff interpretation in question, and should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

(3) 15 U.S.C. 1640(f).

12 CFR Part 226, FC-0100 § 226.8(c)

Where credit customer applies cash rebate from dealer to purchase of auto, rebate should be treated only as reducing cash price disclosed to customer.

JULY 19, 1977.

This is in response to your letter of * * *, requesting an official staff interpretation of Regulation Z with respect to the proper treatment under § 226.8(c) or certain rebates offered by your client, an automobile dealer. Your letter indicates that your client has instituted a dealer rebate program to encourage new car sales. In a telephone conversation with a member of our staff, you stated that the rebate, in the amount of $300, is given to all purchasers of new automobiles regardless of whether the purchase is for cash or is financed by your client. Your question concerns the proper method of disclosure under § 226.8(c) when a credit customer desires to apply the rebate toward the purchase of the automobile.

In Public Information Letter 878, staff expressed the view that giving the rebate effectively reduces the cash price required to be disclosed under § 226.8(c)(1). For example, if the normal cash price of an automobile is $5,000 and the rebate offered by your client is $300, then the cash price for Truth in Lending purposes would have to be disclosed as $4,700. This result is mandated by § 226.2(n) which defines "cash price" as "the price at which the creditor offers, in the ordinary course of business, to sell for cash the property or services which are the subject of a consumer credit transaction." Since the effect of the $300 rebate in the above example would be to enable a cash customer to purchase the $5,000 automobile for $4,700, the cash price disclosed to the credit customer must be $4,700.

Public Information Letter 878 further indicates that the amount of the rebate should be separately disclosed under § 226.8(c)(4) as an item which is included in the amount financed but which is not part of the finance charge. However, in the situation contemplated in Letter 878 the customer received the rebate and did not apply it to the purchase of the automobile. Thus, the customer received not only the automobile but also the amount of the rebate. In that situation it is necessary to include the amount of the rebate in the amount financed in order to reflect the value which is actually received by the credit customer who does not apply the rebate to the price of the automobile. (In the example discussed above, if the credit customer leaves the dealership with both the automible, which would cost a cash customer $4,700, and the $300 rebate, the amount financed would be $5,000.)

Where the credit customer elects to apply the amount of the rebate to the purchase of the automobile, staff believes that the only account which should be taken of the rebate is to reduce the cash price. Thus, in our example, the cash price of the car which normally sells for $5,000 should be disclosed as $4,700. The rebate need not otherwise be reflected in the Truth in Lending disclosures, inasmuch as the only value received by the customer as a result of the credit transaction is an automobile which would cost a cash customer $4,700.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited to the facts and issues presented herein. I trust that this is responsive to your inquiry.

Sincerely,

JANET HART,
Director.

12 CFR Part 226, FC-0101 § 226.2(p)

Prejudgment workout arrangement which does not involve new evidence of indebtedness executed by customer is informal arrangement requiring no new disclosures.

JULY 19, 1977.

This is in response to your letter of * * *, requesting an official staff interpretation of Regulation Z with regard to the type of prejudgment workout arrangement which your bank affords its delinquent customers. Your plan allows delinquent customers to repay their debts on terms that differ from the original closed end instalment credit transaction. In essence, the bank allows repayment of the indebtedness with the monthly principal payments reduced and finance charges eliminated.

Your letter outlines your bank's prejudgment workout plan as follows:

1. A deficiency balance is established on the customer's account. This balance is defined as the account balance on the date of chargeoff or repossession, as applicable, less unearned rebateable interest charges and insurance premiums, plus any repossession or resale expense incurred.

2. Customer contact is attempted by phone. If contact is made, the deficiency balance is explained; and either the customer is given a prejudgment opportunity to pay the balance in full, or a payment schedule is suggested.

3. If at any time before a court judgment is awarded, the customer expresses a desire to repay the balance in installments, a monthly payment commensurate with the customer's ability to repay is arrived at along with a monthly due date. Repayment schedules are set at a twelve month maximum with any remaining balance either due in full on the final payment or subject to reschedule for an additional twelve months. No interest is charged on any prejudgment balance.

4. Once a schedule is orally agreed upon, the customer is mailed a form letter and a coupon book reflecting the agreed upon terms.

5. Should the customer default upon this agreement, the bank proceeds to obtain a judgment against the customer.

You ask whether this plan is a formal or informal prejudgment workout arrangement and what, if any, disclosures are required under Regulation Z.

In an official staff interpretation of Regulation Z, FC-0020, staff expressed the following opinion regarding the treatment, for Truth in Lending purposes, of prejudgment workout arrangements:

Staff is of the opinion that the issue of whether a prejudgment workout arrangement is subject to the other than open end credit disclosures of § 226.8 is dependent upon whether such a workout arrangement is informal (e.g., by telephone) or written. A prejudgment workout arrangement, which is in writing and involves either a finance charge or more than four instalments, constitutes an extension of consumer credit subject to the disclosure requirements of § 226.8 (b) and (d) regardless of whether the original transaction was classified as "open end credit" or "credit other than open end."

Staff believes that your bank's plan, as outlined above, is an informal workout arrangement requiring no new Truth in Lending disclosures. In staff's view, a formal written workout arrangement would involve some new evidence of indebtedness executed by the customer, such as a new note, contract or other form of written agreement. We do not believe that a unilateral written communication by either the creditor or the customer (such as a letter confirming matters previously discussed either orally or in writing) renders a workout arrangement formal and subject to the disclosure requirements of Regulation Z even though the plan might, like yours, involve repayment in more than four instalments on terms differing from the original instalment credit transaction.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited to the facts and issues discussed herein. I trust that this interpretation is responsive to your inquiry.

Sincerely

JANET HART,
Director.

Board of Governors of the Federal Reserve System, August 4, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

CHAPTER III—FEDERAL DEPOSIT INSURANCE CORPORATION

PART 329—INTEREST ON DEPOSITS

Temporary Suspension of Penalties for Premature Withdrawal of Time Deposits

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Temporary suspension of penalties for premature withdrawal of time deposits.

SUMMARY: The Board of Directors of FDIC has authorized insured nonmember banks to suspend temporarily the penalties for premature withdrawal of time deposits required by § 329.4(d) of FDIC's regulations. The regulations require the forfeiture of three months' interest for the premature withdrawal of time deposits and reduction in the rate of interest paid to the maximum allowed for passbook savings accounts.

The suspension would cover any depositor who has suffered a demonstrable economic loss to property directly related to the flooding occurring on July 19-20, 1977 throughout seven counties in Pennsylvania. These counties were declared major disaster areas by the President on July 21, 1977. This temporary suspension is intended to enable depositors who have suffered disaster-related losses to draw upon funds in time deposits prior to maturity without being penalized.

FOR FURTHER INFORMATION CONTACT:

F. Douglas Birdzell, Bank Regulation Section, Legal Division, Federal Deposit Insurance Corporation, Washington, D.C. 20429; (202-389-4324).

SUPPLEMENTARY INFORMATION: The recent flooding throughout parts of Pennsylvania has resulted in substantial property damage and economic loss estimated to be in the range of two hundred to two hundred and fifty million dollars. The affected regions were declared major disaster areas by the President on July 21, 1977, pursuant to the Disaster Relief Act of 1974 (42 U.S.C. § 5141). Under the Presidential Proclamation, the affected counties are: Bedford, Cambria, Clearfield, Indiana, Jefferson, Somerset and Westmoreland.

Section 329.4(d) of the FDIC's regulations (12 CFR 329.4(d)) provides that when an insured nonmember bank pays a time deposit prior to maturity, the depositor must forfeit three months' interest on the amount withdrawn and the rate of interest on the amount withdrawn is reduced to the maximum rate which may be paid on savings accounts.

In light of the declared state of emergency and the immediate need for funds for reconstruction and similar purposes, FDIC's Board of Directors is allowing insured nonmember banks to temporarily suspend § 329.4(d) so as to allow depositors who have suffered disaster-related losses to have access to funds in time deposits prior to maturity without being penalized.

This order extends only to time deposits held by insured nonmember banks. However, since the order is intended to inure to the benefit of all the victims of the disaster, without regard to whether particular depositors are residents of the disaster area, banks outside of the disaster area will be authorized to waive the penalty pursuant to this order provided that the depositor has suffered a disaster-related loss occasioned by the recent flooding.

The suspension will also automatically apply to counties or areas that may, as a result of the flooding, be subsequently declared disaster areas by Presidential Proclamation subsequent to promulgation of this suspension.

The program will operate on a voluntary basis only. It is up to each insured nonmember bank to decide whether to allow the withdrawals authorized by this order. In addition, banks which take advantage of thhis temporary suspension have the responsibility to ascertain that individual depositors seeking to withdraw time deposits prior to maturity did in fact suffer a disaster-related loss. In this regard, it is suggested that appropriate documentation may consist of photographs of the demand property, cancelled checks for repairs, insurance claims documents, or the like. In appropriate cases, actual knowledge by a bank officer of the fact of a loss will suffice. Also, any depositor seeking withdrawal pursuant to this exception will be required to execute a statement to the effect that he is seeking withdrawal pursuant to a disaster-related loss occasioned by the July flood.

The suspension will be retroactive to July 21, 1977, the date of the Presidential disaster declaration, and will expire on January 31, 1978. This period will permit a full assessment of the casualty losses and allow sufficient time for eligible depositors to withdraw funds without penalty and begin the rebuilding process.

Section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) authorizes the FDIC to prescribe rules and conditions for the payment by insured State nonmember banks of time deposits prior to maturity.

Pursuant to its authority under section 18(g), FDIC's Board of Directors hereby authorizes the temporary suspension of § 329.4(d) with respect to depositors suffering a loss in the flood disaster, the suspension to be effective July 21, 1977, and to expire at midnight on January 31, 1978.

The requirements of section 553(b) and 553(d) of Title 5 of the United States Code and §§ 302.1, 302.2 and 302.5 of Title 12 of the Code of Federal Regulations with respect to notice, public participation, and deferred effective date were not followed in connection with the promulgation of this order because the order enlarges existing rights, grants an exemption, is limited both in duration and with respect to the class of persons affected thereby, because of the immediacy of the need for this temporary suspension, and because the Board of Directors found that the public interest would best be served by making the order effective immediately.

By order of the Board of Directors, August 3, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

[FR Doc.77-23020 Filed 8-9-77;8:45 am]

Title 16—Commercial Practice

CHAPTER I—FEDERAL TRADE COMMISSION

PART 433—PRESERVATION OF CONSUMERS' CLAIMS AND DEFENSES

Extension of Exemption

AGENCY: Federal Trade Commission.

ACTION: Extension of exemption from trade regulation rule.

SUMMARY: On April 14, 1977, the Commission issued a limited exemption from the Trade Regulation Rule on the Preservation of Consumers' Claims and Defenses. The exemption was for two-party open end credit contracts that were executed before August 1, 1977, and do not involve the use of negotiable instruments or waivers of claims and defenses.

The Commission has extended the exemption. Thus, the Rule will apply to all consumer credit contracts taken or received by sellers after September 14, 1977.

DATE: Extension to September 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Rachel Shao, Attorney, Division of Compliance, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580; 202–254–8302.

SUPPLEMENTARY INFORMATION: The Commission has extended the exemption issued for two-party open end consumer credit from the requirements of § 433.2(a) of the Trade Regulation Rule on the Preservation of Consumers' Claims and Defenses. The exemption, as issued on April 14, 1977 (42 FR 19487) applied to two-party open end credit agreements which were executed before August 1, 1977, and do not involve the use of negotiable instruments or waivers of claims and defenses. Section 433.2(a) requires incorporation of a Notice preserving certain consumer rights in all credit contracts used by sellers.

The Commission extended the exemption for a 45-day period. Thus, as of September 15, 1977, the Rule will apply to all consumer credit contracts taken or received by sellers.

Accordingly, pursuant to the Federal Trade Commission Act, as amended, 15 U.S.C. section 41 et seq., the provisions of Part I, Subparts B and C of the Commission's Procedures and Rules of Practice, 16 CFR 1.7, et seq., and section 553 of Subchapter II, Chapter 5, Title 5 of the U.S. Code (Administrative Procedures), the Commission hereby amends the following exemption from 16 CFR 433.2(a) in an amendment to § 433.3(a).

§ 433.3 Exemption of sellers taking or receiving open end consumer credit contracts before September 15, 1977, from requirements of § 433.2(a).

(a) Any seller who has taken or received an open end consumer credit contract before September 15, 1977, shall be exempt from the requirements of 16 CFR Part 433 with respect to such contract provided the contract does not cut off consumers' claims and defenses.

* * * * *

By direction of the Commission.

JAMES A. TOBIN,
Acting Secretary.

Title 19—Customs Duties

CHAPTER II—UNITED STATES INTERNATIONAL TRADE COMMISSION

PART 205—INVESTIGATIONS TO DETERMINE THE PROBABLE ECONOMIC EFFECTS ON THE ECONOMY OF THE UNITED STATES OF PROPOSED MODIFICATIONS OF DUTIES OR OF ANY BARRIER TO (OR OTHER DISTORTION OF) INTERNATIONAL TRADE OR OF TAKING RETALIATORY ACTIONS TO OBTAIN THE ELIMINATION OR UNJUSTIFIABLE OR UNREASONABLE FOREIGN ACTS OR POLICIES WHICH RESTRICT U.S. COMMERCE

AGENCY: United States International Trade Commission.

ACTION: Final rule.

SUMMARY: This document establishes procedural rules for the conduct of investigations to determine the probable economic effects of proposed changes in the regulation of imports. The regulations are necessary to implement appropriate provisions of the Trade Act of 1974.

EFFECTIVE DATE: September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

Edward R. Easton, Office of the General Counsel, United States International Trade Commission, Washington, D.C. 20436, 202–523–0379.

SUPPLEMENTARY INFORMATION: This rule establishes procedural rules for the conduct of investigations under sections 131, 503, and 301(e)(3) of the Trdae Act of 1974.

Subpart A concerns Presidential requests for the advice of the International Trade Commission relating to the probable economic effects of changes in the tariff treatment of imported articles, changes in other import restrictions and the consideration of imported articles as eligible for duty-free treatment under the Generalized System of Preferences.

Subpart B relates to a procedural framework for reporting to the President under the new authority of section 301 of the Trade Act of 1974 providing for the President to obtain the views of the International Trade Commission with regard to the impact on the economy of the United States of the President's taking retaliatory action for unjustified or unreasonable restrictions on U.S. exports.

On December 17, 1976, a notice of proposed rulemaking was published in the FEDERAL REGISTER (41 FR 55203) proposing amendments to title 19, chapter II, Subpart B, Part 205 of the Code of Federal Regulations to provide procedures for carrying out the Commission's functions and duties under sections 131, 301(e)(3), and 503(a) of the Trade Act of 1974. Notice was given that comments concerning the proposed amendments were to be submitted to the United States International Trade Commission on or before January 10, 1977. Submissions from three interested persons were received by February 28, 1977.

A comment with respect to Subpart A of Part 205 suggested that the regulations adopted should reflect the changes in procedures for Presidential requests for the advice of the Commission and transmittal of certain reports of the Commission to the Office of the Special Representative for Trade Negotiations as provided in Executive Order 11846, as amended. The Commission has adopted this suggestion.

A comment with respect to § 205.3(a) suggested that the language of the provision be modified by adding "and fish processing and marketing" after the word "fishing." The comment suggested that the word "fishing" is unduly restrictive. The Commission has decided not to adopt this suggestion. The language in § 205.3(a) is that found in section 131(b) of the Trade Act of 1974. Any questions relating to the scope of that language intended by the Congress will be considered by the Commission as they arise in the factual context of investigations conducted under Subpart A of Part 205. It is the opinion of the Commission that the term "fishing" is sufficiently broad to encompass all facets of the industry over which the Commission has investigative authority.

Two comments suggested that the agency allow at least 30 days from the date of the publication of a notice of investigation for an interested person to request a hearing under the provisions of § 205.6(c). The proposed section had provided for only 15 days. It is the position of the Commission that, in most cases, a notice of hearing will issue with the notice of the institution of an investigation. Nevertheless, in such cases as may arise in which no such notice of hearing issues, a 30 day period from the date of publication in the FEDERAL REGISTER of the notice of institution will be provided for requesting a hearing.

In consideration of the above, 19 CFR Part 205 is amended to read as follows:

AUTHORITY: Sec. 335, Tariff Act of 1930 (72 Stat. 680; 19 U.S.C. 1335); sec. 608, Trade Act of 1974 (88 Stat. 2073); (19 U.S.C. 2482).

§ 205.1 Applicability of part.

This Part 205 applies to functions and duties of the Commission under sections 131, 301(e)(3), and 503(a) of the Trade Act of 1974. For other applicable rules, see Part 201 of this chapter.

Subpart A—Investigations To Determine the Probable Economic Effect of Modifications of United States Duties or of Any Barrier to (or Other Distortion of) International Trade on Domestic Industries and on Consumers

§ 205.2 Applicability of subpart.

This Subpart A of Part 205 applies to investigations for the purposes of section 131(a)–(b), 131(c), and 503 of the Trade Act of 1974. For other applicable rules, see Part 201 of this chapter.

§ 205.3 Investigations under sections 131 and 503 of the Trade Act of 1974.

(a) *Purpose of investigations—(1) Sections 131(a)–(b) and 503(a).* Upon the receipt of a list of articles from the President or from the Special Representative for Trade Negotiations as provided in section 131(a) or 503(a), and in Executive Order No. 11846, as amended, which may be considered for modification of United States duties, or as eligible articles for duty-free treatment under the generalized system of preferences, respectively, the Commission shall initiate an investigation to obtain information pertinent to the formulation of its advice to the President under section 131(b) with respect to such articles to assist him in making an informed judgment as to the impact which might be caused by such duty modifications or duty-free treatment on U.S. manufacturing, agriculture, mining, fishing, labor, and consumers, including whether any reductions in rates of duty should take place over a period longer than the minimum periods provided by section 109(a) of the Trade Act of 1974 (88 Stat. 1985; 19 U.S.C. 2119).

(2) *Section 131(c).* Upon the receipt of a request from the President or from the Special Representative for Trade Negotiations as provided in section 131(c) and in Executive Order No. 11846, as amended, to assist him in his determination of whether to enter into any trade agreement under section 102, the Commission shall institute an investigation to obtain information pertinent to the formulation of its views with respect to the probable economic effects of modifications of any barrier to (or other distortion of) international trade on domestic industries and purchasers and on prices and quantities of articles in the United States.

(b) *Institution and notice of investigation.* An investigation to which this Subpart A relates will be instituted promptly after the receipt from the President or the Special Representative for Trade Negotiations of (1) a list of articles which may be considered for duty modifications or duty-free treatment, or (2) a request for an investigation and report concerning the probable economic effects of modifications of any barrier to (or other distortion of) international trade.

(c) *Hearings.* Public hearing will be held in connection with every investigation to which this Subpart A relates. For other applicable rules, see § 201.11 of this chapter.

(d) *Report to the President.* After the completion of its investigation, the Commission will incorporate its advice or views in a report which together with hearing transcripts, briefs and other information will be transmitted to the President through the Special Representative for Trade Negotiations.

§ 205.4 [Reserved]

Subpart B—Investigations Concerning the Probable Impact on the Economy of the United States of the President's Taking Retaliatory Action To Obtain the Elimination of Unjustifiable or Unreasonable Foreign Acts or Policies Which Restrict U.S. Commerce

§ 205.5 Applicability of subpart.

This Subpart B of Part 205 applies to investigations for the purpose of section 301(e)(3) of the Trade Act of 1974. For other applicable rules, see Part 201 of this chapter.

§ 205.6 Investigations under section 301(e)(3) of the Trade Act of 1974.

(a) *Purpose of investigation.* The purpose of an investigation by the Commission is to provide the President with its views pursuant to section 301(e)(3) as to the probable impact on the economy of the United States of imposing retaliatory restrictions on imports into the United States from countries or foreign instrumentalities which maintain restrictions against U.S. exports.

(b) *Institution and notice of investigation.* An investigation to which this Subpart B relates will be instituted promptly after the receipt from the President of a request for the views of the Commission with regard to the matters indicated in paragraph (a) of this section.

(c) *Public hearings.* If, in the judgment of the Commission, there is good and sufficient reason therefor, the Commission, in the course of its investigation, will hold a public hearing and afford interested parties opportunity to appear and be heard at such hearing. If no notice of public hearing issues concurrently with a notice of investigation, any interested party who believes that a public hearing should be held may, within thirty (30) days after the date of publication in the FEDERAL REGISTER of the notice of investigation, submit a request in writing to the Secretary of the Commission that a public hearing be held, stating the reasons for such request.

(d) *Written statements.* Any interested party may submit to the Commission a written statement of information pertinent to the subject matter of such investigation not later than thirty (30) days after a notice of investigation under paragraph (b) of this section is published in the FEDERAL REGISTER. If a public hear-

PART 210—INVESTIGATIONS OF ALLEGED UNFAIR PRACTICES IN IMPORT TRADE

Discovery Sanctions

AGENCY: United States International Trade Commission.

ACTION: Final rule.

SUMMARY: This rule amends the discovery sanctions rule in unfair import practice cases to provide that only the Commission can terminate an investigation through application of discovery sanctions. The former rule could be interpreted as permitting an administrative law judge to terminate an investigation by imposing such sanctions. The new rule is in conformity with other Commission rules which provide that only the Commission may terminate such an investigation.

EFFECTIVE DATE: September 9, 1977.

FOR FURTHER INFORMATION CONTACT:

William W. Gearhart, Jr., Office of the General Counsel, U.S. International Trade Commission, Washington, D.C. 20436 (202-523-0487).

SUPPLEMENTARY INFORMATION: The new rule revises present § 210.36 (b)(5) of the Commission's Rules of Practice and Procedure (19 CFR 210.36 (b)(5)), applying to investigations conducted under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337).

Notice of proposed rulemaking was published in the FEDERAL REGISTER of June 23, 1977 (42 FR 31811), and persons interested in submitting comments were given until July 25, 1977, to do so. No comments were received.

The Commission, in view of the reasons noted in the above "summary" and noting the absence of public comment, has decided to adopt the proposed rule, with the new rule to become effective September 9, 1977.

Accordingly, pursuant to the rulemaking authority set forth in section 335 of the Tariff Act of 1930, as amended (72 Stat. 680; 19 U.S.C. 1335), the Commission proposes to amend Title 19, Part 210, of the Code of Federal Regulations by amending § 210.36(b)(5) as follows:

§ 210.36 Failure to make discovery; sanctions.

* * * * * *

(b) * * *

(5) Rule that a motion or other submission by the party concerning the order or subpoena issued be stricken, or rule (recommend where the presiding officer is not the Commission) that a determination in the investigation be rendered against the party, or both.

* * * * * *

Issued: August 5, 1977.

By order of the Commission.

KENNETH R. MASON,
Secretary.

Title 22—Foreign Relations

CHAPTER II—AGENCY FOR INTERNATIONAL DEVELOPMENT, DEPARTMENT OF STATE

PART 202—OVERSEAS SHIPMENTS OF SUPPLIES BY VOLUNTARY NON-PROFIT RELIEF AGENCIES

Reimbursement for Ocean Freight Costs

AGENCY: Agency for International Development.

ACTION: Final rule.

SUMMARY: This rule prescribes a new method for determining the amount of reimbursement which will be made by AID for ocean freight costs incurred by voluntary non-profit relief agencies on overseas shipments of voluntary contributions in support of relief and rehabilitation programs. The purpose of the changes is to better insure uniform reimbursement for eligible agency shipments by basing reimbursement on applicable tariffs or booking contracts for delivery to discharge ports.

EFFECTIVE DATE: July 28, 1977.

FOR FURTHER INFORMATION CONTACT:

John A. Ulinski, Jr., Director, Office of Private and Voluntary Cooperation, Bureau of Population and Humanitarian Assistance, Agency for International Development, Department of State, Washington, D.C. 20523 (202-632-9206.

SUPPLEMENTARY INFORMATION: This notice announces certain amendments to AID Regulation 2, Overseas Shipments of Supplies by Voluntary Non-Profit Relief Agencies, Title 22, Code of Federal Regulations, Chapter II, Part 202, which was last published in its entirety in the FEDERAL REGISTER of May 14, 1963 (28 F.R. 4789), and subsequently revised on July 4, 1963 (28 F.R. 6874) and July 20, 1965 (30 F.R. 9059).

AID Regulation 2, 22 CFR, Part 202, Overseas Shipments of Supplies by Voluntary Non-Profit Relief Agencies, establishes the procedures by which voluntary, non-profit agencies can qualify for and receive, in accordance with Section 216 of the Foreign Assistance Act of 1961, as amended, reimbursement from AID for ocean freight costs they incur on overseas shipments of voluntary contributions in support of relief and rehabilitation programs. This regulation has been recently amended as follows. Sections 202.3(a), 202.6(b)(1), and 202.6 (b)(2), as indicated below, contain the most significant revisions. These sections have been revised to provide for determination of the amount of reimbursable ocean freight costs based upon the carrier's applicable tariff for delivery to the discharge port or the applicable charter or booking contract rather than upon the costs "from end of ship's tackle at the United States port of loading to end of ship's tackle at port of discharge" as previously provided in Regulation 2. This change was made to alleviate administrative difficulties encountered in applying the "ship's tackle" rule. The remaining changes in these sections are necessary conforming amendments.

Other sections have been amended by updating form numbers (202.2(b), 202.3 (a) and (b), 202.4 (a) and (b), and 202.6(d)), changing an address (202.5(a)(3)), and adding the title of a form (202.6(a)). Because numerous revisions have been made to Regulation 2 since it was last fully published in 1963, it is set out below, as amended in its entirety.

Accordingly, 22 CFR Part 202 is amended as follows:

The following regulations shall supersede, as of their effective date, all existing regulations contained in Part 202, Chapter II, Title 22 of the Code of Federal Regulations.

Sec.

202.1 Definition of terms.
202.2 Shipments eligible for reimbursement of freight charges.
202.3 Freight reimbursement limitations.
202.4 Certificates.
202.5 Applications for reimbursement of freight charges.
202.6 Documentation required for reimbursement.
202.7 Refund by suppliers and/or agencies.
202.8 Saving clause.

AUTHORITY: §§ 202.1 to 202.8 issued under sec. 621, 75 Stat. 424, as amended; 22 U.S.C. 2151. Interpret or apply secs. 216, 75 Stat. 429, as amended, 22 U.S.C. 2176; E.O. 10973, 26 F.R. 10469, 3 CFR 1961 Supp.

§ 202.1 Definition of terms.

(a) "The Administrator" means the Administrator of the Agency for International Development.

(b) "The Committee" means the Advisory Committee on Voluntary Foreign Aid of the Agency for International Development.

(c) "Supplies" means relief and rehabilitation supplies shipped in support of programs registered with the Committee as well as administrative supplies and equipment shipped in support of such programs. In no case shall such supplies include items for the personal use of representatives of the registered agency.

(d) "Agency" or "agencies" means the American Red Cross and any United States voluntary non-profit relief agency registered with and approved by, the Committee.

(e) "Duty free" means exempt from all customs duties, and other duties, tolls, and taxes of any kind.

(f) "Recipient country" means any country or area in which voluntary non-profit relief agencies registered with and approved by the Advisory Committee on Voluntary Foreign Aid have programs approved by said Advisory Committee.

(g) "Reimbursement" means (1) payment directly to an agency by AID, or (2) payment to an agency by a banking institution in the United States acting under letter of commitment issued by AID guaranteeing subsequent reimbursement to the banking institution of such payment.

§ 202.2 Shipments eligible for reimbursement of freight charges.

(a) In order to further the efficient use of United States voluntary contributions for relief in nations or areas designated by the Administrator of AID from time to time, agencies may be reimbursed by AID within specified limitations for freight charges incurred and paid in transporting supplies donated to or purchased by such agencies from United States ports or, in the case of excess or surplus property supplied by the United States, from foreign ports to initial foreign ports of entry, or in the case of landlocked countries to points of entry designated by the Committee.

(b) Shipments shall be eligible for reimbursement of freight charges only where authorized by the issuance by AID of a Procurement Authorization (Form AID 1160-4).

§ 202.3 Freight reimbursement limitations.

Economic utilization of AID funds available for reimbursement to agencies for freight charges incurred and paid by such agencies for the shipment of donated or purchased supplies to a recipient country requires the following limitations on amounts reimbursable.

(a) *Ocean Freight.* The amount of ocean freight charges reimbursable to an agency is limited to the actual cost of transportation of the supplies as assessed by the delivering carrier either in accordance with its applicable tariff for delivery to the discharge port or in accordance with the applicable charter or booking contract at a rate not exceeding the prevailing rate, if any, for similar freight services, or the rate paid to the supplier of ocean transportation for similar services by other customers similarly situated, as attested to by the supplier in Block 13 of Form AID 1550-1, entitled "Voluntary Agency and Carrier Certificate." (See § 202.4(a).)

(b) *Inland freight.* The amount of inland freight charges reimbursable to an agency is limited to the actual cost of transportation of supplies from pickup point in initial port of entry to designated point of entry in the landlocked recipient country at a rate negotiated by the agency representative as attested to by such agency representative in Block 14 of Form AID 1550-1, entitled "Voluntary Agency and Carrier Certificate." (See § 202.4(b).)

(c) *Related shipping costs.* Where shipment is made to a landlocked recipient country, expenses incurred in transferring supplies from ocean carrier to inland carrier may be reimbursed by the agency when such expenses are not for account of the ship nor included in the inland transportation charges.

§ 202.4 Certificates.

Certificates will be required as follows:

(a) *Ocean transportation.* The supplier of ocean transportation will execute Form AID 1550-1, entitled "Voluntary Agency and Carrier Certificate," in an original and two copies.

(b) *Inland transportation and related shipping costs.* Where inland transportation, including related shipping costs, is reimbursable under provisions of § 202.3, the representative of the agency will execute Form AID 1550-1, entitled "Voluntary Agency and Carrier Certificate," in an original and two copies when, in the absence of published tariffs or a prevailing rate, it is necessary to negotiate for the shipment of the supplies.

§ 202.5 Application for reimbursement of freight charges.

(a) Any agency may make application for reimbursement of freight charges incurred and paid on shipments eligible under § 202.2 provided:

(1) (i) An agreement for duty-free entry and defrayment of inland transportation costs of the donated or purchased supplies from port or point of entry within the recipient country has been concluded within the scope of the regulations in this part between the United States and the recipient country, or

(ii) The agency concerned has submitted evidence satisfactory to the Committee that the recipient country in fact accords duty-free entry and that the inland transportation costs of the supplies from port or point of entry within the recipient country are defrayed by such country or other non-U.S. Government source acceptable to the Committee.

(2) The general program and projects, by countries of operation of the agency, and the supplies in support thereof, have been approved by the Committee and the recipient country.

(3) The application for reimbursement of freight charges together with documentation required under §202.6, is submitted to the Agency for International Development, Attention: Banking and Finance Division, Office of Financial Management, Washington, D.C. 20523, or to a U.S. bank holding an AID letter of commitment.

(b) In the case of ocean transportation, the application must be submitted within 60 days of the date of the related ocean bill of lading. In the case of inland transportation the application must be submitted within 180 days of the date of the related ocean bill of lading.

§ 202.6 Documentation required for reimbursement.

Claims for reimbursement of freight charges must be supported by the following documents:

(a) *Voucher SF 1034.* "Public Voucher for Purchases and Services Other than Personal"—Voucher SF 1034 in original and three copies to be prepared by the agency requesting reimbursement of freight charges.

(b) *Bills of lading*—(1) *Other than landlocked nations or areas.* Where the shipment is made to other than a landlocked nation or area, ocean or charter party bill of lading (or photostat) evidencing shipment from an eligible port of export as prescribed in §202.2(a) to the port of discharge. The bill of lading shall indicate the carrier's complete statement of charges including all relevant weights, cubic measurements, rates, and any applicable tariff surcharges.

(2) *Landlocked nation or area.* (i) Where the shipment is made to a landlocked nation or area and through bills of lading to designated point of entry in landlocked nation or area are not issued, an ocean or charter party bill of lading (or photostat) evidencing shipment from an eligible port of export as prescribed in § 202.2(a) to the port of discharge. The bill of lading shall indicate the carrier's complete statement of charges including all relevant weights, cubic measurements, rates, and any applicable tariff surcharges and a receipted copy of the rail, truck, or barge bills of lading (or other acceptable commercial document) covering the transportation of the supplies from the ocean carrier's point of delivery at port of entry to delivery point in recipient country, correctly assessed at time of loading by the land carrier for freight on a weight, measurement, or unit basis to point of entry in recipient country and from point of entry to point of delivery in the recipient country.

(ii) Where shipment is made to a landlocked nation or area and through bills of lading are issued, a receipted copy of the through bill of lading evidencing shipment from an eligible port of export as prescribed in § 202.2(a) to point of entry in the recipient country. The bill of lading shall include the carrier's complete statement of charges including all relevant weights, cubic measurements, rates, and any applicable tariff surcharges.

(c) *Receipted invoices.* One copy (or photostat) of the detailed invoice of the supplier of the transportation evidencing payment by the agency to the carrier. If the bills of lading required by paragraph (b) of this section meet the requirements of this subparagraph, no invoice is required.

(d) *Voluntary Agency and Carrier Certificate, Form AID 1550-1.* (i) As provided in § 202.4(a), the original and two copies of the Voluntary Agency and Carrier Certificate executed by the supplier of ocean transportation, and

(ii) As provided in § 202.4(b), the original and two copies of the Voluntary Agency and Carrier Certificate executed by the Agency.

§ 202.7 Refund by suppliers and/or agencies.

(a) *By suppliers.* Any supplier of freight to whom freight charges have been financed by AID will promptly refund to AID upon demand the entire amount, or any lesser amount specified, of such freight charges determined by AID to be in excess of the prevailing rate at time of shipment, if any, or the rate paid the supplier for similar services by other customers similarly situated.

(b) *By agencies.* Any agency to which freight charges have been paid or reimbursed under this Regulation will promptly refund to AID upon demand the entire amount, or any lesser amount specified, of inland transportation and/or related shipping costs, (1) whenever AID determines that the reimbursements were improper as being in violation of the provisions of the Foreign Assistance Act of 1961, any relevant appropriation acts, or any rules, regulations, or procedures of AID promulgated under any of these acts, or (2) whenever it is determined by the agency or AID that any of the supplies for which reimbursement was made have not been accorded duty-free status by the recipient country.

§ 202.8 Saving clause.

The Administrator may waive, withdraw, or amend any time or from time to time any or all of the provisions of this part.

Dated: July 28, 1977.

JOHN J. GILLIGAN,
Administrator, Agency for International Development.

Title 24—Department of Housing and Urban Development

CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING—FEDERAL HOUSING COMMISSIONER, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-77-393]

PART 203—MUTUAL MORTGAGE INSURANCE AND INSURED HOME IMPROVEMENT LOANS

Dwelling Units in Cooperative Housing Developments

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: These regulations establish the requirements for the insurance of mortgages to assist individuals and families in the purchase of corporate certificates covering dwelling units in cooperative housing developments.

EFFECTIVE DATE: November 8, 1977.

FOR FURTHER INFORMATION CONTACT:

William A. Rolfe, Director, Single Family Mortgage Insurance Division, Office of Insured and Direct Loan Origination, Department of Housing and Urban Development, Washington, D.C. 20410, 202-426-8914.

SUPPLEMENTARY INFORMATION: On May 27, 1976, the Secretary published proposed regulations (41 FR 21648) pursuant to Section 203(n) of the National Housing Act. Section 203(n) of the Act authorizes the Secretary to insure mortgages involving individual dwelling units in a cooperative housing development which is covered by a blanket mortgage insured under the National Housing Act under certain conditions. Interested persons were invited to participate in the proposed rulemaking by submitting written data, views and arguments with respect to this proposal.

The Department received nine comments in response to the proposed rule, all of which have been reviewed and carefully considered. The following is a discussion of the comments and the changes made.

PAYMENTS BY THE SECRETARY

Several comments suggested that § 203.43c(c)(8) of the proposed rule, § 203.43c(c)(5) in the final rule, which permits the Secretary to cease making monthly payments attributable to any dwelling unit six months after the Secretary's acquisition of the Corporate Certificate, was unfair and financially burdensome to participating cooperatives. The Department believes that this provision of the final rule is necessary to provide an incentive to the cooperative to market corporate certificates on dwelling units owned by the Secretary. However, the final rule provides that payments by the Secretary may cease six months after notification by the Secretary to sell the corporate certificate for a dwelling unit is given to the corporation rather than six months after the Secretary acquires the certificate. Moreover, the final rule does not require that the payment be terminated once the six month time period has elapsed. The Department will use discretion in determining whether payments should be stopped.

RIGHTS OF FIRST REFUSAL

Several comments were received stating that the cooperative corporation should not have to waive its right of first refusal to purchase any Corporate Certificate and its right to approve or reject the buyer of a Corporate Certificate covered by a mortgage insured under Section 203(n) of the National Housing Act. The commenters felt that waiving such authority could easily lead to a complete change in the character of the community and the cooperative board would not be able to remedy the situation. Changes have been made in the rule to give cooperative corporations some latitude in dealing with such situations. Section 203.42c(d)(2) now permits the cooperative to exercise its rights to purchase the Corporate Certificate so long as the corporation pays the full amount due under the 203(n) insured mortgage encumbering the Corporate Certificate or pays the full amount of the Secretary's investment, if the Secretary is the owner of the Corporate Certificate. Also, § 203.43c(d)(3) now permits the corporation to reject the buyer of the Corporate Certificate for a dwelling unit covered by a mortgage insured under Section 203(n), if the Secretary's approval is obtained.

PROTECTION OF MORTGAGEE'S INTERESTS

One area of substantial concern was with respect to the protection of the 203(n) mortgagee's interest with respect to the Corporate Certificate and the lack of any contractual obligation by the cooperative corporation and the blanket mortgagee to respect that interest. Section 203.43c(d)(6) now requires that, in addition to furnishhing a certified statement that the Secretary or the mortgagee is the owner of a Corporate Certificate, the corporation must furnish the Secretary or the mortgagee with an Occupancy Certificate. Section 203.43c(b)(4) defines the Occupancy Certificate as granting an exclusive right to permanent possession of a specific dwelling unit in the cooperative housing development. The term "housing project" in § 203.43c(e) of the proposed rule, § 203.43c(f) of the final rule, has been changed to read "houssing development" for purposes of consistency.

LOAN-TO-VALUE RATIO

Several comments contended that § 203.43c(f) of the proposed rule, did not make the financing of a Corporate Certificate, upon resale, comparable to the financing of a condominium unit, as intended by Congress. The loan-to-value ratio in the proposed rule was somewhat restrictive. However, because of HUD's lack of experience with mortgages of this nature and the need to have an actuarially sound program, it was felt that the proposed loan-to-value ratio was justified. The rule now utilizes the criteria set forth in the enabling legislation. The Department has some reservations about this change and intends to monitor the actuarial soundness of the 203(n) program closely and make adjustments if experience indicates this should be done.

INSURANCE PREMIUM ESCROW REQUIREMENT

Several comments indicated that the provisions of §§ 203.43c(g)(5) and 203.43c(j) of the proposed rule relating to fire and other hazard insurance premiums were not necessary. These provisions, requiring that fire and other hazard insurance premiums be escrowed if the mortgagee required additional insurance coverage over and above the insurance provided under the cooperative's blanket insurance policy, were included because it was anticipated that some mortgagees would consider the insurance coverage provided under the blanket mortgage inadequate to protect their interests. However, based upon the comments that this requirement is not necessary, the Department has deleted the requirement from the final rule.

It is appropriate to point out that 24 CFR 203.22 is applicable to this program. Thus, if the mortgagee requires a mortgagor to pay the mortgage insurance premium charged by HUD, the mortgage will have to provide for monthly payments by the mortgagor of an amount equal to one-twelfth of the annual mortgage insurance premium payable by the mortgagee for HUD's insurance on the 203(n) insured mortgage.

BASIS FOR DEFAULT

Section 203c(h)(7) has been added to require that a mortgage on a Corporate Certificate contain a provision stating that the failure of the mortgagor to pay the mortgagor's share of the common expenses or assessments and charges imposed by the corporation, as provided in the instruments establishing the cooperative, shall be considered a default if the mortgage is to be eligible for insurance under Section 203(n) of the Act. The purpose of this addition is to enable the 203(n) mortgagee to work with the cooperative corporation should the cooperative have reason to evict the mortgagor. Under this provision, if the cooperative corporation should decide to evict for nonpayment, the 203(n) mortgagee can foreclose even if the payments on the 203(n) insured mortgage are current.

BASIS FOR POSSIBLE ASSIGNMENT

Section 203.436(f) has been added to provide the mortgagee holding a 203(n) mortgage with a degree of protection should the cooperative development's blanket mortgage go into serious default and the holder of the blanket mortgage announce an intention to foreclose. Comments received by the Secretary indicated concern that the 203(n) mortgagee's interest would not be protected should a foreclosure of the blanket mortgage take place. This amendment alleviates that concern by providing for assignment of the 203(n) insured mortgage to the Secretary prior to foreclosure, should the Department determine this course of action to be necessary and in the interest of the Department.

MISCELLANEOUS PROVISIONS

Paragraph (c) of § 203.43c provides that certain requirements, formerly dealt with in the tri-party agreement now covered by Paragraph (d), be included in the organizational documents of the cooperative corporation as is appropriate.

A new paragraph (c)(1) has been added to § 203.43c to protect the interests of the Secretary or mortgagee when either is the owner of a Corporate Certificate. Paragraph (c)(6) protects the Secretary and mortgagee from being saddled with the obligation to make back payments owed by the 203(n) mortgagor to the Cooperative Corporation. The Cooperative can proceed to collect from the mortgagor who benefitted from the services for which charges are due.

Paragraph (d)(9) of § 203.43c contains a new provision which establishes a requirement for the eviction of persons from dwelling units attributable to Corporate Certificates whose ownership has shifted to the Secretary or a 203(n) mortgagee.

The maximum term of a mortgage has been increased from 20 to 30 years in keeping with the intent of Congress to make the financing of the Corporate Certificate comparable to the financing of a condominium unit.

Similarly Paragraph (h) of § 203.43c setting special down payment requirements has been omitted from the final draft in favor of utilization of the down-payment requirements of the 203(b) Program applicable by virtue of 203.43c.

Section 203.43c(c)(10) of the proposed rule, 203c(d)(6) of the final rule, has been amended to delete the language "the exclusive right of permanent possesion" since the requirement of this language is embodied in the definition of "Occupancy Certificate" contained in § 203.43c(b)(4).

Paragraph (a) of § 203.436 has been amended to exclude the application of § 203.366. Its requirements are supplanted by paragraphs (c) and (d) of § 203.436.

Paragraph (c) of § 203.436 has been amended to omit a requirement that the mortgagee unconditionally warrant the Secretary's title to the Corporate Certificate. The mortgagee will be held to the standard which obtains under the Section 203(b) insurance program and no additional written warranty or certification will be required. See § 203.436 (d) and (e).

In addition to the above, several minor modifications have been made in the final rule to reflect changes that were necessary because of the anticipated processing procedures which will be followed for the 203(n) program. The regulations have been renumbered extensively to accommodate the changes which have been made.

The regulations require a Tri-Party Agreement between the corporate owner of the cooperative housing development, the Section 203(n) mortgagee, and the Secretary. Such agreements will be a part of each origination of a mortgage involving an individual dwelling unit under Section 203(n). The agreement obligates the signers to provide notices, acknowledge interests in, and perform functions relating to the dwelling unit and ownership documentation. Such an agreement is necessary to effectuate the intention of the regulations with respect to the cooperative corporation.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Office of the Secretary, Room 5218, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410.

NOTE—It is hereby certified that the economic and inflationary impacts of these amendments have been carefully evaluated in accordance with Executive Order 11821.

Accordingly, the Secretary of Housing and Urban Development amends Part 203 of Chapter II of 24 CFR as follows:

1. The table of contents for Part 203 is amended as follows:

(a) By adding a new § 203.43c after § 203.43b under "Eligible Properties" as follows:

* * * * *

§ 203.43c Eligibility of mortgages involving a dwelling unit in a cooperative housing development.

* * * * *

(b) By adding a new centered caption and section after § 203.435 as follows:

* * * * *

COOPERATIVE UNIT MORTGAGES

§ 203.436 Mortgages involving a dwelling unit in a cooperative housing development.

* * * * *

2. A new section 203.43c is added after 203.43b to read as follows:

§ 203.43c Eligibility of mortgages involving a dwelling unit in a cooperative housing development.

A mortgage involving a dwelling unit in a cooperative housing development which meets the requirements of this subpart, except as modified by this section, shall be eligible for insurance under Section 203(n) of the National Housing Act.

(a) The provisions of §§ 203.16a, 203.17, 203.18, 203.23, 203.24, 203.26, 203.37, 203.38, 203.43b and 203.44 through 203.102 of this part shall not apply to mortgages insured under Section 203(n) of the National Housing Act.

(b) As used in connection with the insurance of mortgages under this section and § 203.436 of this part: (1) "Mortgage" shall mean a first lien given to secure a loan made to finance the purchase of a Corporate Certificate together with the applicable Occupancy Certificate of a cooperative ownership housing corporation in which the permanent occupancy of the dwelling units is restricted to members of such corporation.

(2) "Corporation" shall mean an organization which holds title to a cooperative housing development which is covered by a blanket mortgage or mortgages insured by FHA under the National Housing Act.

(3) "Corporate Certificate" shall mean such stock certificates, membership certificates, or other instruments which the laws of the jurisdictions in which the cooperative housing development is located require to evidence ownership of a specified interest in the corporation.

(4) "Occupancy Certificate" shall mean a written instrument provided by the corporation to each holder of a Corporate Certificate which grants an exclusive right of possession of a specific dwelling unit in the cooperative housing development.

(5) References in this subpart to a dwelling, residence or property which is sold, conveyed, covered by a mortgage or subject to a lien shall be construed to mean the Corporate Certificate together with the Occupancy Certificate, except that where such references when interpreted in light of Section 203(n) of the National Housing Act clearly indicate the intent to be the dwelling unit, such reference shall mean the dwelling unit identified in the Occupancy Certificate.

(c) The organizational documents of the cooperative corporation must provide that: (1) Either the Secretary or a mortgagee under a mortgage insured under this section shall be a member of the cooperative corporation for so long as either owns a Corporate Certificate;

(2) A mortgage insured under this section shall be a first lien upon the property covered by the mortgage;

(3) The Secretary may exercise the voting rights which are attributable to each Corporate Certificate owned by the Secretary;

(4) The Secretary may designate as her proxy an agent for the purpose of exercising the voting rights of the Secretary which are attributable to the Corporate Certificate or Certificates owned by the Secretary;

(5) The Secretary may cease making monthly payments attributable to any dwelling unit for which the Secretary owns a Corporate Certificate six months after the Secretary notifies the corporation to sell the Corporate Certificate or upon default by the corporation on the blanket mortgage covering the dwelling unit;

(6) The Secretary or a mortgagee shall not be obligated to make payments to the corporation for any amounts unpaid by a mortgagor under a mortgage insured under this section prior to the date the Secretary or the mortgagee becomes the owner of the Corporate Certificate.

(d) The corporation shall have entered into an agreement with the Secretary and the mortgagee which: (1) Requires that the corporation shall furnish the Secretary with the most recent annual financial report certified to have been based on generally accepted accounting principles and the most recent monthly or quarterly financial report;

(2) Waives any option or right of first refusal the corporation may have to purchase any Corporate Certificate covered by a mortgage insured under Section 203(n) of the National Housing Act, unless the corporation pays the full amount due under such mortgage or pays the full amount of the Secretary's investment if the Secretary is the owner of the Corporate Certificate, whichever is greater.

(3) Except with the approval of the Secretary, waives all authority the corporation may have to approve or reject the buyer of a Corporate Certificate owned by the Secretary or the buyer of a Corporate Certificate covered by a mortgage insured under Section 203(n) of the National Housing Act.

(4) Requires the corporation on notice by the Secretary to act as her agent for a fee to be determined by the Secretary for the limited purposes of:

(i) Selling all Corporate Certificates of the corporation owned by the Secretary;

(ii) Renting and collecting rents on any dwelling unit for which the Secretary owns the Corporate Certificate.

(5) Provides that the Secretary shall not be obligated to make payments to the corporation for outstanding debts of the mortgagor;

(6) Requires the corporation to furnish to a mortgagee or to the Secretary, on request:

(i) A statement, certified by the officer charged with maintenance of the Corporate Certificate Transfer Book, that such book currently shows that the mortgagee or the Secretary is the owner of any Corporate Certificate transferred to the mortgagee or the Secretary; and,

(ii) The Occupancy Certificate in the name of the mortgagee or the Secretary.

(7) Requires the corporation to notify the mortgagee, whose name and address has been provided, of any default in corporation fee payments by the mortgagor within 15 days of such default;

(8) Requires the mortgagee to notify the corporation of any default in mortgage payments by the mortgagor within 15 days of such default;

(9) Requires the corporation upon notice by the Secretary or the mortgagee, when the Secretary or the mortgagee is the owner of the Corporate Certificate, and for a fee to be determined by the Secretary to evict any person or persons from a dwelling unit identified in the Occupancy Certificate.

(10) Contains such other provisions as the Secretary may require.

(e) The mortgagee shall obtain such security and other undertakings as may be required to establish a first lien on the Corporate Certificate and the Occupancy Certificate under the laws of the State where the Cooperative Housing Development is located.

(f) The mortgage involves a one-family dwelling unit in a cooperative housing development which is covered by a blanket mortgage or mortgages insured under the National Housing Act.

(g) The mortgage shall not exceed the balance remaining after subtracting from the amount determined under § 203.18(a) of this chapter an amount equal to the portion of the unpaid balance of the blanket mortgage covering the cooperative development which is attributable to the dwelling unit the mortgagor is entitled to occupy as of the date the mortgage is accepted for insurance.

(h) The mortgage shall be executed upon a form conforming to the applicable provisions of this part and shall:

(1) Involve a principal obligation in multiples of $50.

(2) Come due on the first of the month.

(3) Have an amortization period of either 5, 10, 15, 20, 25 or 30 years by providing for either 60, 120, 180, 240, 300 or 360 monthly payments.

(4) Be for a term not to exceed 30 years or the remaining term of the blanket mortgage covering the cooperative development or three-quarters of the remaining economic life of the building improvements, whichever is less.

(5) Provide for payments to principal and interest to begin not later than the first day of the month following 60 days from the date the mortgagee's certificate on the commitment was executed.

(6) Contain a provision stating that the failure of the mortgagor to pay the mortgagor's share of the common expenses or assessments and charges imposed by the corporation as provided in the instruments establishing the cooperative shall be considered a default.

(i) The entire principal amount of the mortgage must have been disbursed to the mortgagor or to his creditors for his account and with his consent.

(j) The mortgage must be executed by a mortgagor who intends to be an occupant of the unit.

(k) The mortgagee may collect from the mortgagor upon the execution of the mortgage a sum that will be sufficient to pay the mortgage insurance premium for the period beginning on the date of the closing of the loan and ending on the date of the first monthly payment under the mortgage.

(l) The mortgagee shall upon application for a mortgage insurance commitment provide true copies of the following organizational documents of the cooperative corporation for examination and approval by the appropriate HUD Field Office:

1. Certificate of Incorporation;
2. Regulatory Agreement;
3. By-Laws as amended;
4. The financial statements required in paragraph (d)(1) of this subsection;
5. Proposed Occupancy Certificate;
6. Proposed Corporate Certificate;

Provided that one or more of the requirements of this paragraph may be waived by the Secretary if the documents have been approved by the Secretary and the mortgagee submits with the application a statement certified by an officer of the cooperative corporation that no changes have been made in the documents since such approval.

3. Add a new section 203.436 after § 203.435 as follows:

COOPERATIVE UNIT MORTGAGES

§ 203.436 Mortgages involving a dwelling unit in a cooperative housing development.

(a) The provisions of 203.251(d), 203.366 and 203.440 through 203.495 shall not apply to mortgages insured pursuant to Section 203(n) of the National Housing Act.

(b) References in this subpart to the term "deed" and "deed in lieu of foreclosure", or the word "property" when found in the phrases "conveyance of property," "reconveyance of property," "transfer of property," "acquisition of property", or other phrases indicating transfer of property, shall be construed to mean the assignment of the Corporate Certificate and Occupancy Certificate. However, when the use of such terms, as interpreted in light of Section 203(n) of the National Housing Act, clearly indicates that reference to the dwelling unit is intended, such terms shall mean the dwelling unit identified in the Occupancy Certificate.

(c) In addition to the requirements of § 203.365, the mortgagee shall forward to the Secretary within 45 days after the transfer of the Corporate Certificate:

(1) A statement certified by the officer of the corporation charged with maintenance of the Corporate Certificate Transfer Book that such book currently shows that the Secretary is the owner of the Corporate Certificate; and,

(2) The Occupancy Certificate in the name of the Secretary.

(d) The mortgagee shall tender to the Secretary good and marketable title to the Corporate Certificate and the exclusive right of permanent possession of the dwelling unit.

(e) In lieu of the types of title evidence provided in § 203.385, the Secretary will accept a legal opinion signed by an attorney at law experienced in the examination of titles that the Secretary has good and marketable title to the Corporate Certificate and the exclusive right of possession of the dwelling unit.

(f) The Secretary may accept assignment of mortgages insured under this part if it is determined by the Secretary that it is in the Department's interest to do so provided that the blanket mortgage is in default and the holder of such mortgage has announced an intention to foreclose.

Issued at Washington, D.C., August 3, 1977.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing, Federal Housing Commissioner.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 740-77]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Subpart 0—Office of Management and Finance

TECHNICAL AMENDMENTS

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: One of the specific functions assigned to the Assistant Attorney General for Administration, who heads the Office of Management and Finance, is to submit requests to the Comptroller General for decisions on questions involving payments by the Department, pursuant to 31 U.S.C. 74. This order adds to the functions of the Assistant Attorney General for Administration responsibility to request decisions from the Comptroller General on questions of law involving payment on vouchers submitted to certifying officers (31 U.S.C. 82d) and authorizes the Assistant Attorney General to decide upon questions involving payment of $25 or less, pursuant to a Comptroller General decision letter of July 14, 1976.

EFFECTIVE DATE: August 1, 1977.

FOR FURTHER INFORMATION CONTACT:

William D. Van Stavoren, Acting Director, Financial Management Staff, Office of Management and Finance, Department of Justice, Washington, D.C. 20530 (202-739-5116).

Pursuant to the authority vested in me by 28 U.S.C. 509, 510 and 5 U.S.C. 301, paragraph (h) of § 0.76 of Subpart 0 of Part 0 of Chapter I of Title 28, Code of Federal Regulations, is revised to read as follows:

§ 0.76 Specific functions.

* * * * *

(h) Submitting requests to the Comptroller General for decisions (31 U.S.C. 74, 82d) and deciding questions involving the payment of $25 or less (Comp. Gen. B-161457, July 14, 1976).

Dated: August 1, 1977.

GRIFFIN B. BELL,
Attorney General

[FR Doc.77-23105 Filed 8-9-77;8:45 am]

Title 32—National Defense

CHAPTER I—OFFICE OF SECRETARY OF DEFENSE

PART 290—AVAILABILITY OF DEFENSE CONTRACT AUDIT AGENCY RECORDS

AGENCY: Defense Contract Audit Agency, DOD.

ACTION: Final rule.

SUMMARY: As required by the Freedom of Information Act (5 U.S.C. 552), this rule will provide the public with: the addresses of persons from whom information may be obtained; the procedures for making such requests; the general procedures by which the Defense Contract Audit Agency (DCAA) authorities are channeled; and a description of DCAA's organization and functions as of March 31, 1977.

EFFECTIVE DATE: August 10, 1977.

FOR FURTHER INFORMATION CONTACT:

Sybil L. Taylor, Records Administrator, Defense Contract Audit Agency, Cameron Station, Alexandria, Va. 22314, telephone: 202-274-7285.

SUPPLEMENTARY INFORMATION: On April 13, 1977, DCAA published in the FEDERAL REGISTER (42 FR 19356) a notice of proposed rulemaking setting forth rules and regulations of DCAA which implement the Freedom of Information Act (FOIA) (5 U.S.C. 552).

Interested parties were invited to submit comments. Two comments were received concerning the release of information to which a claim of confidentiality is made by the provider of the information and the agency's discretion to release exempted information. These commenters recommended that the last two sentences of § 290.22 be eliminated so as to omit the provision for the discretionary release of exempt information. These commenters also requested that the proposed rule be amended to allow a Government contractor to prevent the release of certain information. Implementation of these comments would restrict DCAA officials in the exercise of delegated discretionary functions.

The exemptions listed in the FOIA are permissive, not mandatory. A record in the possession of an agency must be released except when it is exempt from release and there is no significant and legitimate Governmental purpose that would be served by withholding the record. The Department of Defense FOIA regulations assign responsibility for evaluating these criteria to the component officials (32 CFR 286.3(b)). DCAA does not have the authority to abdicate this duty in favor of an outside party. Further, by automatically following the guidance of an outside party, the DCAA official may act in an arbitrary and capricious manner, thereby subjecting himself to disciplinary action (5 U.S.C. 552(a)(4)(F)).

Additionally, recent statements of Department of Justice officials indicate that the Department of Justice will not accept cases of questionable merit. DCAA has no power to bind the Department of Justice to a decision to defend a case of doubtful validity. The party that provided the information to DCAA retains the option of seeking a judicial decision.

While DCAA regards all data collected in the audit process as privileged information to be held in confidence, the agency cannot accept the recommendations. However, § 290.22 has been amended to provide that, except when the request is for an audit report, any party which has furnished information which may be confidential will be notified upon receipt of a request and of DCAA's intent to release information. Additionally, § 290.26(b)(2) has been amended to provide that, when a request for an audit report is referred to a contracting officer for disposition, any party who has provided information which may be confidential and is included in the report will be notified of the referral. These practices will provide sufficient protection against improper release of confidential information, and provide the party which provided the information with the option of seeking a judicial decision. Accordingly, the proposed rule, with §§ 290.22 and 290.26(b)(2) revised, is hereby adopted.

For the stated reasons, the Defense Contract Audit Agency amends Title 32 CFR Part 290 as set forth below.

Dated: July 21, 1977.

FREDERICK NEUMAN,
Director.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of the Assistant Secretary of Defense (Comptroller).

AUGUST 2, 1977.

PART 290—AVAILABILITY OF DEFENSE CONTRACT AUDIT AGENCY RECORDS

Subpart A—Organization Statement

Sec.
290.1 Purpose.
290.2 Origin and authority.
290.3 Objective.
290.4 Mission.
290.5 Composition.

Subpart B—Availability of DCAA Records

290.20 Purpose.
290.21 Applicability and scope.
290.22 Policy.
290.23 "Records" defined.
290.24 Public inspection and copying.
290.25 Requests for records.
290.26 Procedures for submitting requests.
290.27 Material withheld from disclosure.
290.28 Administrative appeals of denials.
290.29 Judicial action.

AUTHORITY: 5 U.S.C. 301 and 552, as amended by Pub. L. 93-502, Nov. 21, 1974.

Subpart A—Organization

§ 290.1 Purpose.

This subpart implements 5 U.S.C. 552 by describing the central and field organizations of DCAA and the general course and method by which DCAA's functions are channeled and determined.

§ 290.2 Origin and authority.

DCAA was established by the Secretary of Defense under Department of Defense (DoD) Directive 5105.36 and began operating on July 1, 1965. Its Director is responsible directly to the Secretary of Defense. Staff supervision is provided by the Assistant Secretary of Defense (Comptroller).

§ 290.3 Objective.

DCAA's objective is to assist DoD in purchasing defense materials and services at the lowest price or cost which is both reasonable and fair to the Government and the supplier. While emphasis is on reasonableness and fairness, it also includes the premise that prices paid by the Government should not reflect the cost of contractor operations or practices which are in any manner wasteful or unnecessary.

§ 290.4 Mission.

(a) DCAA performs all necessary contract audit for DoD, and provides accounting and financial advisory service regarding contracts to all DoD components responsible for procurement and contract administration. These services are provided in connection with negotiation, administration, and settlement of contracts and subcontracts. It also furnishes advisory contract audit service to a number of other Government agencies under agreements between DoD and such agencies.

(b) DCAA audits contractors' and subcontractors' accounts, records, documents, and other evidence; systems of internal control, accounting, costing, estimating, and general business practices and procedures to give advice and recommendations to procurement and contract administration personnel on: acceptability of costs incurred under cost, redetermination, incentive, and similar type contracts; acceptability of estimates of costs to be incurred as represented by contractors incident to the award, negotiation, modification, and change of contracts; adequacy of contractors' accounting and financial management systems and estimating procedures. DCAA also performs post-award audits of contracts in order to assure compliance with the provisions of Public Law 87-653 (Truth in Negotiations), and reviews contractor compliance with the rules, regulations, and promulgated standards of the Cost Accounting Standards Board established by Public Law 91-379.

(c) DCAA assists responsible procurement or contract administration activities in their surveys of the purchasing-procurement systems of major contractors; it cooperates with other DoD components on reviews, audits, analyses, or inquiries involving contractors' financial positions or financial and accounting policies, procedures, or practices. DCAA also maintains liaison auditors at major procuring and contract administration offices and provides assistance in the development of procurement policies and regulations.

§ 290.5 Composition.

(a) DCAA consists of seven components: a headquarters located at Cameron Station, Alexandria, Virginia, and six Regional Offices. The Regional Offices manage over 300 field audit offices (FAOs) located throughout the United States and overseas. FAOs are called branch, resident, and procurement liaison offices. Suboffices are established by Regional Managers as an extension of an FAO when required by that office to furnish special onsite contract audit service on a permanent basis. A suboffice is satellited on its parent FAO for supervision, release of audit reports, and administrative support.

(b) The headquarters consists of seven principal staff elements:

(1) The Director exercises worldwide direction of DCAA.

(2) The Deputy Director serves as principal assistant to the Director and acts for the Director in his absence.

(3) The Assistant Director, Operations & Professional Development, authorized to act for the Director and Deputy Director in their absence, is responsible for audit management, technical audit programs, and the Defense Contract Audit Institute in Memphis, Tennessee.

(4) The Assistant Director, Policy & Plans, is responsible for policy formulation, cost accounting standards, and audit guidance and procedures; and acts for the Director in the absence of the Director, Deputy Director, and Assistant Director, Operations & Professional Development.

(5) The Assistant Director, Resources, is responsible for the programs and procedures related to the management and administration of all resources required to support the audit mission; and acts for the Director in the absence of the Director, Deputy Director, Assistant Director, Operations & Professional Development, and Assistant Director, Policy & Plans.

(6) The Assistant Director, Review & Analysis, plans, directs, and conducts agencywide reviews and analyses, including independent examination and appraisal of all aspects of audit operations of Regional Offices and FAOs; and acts for the Director in the absence of the Director; Deputy Director; Assistant Director, Operations & Professional Development; Assistant Director, Policy & Plans; and Assistant Director, Resources.

(7) The Counsel provides legal and legislative advice to the Director and all members of the agency staff.

(8) The Executive Officer develops plans and policies affecting multiple DCAA functions and activities; initiates or reviews papers formulated within the Office of the Director; and has responsibility for the DCAA Equal Employment Opportunity Program.

(c) Regional Offices are located in Atlanta, Boston, Chicago, Los Angeles, Philadelphia, and San Francisco. Regional Managers direct and administer the DCAA audit mission, and manage personnel and other resources assigned to the regions; act as principal advisors to the Director; manage the contract audit program; and direct the operation of FAOs within their region. Principal staff elements of Regional Offices are Office of the Regional Manager, Assistant Regional Manager for Audit Management, Assistant Regional Manager for Resources, and Assistant for Special Projects.

(d) A resident office is established at a contractor's location when the amount of audit workload justifies the assignment of a permanent staff of auditors and support staff. A resident office may perform procurement liaison audit functions.

(e) A branch office is established at a strategically situated location within the region, responsible for performance of all contract audit service within the assigned geographical area on a mobile basis, exclusive of contract audit service performed by a resident or liaison office within the area. A branch office may perform procurement liaison audit functions.

(f) A liaison office is established at a DoD procurement or contract administration office within the region when required on a permanent basis to provide effective communication and coordination between procurement and contract audit elements in the interest of achieving the objectives of prudent contracting. A liaison office maintains a program to asure full utilization of contract audit services by procurement and contract administration offices within the region, provides audit advisors, and measures customer satisfaction; participates in prenegotiation and negotiation conferences at the request of procurement and contracting officers and furnishes related advisory services.

Subpart B—Availability of DCAA Records

§ 290.20 Purpose.

This subpart implements 5 U.S.C. 552 (Freedom of Information Act), as amended, and supplements DoD Directive 5400.7 (32 CFR Part 286) by describing established facilities at which, the officials from whom, and the procedures whereby members of the public may inspect and copy or obtain copies of unclassified DCAA records.

§ 290.21 Applicability and scope.

(a) *Applicability.* This subpart shall apply to all offices of DCAA and shall govern responses by DCAA officials to written requests from members of the public for permission to examine, or to be provided with copies of DCAA records.

(b) *Scope.* Requests for records under the Privacy Act of 1974 (5 U.S.C. 552a) are governed by the provisions of 32 CFR Part 290a. See § 286.2 of this Subchapter for other categories of requests for information or records that are excluded from the scope of this subpart.

§ 290.22 Policy.

It is the policy of DCAA to make available to the public the maximum amount of information concerning its operations and activities. This basic policy is subject to the exemptions recognized in 5 U.S.C. 552(b) and § 286.4 of this Subchapter. Notwithstanding such permissible exemptions, it is DCAA's policy that an exempt record will be made available when its disclosure would not be inconsistent with statutory requirements and when the DCAA official designated in § 290.25(e) determines that no significant and legitimate Governmental purpose would be served by withholding the record. The latter determination is within the sole discretion of DCAA. However, any party that has furnished information to DCAA will be notified upon receipt of a request and of the intent to release information which may be confidential, except as to information discussed at § 290.26(b)(2).

§ 290.23 "Records" defined.

In determining whether documentary material qualifies as a "record," consideration will be given to 44 U.S.C. 3301, which defines the word "record" as follows:

(It) includes all books, papers, maps, photographs, or other documentary materials, regardless of physical form or characteristics, made or received by any agency of the United States Government under Federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the Government or because of the informational value of data contained therein.

(a) Records are not limited to permanent or historical documents but include current documents.

(b) The term "records" does not include objects or articles such as structures, furniture, paintings, sculpture, three-dimensional models, vehicles, equipment, etc., whatever their historical value or value as "evidence."

(c) Formulae, designs, drawings, research data, computer programs, technical data packages, etc., are not considered "records" within the intent of 5 U.S.C. 552, even though maintained in documentation form, because of development costs, utilization, or value. These items are considered property, not preserved for informational value nor as evidence of agency functions, but as exploitable resources to be tutilized in the best interest of all the public. Requests for copies of such material shall be evaluated according to policies expressly directed to the appropriate dissemination or use of such property. Requests to inspect such material to determine its content for informational purposes shall normally be granted unless inspection is inconsistent with the obligation to protect the property value of the material, such as may be true for certain formulae.

(d) The term "records" does not include unaltered stocks of publications and processed documents such as regulations, manuals, instructions, and related materials that are available to the public through an established distribution system for sale or without charge. Examples of such materials are publications available to the public by purchase from DCAA or the Defense Contract Audit Manual and other documents available by purchase from the Superintendent of Documents, U.S. Government Printing Office. Individuals requesting such material under the FOIA will be referred to the appropriate public sales outlet.

§ 290.24 Public inspection and copying.

(a) 5 U.S.C. 552(a)(2) requires agencies to make available for public inspection and copying (1) final opinions, including concurring and dissenting opinions, as well as orders, made in the adjudication of cases; (2) statements of policy and interpretations which have been adopted by the agency and are not published in the FEDERAL REGISTER; and (3) administrative staff manuals and instructions to staff that affect a member of the public; unless the materials are promptly published and copies offered for sale.

(b) DCAA documents described in § 290.24(a) are published under the DCAA Publications System as regulations, manuals, instructions, and pamphlets, and are available to the public through purchase from DCAA or the Superintendent of Documents.

(c) The DCAA headquarters and each of the six Regional Offices shall publish semiannually an index of the documents published under the DCAA Publications System. Such indexes shall be made available to the public upon request without cost.

§ 290.25 Requests for records.

(a) *General.* According to the spirit and intent of 5 U.S.C. 552 and 32 CFR 286, upon receipt of written or verbal requests to DCAA offices, all reasonable efforts should be made to advise members of the public on the correct means for securing permission to examine desired records, or for obtaining copies of such records.

(b) *Identification of records.* While it is expected that DCAA offices will use their knowledge of the contents of their files and expend reasonable efforts to assist the public in identifying records which contain the particular information sought, the requester must "reasonably describe" the record sought. A record must exist at the time of the request. It is not required that a record be "created" or compiled for the purpose of furnishing information not already available in existing records. A record that is maintained by computer is normally deemed to exist for this purpose, but only if retrievable in approximately the form desired without substantial reprogramming.

(c) *Fees.* Fees shall be determined according to § 286.8 of this Subchapter. Fees shall be charged only for direct cost of search and duplication and shall not include indirect costs or costs attributable to reviewing the records.

(1) Fees will not be charged if, for a single request, the direct search cost is less than $25.00. Fees will not be charged if, for a single request, the direct duplication cost is less than $5.00. Fees will not be reduced by these amounts when the thresholds are exceeded.

(2) No request will be processed until the requester has been advised in writing of the estimated amount of the fees if they are expected to exceed the automatic waiver thresholds.

(3) Time limits specified in § 286.11 of this Subchapter will not begin until payment of fees is resolved or the requester's entitlement to a waiver of fees is established.

(4) Ordinarily, fees will not be assessed for nonproductive search or when all records located are denied. However, fees may be assessed if the requester insists upon a search and agrees to such fees prior to the search after being advised that the search is likely to be unproductive.

(5) Fees normally must be paid in advance of rendering the service. An exception exists when the requester promises in writing to pay upon receipt of a statement, and represents that he will be able to pay. When the anticipated combined total of direct search and duplication fees to be assessed exceeds $60.00, prepayment of all or a portion of the estimated fees may be required before processing the request.

(6) Subsequent requests will not be processed when, at the time of the request, the requester is known to be in default of payment of fees incurred in connection with a previous request.

(7) Payment of fees may be by personal check, bank draft drawn on a U.S. bank, or by U.S. Postal money order. All such payments shall be made payable to the Treasurer of the United States. DCAA does not have the facilities for handling cash payments. A receipt for fees paid will be given only upon request.

(d) *Waiver of fees.* The determination to waive fees is at the discretion of the officials listed in § 290.25(e). The follow-

ing requirements pertain to requests for waiver of fees in excess of the automatic waiver threshold:

(1) If a requester wishes to request a waiver of fees, the request must provide sufficient information to enable a proper determination. A statement that release is in the public interest, the identity or tax status of the requester, or the intention that the record will be made public is not persuasive grounds for granting a waiver. The requester should provide information concerning the planned use of the information, how this will serve the general public interest, the segment of the public to benefit from the information, the size of the public to be benefited, the significance of the benefit, the private interest of the requester which the release may further, the usefulness of the material to be released, the likelihood that tangible good will be realized, and any other information which may be pertinent to the appropriateness of public payment. This information does not influence the determination to release or withhold a record; it influences the determination as to whether the public will assume the direct search and duplication costs. The requester need not provide this information if he does not wish the public to bear the cost.

(2) Fee waivers shall be decided on case-by-case evaluation. Blanket waivers for specific individuals or organizations will not be granted.

(3) If the requester declares his unwillingness to pay fees and does not warrant a waiver of fees, the request will not be processed if it is estimated that the direct search and duplication costs will exceed the automatic waiver threshold.

(e) *Release/denial authorities.* The following officials are authorized to deny as well as grant requests for documents or records:

(1) Records Administrator, Defense Contract Audit Agency, Cameron Station, Alexandria, Va. 22314.

(2) Regional Manager, Defense Contract Audit Agency, P.O. Box 1498, Marietta, Ga. 30060.

(3) Regional Manager, Defense Contract Audit Agency, Waltham Federal Center, 424 Trapelo Road, Waltham, Mass. 02154.

(4) Regional Manager, Defense Contract Audit Agency, 527 South LaSalle Street, Suite 652, Chicago, Ill. 60605.

(5) Regional Manager, Defense Contract Audit Agency, 1340 West Sixth Street, Second Floor, Los Angeles, Calif. 90017.

(6) Regional Manager, Defense Contract Audit Agency, Federal Building, 1421 Cherry Street, Philadelphia, Pa. 19102.

(7) Regional Manager, Defense Contract Audit Agency, 450 Golden Gate Avenue, Box 36116, San Francisco, Calif. 94102.

§ 290.26 Procedures for submitting requests.

(a) To qualify as a request within the technical requirements of this subpart, a request for copies of, or for permission to examine, DCAA records must:

(1) Be in writing and indicate expressly, or by clear implication, that it is a request under the Freedom of Information Act, 5 U.S.C. 552, or this regulation;

(2) Contain a reasonable description of the particular record sought, sufficiently accurate and specific to enable personnel to locate and identify the record with a reasonable amount of effort; if the record cannot be specifically identified, an explanation of the purposes for which they are desired might be of assistance; and

(3) Contain a check or money order for the anticipated search and duplication fees (at least an adequate deposit); or a clear statement that the requester will be willing and able to pay all fees or to pay such fees up to a specified limit; or satisfactory evidence establishing that the requester is entitle to a waiver of fees.

(b) *Addressing requests.* A list of addresses from which DCAA records may be requested is given in § 290.25(e). A request will not be deemed to have been received for purposes of time limits specified in Part 286.11 of this Subchapter until it is received by the appropriate addressee.

(1) *Misdirected requests.* A request received by an official who is not the appropriate official indicated in 290.25(e) shall be promptly readdressed and forwarded directly to the appropriate official. The requester shall be notified of this referral. Direct contact between the original recipient and the correct addressee is encouraged to ensure expeditious handling of the request.

(2) Requests for copies of audit reports will be referred to the appropriate contracting officer when received by a DCAA office. Requesters will be notified of such referrals. In addition, any party that has furnished information which may be confidential and which is included in the requested report will be notified of the referral.

(3) All other requests should be directed to the appropirate Regional Manager, if known. If the location of the record is not known, the request should be directed to the Records Administrator.

§ 290.27 Material withheld from disclosure.

Only those records falling within the specific exemptions listed in 5 U.S.C. 552 (b) and § 286.4 of this Subchapter may be withheld. Any person who is denied a request for a record, in whole or in part, or denied a waiver of fees will be given a written explanation of the basis for the determination and advised of his right to appeal the denial.

§ 290.28 Administrative appeals of denials.

Appeals of denials should be addressed to the Assistant Director, Resources, Defense Contract Audit Agency, Cameron Station, Alexandria, Va. 22314. A copy of the initial request and the initial denial should be forwarded with the appeal letter. Final refusal to provide a record or to waive fees will be made in writing by the Assistant Director, Resources, after consultation with the Counsel, Assistant Director, Operations & Professional Development, or other appropriate staff elements. The requester will be advised of his right to judicial review.

§ 290.29 Judicial action.

A requester will be deemed to have exhausted his administrative remedy after he has been denied the requested record by the Assistant Director, Resources, or when the agency fails to respond to his request within the time limits prescribed by Part 286 of this Subchapter. The requester then may seek an order from a U.S. District Court in: (a) The district in which he resides or has his principal place of business; (b) the district in which the record is situated; or (c) in the U.S. District Court for the District of Columbia, enjoining the agency from withholding the record and ordering its production.

Title 36—Parks, Forests, and Public Property

CHAPTER I—NATIONAL PARK SERVICE, DEPARTMENT OF THE INTERIOR

PART 67—HISTORIC PRESERVATION CERTIFICATIONS PURSUANT TO THE TAX REFORM ACT OF 1976

Certification of State or Local Statutes

AGENCY: National Park Service, Interior.

ACTION: Additional interim procedures.

SUMMARY: This rule supplements the previous interim regulations by adding a new section in the certification process. The Tax Reform Act of 1976 requires the certification of State and local statutes by the Secretary of the Interior, so that an owner of a structure in a historic district created by legislation certified under these regulations may be able to take advantage of the provisions of the Act.

DATE: Effective: August 10, 1977. Comments by September 9, 1977.

ADDRESS: Send comments to: Mr. Jerry L. Rogers, Chief, Office of Archeology and Historic Preservation, National Park Service, Department of the Interior, Washington, D.C. 20240, 202–523–5275.

SUPPLEMENTARY INFORMATION: The Tax Reform Act of 1976, Pub. L. 94–455, 90 Stat. 1519, included among its many provisions section 2124, "Tax Incentives to Encourage the Preservation of Historic Structures," under which the Secretary of the Interior is required to make certain certifications with respect to the historic character of buildings and structures, the rehabilitation of historic buildings and structures, and the preservation criteria of State and local statutes.

Regulations for certifying the historic significance of structures and certification of rehabilitations were published as interim regulations and for comment

in the FEDERAL REGISTER on March 15, 1977 (42 FR 14121). These interim regulations are still in effect. These regulations for certifying State and local statutes under section 2124(a) will be an addition to 36 CFR Part 67 as published on March 15, 1977. They are published separately in the interim but will be fully integrated when the regulations are published in final.

Since certification of a State or local statute under this process provides significant tax benefits for historic structures in districts designated thereunder, certification is likely to be a significant and beneficial impetus to rehabilitation and upgrading of properties in historic districts. The Department of the Interior urges State and local governments to evaluate the social implications of improvements in such districts to assure that the residents in these districts are provided for, as appropriate.

When the certification of State statutes will have an impact on districts in specific localities, the Department of the Interior urges State governments to notify and consult with appropriate local officials prior to submitting a request for certification of the statute.

For structures in State or locally designated historic districts where the statute has been certified, requests for certification of the historic significance or rehabilitation of individual structures within such districts should be made in accord with the interim regulations of March 15, 1977, 36 CFR Part 67. The certification of significance of such structures will be made or denied upon an evaluation of whether the strucure contributes to the significance of the State or locally designated district, based upon the documentation submitted on the structure and the district in which it is located. Certifications of rehabilitation will be based on whether or not the rehabilitation is consistent with the historic character of the structure or the district in which the structure is located.

It is the policy of the Department of the Interior, whenever practicable, to offer the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding the proposed regulations to the Chief, Office of Archeology and Historic Preservation, National Park Service, Department of the Interior, Washington, D.C. 20240, on or before September 8, 1977. However, inasmuch as taxpayers are already requesting that certifications be made under the Tax Reform Act, the process set forth below will be utilized as interim regulations until such time as the proposed regulations, as they may be amended, are published in final.

This rulemaking is developed under the authority of section 101(a)(1) of the National Historic Preservation Act of 1966, 16 U.S.C. 470a–1(a) (1970 ed.), as amended, and section 2124 of the Tax Reform Act of 1976, 90 Stat. 1519. In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4331, et seq.) the National Park Service has prepared an environmental assessment of these proposed regulations. Based on this assessment, it is determined that implementation of the proposed regulations is not a major Federal action that would have a significant effect on the quality of the human environment and that an environmental impact statement is not required. The assessment, which is on file in the office of the Chief, Office of Archeology and Historic Preservation, National Park Service, Department of the Interior, Washington, D.C. 20240, is available for public inspection, and will be available for public comment for a period running concurrently with the comment period for these proposed regulations.

The originator of these regulations is Carol Shull, Historian, National Register of Historic Places (202–523–5483).

Accordingly, section 67 is amended by adding a new § 67.9 entitled Certification of State or Local Statutes. These regulations are in interim effect as of this date of publication to read as follows:

§ 67.9 Certification of State or Local Statutes.

(a) State or local statutes which will be certified by the Secretary of the Interior. For the purpose of this regulation, a State or local statute is a law of the State or local government designating a historic district or districts, including any by-laws or ordinances pertaining to the district or districts designated thereunder. Such statutes must contain criteria which will substantially achieve the purpose of preserving and rehabilitating buildings of historic significance to the district. To be certified by the Secretary of the Interior, the statute generally must provide for a duly designated review body, such as a review board or commission, with power to review proposed alterations to structures within the boundaries of the district or districts designated under the statute. State enabling legislation for the creation of historic districts not containing the minimum criteria above will not be certified. When the certification of State statutes will have an impact on districts in specific localities, the Department of the Interior urges States governments to notify and consult with appropriate local officials prior to submitting a request for certification of the statute.

(b) Who may apply. Requests for certification of State or local statutes may be made only by the duly authorized representative of the government which enacted the statute. The applicant shall certify that he or she is authorized by the governing body to apply for certification.

(c) Certification process. Requests for certification of statutes as required under section 2124(a) of the Tax Reform Act of 1976 shall be made as follows:

(1) Requests for certifications of statutes shall be submitted to the appropriate State Historic Preservation Officer and accompanied by the following:

(i) A written request from the authorized representative of the government that enacted the statute(s) including the certification required by paragraph (b) of this section.

(ii) A copy of the statute or statutes for which certification is requested, including by-laws or ordinances, if any, which pertain to district(s) already designated under the statute(s).

(iii) Local governments shall submit a copy of the State enabling legislation, if any, authorizing the designation of historic districts.

(2) Documentation on each district designated under the statute shall be submitted in duplicate, including a:

(i) Description;

(ii) Statement of significance;

(iii) Map defining boundaries of district;

(iv) Representative photographs of the district including streetscape photographs.

One copy of the documentation will be forwarded to the Keeper of the National Register. Where practical the documentation on each district should accompany the request for certification. If not, the documentation must be submitted to the State Historic Preservation Officer and the Keeper of the National Register before the Secretary of the Interior will process requests for certification of an individual structure within the district or districts for which the request for certification of statute(s) has been made. This also applies to documentation on additional districts designated under State or local statutes certified prior to the designation of such districts.

(3) The State Historic Preservation Officer shall review the statute(s) and the documentation on the district(s) protected thereunder and make an assessment of whether the statute(s) contain criteria which will substantially achieve the purposes of preserving and rehabilitating buildings of historic significance to the district(s) based upon the standards set out above in paragraph (a) of this section. If the statute(s) contain such a provision and if, in the opinion of the State Historic Preservation Officer, this and other provisions in the statute will substantially achieve the purpose of preserving and rehabilitating buildings of historic significance to the district, the State Historic Preservation Officer should recommend that the statute be certified.

(4) The State Historic Preservation Officer shall forward the request with the accompanying documentation as specified in paragraph (c) of this section with his written recommendation as to whether the statute should be certified to the Keeper of the National Register, Office of Archeology and Historic Preservation, National Park Service, Department of the Interior, Washington, D.C. 20240. The State Historic Preservation Officer shall forward the request with his recommendation within 45 days of receipt of the request by the duly authorized representative: *Provided*, The request is submitted in accord with paragraph (c) of this section. If this period has expired without such actions being taken the duly authorized representative of the State or local government may submit the request for certification of the statute(s) directly to the Keeper of the National Register in accord with paragraph (c) of this section.

(5) The Keeper of the National Register shall review the request and the recommendation of the State Historic Preservation Officer and make a decision as to certification. If, in the opinion of the Keeper of the National Register, the statute(s) contain criteria which will substantially achieve the purpose of preserving and rehabilitating buildings of historic significance to the district, the Secretary will certify the statute(s).

(6) The Keeper of the National Register shall provide written notification to the applicant and the appropriate State Historic Preservation Officer when certification of the statute is given or denied within 45 days of receipt of the request for certification. If certification is denied, the notification will provide a justification for such denial.

(d) Certification of such statutes under this regulation in no way constitutes certification of significance of individual structures within the district or of the rehabilitation by the Secretary for purposes of section 2124. Regulations for obtaining certifications of significance and rehabilitation pursuant to section 2124 are contained in 36 CFR 67.4 through 67.7. The Secretary of the Interior will certify the significance of individual structures within such districts after an evaluation of whether the structure contributes to the significance of the State or locally designated district based upon the documentation submitted on the structure and the district in which it is located. Certifications of rehabilitation will be based on whether or not the rehabilitation is consistent with the historic character of the structure or the district in which it is located.

(e) For appeals, refer to 36 CFR 67.8, Appeals, Historic Preservation Certifications Pursuant to the Tax Reform Act of 1976.

(f) State or local governments, as appropriate, must notify the Secretary of the Interior and the Secretary of the Treasury, in the event that certified statutes are amended in any respect or repealed.

Approved: July 27, 1977.

WILLIAM J. WHALEN,
Director, National Park Service.

CHAPTER II—FOREST SERVICE, DEPARTMENT OF AGRICULTURE

PART 200—ORGANIZATION, FUNCTIONS, AND PROCEDURES

Subpart A—Organization

ORGANIZATION CORRECTIONS

AGENCY: Forest Service, USDA.

ACTION: Final rule (organization statement).

SUMMARY: The organizational listing of the Forest Service is corrected to clarify the authority of the Administrator of the Lake Tahoe Basin Management Unit, Forest Supervisors for the Eldorado, Toiyabe, and Tahoe National Forests, and Regional Foresters for Regions 4 and 5. This is a result of a recent redelegation of authority to Regional Foresters to issue criminal regulations (42 FR 2968 and 42 FR 2960; 7 CFR 2.60 and 36 CFR 261.70). This is required to be published in the FEDERAL REGISTER by The Administrative Procedures Act.

DATES: This amendment is effective August 10, 1977.

FOR FURTHER INFORMATION CONTACT:

Thomas R. Jones, Administrative Management Staff, Forest Service, USDA, P.O. Box 2417, Washington, D.C. 20013, (202-447-4077).

Part 200, Title 36 of the Code of Federal Regulations is amended by changing § 200.2(d) as follows:

§ 200.2 Field Organization.

* * * * *

(d) *Field Addresses.* The addresses of Regional Foresters, Station Directors, and Area Directors are given below. Under each Regional Office address is a list of National Forests and similar units by States and headquarters locations. Headquarters locations for Ranger Districts, National Grasslands, and National Recreation Areas are not listed but may be obtained from Forest Supervisors.

National forests by regions

State in which forest is located	National forest	Headquarters of supervisor
*	*	*
Region 4 ***		
Nevada	Toiyabe, except the Lake Tahoe basin management unit.	Reno.
*	*	*
Region 5 ***		
California	Eldorado, except the Lake Tahoe basin management unit.	Placerville.
*	*	*
	Tahoe, except the Lake Tahoe basin management unit. Lake Tahoe basin management unit (portions of Toiyabe, Eldorado, and Tahoe National Forests).	Nevada City. South Lake Tahoe (headed by an administrator).
*	*	*

(81 Stat. 54 (5 U.S.C. 552).)

JOHN R. MCGUIRE,
Chief, Forest Service.

AUGUST 5, 1977.

[FR Doc.77-23106 Filed 8-9-77;8:45 am]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL-754-4]

PART 610—FUEL ECONOMY RETROFIT DEVICES—TEST PROCEDURES AND EVALUATION CRITERIA

Interim Rule

AGENCY: Environmental Protection Agency.

ACTION: Interim final rulemaking.

SUMMARY: These regulations establish evaluation criteria and test procedures for evaluating the fuel economy improvement claims for devices that may be retrofitted on new or in-use vehicles. These regulations are required by the Motor Vehicle Information and Cost Savings Act. The regulations will provide a uniform test procedure for devices intended to improve fuel economy performance.

DATES: Effective date: August 10, 1977. Deadline for submission of written comments: November 8, 1977.

ADDRESS: Deputy Assistant Administrator for Mobile Source Air Pollution Control (AW-455), Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Gary Timm, Technical Advisor, Regulatory Management Staff, Office of Mobile Source Air Pollution Control, Environmental Protection Agency, Washington, D.C. 20460, 202-755-0596.

SUPPLEMENTARY INFORMATION: The Environmental Protection Agency (EPA) is hereby promulgating rules on an interim final basis under Section 511 of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C. 2011 et seq., as amended by section 301 of the Energy Policy and Conservation Act, Pub. L. 94-163, 89 Stat. 915. Section 511 requires the Administrator of EPA to: (1) Establish testing and other procedures for measuring the effects of retrofit devices on automobile fuel economy and pollutant emissions; (2) establish criteria for evaluating the accuracy of fuel economy representations made with respect to retrofit devices; and (3) publish test results, conclusions on fuel economy and emissions effects, and other relevant information. A retrofit device is any component, equipment, or device which replaces, modifies, or adds to any original component, equipment, or device found on an automobile. (A more detailed definition is found in § 610.17 of these rules.)

The device evaluation programs called for in the Act can be initiated upon the request of the Federal Trade Commission, by the EPA acting on its own volition, or upon the application of a device manufacturer, in which case the manufacturer shall be liable for the costs of testing. Although the final rules are expected to contain provisions for initiation of device evaluations in all three ways listed above, these interim regulations provide only for manufacturer-initiated evaluations. This is to ensure that no manufacturer will be subject to government-initiated testing under these regulations until notice and public procedure have been provided. EPA expects that, when these regulations are made final after consideration of public comments, language will be added having the following effect:

(1) A retrofit device evaluation program will be initiated at the request of the Federal Trade Commission (FTC) when it has reason to believe that fuel economy representations made for a retrofit device being marketed may be inaccurate (§ 610.11(a)).

(2) A retrofit device evaluation program may be initiated at the EPA Administrator's initiative (§ 610.11(b)).

(3) All costs incurred in an evaluation program initiated at the request of the FTC or at the Administrator's initiative, including the cost of purchasing any necessary quantity of the device under evaluation, will be borne by the United States (§ 610.13(a)).

(4) In a device evaluation program initiated at the request of the FTC, the composition and size of the test fleet will be determined by the Administrator in consultation with the FTC (§ 610.32(a)).

EPA will include lubricant and oil and fuel additives as well as most hardware approached in the test program. The Agency will exclude driving aids such as fuel flow meters which cannot readily be evaluated by standard test procedures. Most of the testing of the program will be carried out by private laboratories under the direction of EPA engineers. EPA cannot absorb the additional test loads at its own test facilities to carry out the program in house. All of the contract work will be paid by the party requesting the test. When a manufacturer requests a test, payment will be made directly to the laboratory conducting the testing.

The rules published herein include criteria for evaluating claims and conducting tests, descriptions, and categories of the devices that can be evaluated, and test procedures. Chassis dynamometer tests known as the 1975 Federal Test Procedure for light-duty vehicles (40 CFR Part 86) and the EPA Highway Fuel Economy Test (40 CFR Part 600) will be the primary methods used to determine the effects of devices on fuel economy and pollutant emissions. Other, specialized test procedures may be used when devices and effects cannot be adequately evaluated by these tests. For instance, the effect of an aerodynamic drag reduction device may be determined by tests on a test rack, and the durability effects of various products may be evaluated by using engine test procedures.

EPA finds that notice and public procedure before promulgating these interim regulations would be unnecessary and contrary to public interest because further delay in publishing these regulations will deprive the Nation of information regarding the potential benefits of fuel economy retrofit devices; more information can be gained regarding the best way to structure the program in the final regulations by the experience gained under the evaluation programs conducted under these interim regulations than could be gained by comment alone; and these rules impose no burden on nor jeopardize any person. For essentially the same reasons, the Agency finds good cause to make this action effective on the date of publication in the FEDERAL REGISTER.

Interested parties are invited to comment on these rules by submitting such written data, views, or arguments as they may desire. Such comments will be considered prior to issuance of final rules. Communications should be available for inspection and copying at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying service.

(Sec. 511, Motor Vehicle Information and Cost Savings Act, as amended (Sec. 301, Pub. L. 94-163, 89 Stat. 915 (15 U.S.C. 2011)).)

NOTE.—The Environmental Protection Agency has determined that the document does not contain a major action requiring preparation of an Economic Impact Analysis under Executive Orders 11821 and 11949 and OMB Circular A-107.

Dated: August 4, 1977.

DOUGLAS M. COSTLE,
Administrator.

40 CFR Chapter I is amended by adding a new Part 610 to read as follows:

PART 610—FUEL ECONOMY RETROFIT DEVICES—TEST PROCEDURES AND EVALUATION CRITERIA

Subpart A—General Provisions

Sec.
610.10 Program purpose.
610.11 Program initiation.
610.12 Program structure.
610.13 Payment of program costs.
610.14 Eligibility for participation.
610.15 Applicant's responsibilities.
610.16 Application format.
610.17 Definitions.

Subpart B—Evaluation Criteria for the Preliminary Analysis

610.20 General.
610.21 Device category.
610.22 Device integrity.
610.23 Operator interaction effects.
610.24 Validity of test data.
610.25 Evaluation of test data.

Subpart C—Test Requirement Criteria

610.30 General.
610.31 Vehicle tests for fuel economy and exhaust emissions.
610.32 Test fleet selection.
610.33 Durability tests.
610.34 Special test conditions.
610.35 Driveability and performance tests.

Subpart D—General Vehicle Test Procedures

610.40 General.
610.41 Test configurations.
610.42 Fuel economy measurement.
610.43 Chassis dynamometer procedures.

Subpart E—Durability Test Procedures

610.50 Test configurations.
610.51 Mileage accumulation procedure.
610.52 Maintenance.

Subpart F—Special Test Procedures

610.60 Non-standard ambient conditions.
610.61 Engine dynamometer tests.
610.62 Driveability tests.
610.63 Performance tests.
610.64 Track test procedures.

Subpart A—General Provisions

§ 610.10 Program purpose.

(a) The purpose of an evaluation program initiated under these rules is to determine the performance of various retrofit devices, applicable to automobiles, for which fuel economy improvement claims are made, according to standardized procedures and criteria and to compile and disseminate the results of the evaluation.

(b) Data generated in an evaluation program by the Administrator of the Environmental Protection Agency (EPA) will be published in the FEDERAL REGISTER and elsewhere for use by the Federal Trade Commission and the public. It should be stressed that the role of this program will be the generation, analysis, and dissemination of technical data, and not the approval or certification of retrofit devices.

(c) Through engineering and or statistical analysis of data from vehicle tests, the evaluation program will determine the effects on fuel economy, exhaust emissions, durability, and driveability of the applicable vehicles due to the installation or use of the devices. The evaluation program will also include additional procedures, whenever determined by the Administrator as necessary, to evaluate the durability or useful life of the devices themselves or their effects on vehicle durability or useful life.

§ 610.11 Program initiation.

A retrofit device evaluation program will be initiated as follows:

(a) [Reserved]

(b) [Reserved]

(c) Upon the application of any manufacturer of a retrofit device (or prototype thereof) for which a fuel economy improvement claim is made.

§ 610.12 Program structure.

Each device evaluation program will consist of up to three phases to be performed by the EPA Administrator:

(a) A preliminary analysis of available information and test data on the device;

(b) Design and conduct of a sequence of tests to determine device effectiveness if considered necessary by virtue of the Administrator's analysis; and

(c) Publication in the FEDERAL REGISTER, and submission to the Secretary of Transportation and to the Federal Trade Commission, of a summary of the results of any tests conducted under Subparts C through F, or if none were conducted, then a summary of the results of the preliminary analysis conducted under Subpart B; together with the Administrator's conclusions as to the effect of the tested retrofit device on fuel economy and on emissions of air pollution, and as to any other information that the Administrator determines is relevant in evaluating such device. Each of the above phases may, as appropriate, include statistically valid sample sizes and statistical evaluation of measured results.

§ 610.13 Payment of program costs.

(a) [Reserved]

(b) If the evaluation program has been initiated by the application of a manufacturer under § 610.11(c), the manufacturer shall supply, at his own expense, samples of the device in the number required by the Administrator to an independent laboratory recognized by the Administrator and shall be liable for the costs of the evaluation program which are incurred by the independent laboratory.

§ 610.14 Eligibility for participation.

Participation in an evaluation program initiated under § 610.11(c) will be available to any person or company who agrees to follow the procedures set forth in these protocols. Failure to conform to any aspect of these protocols, without the approval of the Administrator, may be interpreted as withdrawal from participation in the program.

§ 610.15 Applicant's responsibilities.

Each applicant for evaluation under § 610.11(c) will be responsible for the following:

(a) Submission of an application, in format specified by the Administrator, prior to initiation of the evaluation. A separate application shall be made for each different device. The application shall be made to the Administrator (or his delegate) by the manufacturer and shall be updated and corrected by amendment if deemed necessary by EPA.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the device covered by the application. This shall include drawings, schematics, and information on the theory of operation.

(2) Vehicles or engines to which the device is applicable.

(3) Installation or usage instructions, including degree of knowledge required by persons making the installation and the tools and equipment required.

(4) A statement of recommended maintenance, degree of knowledge required for that maintenance, and the tools and equipment required to perform the maintenance.

(5) All exhaust emissions and fuel economy test data on the device or product available to the applicant.

(6) All information available to the applicant concerning whether the device in its operation, function, or malfunction may cause an automobile using that device to emit into the ambient air any substance other than pollutants regulated by EPA under section 202 of the Clean Air Act (i.e., hydrocarbons, carbon monoxide, and oxides of nitrogen), or normal atmospheric constituents (such as carbon dioxide or water vapor) in a quantity differing from that emitted in the operation of the automobile without the device.

(7) All information available to the applicant concerning whether the device in its operation, function, or malfunction may result in any unsafe condition endangering the automobile or its occupants or persons or property in close proximity to the automobile.

(c) Shipment to the EPA's Motor Vehicle Emission Laboratory, or other test site designated by the Administrator, of the devices being evaluated in the quantity specified by the Administrator.

(d) Payment of the costs of testing to an independent laboratory, which may include the direct labor and material cost to the laboratory of acquiring the test fleet, of repairing and tuning the test fleet, of installing and removing devices, of conducting the required tests, and such other costs as may be specified.

(e) Complete copies of the application and of any amendments thereto shall be submitted in such multiple copies as the Administrator may require.

§ 610.16 Application format.

(a) Device manufacturers who apply for evaluation of a fuel economy retrofit device shall use a standard application format, in order to allow the Administrator to compile relevant data on specific devices and to allow timely response to applications. Application formats are available from and submission shall be made to:

Director, Emission Control Technology Division, Environmental Protection Agency, 2565 Plymouth Rd., Ann Arbor, Mich. 48105. ATTN: Fuel Economy Retrofit Device Evaluation.

(b) Four weeks should be allowed for analysis of the application and preparation of a response. As indicated in other sections of this part, this response will include the evaluation of the device according to the criteria discussed in Subpart B of this part. The Administrator's evaluation will be made public.

§ 610.17 Definitions.

Except as specifically defined below, all terms used in these protocols which are defined in the Clean Air Act, as amended (42 U.S.C. 1857f–1, 1857f–5, 1857f–5a, 1857f–6, and 1857g(a)) or 40 CFR Part 86 shall have the meanings provided therein.

(a) "Retrofit device" means any component, equipment, or other device:

(1) Which is designed to be installed in or on an automobile as an addition to, as a replacement for, or through alteration or modification of, any original component, equipment, or other device; and

(2) Which any manufacturer, dealer, or distributor of such device represents will provide higher fuel economy than would have resulted with the automobile as originally equipped. The term also includes fuel and oil additives for use in an automobile. The term does not include fuel flow measuring instruments or other driving aids which will not be evaluated in this program.

(b) "Automobile" means any four-wheeled vehicle propelled by fuel which is manufactured primarily for use on public streets, roads, and highways (except any vehicle operated exclusively on a rail or rails), and which is rated at 6,000 lbs. gross vehicle weight or less.

(c) "Fuel economy" means the average number of miles traveled by an automobile per gallon of gasoline (or equivalent amount of other fuel) consumed, as determined by the Administrator in accordance with procedures established under Subparts D or F.

(d) "Manufacturer" means a person or company who is engaged in the business of manufacturing, distributing, or selling retrofit devices for which a fuel economy improvement claim is made.

(e) "Retrofit" means the addition of a new item, modification or removal of an existing item of equipment beyond that of regular maintenance, or use of a fuel or oil additive, on an automobile after its initial manufacture.

(f) "Federal test procedures" means the test procedures specified in 40 CFR Part 86, except as those procedures are modified in these protocols.

(g) "Highway Fuel Economy Test" means the test procedure described in § 600.611(b) or § 600.111(b) as applicable.

(h) "Operator" means any person who installs, services, or maintains a retrofit device in an automobile or who operates an automobile with a retrofit device installed.

(i) "Device integrity" means the soundness of a device as determined by evaluation of design information and test data.

(j) "Test data" means any information which purports a quantitative measure of any aspect of the behavior of a retrofit device.

(k) "Testing agent" means any person who develops test data on a retrofit device.

(l) "Preconditioning" means the operation of an automobile through one (1) EPA Urban Dynamometer Driving Schedule, described in 40 CFR Part 86.

(m) "Configuration" means the mechanical arrangement, calibration, and condition of a test automobile, with particular respect to carburetion, ignition timing, and emission control systems.

(n) "Baseline configuration" means the unretrofitted test configuration, tuned in accordance with the automobile manufacturer's specifications.

(o) "Adjusted configuration" means the test configuration after adjustment of engine calibrations to the retrofit specifications, but excluding retrofit hardware installation.

(p) "Retrofitted configuration" means the test configuration after adjustment of engine calibrations to the retrofit specifications and after all retrofit hardware has been installed.

(q) "Data fleet" means a fleet of automobiles tested at 'zero device-miles' in 'baseline configuration,' the 'retrofitted configuration,' and in some cases the 'adjusted configuration,' in order to determine the changes in fuel economy and exhaust emissions due to the 'retrofitted configuration,' and where applicable the changes due to the 'adjusted configuration,' as compared to the fuel economy and exhaust emissions of the 'baseline configuration.'

(r) "Durability fleet" means a fleet of automobiles operated for mileage accumulation used to assess deterioration effects associated with the retrofit device.

(s) "Zero device-miles" means the period of time between retrofit installation and the accumulation of 100 miles of automobile operation after installation.

(t) "Independent laboratory" means a test facility operated independently of any motor vehicle, motor vehicle engine, or retrofit device manufacturer capable of performing retrofit device evaluation tests. Additionally, the laboratory shall have no financial interests in the outcome of these tests other than a fee charged for each test performed.

(u) "Evaluation Program" or "Program" means the sequence of analyses and tests prescribed by the Administrator as described in § 610.12 in order to evaluate the performance of a retrofit device.

(v) "Preliminary analysis" means the engineering analysis performance by EPA prior to testing prescribed by the Administrator based on data and information submitted by a manufacturer or available from other sources.

Subpart B—Evaluation Criteria for the Preliminary Analysis

§ 610.20 General.

The Administrator will employ the following criteria for evaluating the accuracy of fuel economy representations made with respect to retrofit devices:

(a) Device functional category; (b) device integrity; (c) operator interaction effects; (d) validity of test data; (e) as these concepts are explained in evaluation of test data: as these concepts are explained in §§ 610.21 through 610.25 respectively.

§ 610.21 Device functional category and vehicle system effects.

(a) The devices evaluated in this program are organized into categories for purposes of definition and establishment of evaluation criteria and test procedures, and to indicate which vehicle functional characteristics (other than fuel economy) may be adversely affected by installation or use of the device.

(b) A device will be categorized based on:

(1) Engineering principles governing operation of the device; (2) interaction between the device and specific vehicle/engine operating characteristics; and (3) constraints with respect to vehicle applicability of the device.

(c) The device categories and the affected vehicle functional characteristics which may be adversely affected are noted for each device category in Table I. The notations for each characteristic are as follows:

Exhaust Emissions—1.
Driveability—2.
Durability—3.
Performance—4.

TABLE I

Device categories:	Characteristics adversely affected
Fuel-air system:	
Carburetors and fuel injection systems	All
Air-fuel ratio modifiers (e.g., air bleeds)	All
Atomization devices (acoustic and mechanical)	All
Vapor injectors	All
Choke controls	1, 2, 4
Air filters	1, 3, 4
Fuel modifiers (additives)	1, 3
Fuel-air distribution systems (intake manifolds)	1, 2, 4
Fuel pressure regulators	All
Ignition systems:	
Spark plugs	All
Spark timing control systems	All
Spark duration control systems	1, 4
Spark energy sources	1, 4
Emission control systems:	
Exhaust gas recirculation (EGR) systems	All
After-treatment devices	1, 2, 4
Drivetrain:	
Tires	(1)
Overdrive units	All
Torque converter lockups	1, 2, 4
Exhaust system:	
Headers	1
Tuned exhaust systems	1
Accessories:	
Cooling fan or cooling for couplings	(1)
Cold start aids (e.g., engine heaters)	1
Lubrication:	
Oil filters	3
Oil modifiers (additives)	1, 3
Vehicle body:	
Aerodynamic drag reduction devices	(1)
Miscellaneous:	
Modifications to valve timing	All
Retrofit prechambers	All
"Placebos" (devices that are claimed to operate on questionable or doubtful scientific principles)	None

[1] Small effect, may be difficult to measure.

(d) In the absence of information from the device manufacturer on this topic or if the Administrator's preliminary evaluation indicates that testing is necessary, the Administrator will conduct tests to determine the extent of these adverse effects.

§ 610.22 Device integrity.

The integrity of a device will be evaluated with respect to:

(a) The extent to which device manufacture is standardized by means of drawings, specifications, and other fabrication and quality assurance controls;

(b) The degree of sensitivity of device effectiveness to deterioration under exposure to normal operating stresses and environments;

(c) The susceptibility of the device to deterioration of effectiveness under abnormal operating conditions;

(d) The effects upon its surroundings of device malfunction under causes of failure which may be reasonably anticipated to occur in actual use; and

(e) The extent to which test data support paragraphs (b), (c), and (d) of this section.

§ 610.23 Operator interaction effects.

Operator interaction effects will be evaluated with respect to:

(a) The degree of sensitivity of device effectiveness to variances in installation, operation, and maintenance;

(b) The adequacy of manufacturer-furnished instructions for minimizing variances in installation, operation, and maintenance;

(c) The extent to which device installation or use, or the effects of such installation or use, impinge upon Federal emission control regulations;

(d) Effects on the performance or occupant comfort of the retrofitted vehicle, and on that of other vehicles; and

(e) The relationship between total cost of ownership of the device and the cost savings realizable from its fuel economy effects.

§ 610.24 Validity of test data.

The Administrator will make a determination as to the validity of manufacturer-furnished test data on the basis of:

(a) Correlatability between the test procedures used by the manufacturer or testing agent and the procedures prescribed in Subpart D;

(b) The choice of test vehicle(s) as representative of the manufacturer's claim of operation and or principles of operation;

(c) The degree of control exercised over ambient and operating conditions in the tests, including vehicle calibrations;

(d) Accuracy and precision of the measurement techniques and instrumentation used in the tests;

(e) Disclosure of all test data acquired on the device, whether representing positive, negative, or inconclusive results;

(f) Qualifications and independence of the testing agent; and

(g) The extent to which test data include evaluation of the durability of the device, or its effect on vehicle durability.

§ 610.25 Evaluation of test data.

Valid manufacturer-furnished test data will be evaluated with respect to:

(a) Vehicle applicability;

(b) Dependence of device effects vehicle type;

(c) Device effects on fuel economy, and on emissions, with statistical or other caveats as established by the data base;

(d) Definition of claims which can be made based on the available data; and

(e) Substantiation of specified claims actually made by the manufacturer.

Subpart C—Test Requirement Criteria

§ 610.30 General.

(a) If the Administrator determines, by the criteria given in Subpart B, that

the claims made for a device are not supported by existing test data or other information, the Administrator will request the manufacturer to furnish additional information, and may design a test program to investigate those areas where claims appear to be erroneous or unsupported or where adverse effects due to use of the device are suspected.

(b) In cases where the Administrator determines on the basis of the preliminary analysis that a device either can have no significant beneficial effect on fuel economy, or will have an adverse effect on emissions, he may elect not to design a test program or test the device and only publish his preliminary analysis and conclusions.

(c) If the evaluation was initiated upon application of a manufacturer (as described in § 610.11(c)) and the manufacturer elects not to carry through on his application, the Administrator's analysis and conclusions will be published.

§610.31 Vehicle tests for fuel economy and exhaust emissions.

(a) The tests described in Subparts D, E, or F may be conducted if existing data or other information are insufficient to support claims for a device in any of these areas:

(1) Degree of improvement in fuel economy.

(2) Effect on exhaust emissions.

(3) Vehicle applicability.

(b) The Administrator may determine that, in certain cases, tests using engine dynamometers are adequate for determining the effect of a device. Examples of such cases are given below.

(1) *Long-term effects.* In the case of fuel or oil additives, it may be necessary for the engine to operate for several thousand miles before the effectiveness can be adequately measured. In such cases an engine dynamometer will permit a less expensive and better controlled durability and economy test than one in which a vehicle must be driven on a durability route and then tested on a chassis dynamometer or test track.

(2) *Durability requirements.* Aspects of engine durability can be efficiently determined using specialized engine testing rather than through durability mileage accumulation in a vehicle. A number of standard engine tests are presently used which can be incorporated into this requirement.

§ 610.32 Test fleet selection.

(a) The composition and size of the test fleet will be determined by the Administrator.

(b) The goal of the test fleet selection will be the provision of a data base adequate to give the Administrator reasonable confidence in the conclusions to be reached.

(c) Once the number of vehicles to be tested has been determined, the Administrator will specify the test fleet makeup by make, model, model year, engine displacement and carburetor and transmission type.

§ 610.33 Durability tests.

The Administrator may determine that a device under evaluation will require durability testing in addition to the basic evaluation testing for device effectiveness. This requirement may be necessary for several reasons:

(a) A retrofit device manufacturer may claim that some mileage accumulation may be needed before the full effectiveness of the device can be obtained. If such claims are made, durability testing as described in Subpart E may be performed. To determine whether the effectiveness change during the mileage accumulation is a function of the device or of the mileage accumulation alone, in some durability tests it may be necessary to run the mileage accumulation on vehicles with and without the device. Due to the high cost of durability testing and in particular of such duplicate testing, it will be used only where it is judged by the Administrator to be necessary.

(b) A device may have a limited life expectancy or be such that it requires replacement or adjustment at a prescribed mileage interval. Confirmatory durability tests may be run to assess whether such mileage intervals are proper and effective.

(c) A device may be suspected of having an adverse effect on the durability of the engine to which it is applied. After identification of a potential failure mode, durability tests may be conducted to investigate any changes in engine characteristics associated with that failure mode. Examples are valve problems, deterioration in spark plug life, increase in carburetor or combustion chamber deposits, or increased engine wear. If it is not possible to directly measure the change in the suspect characteristic, then a durability run may be made as described in Subpart G, in which fuel economy and exhaust emissions are periodically checked during the accumulation of up to 15,000 miles.

(d) A critical item which can influence fuel economy is vehicle maintenance. Any durability test program used in evaluation of the effectiveness of a fuel economy device will be designed to differentiate maintenance effects from the effect of the device. Any maintenance associated with the device operation will be rigidly controlled. If the maintenance appears to be a significant factor in the effectiveness of a device, then it may be necessary to run a control test on vehicles without the device installed where the same maintenance is performed to quantify any incremental effect of that maintenance.

§ 610.34 Special test conditions.

If the Administrator determines that a device may have potentially detrimental effects on the operation of a vehicle when operated in ambient conditions outside the range specified in 40 CFR Part 86, or if the device manufacturer claims a fuel economy improvement in such conditions, additional tests may be performed. These tests will determine whether the device will significantly limit the operational usefulness of the vehicle and will assess the claimed fuel economy benefit.

(a) *Extreme temperatures.* As required by the Administrator, tests will be conducted at extreme ambient temperature conditions to determine the effect due to devices (e.g., engine heaters) for which fuel economy improvements at extreme temperatures are made. For other devices it may be necessary to determine whether the cold starting and driving capability of device-equipped vehicles is affected sufficiently to make them dangerous, or whether fuel economy characteristics at extreme temperatures are significantly worse than before the device was installed.

(b) *High altitude.* Devices for which specific claims of improved fuel economy at high altitude are made may be tested using the procedures in Subpart D, at altitudes above 4,000 feet. For other devices, testing at high altitude may be necessary for determining whether a device will make the vehicle less useful or efficient when operated at various altitudes. The Administrator will determine when such testing is required.

§ 610.35 Driveability and performance tests.

If the Administrator determines that driveability and performance of a vehicle may be adversely affected by the use of a device, a number of automobiles to be determined by the Administrator will be subjected to the driveability and performance tests discussed in §§ 610.62 and 610.63, respectively.

Subpart D—General Vehicle Test Procedures

§ 610.40 General.

Two chassis dynamometer test procedures, the Federal emissions test procedures (City Fuel Economy Test) and the Highway Fuel Eonomy Test will generally be used to evaluate the effectiveness of the devices supplemented by steady state dynamometer tests where warranted. Under unusual circumstances other test procedures, durability test procedures, or special test procedures such as track versions of the City and Highway fuel economy tests may be necessary. These procedures are described in Subparts E and F respectively.

§ 610.41 Test configurations.

(a) In order to measure the effectiveness of a retrofit device at least two, and in some cases, three vehicle configurations defined in § 610.17 will be tested. Each vehicle will be tested at least twice in each configuration, as determined by the Administrator.

(b) The first test configuration is a baseline configuration. In this configuration the baseline or unretrofitted vehicle emissions will be measured.

(c) The second test configuration, the parametrically adjusted configuration, may be required at the discretion of the Administrator if a device requires both hardware and engine parameter modifications to achieve the fuel economy improvement. If, in the Administrator's judgment, based on a review of the available information, the combined effects of retrofit hardware installation and parametric adjustment could be substantially duplicated by parametric adjustment alone, then the Administrator may specify a second test, to evaluate such adjustment exclusive of the retrofit hardware.

(d) The third series of tests, in the retrofitted configuration, will evaluate the full retrofit system installed on the vehicle.

§ 610.42 Fuel economy measurement.

(a) Fuel economy will be measured by: (1) the carbon balance method, or (2) gravimetric or volumetric methods. In the gravimetric and volumetric methods, fuel consumption is determined by weighing the fuel source before and after a test, or by measuring the volume of fuel consumed during a test. Since the distance traveled during the tests is known, the fuel economy, in miles per gallon, can be calculated. Gravimetric and volumetric methods require the use of special test equipment in addition to the emissions measuring equipment.

(b) The carbon balance procedure for measuring fuel economy relates the carbon products in the exhaust to the amount of fuel burned during the test. This method will be the one used to measure fuel economy unless track tests are employed.

(c) Three values of fuel economy will be reported: for city driving ('75 FTP), for highway driving (HFET), and the combined city/highway value calculated according to this equation:

$$MPG_{combined} = 1/\left[\frac{0.55}{MPG_{city}} + \frac{0.45}{MPG_{hwy}}\right]$$

§ 610.43 Chassis dynamometer procedures.

(a) (1) *1975 Federal Test Procedure.* Vehicle exhaust emissions will be measured according to the Federal emission test procedure described in 40 CFR Part 86 Subpart B, which is known as the 1975 Federal Test Procedure ('75 FTP). However, the following modifications will be employed:

(i) No evaporative emission loss, as specified by 40 CFR § 86.177-9, need be measured (with the exception of devices modifying or disconnecting existing evaporative control devices in such a manner as would be expected to adversely affect their evaporative emission control performance).

(ii) Vehicle preconditioning shall consist of operation of the vehicle through one (1) EPA Urban Dynamometer driving Schedule. This preconditioning must be done at least 12 hours, but no earlier than 36 hours before the emission test.

(iii) While the test fuel must meet the specifications outlined in 40 CFR § 86.-177-6, fuel conditioning as specified for evaporative emission test procedures is not required.

(2) During the '75 FTP, the vehicle is driven on a chassis dynamometer using the Urban Dynamometer Driving Schedule which yields an average speed of 21.6 mph and a distance of 11.1 miles. A chassis dynamometer reproduces vehicle inertia and road load. For each inertia weight class, a road load is specified which takes into account rolling resistance aerodynamic drag for an average vehicle in each class. The vehicle exhaust is collected, diluted, and thoroughly mixed with filtered background air, to a known constant volume flow. This procedure is known as Constant Volume Sampling (CVS). The '75 FTP measures the emissions generated during a "cold" start and includes a "hot" start after a ten minute shutdown following the first 7.5 miles of driving.

(b) *Highway Fuel Economy Test.* Since the '75 FTP does not represent the type of driving done in rural areas, especially on highways, as part of the standard procedure an additional test known as the EPA Highway Fuel Economy Test (HFET) will be conducted to determine highway fuel economy. The average speed of the driving schedule on this test is 48.2 mph and the distance covered is 10.2 miles. The test vehicle is fully warmed up at the start of the Highway Fuel Economy test which is ordinarily run immediately following the Federal Emission test procedure. The test procedure to be followed for generation of highway fuel economy data are those specified in § 600.611 or § 600.111 as applicable.

(c) *Steady state tests.* Constant speed, road load tests may be conducted to help give insight into operational differences and exhaust emission and fuel economy changes due to a retrofit device. Speeds between 0 (engine idling) and 60 mph will be investigated, with a time period at each speed long enough to ensure that engine operation has stabilized.

Subpart E—Durability Test Procedures

§ 610.50 Test configurations.

(a) In addition to the tuneup to manufacturer's specifications per § 610.41, all vehicles in the durability fleet will have installed the following new parts: Air, oil, and fuel filters; spark plugs; points; condenser; rotor; distributor cap; PCV valve, and emission control devices such as vacuum control valves and EGR valves.

(b) Vehicles included in the durability fleet will be subjected at zero-device miles to the same test sequence for fuel economy and exhaust emissions as specified in Subpart D. Subsequently, they will be tested at 3,000 device-mile intervals, up to and including the final mileage point of 15,000 device-miles. Testing at these mileage points will be performed with the vehicle equipped with the full retrofit system.

(c) After the 15,000-mile test the vehicle will be tuned as necessary and the device adjusted to the manufacturer's specifications as required. The fully restored retrofitted configuration will then be tested. The device will then be removed from the vehicle and the vehicle set to vehicle manufacturer's specifications. A tuned baseline test will then be conducted.

§ 610.51 Mileage accumulation procedure.

(a) The mileage accumulation procedure follows that outlined in 40 CFR Part 86 Subpart A except as amended by these protocols. This mileage accumulation schedule, or a suitable alternate procedure approved by the Administrator, will be used.

(b) Fuel used in the mileage accumulation will be commercial fuel available in the retail market and shall conform to the requirements of 40 CFR 86.133.

§ 610.52 Maintenance.

(a) Maintenance during the durability evaluation can best be considered in three separate categories:

(1) Normal scheduled vehicle maintenance; (2) unscheduled vehicle maintenance; and (3) retrofit maintenance.

(b) Normal scheduled vehicle maintenance can be defined as those periodic services specified in the original owner's manual supplied to the owner at the time of new vehicle purchase.

(1) Normal periodic engine oil changes, vehicle lubrication, and oil filter changes, as specified in the original owner's manual, will be performed during durability mileage accumulation.

(2) For purposes of these protocols the following items of normally scheduled vehicle maintenance will not be performed during the durability mileage accumulation:

(i) Normal tune-up items: (A) Spark plugs; (B) condenser; (C) rotor; (D) distributor cap.

(ii) Air Cleaner element.

(iii) PCV Inspection.

(iv) Dwell and timing check.

(v) Charging circuit check.

(3) Periodic maintenance items specified in the original owner's manual, other than those listed above, may be performed if found to be necessary by the Administrator.

(c) *Unscheduled maintenance.* Because the vehicles used for durability evaluation in this program will probably have considerable mileage accumulation and unknown maintenance prior to inclusion in the program, it can be anticipated that certain vehicle and engine failures may occur, which may be unrelated to the retrofit device. Unscheduled maintenance will be performed only in those cases where a significant driveability problem has been indicated by the driver of the vehicle.

(1) Correction of the following problems will be made as soon as the problems occur:

(i) Tire replacement (same size and type).

(ii) Vehicle body repairs (remote from engine and retrofit).

(iii) Windshield wipers.

(iv) Fluid levels unrelated to retrofit.

(v) Brakes.

(vi) Hoses unrelated to retrofit.

(vii) Belts unrelated to retrofit.

(viii) Suspension failures.
(ix) Wheel alignment.
(x) Steering.
(xi) Wheel bearings.
(xii) Non-engine electrical system.
(xiii) Drivetrain components (U-joints, axles, transmission adjustments, etc.).

(2) Other unscheduled maintenance of the engine or drivetrain may be made as directed by the Administrator. Upon notification of a need for unscheduled maintenance, the Administrator may decide that before and after maintenance fuel economy tests are required.

(d) Maintenance of the retrofit device will normally not be performed during the accumulation of durability mileage of 15,000 miles. However, certain retrofit devices may require periodic maintenance that is directly related to device function. An example is the periodic addition of fluid to the reservoir of a vapor injector. The Administrator will determine whether periodic maintenance will be allowed, based on his review of available information including the device manufacturer's maintenance instructions to the consumer.

(e) A log of all maintenance shall be kept for every vehicle. These logs will be summarized in the final report by the Administrator.

Subpart F—Special Test Procedures

§ 610.60 Non-standard ambient conditions.

(a) *Extreme temperatures.* For vehicles required to be tested at extreme temperatures, the test sequence described in § 610.41 will be performed using either test track or dynamometer, in ambient temperatures outside the 60° to 90° range specified in § 610.64 as determined by the Administrator. In no case will tests be performed at temperatures lower than 0°F or higher than 120°F. The driveability tests described in § 610.62 may also be performed at non-standard temperatures, as determined to be necessary by the Administrator.

(b) *High altitudes.* Vehicles required to be tested at high altitudes will undergo the tests described in § 610.43 if necessary, on either test track or dynamometer as determined by the Administrator. One test location, at an elevation of at least 4,000 feet, will be selected.

§ 610.61 Engine dynamometer tests.

The Administrator will choose a test procedure or procedures from various engine dynamometer durability test procedures used by research organizations in government, the oil industry, engine manufacturing companies, and independent laboratories.

§ 610.62 Driveability tests.

Driveability assessment (at normal ambient temperatures) of the baseline configuration, of the adjusted configuration (if required by the Administrator), and of the fully retrofitted configuration may be conducted at zero device-miles for all vehicles included in the durability fleet, and at approximately zero device-miles at low ambient temperatures (0°F-20°F). Driveability evaluation procedures will be published by the Administrator at a later date.

§ 610.63 Performance tests.

The effect of a device on a vehicle's performance will be determined by performing wide-open-throttle 0 to 60 mph acceleration tests (at normal ambient temperatures) on the baseline vehicle configuration, on the adjusted configuration (if required), and on the fully retrofitted configuration. Tests will be conducted on a dry, level, smooth-surfaced test track, with appropriate speed-time measuring equipment, on as many vehicles as determined to be necessary.

§ 610.64 Track test procedures.

(a) Cases may arise where it will be necessary to evaluate the fuel economy effects of a retrofit device on a test track, because the effect of the device cannot be adequately tested using the chassis dynamometer procedures. (An obvious example is a device that changes the aerodynamic drag of the test vehicle.) In such cases, testing will be performed on a dry, level, smooth-surfaced test track of such dimensions that the speeds required by the '75 FTP and the HFET may be safely achieved.

(1) Because aerodynamic drag is not a linear function of velocity, it will be necessary to limit testing to times when the magnitude of the wind velocity is less than 5 mph, with gusts less than 10 mpg.

(2) Testing will also be limited to ambient temperatures between 60° and 90°F, and to times when the ambient temperature remains reasonably constant during individual tests. Temperature differences between tests of baseline and retrofit configurations will also be minimized.

(3) Exhaust emissions will not be measured during track testing.

(4) Fuel economy of a vehicle running on a track will be measured using either a volumetric or gravimetric procedure.

(5) Vehicle speed and distance will be measured with a "fifth wheel" type of device. Suitable apparatus will be used to generate a permanent record (strip chart recorder, etc.) of the vehicle speed versus time.

(b) *1975 Federal Test Procedure.* Although essentially the same procedures will be used for track testing as for dynamometer testing, some modifications will be necessary to insure safe operation of the test vehicle and to adjust to the requirements of track testing.

(1) An assistant to the driver will be necessary to steer the vehicle, so that the driver will not be distracted from following the speed-time schedules used with the '75 FTP and the HFET.

(2) The test vehicle will be preconditioned within the same time constraints given in § 610.43(a)(1)(ii). Preconditioning may take place either on the track or in a dynamometer. The 12-hour soak after preconditioning will take place in an area where the ambient temperature will remain within the 60° to 90°F range, indoors, if necessary.

(3) The vehicle will be transported to the test track without being started. If the distance from soak area to track is no greater than one-quarter mile, then the vehicle may be pushed or towed to the track. Otherwise the vehicle must be transported by truck or trailer.

(4) Fuel economy will be determined by either a gravimetric or volumetric method.

(c) *Highway fuel economy test.* The highway test will follow the '75 FTP in the same manner as in dynamometer tests (§ 610.43(b)). Fuel economy will be measured by gravimetric or volumetric methods.

(d) *Steady state tests.* Steady state tests on the track will be run in the same manner as on the dynamometer except that fuel economy will be measured by gravimetric or volumetric methods.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Ex Parte No. 252 (Sub-No. 1)]

PART 1036—INCENTIVE PER DIEM CHARGES ON BOXCARS

Use of Funds on Boxcars

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: Upon consideration of the petitions for reconsideration and replies filed in response to the Commission's order of January 21, 1977, at 353 ICC 336, the regulations governing the use of funds on boxcars were amended to provide carriers the alternative of a single 1964–68 test period average for all types of boxcar transactions, a matching requirement, or the previous separate test period averages, and to allow carriers to draw down incentive per diem funds for purchasing, leasing and nonequity leasing of rebuilt as well as new boxcars.

EFFECTIVE DATE: August 8, 1977.

FOR FURTHER INFORMATION:

Deputy Director Rosenak or Assistant Deputy Director Gobetz, Section of Rates, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, 202-275-7693.

SUPPLEMENTARY INFORMATION: The spending prerequisites were further modified in this report to balance important objectives. On the one hand, as the Commission stated in its prior report, "without some restrictions on the drawing down of incentive funds, carriers simply use these funds to purchase their normal car replacements and thus merely maintain the status quo within the Nation's car fleet." 353 ICC at 343. On the other hand, the Commission was mindful that "(t)he purpose of incentive per diem is to acquire boxcars and the accumulation of incentive funds in no way accomplishes this purpose." 349 ICC at 318. To this end, the Commission has endeavored to introduce flexibility in the prerequisites for drawing down incentive funds. For these reasons 49 CFR 1036.4 is amended as set forth below.

By the Commission. (Commissioner Murphy dissented in part and Commissioners Hardin and Gresham did not participate.)

H. G. HOMME, Jr.,
Acting Secretary.

§ 1036.4 Use of funds on boxcars.

(a) The net credit balances resulting from incentive per diem settlements on boxcars, which are earmarked in accordance with § 1036.3, may be drawn down in whole or in part at any time by the carrier to build, lease equivalent of purchase, or purchase, in whole or in part, new or rebuilt unequipped boxcars for general service described in § 1036.1: *Provided,* The carrier has in the same calendar year built, leased, or purchased its 1964–68 average acquisitions of such boxcars and made up any arrearage in having failed to maintain such average each year this order is in effect. Earmarked funds may also be used in whole or in part to lease any number of new or rebuilt unequipped boxcars for general use described in § 1036.1 in which the carrier is not acquiring an equity interest: *Provided,* The carrier has in the same calendar year leased its 1964–68 average number of such boxcars and made up any arrearage in having failed to maintain such an average each year the order is in effect. Earmarked funds may be used in whole or in part to rebuild any number or portion of general service, unequipped boxcars described in § 1036.1: *Provided,* The carrier has in the same calendar year rebuilt its 1964–68 average number of such boxcars and made up any arrearage in having failed to maintain such average each year the order is in effect.

(b) As an alternative, the net credit balances resulting from incentive per diem settlements on boxcars, which are earmarked in accordance with § 1036.3, may be drawn down in whole or in part at any time by the carrier to build, lease equivalent of purchase, purchase, or lease in which a carrier is not acquiring an equity interest, in whole or in part, new or rebuilt unequipped boxcars for general service described in § 1036.1, or rebuild any number or portion of unequipped boxcars for general service described in § 1036.1: *Provided,* The carrier has in the same calendar year built, leased, purchased, nonequity leased, or rebuilt its 1964–68 average number of such boxcars and made up any arrearage in having failed to maintain such average each year this order is in effect. A carrier may, as another alternative, draw down earmarked funds in whole or in part, to build, lease, purchase, or nonequity lease new or rebuilt unequipped boxcars for general service or rebuild unequipped boxcars for general service provided, as a minimum, it matches the earmarked funds it will use to obtain these boxcars with an equal amount of its own funds. To facilitate the change to the aggregate test period from the previous three separate test periods, the effective date of the aggregate test period is August 8, 1977 and on that date all previous test period arrearages will be eliminated for the aggregate test period.

(c) Nonequity leases for unequipped boxcars for general service and XF boxcars must be at least 10 years in duration and, in connection with such leases, earmarked funds must not be used for the cost of maintenance nor on leases entered into prior to January 1, 1975.

(d) Net balances on Canadian-owned cars may be drawn down without regard to prior acquisitions, but where the designee is a class I United States carrier such drawdowns shall not affect that carrier's accumulation of arrearages.

(e) A carrier using earmarked funds, in whole or in part, to build, rebuild, lease, purchase or nonequity lease general service, unequipped boxcars of the XF designation, shall be required, as a minimum, to match the earmarked funds it will use to obtain these XF boxcars with an equal amount of its own funds.

(f) All earmarked funds that have accrued since the inception of the incentive per diem program must be put to use within 18 months after the end of the calendar year in which the funds are collected and result in a net credit balance for the building, rebuilding, leasing, purchasing, or nonequity leasing of general service, unequipped boxcars described in § 1036.1 for addition to such carrier's or designee's fleet in accordance with this part. Upon a showing of good cause an application, including a showing that the parties to the proceeding herein have been notified by the carrier of such application, may be made to the Commission for waiver of the said 18-month period, which may, in the Commission's discretion, be granted after consideration of all views regarding the application. If the earmarked funds are not used within the 18-month period, they may be voluntarily surrendered to Rail Box whose establishment and operation was approved in *American Rail Box Car Co.—Pooling,* 347 ICC 862. If the carrier fails within the stated period to put to use collected earmarked funds which result in a net credit balance, has not obtained relief from that requirement, and has not surrendered such funds to Rail Box, the Commission will investigate the matter to determine what, if any, corrective action is warranted. Appropriate corrective action would include section 16(12) remedies among others.

(g) Carriers may make temporary investment of unexpended funds in Government bonds or other liquid securities. Such securities must be readily convertible to cash so that funds remain available for boxcar purchases. Interest earned must become part of the earmarked fund.

(h) As used in this section, "build," "rebuild," "lease," or "purchase" refer to a commitment to build, rebuild, lease, or purchase which results in the acquisition of a car on line ready for use within 10 months from the date of commitment, except that in extraordinary cases beyond the control of the carrier or the car supplier, a car that is delivered after 10 months from the date of commitment may qualify if approved by the Bureau of Accounts of this Commission.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of White River National Wildlife Refuge, Arkansas, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of White River National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

EFFECTIVE DATES: Gun hunt—October 1–20; archery (turkey)—October 11–30, 1977.

FOR FURTHER INFORMATION CONTACT:

Raymond R. McMaster, Refuge Manager, P.O. Box 308, DeWitt, Arkansas 72042. Telephone 501-946-1468.

SUPPLEMENTAL INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Hunting is permitted on the White River National Wildlife Refuge, Arkansas, only on the areas designated by signs as being open to hunting. These areas comprising 100,000 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive NE., Atlanta, Georgia 30329. Hunting shall be in accordance with all applicable state regulations subject to the following conditions:

1. Species permitted to be taken: Squirrel, rabbit and beaver by gun; and one turkey of either sex by archery.

2. Weapons (a) Gun—Shotguns and .22 caliber rimfire rifles are permitted, and (b) long bows only.

3. Permit required.

4. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

5. All hunters must exhibit their hunting licenses, game, and vehicle contents to Federal and State Officers upon request.

6. Loaded guns are not permitted in vehicles, boats, or in camp.

7. Big Island will be closed to archery hunting October 27, 28, 29 due to conflict with muzzle loaders hunt.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE: The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 3, 1977.

KENNETH E. BLACK,
Regional Director.

[FR Doc 77-230 .. Filed 8-9-77 8:45 am]

PART 32—HUNTING

Opening of Catahoula National Wildlife Refuge, Louisiana, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to upland game hunting of Catahoula National Wildlife Refuge is compatible with the objectives for which the area was established will utilize a renewable natural resource, and will provide recreational opportunity to the public.

EFFECTIVE DATES: October 1, 1977 through October 16, 1977.

FOR FURTHER INFORMATION CONTACT:

Stephen K. Joyner, Refuge Manager, Catahoula National Wildlife Refuge, P.O. Drawer LL, Jena Louisiana 71342, telephone: 318-992-5261.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Squirrel hunting is permitted on the Catahoula National Wildlife Refuge, Louisiana, only on the areas designated by signs as being open to hunting. These areas comprising 5,318 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive NE., Atlanta, Georgia 30329. Squirrel hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. A permit is required for hunting on the refuge. The permits are free and may be obtained at Refuge headquarters.

2. The season extends from October 1-16, 1977.

3. Hunters may enter the area 30 minutes prior to legal shooting time (30 minutes before sunrise) and must be out of the refuge 30 minutes after legal shooting hours (30 minutes after sunset).

4. Unmarked feral hogs may be taken.

5. No vehicles with tires larger than 9.00 x 16" can be used on the refuge. All vehicles must remain on established roads and trails.

6. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

7. Dogs are not permitted.

8. Firearms limited to shotguns and .22 caliber rimfire rifles.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 33. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 3, 1977.

KENNETH E. BLACK,
Regional Director.

[FR Doc.77 23098 Filed 8-9-77;8:45 am]

PART 32—HUNTING

Opening of Seedskadee National Wildlife Refuge, Wyoming, to Public Hunting of Sage Grouse

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to public hunting of Sage Grouse on Seedskadee National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

EFFECTIVE DATE: August 27, 1977, through September 5, 1977.

FOR FURTHER INFORMATION CONTACT:

H. J. Johnson, Refuge Manager, Seedskadee National Wildlife Refuge, Fontenelle Route, Via Kemmerer, Wyoming 83101, area code 307-877-6334.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Public hunting of Sage Grouse is permitted on Seedskadee National Wildlife Refuge, Wyoming, All of the refuge area, comprising 14,284 acres, and so designated by signs, is open to hunting. Maps of the area are available at the refuge office, Fontennelle Route, Via Kemmerer, Wyoming 83101 and from the office of the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, CO 80225. Hunting shall be in accordance with all applicable State regulations governing the hunting of Sage Grouse.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

H. J. JOHNSON,
Refuge Manager.

AUGUST 1, 1977.

[FR Doc.77-23108 Filed 8-9-77;8:45 am]

PART 32—HUNTING

Opening of Wheeler National Wildlife Refuge, Alabama, to the Hunting of Gray Squirrels, Rabbits, Raccoons and Opossums

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to upland game hunting of Wheeler National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity for the public.

EFFECTIVE DATE: October 15, 1977 through February 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Thomas Z. Atkeson, P.O. Box 1643, Decatur, Alabama 35602, 205-353-7243.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game hunting; for individual wildlife refuge areas.

Upland game hunting is permitted on the Wheeler National Wildlife Refuge, Alabama, only on the areas designated by signs as being open to hunting. These areas comprising approximately 19,000 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, 17 Executive Park Drive, N.E., Atlanta, Georgia 30329. Upland game hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Permits, issued without charge at refuge office, will be required.

2. Gray squirrels and rabbit—hunting allowed only on October 15, 17, 18 and 19, 1977. Allowable arms: shotguns, .22 rimfire rifles, pellet guns, bows and arrows. Only pellet guns, bows and arrows may be used in that area west of Interstate Highway 65 and north of State Highway 67 and west of Flint Creek, south of State Highway 67. No dog use allowed.

3. Raccoons and Opossums—hunting allowed only during the period February 13 through February 18, 1978. Allowable arms: Shotguns. Hunting hours 5:00 p.m. to 7:00 a.m. only. Dog use allowed.

4. Rabbits—hunting allowed only through the period February 21-February 25, 1978. Allowable arms: Shotguns, pellet guns, bows and arrows. Only pellet guns, bows and arrows will be allowed in that part of the open area west of Interstate Highway 65 and north of State Highway 67 and west of Flint Creek, south of State Highway 67. Hunting allowed only during the hours 8:00 a.m. to 5:00 p.m. Dog use allowed.

5. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

The provisions of this special regulations supplement the regulations which govern upland game hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 3, 1977.

KENNETH E. BLACK,
Regional Director.

[FR Doc.77-23102 Filed 8-9-77;8:45 am]

PART 32—HUNTING

Opening of St. Marks National Wildlife Refuge, Florida to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of St. Marks National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

EFFECTIVE DATE: As set for the Aucilla Wildlife Management Area by the State of Florida.

FOR FURTHER INFORMATION CONTACT:

Joe D. White, Refuge Manager, St. Marks National Wildlife Refuge, P.O. Box 68, St. Marks, Florida 32355, telephone 904-925-6280.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; hunting for individual wildlife refuge areas.

Hunting is permitted on the St. Marks National Wildlife Refuge, Florida, only on the areas designated by signs as being open to hunting. These areas comprising approximately 600 acres are delineated on maps of the Aucilla Wildlife Management Area available from the Florida Game and Fresh Water Fish Commission, Tallahassee, Florida 32304. Hunting shall be in accordance with all applicable State regulations.

The provisions of this special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 3, 1977.

KENNETH E. BLACK,
Regional Director.

PART 32—HUNTING

Opening of Wheeler National Wildlife Refuge, Alabama to the Mounted Hunting of Red and Gray Foxes

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to mounted hunting of red and gray foxes of Wheeler National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

EFFECTIVE DATES: October 1, 1977, through February 15, 1978, inclusive.

FOR FURTHER INFORMATION CONTACT:

Thomas Z. Atkeson, P.O. Box 1643, Decatur, Alabama 35602, 205-353-7243.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game hunting; for individual wildlife refuge areas.

Upland game hunting is permitted on the Wheeler National Wildlife Refuge, Alabama, only on the areas designated by signs as being open to hunting. These areas comprising approximately 7,000 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, 17 Executive Park Drive, N.E., Atlanta, Georgia 30329. Upland game hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Permits, Obtainable without charge from the refuge office, are required.

2. Hunting will take place only on those parts of the refuge lying between Limestone and Andian creeks, north of the Tennessee River.

3. No firearms of any type will be allowed on these hunts.

4. Dog and horse use will be allowed.

5. No fox hunting will take place during the period October 15-19, inclusive, while public squirrel hunting is in progress.

6. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proopsal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

KENNETH E. BLACK,
Regional Director.

Dated: August 3, 1977.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 211]

EXTENSION OF CRUDE OIL BUY/SELL PROGRAM CURRENT ALLOCATION QUARTER THROUGH SEPTEMBER 1977

AGENCY: Federal Energy Administration.

ACTION: Notice of proposed rulemaking and public hearing.

SUMMARY: The Federal Energy Administration (FEA) proposes to adopt a special rule that would extend the crude oil buy/sell program's June through August 1977 allocation quarter for the month of September 1977 as a transition between the current program and the proposed revised program. Under the proposed special rule, refiner-buyers that purchased their allocations in the current quarter would be permitted to purchase a pro-rata amount thereof in the month of September from the same refiner-sellers from which they purchased crude oil in the current quarter.

DATES: Comments by August 23, 1977, 4:30 p.m.; requests to speak by August 16, 1977, 4:30 p.m.; statements by August 22, 1977, 4:30 p.m.; hearing to be held on August 23, 1977, at 9:30 a.m. at the location set forth below, and will be continued if necessary at 9:30 a.m. on August 24, 1977.

ADDRESSES: Comments and requests to speak at the hearing to: Executive Communications, Room 3317, FEA, Box OK, Washington, D.C. 20461. Statements to Regulations Management, Room 2214 FEA, 2000 M Street, NW., Washington, D.C. 20461.

Hearing held at:

2000 M Street NW., Room 2105, Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Robert C. Gillette (Hearing Procedures), 2000 M Street NW., Room 2214B, Washington, D.C. 20461. 202–254–5201.

Ed Vilade (Media Relations), 12th and Pennsylvania Avenue NW., Room 3104, Washington, D.C. 20461. 202–566–9833.

Robert G. Bidwell, Jr. or William H. Gottfried (Program Office), 2000 M Street NW., Room 6128P, Washington, D.C. 20461. 202–254–9707.

Samuel M. Bradley or Jeffrey C. Conrad (Office of General Counsel) 12th and Pennsylvania Avenue NW., Room 5134, Washington, D.C. 20461. 202–566–9565 (Bradley); 202–566–2087 (Conrad).

SUPPLEMENTARY INFORMATION:

A. BACKGROUND.

On July 18, 1977, FEA issued a notice of proposed rulemaking and public hearing (42 FR 37406, July 21, 1977) to amend the Mandatory Petroleum Allocation Regulations to limit the scope of the crude oil buy/sell program set forth in which have a demonstrated necessity for 10 CFR 211.65 to those refiner-buyers allocations of crude oil based on lack of access to adequate supplies of domestic and foreign crude oil, to modify the pricing provision for sales of allocated crude oil to reflect more accurately the actual market value of crude oil sold under the buy/sell program, and to simplify the administration of the program.

The proposed revision of the buy/sell program also would extend the allocation period from a quarterly to a six-month period to simplify the administration of the program and to permit a greater degree of certainty for both refiner-buyers and refiner-sellers. The first six-month allocation period is proposed to commence October 1, 1977, and applications for participation in the revised program would be required to be submitted to FEA by August 31, 1977. In addition, the proposal provides that the buy/sell notice that specifies the quantities of allocated crude oil each refiner-buyer is eligible to purchase and each refiner-seller is required to sell would be published thirty (30) days prior to the start of each allocation period, rather than fifteen (15) days prior to the beginning of an allocation quarter as provided under the current regulations.

In the July 21, 1977 notice, FEA stated that it would propose an extension of the June through August 1977 allocation quarter for the month of September as a transition between the current program and the proposed revised program. FEA determined that it would be necessary to extend the current allocation quarter through September because there was not adequate time to implement a new program between the date of the hearing on the proposed revised program, August 9, 1977, and September 1, 1977, the start of a new allocation quarter under the present regulations. In addition, FEA did not consider it desirable to initiate a new allocation quarter under the present regulations, since it anticipated that a revised program could be ready for implementation on October 1, 1977. Accordingly, FEA proposes for public comment a Special Rule No. 9 in the Appendix to Subpart C of Part 211 which would suspend until further notioe the allocation quarter that would otherwice commence September 1, 1977 and would continue the allocations provided in the May 25, 1977 buy/sell notice on a pro-rata basis through the month of September 1977.

In the event FEA implements the revised program effective October 1, 1977 as proposed, processing of the applications for participation in the program could delay publication of the first buy/sell notice under the new program by several weeks. Accordingly, FEA requests comments on whether it would be desirable to extend the current allocation quarter for the months of September and October to permit the proposed thirty-day period between the publication of the first buy/sell notice and the first month of the new program. In addition, since refiners may enter into contracts in September for delivery of crude oil in October in contemplation of the extension of the current allocation quarter to the month of October, FEA requests comments on whether termination of the special rule on September 30 would unduly complicate transactions between refiner-buyers and refiner-sellers.

FEA recognizes the difficulties inherent in extending a refiner's buy/sell position for the current allocation quarter on a pro-rata basis for the month of September 1977. However, FEA believes that the difficulties associated with initiating the new allocation quarter under the present regulations and then terminating it at the end of September are even greater.

B. PROPOSED SPECIAL RULE NO. 9

Special Rule No. 9 would provide that refiner-sellers and refiner-buyers during the June through August allocation quarter would continue in such capacities for September 1977. Refiner-buyers that entered into contracts prior to August 1, 1977 pursuant to the May 25, 1977 buy/sell notice (42 FR 26694) would have the option of continuing those seller/buyer relationships on a pro-rata basis during September 1977. A refiner-seller would be required to offer for sale in September to such a refiner-buyer a volume of crude oil equal to 30/92 of the total volume of crude oil purchased by that refiner-buyer from that refiner-seller.

Special Rule No. 9 provides dates by which contracts for the sale of crude oil pursuant to Special Rule No. 9 would have to be executed.

Since the proposed special rule provides that refiner-buyers' purchase opportunities in the month of September would be limited to a pro-rata amount of their actual purchases rather than their allocation in the current allocation quarter, refiner-buyers that did not purchase any allocated crude oil in the current allocation quarter would not be eligible to purchase any crude oil in September. At the same time, refiner-sellers that did not make any sales in the current allocation quarter would be relieved of sales obligations in September. FEA specifically requests comments on whether refiner-buyers that made no purchases or purchased less than their total allocation in the current quarter should be eligible to purchase a pro-rata amount of their unpurchased allocation in the month of September and whether refiner-sellers that made no sales or sold less than their total obligations in the current allocation quarter should be required to sell a pro-rata amount of such unsold obligations in September.

C. WRITTEN COMMENT AND PUBLIC HEARING PROCEDURES

A public hearing on the subject matter of this notice will be held beginning at 9:30 a.m., e.s.t., on August 23, 1977, in Room 2105, 2000 M Street, N.W., Washington, D.C., to receive comments from interested persons

Any person who has an interest in the subject matter of this notice, or who is a representative of a group or class of persons which has such an interest, may make a written request for an opportunity to make oral presentation. Requests to testify at the public hearing should be directed to Executive Communications, FEA, 1200 Pennsylvania Avenue NW., Washington, D.C. 20461, and must be received before 4:30 p.m., e.s.t., August 16, 1977. Such requests may be handdelivered to Room 3309, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., e.s.t., Monday through Friday. Persons submitting such requests should be prepared to describe the interest concerned; if appropriate, to state why he or she is a proper representative of a group or class of persons which has such an interest; and to give a concise summary of the proposed oral presentation and a phone number where he or she may be reached through August 22, 1977. Persons selected to be heard at the public hearing will be notified by FEA before 5:30 p.m., e.s.t., August 18, 1977, and must submit 50 copies of his or her statement to Regulatory Programs, FEA, Room 2214, 2000 M Street NW., Washington, D.C., before 5:30 p.m., e.s.t., August 22, 1977.

FEA reserves the right to select the persons to be heard at the hearing, to schedule their respective presentations and to establish the procedures governing the conduct of the hearing. Each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. It will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations. .

Any interested person may submit questions, to be asked of any person making a statement at the hearing, to Executive Communications, FEA, before 4:30 p.m., e.s.t., August 22, 1977.

Any person who makes an oral statement and who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. FEA or the presiding officer, if the question is submitted at the hearing, will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be anounced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by FEA and made available for public inspection at the FEA, Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Interested persons are invited to submit data, views, or arguments with respect to this proposal to Executive Communications, Federal Energy Administration, Box OK, Washington, D.C. 20461. Comments should be identified on the outside envelope and on documents submitted to Executive Communications, FEA, with the designation "Special Rule No. 9." Fifteen copies should be submitted. All comments received by 4:30 p.m., e.s.t., August 23, 1977, and all relevant information, will be considered by FEA.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing in accordance with the procedures stated in 10 CFR 205.9(f). FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

As required by section 7(c)(2) of the Federal Energy Administration Act of 1974, Pub. L. 93–275, a copy of this proposal has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator had no comments.

NOTE—In accordance with Executive Order 11821 and OMB Circular A-107, FEA is considering the inflationary impact of this proposal.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93–159, as amended, Pub. L. 93–511, Pub. L. 94–99, Pub. L. 94–133, Pub. L. 94–163, and Pub. L. 94–385; Federal Energy Administration Act of 1974, Pub. L. 93–275, as amended, Pub. L. 94–332 and Pub. L. 94–385; Energy Policy and Conservation Act, Pub. L. 94–163, as amended, Pub. L. 94–385; E.O. 11790, 39 FR 23185; E.O. 11933, 41 FR 36641.)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is proposed to be amended as set forth below.

Issued in Washington, D.C., August 8, 1977.

ERIC J. FYGI,
Acting General Counsel.

Subpart C of 10 CFR Part 211 is amended by adding a Special Rule No. 9 to the Appendix thereof to read as follows:

SPECIAL RULE NO. 9

1. *Scope.* This special rule applies to all refiners which were refiner-buyers and refiner-sellers during the crude oil allocation quarter under the buy sell program commencing June 1, 1977.

2. *Purpose.* Notwithstanding the provisions of § 211.65, this special rule suspends the crude oil allocation quarter which would otherwise commence September 1, 1977, and establishes a new rule for the allocation of crude oil during the month of September 1977.

3. *Special allocation rule for September 1977.* For the month of September 1977 the allocation of crude oil among refiners shall be made as follows:

(a) Each refiner-seller and refiner-buyer as determined for the crude oil sales period commencing June 1, 1977, shall continue in such capacity in September 1977.

(b) Each refiner-seller shall sell in the month of September 1977 to each refiner-buyer to which sales of crude oil were made by the refiner-seller pursuant to the allocation quarter commencing June 1, 1977, including sales directed by FEA pursuant to 10 CFR 211.65(h), a volume of crude oil equal to 30 92 of the total volume of crude oil sold to that refiner-buyer by that refiner-seller. Refiner-buyers shall have the option of exercising their respective purchase opportunities authorized under this paragraph.

(c) Prior to September 1, 1977, each refiner-seller shall notify each refiner-buyer of the volume of crude oil to be sold to such refiner-buyer by the refiner-seller pursuant to paragraph (b) of this rule

(d) Prior to September 7, 1977, refiner-sellers and refiner-buyers shall enter into sales contracts for the delivery and purchase of crude oil pursuant to paragraph (b) of this rule.

(e) For purposes of adjusting refiner-sellers' sales obligations for allocation periods subsequent to September 30, 1977, FEA will calculate a total primary sales obligation for the month of September 1977 based on 30 92 of the total primary sales obligation in the allocation quarter commencing June 1, 1977. Each refiner-seller's imputed sales obligations for the month of September 1977 will be calculated according to the procedures provided in § 211.65(d), and refiner-sellers' unsold primary obligations from the allocation quarter commencing June 1, 1977 and the September 1977 allocation period will be carried forward to the allocation period commencing October 1, 1977.

(f) The provisions of § 211.65 (f) and (g) and § 212.94 are applicable to all sales made pursuant to this rule.

(g) The provisions of Subpart C of Part 211 (including but not limited to the procedures and reporting requirements of § 211.66) shall remain in full force and effect except as expressly modified by the provisions of this rule.

(h) FEA will not entertain applications for allocations of crude oil for future refining capacity submitted pursuant to § 211.65(b) for the month of September 1977.

CIVIL AERONAUTICS BOARD

[14 CFR Part 378]

[EDR-328A; SPDR-58A; PSDR-48A; Docket No. 30667; Dated August 5, 1977]

PRICE ADVERTISING OF AIR TRANSPORTATION

Supplemental Advance Notice of Proposed Rulemaking

AGENCY: Civil Aeronautics Board.

ACTION: Supplemental advance notice of proposed rulemaking.

SUMMARY: This supplemental advance notice extends the time for filing comments and reply comments on the Board's advance notice of proposed rulemaking concerning the price advertising of air transportation, especially charters. The action is taken on the Board's initiative.

DATES: Comments by August 25, 1977. Reply comments by September 15, 1977.

ADDRESSES: Comments should be sent to Docket 30667, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. Docket comments may be examined at the Docket Section, Civil Aeronautics Board, Room 711, Universal Building, 1825 Connecticut Avenue NW., Washington, D.C., as soon as they are received.

FOR FURTHER INFORMATION CONTACT:

Simon J. Eilenberg, Rules Division, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202-673-5442).

SUPPLEMENTARY INFORMATION: By EDR-328/SPDR-58/PSDR-48, June 9, 1977, 42 FR 30376, June 14, 1977, the Board—in response to various petitions and inquiries—initiated review of its regulations and policies concerning price advertising of air transportation. In view of the broad scope of the rulemaking, the Board desired the widest possible participation. It invited comments by the industry, consumer organizations, and the general public. It also specifically sought the advice of the Office of Consumer Affairs of the Department of Health, Education and Welfare and the Federal Trade Commission, agencies particularly concerned with consumer protection and advertising, and of the Internal Revenue Service, whose governing statute contains specific provisions about inclusion of taxes in the advertised price of air transportation.

As of today, we have received no comment from any of the specified agencies, and it appears that they were for various reasons unaware of, or unable to comply with, the July 25 filing date. However, we have ascertained that they all desire to participate and expect to be able to file comments by August 25, 1977. It may be that other persons or organizations interested in filing comments are in the same position. An additional time period will thus permit the wider participation and advice which the Board desires, without prejudicing any party.

Upon consideration of the foregoing, the undersigned finds that there is good cause to grant a reasonable extension of time. Requests for additional extensions of time will not be granted, however, barring extraordinary and unforeseeable developments.

Accordingly, pursuant to authority delegated in § 385.20(d) of the Board's Organization Regulations (14 CFR 385..20(d)), the time for filing comments is extended to August 25, 1977, and the time for reply comments is extended to September 15, 1977.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743 (49 U.S.C. 1324).)

SIMON J. EILENBERG,
Associate General Counsel,
Rules Division.

DEPARTMENT OF COMMERCE

Patent and Trademark Office

[37 CFR Parts 2 and 4]

TRADEMARK APPLICATIONS UNDER SECTION 44 OF THE TRADEMARK ACT OF 1946

Proposed Rulemaking

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Proposed rulemaking.

SUMMARY: This notice invites written comment on a Patent and Trademark Office proposal to amend the rules of practice and forms for trademark cases filed under section 44 of the Trademark Act of 1946. The proposed changes are being made because of the decision by the Court of Appeals for the District of Columbia Circuit in *SMC Corporation* v. *Langis Foods Ltd.*, 539 F. 2d 196, USPQ 288 (1976). The effect of the proposed amendments is to eliminate the requirement for an allegation of use of the mark and the submission of specimens showing use of the mark in the case of applications for trademark registration which are based on a foreign application or registration. The proposed changes would require the applicant to submit a certified copy of his foreign application if he is claiming a right of priority based on that foreign application. Furthermore, the identification of goods and services may only include goods or services on which the applicant is using the mark, or has a bona fide intention to use the mark.

DATES: Comments must be received on or before November 1, 1977. Requests to speak at the hearing by October 17, 1977. Hearing date October 26, 1977. 9:30 a.m., e.d.t.

ADDRESSES: Comments may be addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231. All comments received will be available for public inspection in Room 11E10, Crystal Plaza, Building 3, 2021 Jefferson Davis Highway, Arlington, Va.

HEARING LOCATION

Room 11C24, Crystal Plaza, Building 3, 2021 Jefferson Davis Highway, Arlington, Va. 22202.

FOR FURTHER INFORMATION CONTACT:

C. Morten Wendt, Patent and Trademark Office (703-557-3268).

SUPPLEMENTARY INFORMATION: On April 30, 1974, at 921 O.G. TM 250, notice was published that trademark applications filed under section 44 of the Act of 1946 without specimens and without a statement of use would receive a filing date conditional upon the ultimate decision in the civil action which was brought to review the decision of the Trademark Trial and Appeal Board in *John Lecroy & Son, Inc.* v. *Langis Foods Limited*, 177 USPQ 717 (1973).

The civil action was finally determined by the Court of Appeals for the District of Columbia Circuit sub nom. *SCM Corporation* v. *Langis Foods Ltd.*, 539 F. 2d 196, 190 USPQ 288 (1976). The court stated that the issue of whether an applicant filing an application under the provisions of section 44(d) of the Trademark Act need allege use of the mark was not presented to the District Court or to the Court of Appeals in the case it decided. Therefore, the issue of whether an applicant filing in application under the provisions of section 44 of the Trademark Act need allege use of the mark somewhere and submit specimens to show such use remains for determination.

The last ruling by the Patent and Trademark Office was *John Lecroy & Son, Inc.* v. *Langis Foods Ltd.*, 117 USPQ 717 (TTAB 1973) in which the Board stated "There is nothing in the Act authorizing the Patent Office to require of a foreign applicant under section 44(d) use of his mark prior to the filing of his application in his home country * * *," page 719. The Board expressly overruled *In re Certain Incomplete Trademark Applications* 137 USPQ 69 (Comr. Pats. 1963), which held that an allegation of use of the mark somewhere and specimens were required. This reversed the ruling of *Ex parte Society Fromagerics Bel*, 105 USPQ 392 (Comr. Pats. 1955), which had reversed the ruling of *Ex parte British Insulated Callender's Cables Ltd.*, 83 USPQ 319 (Comr. Pats. 1949).

The Court of Appeals in *SCM Corporation* v. *Langis Foods Ltd., supra*, held that under section 44(d) of the Trademark Act a foreign applicant obtained a constructive use date in the United States as of the filing date of the first application in a convention country.

In light of that decision, it is proposed that the Commissioner rescind the policy set forth in *In re Certain Incomplete Trademark Applications, supra*, to reflect the concept that a filing in a foreign country creates a constructive use of the trademark in the United States sufficient for filing an application under section 44(d) of the Trademark Act. Likewise, a foreign registration would be construed to be constructive use for the purpose of filing an application under section 44(e) of the Act. Accordingly, an application filed under section 44 need not allege use of the mark or be accompanied by specimens. However, the applicant filing under section 44(d) would be required to submit a certified copy of the application which is the basis of a priority claim and the applicant filing under section 44(e) must still submit a certification or certified copy of the registration in the country of origin of applicant.

The Lisbon revision of Article 4A of the Paris Convention, ratified by the United States on January 4, 1962, provides that a regular national filing in any Convention country shall give rise to a right of priority, whatever may be the subsequent fate of that application. Thus a foreign applicant may file in the United States, claiming priority under section 44(d) but relying on use in commerce rather than a registration under section 44(e).

Notice is hereby given that pursuant to the authority contained in section 41 of the Act of July 5, 1946 (60 Stat. 440, 15 U.S.C. 1123) and section 6 of the Act of July 19, 1952, as amended (85 Stat. 364, 88 Stat. 1949, 35 U.S.C. 6 as amended), the Patent and Trademark Office proposes to amend Title 37 of the Code of Federal Regulations by amending §§ 221.21, 2.39, 2.56, 4.1 and 4.7.

It is proposed to revise and amend the sections as follows (additions are indicated by arrows; deletions are bracketed):

PART 2—RULES OF PRACTICE IN TRADEMARK CASES

1. By amending § 2.21(a) to read as follows:

§ 2.21 Requirements for receiving a filing date.

(a) Materials submitted as an application for registration of a mark will not be accorded a filing date as an application until all of the following elements are received:

* * * * *

(5) At least one specimen or facsimile of the mark as actually used ►, except that a specimen or facsimile is not required when § 2.39 is applicable◄;

* * * * *

2. By revising paragraphs (a) and (b) and by the addition of new paragraphs (c) and (d) to § 2.39 to read as follows:

§ 2.39 Omission of ►allegations◄ [allegation] of use [in commerce] by foreign applicants.

(a) The ►allegations◄ [allegation] that the mark is in use in commerce ►and that the specimens or facsimiles show the mark as actually used in connection with the goods◄, required by § 2.33(b), and the statements of the dates of applicant's first use ►and that the applicant has adopted and is using the mark shown in the accompanying drawing◄, required by § 2.33(a) (1) ►(iv), ◄ (vii), and (viii), may be omitted in the case of an application filed pursuant to section 44(e) of the act for registration of a mark duly registered in the country of origin of a foreign applicant, provided the application when filed is accompanied by a ►certification or certified copy issued by◄ [certificate of] the trademark office of the [foreign] country ►of origin of applicant◄ showing that the mark has been registered in [the] ►that◄ country [of origin of the applicant] and also showing the mark, the goods for which registered and that said registration is then in full force and effect. If the ►certification or certified copy◄ [certificate] is not in the English language, a translation is required.

(b) Such allegations and statements may also be omitted in the case of an application claiming the benefit of a prior foreign application in accordance with section 44(d) of the act. The application in such case shall state the date and country of the first foreign application [and,] ►. A certification or certified copy issued by the trademark office of the country where the first foreign application was filed shall accompany the application or be submitted within such time as is specified by the office. The certification or certified copy shall show the mark, the goods for which the first foreign application was filed, and the date of filing thereof. If the certification or certified copy is not in the English language, a translation is required. Before◄ [before] the application can be considered as allowable ►in the absence of an allegation of use in commerce◄, there must be filed a ►certification or certified copy issued by◄ [certificate of] the trademark office of the [foreign] country ►of origin of applicant◄ showing that the mark has been registered in [the] ►that◄ country [of origin of the applicant] and also showing the mark, the goods for which registered and the date of ►issue of the registration. If the certification or certified copy is not in the English language, a translation is required.◄ [filing of the application. In such cases the specification of goods shall not exceed the scope of that covered by the foreign registration or application.] In the event the application is based upon a subsequent regularly filed application in the same foreign country the application must so state and must show that any prior filed application has been withdrawn, abandoned or otherwise disposed of, without having been laid open to public inspection and without having any rights outstanding, and has not served as a basis for claiming a right of priority.

►(c) The foreign application or the foreign registration, which is the basis of a claim to registration under section 44(d) or 44(e) of the act, shall be deemed to be constructive use of the mark for the purpose of filing an application under the act.◄

►(d) The specification of goods identified in an application filed under section 44(d) or 44(e) of the act shall not exceed the scope of that covered by the foreign application or registration, and, furthermore, such identification of goods in the application under the act shall include only those goods on or in association with which the applicant is actually using the mark or has a bona fide intention to use the mark on the filing date of the application under the act.◄

3. By revising § 2.56 to read as follows:

§ 2.56 Specimens.

The application must include five specimens of the trademark as actually used on or in connection with the goods in commerce. The specimens shall be duplicates of the actually used labels, tags, or containers, or the displays associated therewith or portions thereof, when made of suitable flat material and of a size not to exceed 8½ inches (21.6 cm.) wide and 13 inches (33.0 cm.) long. ►Specimens are not required when § 2.39 is applicable, but if commercial specimens are available, the applicant is encouraged to submit such specimens.◄

PART 4—FORMS FOR TRADEMARK CASES

f. By amending the "Notes" following § 4.1 by renumbering paragraph (2) as (2)(b), paragraph (3) as (3)(b), and paragraph (5) as (5)(b) and adding subparagraphs (2)(a), 3(a), and 5(a) to read as follows:

NOTES.—[Amended]

* * * * *

►(2)(a) A foreign applicant relying upon section 44(d) or 44(e) of the act shall specify only those goods which are comprehended within the identification of goods of the foreign application or registration upon which he relies and on which, on the filing date of the application, he is actually using the mark or has a bona fide intention to use the mark.◄

* * * * *

►(3)(a) A foreign applicant relying upon section 44(d) or 44(e) of the act may omit the allegations of the date of first use of the mark, the date of first use of the mark in commerce and that the mark is now in use in such commerce.◄

* * * * *

►(5)(a) A foreign applicant relying upon section 44(d) or 44(e) of the act who does not allege use of the mark may omit specimens and an allegation that specimens showing the mark as actually used are presented with the application, but if commercial specimens are available, the applicant is encouraged to submit such specimens.◄

* * * * *

5. By amending the "Notes" following § 4.7 by renumbering paragraph (12) as (12)(a) and adding subparagraph (b) to read as follows:

NOTES.—[Amended]

* * * * *

►(12)(b) A foreign applicant relying upon section 44(d) or 44(e) of the act who does not allege use of the mark may omit specimens and an allegation that specimens showing the mark as actually used are presented with the application, but if commercial spec-

imens are available, the applicant is encouraged to submit such specimens.◀

Dated: July 22, 1977.

C. MARSHALL DANN,
Commissioner of Patents and Trademarks.

Approved: August 3, 1977.

HOWARD I. FORMAN,
Acting Assistant Secretary for Science and Technology.

VETERANS ADMINISTRATION

[38 CFR Part 8]

SERVICE DISABLED VETERANS INSURANCE

Application on Behalf of Incompetent Veteran

AGENCY: Veterans Administration.

ACTION: Proposed regulation.

SUMMARY: The proposed amendment will revoke the present portion of the regulation which allows a third party, other than a guardian, to apply on behalf of a mentally incomptent veteran for Service Disabled Veterans Insurance. It has been determined that the present regulation exceeds the scope of the enabling statute and the intended effect of this action is to bring the regulation within the prescribed limits.

DATE: Comments must be received on or before September 9, 1977. It is proposed to make this amendment effective the date of final approval.

ADDRESS: Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Ave. NW., Washington, D.C. 20420.

Comments will be available for inspection at the address shown above during normal business hours until September 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Murray J. Zuckerman, Veterans Administration Center (290B), P.O. Box 8079, Philadelphia, Pa. 19101, 215-951-5733.

SUPPLEMENTARY INFORMATION: It has been determined that the amendment to section 722(a) and the enactment of section 722(b), Title 38, United States Code, prior to the amendment to the portion of § 8.0(b)(2) which is now being revoked had adequately corrected inequities in this area.

ADDITIONAL COMMENT INFORMATION

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays), until September 19, 1977. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

NOTE.—The Veterans Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 as amended by Executive Order 11949 and OMB Circular A-107.

Approved: August 2, 1977.

MAX CLELAND,
Administrator.

In § 8.0, paragraph (b)(2) is revised to read as follows:

§ 8.0 Eligibility.

* * * * * * *

(b) * * *

(2) An application for insurance under this paragraph should be made on the form prescribed therefor, but any written statement which in substance meets the requirements of this paragraph may be considered an application. If the applicant is mentally incompetent, the application may be made by a guardian, and, if required under the State law, after the court shall have authorized the fiduciary to make such application.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 61]

[FRL 775-2]

VINYL CHLORIDE

National Emission Standards for Hazardous Air Pollutants; Extension of Comment Period

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The deadline for submittal of comments on the amendments to the vinyl chloride standard which were proposed on June 2, 1977 (42 FR 28154), is being delayed from August 1, 1977, to August 19, 1977. The Society of Plastics Industry, Inc., because of the time required to make the proceedings from the public hearing available, has asked that the deadline for comments be delayed so that they will have ample opportunity to review the proceedings.

DATE: Comments must be received on or before August 19, 1977.

ADDRESS: Comments should be submitted (preferably in triplicate) to the Emission Standards and Engineering Division (MD-13), Environmental Protection Agency, Research Triangle Park, N.C. 27711, attention: Mr. Don R. Goodwin.

All public comments received may be inspected and copies at the Public Information Reference Unit (EPA Library), Room 2922, 401 M Street SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Don R. Goodwin, Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, N.C. 27711, telephone 919-541-5271.

SUPPLEMENTARY INFORMATION: On June 2, 1977 (42 FR 28154), the Environmental Protection Agency proposed amendments to the vinyl chloride standard which was promulgated under the authority of section 112 of the Clean Air Act on October 21, 1976 (42 FR 46561). The notice of proposal requested public comments on the amendments by August 1, 1977.

On July 19, 1977, a public hearing on the proposal was held in Washington, D.C. The proceedings were made available to the Agency on July 28, 1977. Additional time was required to make copies of the proceedings and distribute them to interested parties. The Agency believes that an extension of the comment period through August 19, 1977, is justifiable.

Dated: August 2, 1977.

EDWARD F. TURK,
Acting Assistant Administrator for Air and Waste Management.

FEDERAL MARITIME COMMISSION

[46 CFR Part 502]

[Docket No. 77-40]

RULES OF PRACTICE AND PROCEDURE; SUBPENAS AND DISCOVERY REQUESTS DIRECTED TO COMMISSION STAFF PERSONNEL; REPLIES TO APPEALS

Proposed Rulemaking

AGENCY: Federal Maritime Commission.

ACTION: Proposed rule changes.

SUMMARY: The Federal Maritime Commission proposes to amend its rules of practice and procedure to require that service of subpenas and discovery requests or motions directed against Commission staff personnel be served on the Secretary of the Commission; to authorize the General Counsel to appoint an attorney to represent Commission staff personnel who are involved; to permit rulings of the presiding officer to be appealed and to be reviewed by the Commission absent appeal in such matters; and to permit parties to file replies to appeals generally. The amendments are necessary because the present rules governing subpena and discovery procedures are inconsistent and unclear and do not give the Commission an opportunity to rule upon matters affecting disclosure of is own records. Furthermore, the present rule governing appeals to the Commission does not provide for replies to such appeals. The effect of the proposed rule changes will be to conform subpena and discovery procedures as regards service and legal representation, to involve the Commission in any decision concerning disclosure of agency records or the giving of testimony by Commission staff personnel, and to facilitate decisions in the matter of appeals to the Commission.

DATES: Comments on or before: September 9, 1977.

ADDRESSES: Comments to: Secretary, Federal Maritime Commission, Washington, D.C. 20573.

FOR FURTHER INFORMATION CONTACT:

Joseph C. Polking, Acting Secretary, Room 11101, 1100 L Street NW., Washington, D.C. 20573 (202-523-5725).

SUPPLEMENTARY INFORMATION: The present rule governing service of subpenas directed to Commission employees does not conform to the analogous situation involving the use of discovery procedures directed to Commission staff personnel. Thus, Rule 135, 46 CFR Part 502.135, concerning subpenas, provides that such subpenas shall be served on the General Counsel and refers to Commission "employees." However, Rule 209, 46 CFR 502.209, concerning the use of discovery procedures, refers to Commission "staff personnel" and is unclear upon whom the various discovery requests or motions are to be served, except for notices to take depositions and for written interrogatories, both of which are to be served on the Secretary of the Commission. Neither of these rules, furthermore, provides for Commission staff personnel to have legal representation if they become involved in such matters. Nor do the rules insure that the Commission will have an opportunity to review rulings of the presiding officer affecting Commission records either by granting any party a right to appeal to the Commission or permitting the Commission to review such rulings on its own initiative.

The present rule governing the filing of motions for leave to appeal rulings of the presiding officer, Rule 153, 46 CFR 502.153, requires that motions for leave to appeal be accompanied by the appeal itself so that the presiding officer will have before him the full grounds for the motion and appeal before ruling. However, no provision is made for a party to file a reply to the appeal as distinct from his right to file a reply to the motion.

The proposed amendments would remedy these defects in the present rules. Thus, in both subpena and discovery situations, a uniform procedure would be established with respect to the service of subpenas and discovery requests and pleadings by providing that all such documents be served upon the Commission's Secretary. Moreover, the General Counsel will be authorized to designate an attorney to represent Commission staff personnel involved in these matters. In order to insure the integrity of the administrative process, however, the attorney so designated will thereafter take no part in the Commission's decisionmaking process.

Another problem which these amendments are intended to correct concerns the responsibilities of the Commission and the rights of the parties in matters concerning interrogation of Commission staff personnel and inspection of records in the custody of the Commission. The present rules permit the use of subpenas and discovery directed against Commission staff personnel as they do against any private litigant. This is quite proper and consistent with the legislative grant of authority to the Commission set forth in section 27 of the Shipping Act, 1916, as amended, 46 U.S.C. 826. See Senate Report No. 472, 90th Congress, 1st Sess., August 2, 1967, p. 2; Hearings before the House Subcommittee on Merchant Marine and Fisheries, August 15, 16, 1967, 90th Congress, 1st Sess., p. 61; Senate Hearings, May 8, 9, 1967, p. 8. Unlike private litigants, however, the Commission is a government agency involved in law enforcement activities and has responsibilities which do not devolve upon private persons. Certain privileges have been granted to such agencies by law which have no analogue as regards private parties, for example, the privilege generally to withhold from disclosure internal personnel rules and practices, inter-agency or intra-agency memoranda or letters, investigatory records compiled for law enforcement purposes, etc. See the Freedom of Information Act, as amended, 5 U.S.C. 552(b). Improvident disclosure of such information may have adverse effects on the Commission's ability to discharge its regulatory responsibilities. Requests for such information consequently involve delicate and sensitive considerations as to which the Commission has intimate knowledge not necessarily possessed by presiding administrative law judges however qualified they may be with respect to the laws of evidence and discovery. For that reason the Commission is proposing to insure that it will have an opportunity to give full consideration to such matters whether by way of appeal or by review on its own initiative. The proposed rule, furthermore, would apply whether the presiding judge grants or denies the particular request.

As mentioned, the present rule governing the filing of motions for leave to appeal rulings of the presiding officer, Rule 153, 46 CFR 502.153, does not provide that replies may be filed to the appeal itself as distinct from the motion. Therefore, although the presiding officer is able to consider all of the arguments presented by the moving party in favor of granting leave to appeal contained in both the motion and the appeal itself, he does not have the benefit of complete replies and parties who oppose the motion and appeal are placed at a disadvantage. Experience has shown, furthermore, that parties often assume that they have a right to file replies to all pleadings and documents served on them if they wish even if rules do not make specific provision and consequently file replies anyway. The Commission believes that the specific grant of permission to file such replies would be fairer to all parties, would provide the presiding officer with a complete discussion of the issues involved, and would furthermore save time by enabling him to certify the entire set of arguments to the Commission for its decision should he decide to grant leave to appeal with no need for further pleadings. Rule 153 is proposed to be amended accordingly.

Therefore, pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 553), and sections 27 and 43 of the Shipping Act, 1916 (46 U.S.C. 826, 841a), Part 502 of Title 46, Code of Federal Regulations, is proposed to be amended as set forth below:

PART 502—RULES OF PRACTICE AND PROCEDURE

1. Section 502.135 is proposed to be revised to read as follows:

§ 502.135 Subpena of Commission staff personnel, documents or things.

(a) A subpena for the attendance of Commission staff personnel or for the production of documentary materials in the possession of the Commission shall be served upon the Secretary. If the subpena is returnable at hearing, a motion to quash may be filed within five (5) days of service and attendance shall not be required until the presiding officer rules on said motion. If the subpena is served in connection with prehearing depositions, the procedure to be followed with respect to motions to quash and replies thereto will correspond to the procedures established with respect to motions and replies in § 502.132(c).

(b) The General Counsel shall designate an attorney to represent any Commission staff personnel subpenaed under this section. The attorney so designated shall not thereafter participate in the Commission's decision-making process concerning any issue in the proceeding.

(c) Rulings of the presiding officer issued under § 502.135(a) shall become final rulings of the Commission unless an appeal is filed within ten (10) days after date of issuance of such rulings or unless the Commission on its own motion reverses, modifies, or stays such rulings within twenty (20) days of their issuance. Replies to appeals may be filed within ten (10) days. The filing of such appeals shall stay the presiding officer's rulings until the Commission acts upon the matter.

2. Section 502.209 is proposed to be revised to read as follows:

§ 502.209 Use of discovery procedures directed to Commission staff personnel.

(a) Discovery procedures described in §§ 502.204, 502.205, 502.206, 502.207, and 502.208, directed to Commission staff personnel shall be permitted and shall be governed by the procedures set forth

in those sections except as modified by paragraphs (b) and (c) of this section. All notices to take depositions, written interrogatories, requests for production of documents and other things, requests for admissions, and any motions in connection with the foregoing, shall be served on the Secretary of the Commission.

(b) The General Counsel shall designate an attorney to represent any Commission staff personnel to whom any discovery requests or motions are directed. The attorney so designated shall not thereafter participate in the Commission's decisionmaking process concerning any issue in the proceeding.

(c) Rulings of the presiding officer issued under § 502.209(a) shall become final rulings of the Commission unless an appeal is filed within ten (10) days after date of issuance of such rulings or unless the Commission on its own motion reverses, modifies, or stays such rulings within twenty (20) days of their issuance. Replies to appeals may be filed within ten (10) days. The filing of such appeals shall stay the presiding officer's rulings until the Commission acts upon the matter.

3. Section 502.153 proposed to be amended by inserting the following sentence after the third sentence:

§ 502.153 Appeal from ruling of presiding officer thereof; orders of dismissal in whole or in part.

Replies to the motion and the appeal may be filed within fifteen (15) days after date of service thereof unless the presiding officer for good cause shown enlarges or shortens the time.

NOTE: Since the proposals set forth in this rulemaking proceeding concern procedural matters limited to the conduct of formal proceedings before the Commission, their adoption could in no way be considered to result in major federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.). Consequently no environmental impact statement will be issued in this proceeding.

By order of the Federal Maritime Commission.

JOSEPH C. POLKING,
Acting Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 43]

[Docket No. 21265]

UNIFORM SETTLEMENT RATES ON PARALLEL INTERNATIONAL COMMUNICATIONS ROUTES

Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Extension of time.

SUMMARY: In response to the request by ITT World Communications Inc. the dates for comments and replies set forth in the Commission's Notice of Proposed Rulemaking, FCC 77-369, released June 13, 1977, are extended to August 22, 1977, and September 21, 1977, respectively.

DATES: Comments may be field on or before August 22, 19777 and Reply Comments on or before September 21, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Francis L. Young, Common Carrier Bureau, Federal Communications Commisssion, Washington, D.C. 20554, 202-632-5550.

SUPPLEMENTAL INFORMATION:

In the matter of uniform settlement rates on parallel international communications routes (42 FR 31175; June 20, 1977)

ORDER

Adopted: August 3, 1977.

Released: August 4, 1977.

By the Chief, Common Carrier Bureau.

1. Before the Commission for consideration is the request for extension of time, filed July 22, 1977, by ITT World Communications Inc. (WorldComm) seeking a ten day extension of the filing deadlines in this proceeding. In support of its request WorldComm claims that the press of other Commission proceedings and scheduled vacations limit the time for adequately preparing comments for this proceeding. WorldComm further states that the other international record carriers it anticipates will file comments in this proceeding do not oppose the requested extension.

2. This proceeding involves matters of important international communications policy. The brief extension sought would not unduly delay the proceeding. Good cause appears to exist for the extension requested. Thus, the request will be granted.

3. *Accordingly*, Pursuant to authority delegated under § 0.303 of the Commission's Rules and Regulations, 47 CFR 0.303, the motion for extension of time, filed July 22, 1977, by ITT World Communications Inc. is granted; and

4. *It is ordered*, That the dates for filing comments and reply comments are extended and that interested persons may file comments on or before August 22, 1977, and reply comments on or before September 21, 1977.

WALTER R. HINCHMAN,
Chief, Common Carrier Bureau.

[Docket No. 21239; RM-2803]

FM BROADCAST STATION IN BONITA SPRINGS, FLA.

Proposed Changes in Table of Assignments; Order Extending Time for Filing Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: Action taken herein extends the time for filing reply comments to a Notice of Proposed Rule making for the substitution of commercial FM Channel 241 for 240A at Bonita Springs and required changes in three other communities. Petitioner, Gold Coast Broadcasting Corp., has requested additional time to respond to issues raised by several parties in comments.

DATE: Reply comments are due on or before August 19, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James J. Gross, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of § 73.202(b), Table of Assignments, FM broadcast stations. (Bonita Springs, Florida) (42 FR 33779; July 1, 1977).

ORDER EXTENDING TIME FOR FILING REPLY COMMENTS

Adopted: August 3, 1977.

Released: August 4, 1977.

By the Chief, Broadcast Bureau:

1. The Commission has before it a request for a two week extension of time to file reply comments in the above-captioned proceeding from August 5, 1977, to August 19, 1977. The request is from Gold Coast Broadcasting Corp. ("Gold Coast"), licensee of WLEQ(FM) Bonita Springs, Fla. Gold Coast, the petitioner in this proceeding, seeks the substitution of Channel 241 for 240A at Bonita Springs, and a shift of channel assignments in three other communities.

2. A prior extension of time for comments and reply comments was requested by three interested parties after Gold Coast had filed its supporting comments. The extension was granted and comments were timely filed by Palmer Broadcasting Co., Lee County FM, Inc., Lighthouse Broadcasting, Inc., Radio South Dade, Inc., Radio Broward, Inc., and Bartell Broadcasting of Florida, Inc. Gold Coast claims that these comments are somewhat lengthy and raise a number of legal, financial, and engineering matters to which Gold Coast would like to reply. Furthermore, Gold Coast says, its president and general manager resides in Florida, its engineering consultant in Connecticut, and its legal counsel in Washington. Gold Coast desires a total of four weeks in which to prepare its reply comments and therefore seeks to extend the original two week period by this two week extension. Counsel for Gold Coast informs us that the parties who filed comments to date in this proceeding have stated by phone that they have no objection to this extension.

3. We are of the view that Gold Coast has made a sufficient showing of grounds for an extension of time in this proceeding. *Accordingly, it is ordered*, That the date for filing reply comments in this proceeding is extended from August 5, 1977, to and including August 19, 1977.

4. This action is taken pursuant to authority found in Sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's Rules.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[47 CFR Part 81]

[Docket No. 20617; RM-2359; FCC 77-525]

CHANNELING ARRANGEMENTS OF CANADA/UNITED STATES FOR WEST COAST, GREAT LAKES, AND EAST COAST FOR APPENDIX 18 MARITIME MOBILE CORRESPONDENCE FREQUENCIES

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: Implementation of an arrangement between United States and Canada covering assignment of VHF maritime mobile public correspondence channels to coast stations on the West Coast, East Coast, and on the Great Lakes and the St. Lawrence Seaway. This action is necessary because the arrangement with Canada has been recently finalized.

DATES: Comments must be received on or before September 6, 1977, and reply comments must be received on or before September 16, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Robert DeYoung, Safety and Special Radio Services Bureau, 202-632-7197.

SUPPLEMENTARY INFORMATION:

Adopted: July 21, 1977.

Released: August 3, 1977.

In the matter of Proposed Canada/United States channeling arrangements for the West Coast, Great Lakes, and the East Coast for Appendix 18 maritime mobile correspondence frequencies, Docket No. 20617, RM 2359 (40 FR 51494).

1. On October 28, 1975, we released a Notice of Inquiry in the above captioned matter. All comments received favored adoption of the proposed arrangements. We subsequently finalized the arrangements with Canada by a letter to Canada signed by the Chairman of the Commission on December 15, 1976. This Notice is a consolidation of that proceeding and of a petition for rulemaking in RM 2359.

2. The purpose of this rulemaking is to incorporate these arrangements into the Commission's rules. Simultaneously, the Canadian Government will implement its own and compatible plan. Part of these arrangements is a plan submitted by the North Pacific Marine Radio Council, Inc., hereinafter called (NPMRC), and is entitled "North Pacific Marine Radio Council, Inc., and Western Canada Telecommunications Council Public Correspondence Committee report on a new maritime VHF Public correspondence frequency assignment plan," hereinafter called (Joint Plan). The Joint Plan resulted from a joint effort between NPMRC and Western Canada Telecommunications Council, hereinafter called (WCTC), and was submitted as a Working Paper at the Canada/USA meeting held in Ottawa, Canada in 1975. This plan was submitted as a petition for rulemaking by NPMRC (RM-2359).

3. The provisions of the Joint Plan when implemented by the U.S. and Canada will apply to waters of the State of Washington and of the Province of British Columbia within the coordination boundaries of "Arrangement A" of the Canada/USA Frequency Coordination Agreement above 30 MHz. Other arrangements between the U.S. and Canada apply to the Great Lakes and East Coast.

4. Public coast stations authorized by the Commission in U.S. waters within the boundaries of the West Coast joint plan will be governed by these arrangements and § 81.303 or duplication of service will not be applicable to these stations. In the Great Lakes and on the East Coast, the arrangements will facilitate frequency assignments and licensing coordination procedures.

5. The primary purpose of the Joint Plan is to provide an improved public correspondence service in the Puget Sound area and facilitate frequency assignments and coordination between the U.S.A. and Canada. The Joint Plan, if implemented, will also result in spectrum-saving use of frequencies on both sides of the international boundary and will ease the inter-governmental administrative burdens of coordinating channel assignment on a case-by-case basis.

6. The Joint Plan provides for district goegraphical areas which will be allotted primary, supplementary, and local channels. The primary channel is intened to cover the entire geographical area, the supplementary channel is intended to improve coverage of a portion of the area or to relieve traffic congestion on the primary channel, and the local channel will be a low-power (10 watts) channel designed to provide local coverage to certain bays, inlets, or ports within the geographical area covered by the primary channel. The plan is reflected on a map below.

7. Implementation of the Joint Plan in the rules, will require modification of existing authorizations to conform with the technical requirements of the plan. In addition, the Commission will not accept for filing any application for public coast stations within the boundaries of the proposed plan pending final resolution of this proceeding. All pending applications for public coast stations in the Puget Sound area will be retained on file pending the outcome of the proceeding, and such applicants will be given an opportunity to amend their pending applications to conform with the then existing rules.

8. The proposed amendments of the rules, as set forth below, are issued pursuant to the authority contained in sections 4(i), 303 (b), (c), (d), (f), and (r) of the Communications Act of 1934, as amended.

9. Pursuant to applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may file comments on or before September 6, 1977, and reply comments on or before September 16, 1977. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this Notice.

10. In accordance with the provisions of § 1.419 of the Commission's rules, an original and 5 copies of all statements, briefs, or comments filed shall be furnished to the Commission. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Part 81 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA—PUBLIC FIXED STATIONS

1. In § 81.304 a limitation symbol "6" is added in the Limitations column for the frequencies 161.800 MHz through 162.000 MHz and a new subparagraph (b)(6) (which is now shown as "Reserved") is added to read as follows

§ 81.304 Frequencies available.

(a) * * *

Carrier frequency (Kilohertz)	Conditions of use	
	Section	Limitations
*	*	*
156.800	81.304	[illegible]
161.800	81.304	6, [illegible]
161.825	81.304	6, 22, 24, 63
161.850	81.304	6, 22, 24
161.875	81.304	6, 22, 24, 63
161.900	81.304	6, 22
161.925	81.304	6, 22, 63
161.950	81.304	6, 22
161.975	81.304	6, 22, 63
162.000	81.304	6, 22
162.025	81.304	[illegible]

(b) * * *

* * * * *

(6) This frequency is available for use by public coast stations serving the coastal areas of the State of Washington, including Puget Sound and the Province

of British Columbia in accordance with the provisions of Subpart S of Part 81.

* * * * *

2. A New Subpart S is added to read as follows:

Subpart S—Canada U.S.A. Channeling Arrangement for VHF Maritime Public Correspondence

Sec.

81.901 Canada/U.S.A. arrrangements.
81.902 Definitions.
81.903 Technical characteristics.
81.904 Canada, U.S.A. channeling arrangement for West Coast VHF maritime mobile public correspondence.
81.905 Canada/U.S.A. VHF channeling arrangement on the Great Lakes and the St. Lawrence Seaway.
81.906 Canada/U.S.A. channeling arrangement for East Coast VHF maritime mobile public correspondence.

AUTHORITY: Secs. 4(i), 303 (b), (c), (d), (f) and (r) of the Communications Act of 1934, as amended.

Subprt S—Canada/U.S.A. Channeling Arrangement for VHF Maritime Public Correspondence

§ 81.901 Canada/U.S.A. arrangement.

Pursuant to arrangement between the United States and Canada, assignment of VHF frequencies to public coast stations in certain areas of Washington State, the Great Lakes and the East Coast of the United States shall be made in accordance with the provisions of this subpart.

§ 81.902 Definitions.

On the West Coast, the following terms are defined as follows:

(a) *Public Correspondence Sector.* A distinct geographical area to which is alloted primary, supplementary and local channels.

(b) *Primary Channel.* A channel intended to cover the greater portion of a public correspondence sector. It may provide some coverage of an adjacent sector but must not cause harmful interference beyond the adjacent sector.

(c) *Supplementary Channel.* A channel intended to improve coverage of a portion of a sector poorly covered by a primary channel or to relieve traffic congestion on a primary channel. It must not cause harmful interference beyond the adjacent sector.

(d) *Local Channel.* A low-power channel designed to provide local coverage of certain bays, inlets and ports where coverage of primary or supplementary channels is poor or where heavy traffic loading warrants it. It must not cause harmful interference to primary or supplementary channels or to local channels in other sectors.

§ 81.903 Technical characteristics.

On the West Coast, technical characteristics of coast stations shall be as follows:

(a) For primary and supplementary channels the maximum transmitter power shall be 50 watts and the maximum ERP shall be 125 watts. Antennas shall be sited no higher than necessary to provide the desired coverage within the sector.

(b) For local channels the ERP shall not exceed 10 watts. Low siting, directive antennas and natural topography shall be employed to confine coverage to the local area and, in any event, to prevent harmful interference to channels in other sectors.

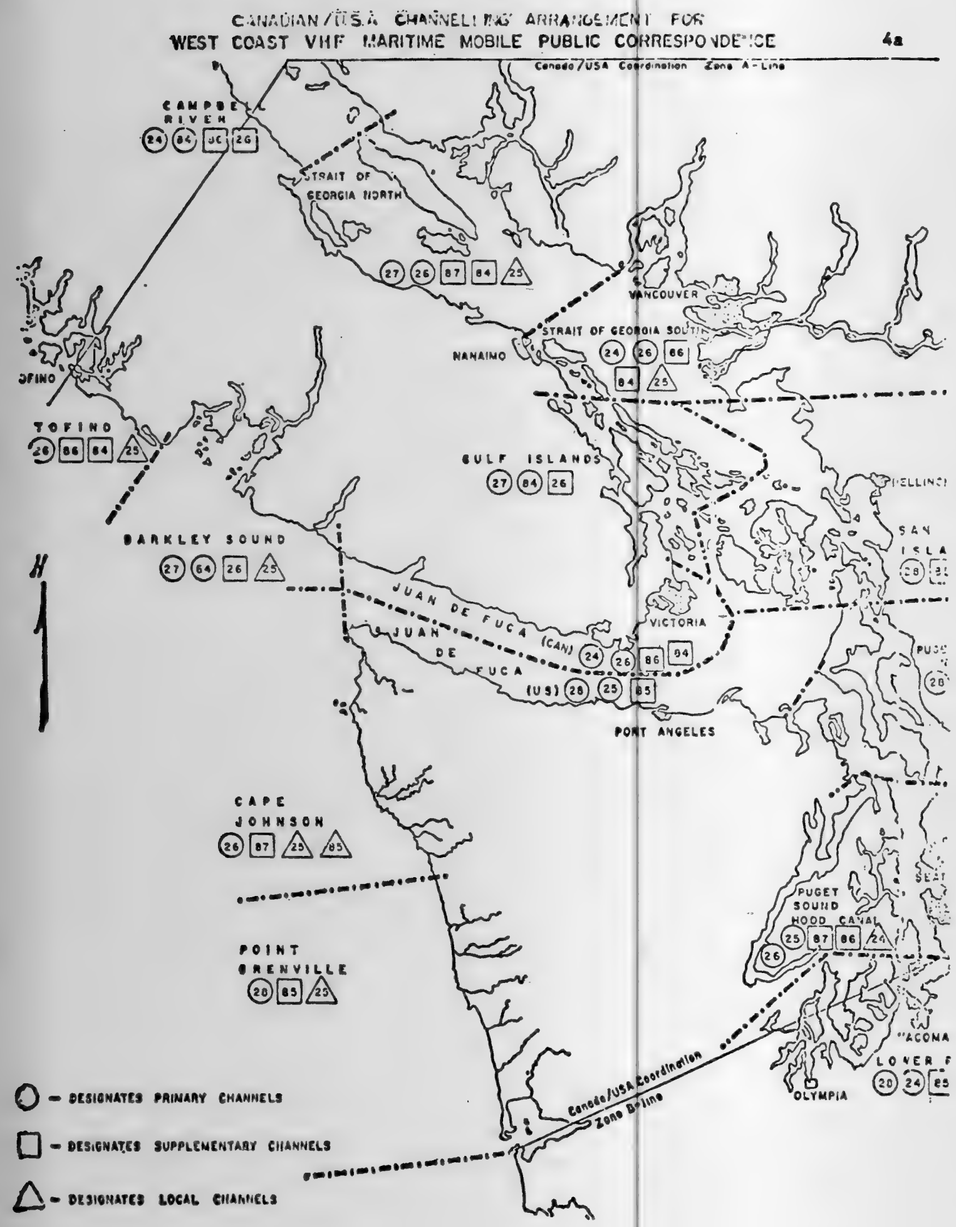
(c) For station design purposes the tolerable interference level shall be considered as a received signal of −107 dBm (−137 dBW) from a vertical dipole located 30 feet above the water.

§ 81.904 Canada/U.S.A. channeling arrangement for West Coast VHF maritime mobile public correspondence.

For purposes of this subpart, and on the West Coasts of Canada and the United States, channels shall be assigned, as follows:

(a) The provisions of the Canada/U.S.A. channeling arrangement apply to waters of the State of Washington and of the Province of British Columbia within the coordination boundaries of "Arrangement A" of the Canada/U.S.A. Frequency Coordination Agreement above 30 MHz.

(b) The channeling arrangement applies to the following public correspondence channels: Channels 24, 84, 25, 26, 86, 27, 87, and 28.



(c) Coast stations may be established by either country in accordance with the provisions of the arrangement without prior coordination with the other country. There shall, however, prior to implementation, be an exchange of information in respect of the establishment of new stations or a change in technical parameters of existing stations.

(d) Coast stations proposed for establishment which are not in acordance with the provisions of the arrangement shall be subject to prior coordination in accordance with the provisions of "Arrangement A of the Canada/U.S.A. Frequency Coordination Agreement above 30 MHz. Such stations shall not be protected from interference or cause interference to existing or future stations which are established in accordance with the provisions of the arrangement.

(e) Existing stations shall comply with the provisions of the arrangement within 12 months after it becomes effective.

(f) The agreed channeling arrangement for the West Coast is as follows:

PUBLIC CORRESPONDENCE SECTOR	PRIMARY CHANNEL		SUPPLEMENTARY CHANNEL		LOCAL CHANNEL	REMARKS
BRITISH COLUMBIA						
Tofino	24	26	86	84	25	
Barkley Sound	27	84	26		25	
Juan de Fuca (Canada)	24	26	86	84		
Gulf Islands	27	84	26			
St. of Georgia South	24	26	86	84	25	
St. of Georgia North	27	26	87	84	25	
Campbell River	24	84	86	26		
WASHINGTON						
Cape Johnson	26		87		85 25	
Pt. Grenville	28		85		25	
Juan de Fuca (U.S.A.)	28	25	85			Ch. 28-Western portion. Ch. 25 -Eastern portion
San Juan Islands	28		85	87		
Puget Sound North	28	24	85			Ch.28 - West Whidbey Isl. Ch. 24 - East Whidbey Isl.
Puget Sound Hood Canal	26	25	87	86	24	
Lower Puget Sound	28	24	85		25	

§ 81.905 Canada/U.S.A. VHF channeling arrangement on the Great Lakes and the St. Lawrence Seaway.

For purposes of this subpart, channels on the Great Lakes and the St. Lawrence Seaway shall be assigned, as follows:

(a) The provisions of the arrangement apply to the waters of the Great Lakes and the St. Lawrence Seaway within the coordination boundaries of "Arrangement A" of the Canada/U.S.A. Frequency Coordination Agreement above 30 MHz.

(b) The arrangement applies to the following public correspondence channels: Channels 24, 84, 25, 85, 26, 86, 27, 87, 28, and 88.

(c) Canada and the U.S.A. will use one shared channel, the following channeling arrangement is agreed:

Canadian channels: 24, 85, 27, 88 (Note 1).
U.S. channels: 84, 25, 86, 87, 28 (Note 2).
Shared channel: 26 (Note 3).

NOTE 1.—Also assignable to U.S. stations within the frequency coordination zone, following successful coordination with Canada.

NOTE 2.—Also assignable to Canadian stations within the frequency coordination zone, following successful coordination with the United States.

NOTE. 3—Changes to existing assignments and new assignments within the frequency coordination zone of either country are subject to prior coordination with the other Administration.

§ 81.906 Canada/U.S.A. channeling arrangement for East Coast VHF maritime mobile public correspondence.

For purposes of this subpart, channels on the East Coast shall be assigned, as follows:

(a) The provisions of the arrangement apply to the Canadian and U.S.A. east coast waters including the St. Lawrence River east of the St. Lawrence Seaway within the coordination boundaries of "Arrangement A" of the Canada/U.S.A. Frequency Coordination Agreement above 30 MHz.

(b) The arrangement applies to the following public correspondence channels: channels 24, 84, 25, 85, 26, 86, 27, 87, 28, and 88.

(c) Canada and the U.S.A. will use one shared channel; the following channeling arragenment is agreed:

Canadian channels: 24, 85, 27, 88 (Note 1).
U.S.A. channels: 84, 25, 86, 87, 28 (Note 2).
Shared channel: 26 (Note 3).

NOTE 1.—Also assignable to U.S. stations within the frequency coordination zone, following successful coordination with Canada.

NOTE 2.—Also assignable to Canadian stations within the frequency coordination zone, following successful coordination with the United States.

NOTE 3.—Changes to existing assignments and new assignments within the frequency coordination zone of either country are subject to prior coordination with the other Administration.

Extension of Time for Filing Comments

AGENCY: Interstate Commerce Commission.

ACTION: Extension of time for filing comments in the above-entitled rulemaking proceedings.

SUMMARY: The purpose of this document is to announce an extension of the time for filing comments in the above-entitled rulemaking proceedings.

DATES: Comments must be received on or before September 19, 1977.

ADDRESSES: Send comments to: Interstate Commerce Commission, 12th St. and Constitution Ave. NW., Washington, D.C. 20423. All written submissions will be available for public inspection during regular business hours at the same address.

FOR FURTHER INFORMATION CONTACT:

Michael Erenberg, Assistant Deputy Director, Section of Operation Rights, Office of Proceedings, 202-275-7292.

SUPPLEMENTARY INFORMATION: The time for filing comments in the above-entitled proceedings, originally set as August 8, 1977, and previously extended to September 7, 1977, is now extended to September 19, 1977. No further extensions will be granted.

H. G. HOMME, Jr.,
Acting Secretary.

INTERNATIONAL TRADE IN ENDANGERED SPECIES OF WILD FAUNA AND FLORA, IMPLEMENTATION OF CONVENTION

Special Working Session Concerning the Convention on International Trade in Endangered Species of Wild Fauna and Flora

AGENCY: U.S. Fish and Wildlife Service.

ACTION: Notice of Special Working Session.

SUMMARY: The parties to the Convention resolved at their first meeting, in November 1976, to hold a Special Working Session. This session is being held to discuss several technical matters regarding the implementation of the Convention: guidelines for shipments of living specimens, identification of specimens, exchange of musuem specimens, placing of confiscated animals and plants, and analysis of Appendices I and II (50 CFR 23.23). The findings of this session will not be binding upon the parties, but they will be considered for later adoption by the parties.

DATES: Information must be received on or before August 31, 1977, in order to be most useful to the Service. Special Working Session to be held in Geneva, Switzerland October 17, 1977 through October 28, 1977.

ADDRESSES: Information should be sent to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Dr. Richard L. Jachowski, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240.

SUPPLEMENTARY INFORMATION: The letter of invitation to the United States of America, requesting participation in the Special Working Session, is reprinted below with its attached documents.

MARCH 16, 1977.

The Secretariat of the Convention on International Trade in Endangered Species of Wild Fauna and Flora presents its compliments to the Embassy of the United States of America and has the honour to draw attention to the following:

1. At its first meeting held in Berne, Switzerland, from 2 to 6 November 1976, the Conference of the Parties to the Convention resolved that a Special Working Session be convened within six months to one year of the first meeting in order to discuss several items regarding the implementation of the Convention.

2. At the same time, the Conference of the Parties to the Convention decided that a Steering Committee be established to coordinate with the Secretariat on the organization of the Special Working Session.

3. The Steering Committee met in Morges, Switzerland, on 21 and 22 February 1977. The following decisions were taken:

(a) The Special Working Session will be held at the World Health Organization Headquarters in Geneva, Switzerland, from 17 to 28 October 1977.

(b) States Party or Signatory to the Convention are invited to participate actively in the Special Working Session as well as other interested States. All States are invited to inform the Steering Committee, at the Secretariat address above,

of their interest and expected participation before 31 May 1977.

(c) National and international organizations with specific interests may also attend the Special Working Session as observers.

(d) To attach to this Note a document defining the objectives of the Special Working Session, requesting working materials from participating States and giving relevant information. The Steering Committee and the Secretariat would appreciate this document being transmitted to the competent authorities.

The Secretariat of the Convention on International Trade in Endangered Species of Wild Fauna and Flora avails itself of this opportunity to renew to the Embassy of the United States of America the assurance of its highest consideration.

ATTACHMENT TO THE LETTER OF INVITATION

INTRODUCTION

At the first meeting of the Conference of the Parties, held in Berne, Switzerland, on November 2–6, 1977, the Parties resolved that a Special Working Session be convened within 6 months to 1 year in order to discuss several items regarding the implementation of the Convention. The terms of reference of the Special Working Session are as follows:

(a) The development of identification aids to facilitate the enforcement of trade restrictions under the Convention;

(b) The development of guidelines on the care and shipment of live specimens of species listed under the Convention;

(c) The consideration of points raised by the control of "readily recognisable parts and derivatives" of species listed under the Convention and subsequent points raised during the meeting of the Conference of the Parties;

(d) The consideration of the feasibility of applying a similar procedure to that regarding the exchange of herbarium specimens, so as to include preserved animal specimens of registered scientific institutions; and

(e) An analysis of Appendices I and II for scientific validity with a view to making recommendations to the next meeting of the Conference of the Parties, in accordance with the resolution adopted by the Conference of the Parties.

Furthermore, the goal of this session is to produce such items of practical use as will be most helpful in the implementation of the Convention.

The resolution established a small Steering Committee to coordinate with the Secretariat the organization of the session. The following members of the Steering Committee participated in the meeting held at IUCN Headquarters, in Morges on 21–22 February 1977, where the present document was prepared: Canada, Ecuador, Switzerland and the United States of America.

TIME AND VENUE OF THE SPECIAL WORKING SESSION

The Special Working Session will be held at the World Health Organization (WHO) Headquarters in Geneva (Switzerland), from 17 to 28 October 1977.

OBJECTIVES OF THE SPECIAL WORKING SESSION

The Special Working Session will not be entitled to make decisions or adopt resolutions which are binding on the Parties. The general goal of the session will be to prepare documents and resolutions for practical implementation of the Convention.

Recommendations for changes to the appendices can be adopted at the second regular meeting of the Conference of the Parties or by postal vote.

In more detail, the objectives of the Special Working Session will be the following:

(a) *Guidelines for shipments of living specimens:* participants should be prepared to discuss the following matters—the desirability of establishing internationally agreed guidelines presently available; the substantive merits or demerits of the existing guidelines; and any particular requirements for a species or group of species which should be included in internationally agreed guidelines. Assuming that participants agree that it is desirable to have international guidelines for the shipment of living specimens, and sufficient substantive information is available, participants should be prepared to draft a resolution recommending the appropriate guidelines to the Parties.

(b) *Identification of specimens:* participants should be prepared to discuss the following items in relation to identification aids—whether or not it is desirable to have internationally agreed identification manuals; if so, what format should be followed and what types of data should be included; and what action should be taken, and by whom, for the production of such manuals. Participants should also be prepared to discuss the problem of identification of parts and derivatives with reference to the attached Conference document Doc. 1.19. The Parties shoud examine the possibility of using standard Customs nomenclature for preparation of the list.

(c) *Exchange of museum specimens:* participants should be prepared to discuss the desirability of extending the approach adopted by the Conference of the Parties at the first meeting for the exchange of herbarium specimens to the exchange of preserved museum specimens. If it is determined that a similar procedure is desirable, participants should be prepared to suggest appropriate procedures for the exchange of museum specimens including the identification of eligible institutions and scientists. (See document Doc. 1.18 attached).

(d) *Placing of confiscated animals:* participants should be prepared to discuss the desirability of creating an information system to enable the placing of confiscated live animals in rescue centers. Participants should also be prepared to give information on the manner in which their own countries have solved the problems.

(e) *Analysis of Appendices I and II:* participants should be prepared to discuss the list of species as they appear in Appendices I and II. Amendments made at the first meeting of the Conference of the Parties should not be considered. Participants should make recommendations for appropriate amendments based upon the criteria adopted by the first meeting (see documents Conf. 1.1 and 1.2 attached). If time permits participants should be prepared to make recommendations on any new proposals for amendments to Appendix I or II.

MATERIALS TO BE SENT TO THE SECRETARIAT PRIOR TO THE SPECIAL WORKING SESSION

In order to facilitate the accomplishment of the tasks of the Special Working Session, papers shall be provided by the Steering Committee. To aid in the preparation of these papers, States are requested to provide the following materials:

Information on the availability within their countries of programmes, materials or aids used in training Customs or other inspection officers;

Manuals, samples, lists of experts or other materials used by Customs or other inspection officers in the identification of various types of wildlife and plants;

Guidelines or regulations presently used to judge whether shipments of live specimens are properly prepared or shipped as to minimize the risk of injury, damage to health or cruel treatment.

These materials, to be of maximum use, should be sent to Mr. J. Berney, Executive Secretary, IUCN, CH–1110 Morges, Switzerland, by 31 May 1977.

Also, in order to facilitate the discussion of Appendices I and II participants should be prepared to indicate to the Secretariat by 31 May 1977, those species which should be considered for deletion or for movement to a different appendix, on the basis of their preliminary evaluation.

PARTICIPANTS TO THE SPECIAL WORKING SESSION

The Berne resolution on the Special Working Session provides that, particular areas concerning the implementation of the Convention, could best be examined by technical experts in the fields of law enforcement, Customs control, zoology, botany, and the veterinary sciences. This resolution and the description of the objectives of the session, should guide participating States in the choice of representatives. The Special Working Session is an expert meeting and not of a decision-making nature.

In order to facilitate the organisation of the Special Working Session, it is necessary for the Secretariat to know by 31 May 1977 which States intend to participate. The Steering Committee and the Secretariat hope that a large number of States will show their interest in participating in the Special Working

Session and, consequently, begin appropriate preparations.

PROVISIONAL AGENDA OF THE SPECIAL WORKING SESSION

The following agenda shall be considered as provisional until such time as it is finalised by the Steering Committee. While it may be unusual that an agenda be fixed without discussion by the participants, the Steering Committee took this action for the following reasons:

The October 1977 session will be of considerable length;

It will be a meeting of specialists;

It will not be necessary for all specialists to be in attendance at all times; and

By establishing a firm agenda, specialists can pick and choose the sessions that are of interest to them, and can therefore plan their attendance appropriately.

All sessions will be plenary.

PROVISIONAL AGENDA

17–18.10.1977: Guidelines on preparation and shipment of live specimens of species listed in the appendices of the Convention.

19.10.1977: Morning: Exchange of museum specimens. Afternoon: Placing of confiscated live animals in rescue centres.

20, 21 and 24.10.1976: Training and identification of specimens.

25 to 27.10.1977: Analysis of Appendices I and II of the Convention: Fauna. If time permits, consideration of amendments to Appendix I or II.

28.10.1977: Analysis of Appendices I and II of the Convention: Flora. If time permits, consideration of amendments to Appendix I or II.

CRITERIA FOR THE ADDITION OF SPECIES AND OTHER TAXA TO APPENDICES I AND II AND FOR THE TRANSFER OF SPECIES AND OTHER TAXA FROM APPENDIX II TO APPENDIX I

THE FIRST MEETING OF THE CONFERENCE OF THE PARTIES TO THE CONVENTION

Decided that in determining the appropriate appendix into which a species or other taxon should be placed the biological and trade status of the taxon should be evaluated together.

APPENDIX I

1. *Biological status.* To qualify for Appendix I, a species must be currently threatened with extinction. Information of any of the following types should be required, in order of preference: (a) scientific reports on the population size or geographic range of the species over a number of years, (b) scientific reports on the population size or geographic range of the species based on single surveys, (c) reports by reliable observers other than scientists on the population size or geographic range of the species over a number of years, or (d) reports from various sources on habitat destruction, heavy trade or other potential causes of extinction. Genera should be listed if most of their species are threatened with extinction and if identification of individual species within the genus is difficult. The same should apply to the listing of any smaller taxa within larger ones. If most of the smaller taxa are not threatened, but identification of individual species is difficult, the entire larger taxa should be placed on Appendix II. Taxa listed in Appendix I, because of difficulty in separating them from endangered forms within the same taxa, should be annotated as such in the appendix.

2. *Trade status.* Species meeting the biological criteria should be listed in Appendix I if they are or may be affected by international trade. This should include any species that might be expected to be traded for any purpose, scientific or otherwise. Particular attention should be given to any species for which such trade might, over a period of time, involve numbers of specimens constituting a significant portion of the total population size necessary for the continued survival of the species. The biological status and trade status of a species are obviously related. When biological data show a species to be declining seriously, there need be only a probability of trade. When trade is known to occur, information on the biological status need not be as complete. This principle especially applies to groups of related species, where trade can readily shift from one species that is well-known to another for which there is little biological information.

APPENDIX II

1. *Biological status.* To qualify for Appendix II, species need not currently be threatened with extinction, but there should be some indication that they might become so. Such an indication might be a decreasing or very limited population size or geographic range of distribution. Information on biological status should be one of the types required for Appendix I species. Genera should be listed if some of their species are threatened and identification of individual species within the genus is difficult. The same should apply to listing any smaller taxa within larger ones.

2. *Trade status.* Species meeting the biological criteria should be listed if they presently are subject to trade or are likely to become subject to trade. The latter situation can arise where heavy trade in one species is extended to include similar species if the demand grows or if supplies of the one species are depleted. The amount of trade that a species can sustain without threat of extinction generally will be greater for species in Appendix II than for those in Appendix I, so there should be evidence of actual or expected trade in such a volume as to constitute a potential threat to survival of the species. Appendix II serves in part as a monitoring tool (Article IV.3) to gather such trade data.

CRITERIA FOR THE DELETION OF SPECIES AND OTHER TAXA FROM APPENDICES I AND II

Considering that criteria for the addition of taxa to Appendix I or II and for the transfer of taxa from Appendix II to Appendix I have been adopted;

THE FIRST MEETING OF THE CONFERENCE OF OF THE PARTIES TO THE CONVENTION

Resolves that the deletion of a plant or animal taxon from Appendix I or II or the reduction of protection given to this taxon by transfer from Appendix I to Appendix II is a serious matter that should be approached with caution. This caution is required for the following reasons:

The addition to and deletion from the appendices to be different problems requiring different approaches by the Conference. If an error is made by the Conference by unnecessarily placing a plant or animal on an appendix, the result is the imposition of a documentation requirement. If however, it errs in prematurely removing a plant or animal from protection, or lowering the level of protection afforded, the result can be the permanent loss of the resources. If it errs it should be therefore toward protection of the resources.

Criteria for deletion or transfer from Appendix I to Appendix II, should require positive scientific evidence that the plant or animal can withstand the exploitation resulting from the removal of protection. This evidence must transcend informal or lay evidence of changing biological status and any evidence of commercial trade which may have been sufficient to require the animal or plant to be placed on an Appendix initially. Such evidence should include at least a well documented population survey, an indication of the population trend of the species, showing recovery sufficient to justify deletion, and an analysis of the potential for commercial trade in the species or population.

In addition to the need for sufficient evidence prior to any action by the Conference to reduce protection for plants or animals presently listed, it is advisable to contact the country or countries or origin prior to this action. Many of the species or taxa on the present lists were placed there at the request of countries which may not be represented at the Conference. The information from countries of origin and from the Secretariat should be made available to the Parties for examination in a written form prior to action by the Conference.

Considering further that some species or taxa of plants and animals may be incorrectly placed on the present appendices, and that there are, fundamental practical problems of implementation of the present lists,

THE FIRST MEETING OF THE CONFERENCE OF THE PARTIES TO THE CONVENTION

Resolves that the appendices should be examined in their entirety, species by species, by a technical conference that could be held in the near future or by some other means.

RECOMMENDATIONS FOR IMPROVING THE EFFECTIVENESS OF THE CONVENTION

EXCHANGE OF HERBARIUM SPECIMENS

1. This working document, presented by the United Kingdom of Great Britain and Northern Ireland, aims to agree to

an international procedure in exempting herbarium specimens from the requirements of the Convention.

2. Paragraph 6 of Article VII of the Convention provides that the provisions of Articles III, IV and V shall not apply to the non-commercial loan, donation or exchange between scientists or scientific institutions registered by a Management Authority of their State, of herbarium specimens, other preserved, dried or embedded museum specimens, and live plant material which carry a label issued or approved by a Management Authority.

3. The United Kingdom expected the amount of exchange in most types of specimens to be very small and we proposed to issue licenses where appropriate. But the amount of exchange in herbarium specimens normally sent by post, is large and although already exempted from licensing in the UK, an internationally agreed exemption system would facilitate such exchanges.

4. We suggest that the best way would be to use existing Customs declaration forms (UK specimen attached as annex to the present document). The exporter would write on it in manuscript "CITES" (the acronym for the Convention), a description such as "herbarium specimens" and the code letter for his institution. Suitable code letters for all recognised botanical institutions in the world are already available in pages 303–354 of the 6th edition of the "Index Herbariorum" published by Costhoek, Scheltema and Holkema, Emmalaan 27, Utrecht, Netherlands in 1974 for the International Bureau for Plant Taxonomy and Nomenclature.

5. UK Customs and Post Office see no obvious objections to this idea, and Customs would be prepared to recognise such a label in place of an import or export license. But the exemption could not of course be operated unless there were general agreement among Parties. If Parties agree, the procedure outlined could be adopted.

Recommendations for Improving the Effectiveness of the Convention

The control of "readily recognisable parts and derivatives"

1. This working document, presented by the United Kingdom of Great Britain and Northern Ireland, aims to exchange information and ideas about readily recognisable parts and derivatives, with a view to greater consistency among Parties.

2. The Convention provides for the regulation of trade in whole living and dead animals and plants listed in Appendices I and II and their readily recognisable parts and derivatives. It was realized at the outset that determining which parts and derivatives were to be controlled would be a major problem in implementing the Convention; such has been the case in practice both in the United Kingdom and, so we understand, in other Party States.

3. The United Kingdom's approach to this problem, to date, can be broken down into a number of distinct steps, comprising:

(i) *Determination of which parts and derivatives of Convention species are readily recognisable.* A list was initially produced with the aid of scientific advice, of the parts and derivatives of Convention species which could be recognised by Customs Officers in the course of their normal control of imported goods, and which were either in trade or might enter into trade in the United Kingdom.

(ii) *Extension of controls to recognisable groups.* In certain cases the parts and derivatives of particular species could not be readily distinguished from those of othe species which are not in the Convention, but it was felt necessary to control the parts and derivatives of the endangered species. This was achieved by extending the controls to parts and derivatives of a group of species or to a group of products, including those in the group which are not in the Convention. Consequently all reptile skins, all spotted cat skins and spotted skins of certain other animals, all ivory (including tusks of the African elephant and of other animals and the teeth of all animals) and all tortoise shell is subject to a licensing requirement in the United Kingdom. The groups controlled have so far been based on the United Kingdom Customs Tariff headings, under the internationally agreed Brussels nomenclature, which are already familiar to Customs Officers and to traders. Applications for licenses for Appendices I and II species are considered according to the rules of the Convention, but licenses for all non-Convention species are granted readily. All applications for licenses are carefully checked and there is, of course, a back-up sampling and identification service available both to Customs and Excise and the Management Authorities.

(iii) *Concentration on major products.* The United Kingdom has adopted a policy of controlling only the major products of the species concerned, for which the animal would be killed, and not its by-products. This is because trade restrictions on major products would almost certainly make any trade in a by-product alone uneconomic. (If trade in ivory from the Indian elephant, for example, were banned, the species is unlikely to be hunted solely to produce umbrella stands from elephants' feet).

(iv) *Identification at species level.* The last step in finalising the United Kingdom controls was to ensure that where identification at species level is essential—for example to enforce the different Convention rules for Appendices I and II reptile skins—controls were only introduced in cases where an expert could make the necessary identification. Consequently the United Kingdom controls on reptile skins apply to all skins (whether fresh, salted, dried, pickled or limed), whether or not split, and all reptile leather, but they do not at present cover manufactured reptile products, which give rise to serious identification problems. To date, therefore, the United Kingdom has only restricted trade in a few manufactured goods, notably those from spotted-cat skins. We are, however, seriously considering extending these controls (and indeed those on primary products) wherever possible.

(v) *Goods marketed as derivatives of endangered species.* In certain cases where recognition at the point of importation present difficulties, the fact that goods intended for the retail market in the importing country are likely to be labelled and marketed as derivatives of endangered species may assist in their control. This arises in the case of some luxury items where the trade stands to gain substantially by disclosing the contents of the goods or where advertising the derivation of the products is necessary to make such trade economic. Control in such cases is facilitated by a Trade Descriptions Act in the United Kingdom which makes it an offence for traders to make false representations about goods on sale. These factors together may make it possible to exercise controls in cases where the criteria in the preceeding paragraphs do not necessarily apply. The prime example of this can be seen in the case of cloth containing at least some vicuna yarn. Although the percentage content of vicuna in a particular bale of cloth may be so low as to make its detection even by laboratory analysis extremely difficult, enforcement is assisted if the vendor calls the cloth "Vicuna." However, this aspect of control has its limitations. As with most new regulations, it may be difficult to establish whether the goods were imported before or after the restrictions came into force unless a check is first made on existing stocks and, of course, goods imported illegally could always be sold clandestinely to known customers.

U.S. Response

The United States accepted the invitation to attend the Special Working Session, and sent the following material to the Secretariat. This material does not represent the final positions that the United States will take at the session. Rather, it is information for the Secretariat to transmit to other parties in order that they might prepare for the session.

Programs, Materials, and Aids Used in Training Inspection Officers to Identify Wildlife

The first of a number of acts and treaties now enforced by the U.S. Fish and Wildlife Service addressing importations of wildlife was the Lacey Act which was enacted in 1900. The Lacey Act sought to control movement in interstate commerce of wildlife taken, transported, or sold in violation of State or Federal law. Later amendments further restricted the importation of wildlife from foreign countries when foreign law was violated. The first wildlife treaty between the United States and a foreign country was a bilateral treaty between the United States and Great Britain signing for Canada, to provide protection for migratory birds. This treaty was ratified in 1916 and implementing legislation was passed in 1918.

In the ensuing years, additional treaties have been negotiated, new laws enacted, regulations propagated, and present acts amended to further increase our international involvement.

The Convention on International Trade in Endangered Species of Wild Fauna and Flora is one of several international treaties involving the United States that are designed to protect wildlife. With the ratification of the Convention on International Trade in Endangered Species of Wild Fauna and Flora, and the passage of implementing legislation in the form of the Endangered Species Act of 1973, it was only natural that the Law Enforcement Division of the U.S. Fish and Wildlife Service be given primary enforcement responsibility for this legislation. The U.S. Fish and Wildlife Service, however, shares jurisdiction in the enforcement of this and other wildlife laws with several nonwildlife oriented law enforcement agencies within the United States. The principal agencies include: the U.S. Customs Service under the Department of the Treasury, the U.S. Department of Agriculture, and the U.S. Coast Guard.

A large percentage of the Agents and Inspectors of the U.S. Fish and Wildlife Service possess degrees in wildlife science, zoology, biology, or botany, while officers in those agencies such as the U.S. Coast Guard or Customs generally lack applied science credentials or background in these areas. Therefore, the U.S. Fish and Wildlife Service has developed a broad training program designed to provide a basic understanding of wildlife and wildlife identification to officers who have a biological background as well as to those officers who have no previous wildlife training.

The following is a summary of the various types of training provided to United States law enforcement officers in the field of wildlife law enforcement, particularly in the area of endangered species identification. It should be recognized at this point that endangered species training has not reached the level of sophistication which other training areas have, such as migratory bird identification, because of the relatively short period of time in which this country has been dealing in the area of endangered species.

Training provided to wildlife officers

The U.S. Fish and Wildlife Service currently employs several categories of either full-time or part-time law enforcement officers. These generally include Special Agents who are full-time criminal investigators employed by the Division of Law Enforcement, U.S. Fish and Wildlife Service, and are the most highly trained Federal wildlife law enforcement officers in the United States. Each Special Agent receives a 7-week training course in criminal investigation at the Federal Law Enforcement Training Center operated by the Department of the Treasury. In addition, each Special Agent must complete a 5-week Special Agent Basic Course provided by the U.S. Fish and Wildlife Service. During this basic course, the Special Agent is trained in all laws and regulations for which he is granted enforcement authority. Included in this training are detailed studies in the mechanisms of the Endangered Species Act of 1973, and a course in the identification of those endangered species most commonly encountered by law enforcement officers. This course includes training in the identification of the various cat skins, crocodilian skins, ivory and ivory products, the more common primates, and sea turtles and their respective products. The fundamental training aids used in this course consist of the actual endangered species products which have been seized and forfeited to the United States Government. Then, following Special Agent Basic School, each new Special Agent is assigned to a training station for 12 to 18 months of intensive on-the-job training. During this on-the-job training program, further emphasis is placed upon the identification of the more commonly encountered endangered species and endangered species products. This training is conducted by senior officers using the actual endangered species and endangered species products encountered in day-to-day law enforcement operations. This way, each Special Agent becomes more familiar with the methods of identifying those endangered species products which he is most likely to encounter during normal operations. For Special Agents who have completed on-the-job training and who are considered fully qualified law enforcement officers, periodic in-service training is conducted. A part of this training includes refresher courses in the identification of the more commonly encountered endangered species and their products. In addition, as new methods and techniques of identification are developed, these techniques are disseminated to all Special Agents through a Law Enforcement memorandum.

The next category of law enforcement officers within the U.S. Fish and Wildlife Service is that of the Wildlife Inspector. These officers are assigned to Customs ports of entry and have the primary task of inspecting and clearing wildlife shipments which are presented for importation or exportation. These officers are not generally granted authority to make arrests and therefore, do not receive the intensive law enforcement training which is received by Special Agents. However, they do attend a Wildlife Inspector training course and are familiarized with all U.S. laws restricting the importation or exportation of wildlife. As part of their training, they receive the same course in endangered species identification as that received by Special Agents. They also have intensive on-the-job training in the identification of endangered species and endangered species products. As with Special Agents, Wildlife Inspectors soon become able to identify between 75 and 90 percent of the endangered species and endangered species products which they encounter in their day-to-day operation.

The third category of law enforcement officers employed by the U.S. Fish and Wildlife Service includes all other employees of the Service to whom law enforcement authority is granted. These officers go by several titles, but are distinguished from Special Agents and Wildlife Inspectors by the fact that law enforcement is not their primary function. Law enforcement is considered a secondary activity in which they may engage in strictly on an opportunistic basis. These officers attend 3 weeks of intensive law enforcement training, which provides a basic background adequate for the performance of their law enforcement duties. Part of this training includes a basic course in endangered species identification. However, because these officers do not normally encounter endangered species or their products in their daily operation, they are instructed to contact the nearest Special Agent if any suspected endangered species violation is observed.

Officers employed by other Federal agencies

Several Federal agencies, other than the U.S. Fish and Wildlife Service, also have authority to enforce the Endangered Species Act. These include the U.S. Customs Service, U.S. Department of Agriculture, the U.S. Coast Guard, and the National Marine Fisheries Service. In addition to these agencies, officers of the U.S. Public Health Service and the U.S. Postal Service may also encounter situations involving violations of the Endangered Species Act. Rarely do some of these officers have any wildlife or biological background and only occasionally have these officers received any formal training in wildlife identification. Therefore, in cooperation with these agencies, the U.S. Fish and Wildlife Service has developed several types of training programs to assist these officers in recognizing and identifying endangered species and their products. When the opportunity arises, the U.S. Fish and Wildlife Service provides formal training in the prohibitions of the Endangered Species Act as well as endangered species identification to officers of these agencies. Such training is roughly equivalent to that given to the part-time law enforcement officers employed by the Service. This includes a general orientation to the laws and a basic course in identification. These officers do not have the time to devote to achieving and maintaining proficiency in wildlife identification; therefore, the goal of the Service is to acquaint them with general categories of wildlife which might be seen so that they may alert Special Agents or Wildlife Inspectors of the U.S. Fish and Wildlife Service if suspicious importations or exportations are encountered. For those officers who do not receive formal training in identification of wildlife, Service law enforcement officers provide informal on-the-job identification training at every opportunity. Generally, these sessions occur whenever a wildlife shipment containing an endangered species is encountered. Much of this training is based on a one-to-one

relationship developed between the Service officers and the officer of the nonwildlife agency. The effectiveness of such training is largely dependent upon the interest which can be instilled in the officer toward protecting the wildlife resource. Such interest is often directly related to the ability of the Service to respond to requests for assistance by other law enforcement agencies.

OTHER IDENTIFICATION/TRAINING METHODS AND PROGRAMS

In addition to the training programs described above, the U.S. Fish and Wildlife Service maintains a list of wildlife experts who may be called upon to provide identification services and, if necessary, testimony in those cases which are beyond the normal capability of the law enforcement officer. In many cases, this service is provided without charge by these experts in the interest of the wildlife resource. This list of experts includes curators of United States zoos, scientists employed by the Service and other Government agencies, and experts employed by private institutions. In addition, the Service is currently studying the possibility of establishing a forensic laboratory for the identification and analysis of wildlife and wildlife products. In the past, many of these experts have provided training in their field of expertise to law enforcement officers of the U.S. Fish and Wildlife Service. The Service has also on occasion provided training in endangered species identification to officers of several State wildlife law enforcement agencies. Generally, this training is based upon that training which is given to Service officers and is modified only to the extent needed to fulfill the requirements of the State agency.

SUMMARY

In summary, the U.S. Fish and Wildlife Service has developed several training programs for the identification of endangered species and endangered species products. These programs are tailored to meet the individual requirements of the law enforcement officers to whom they are given. However, much additional work needs to be done by the Service before its endangered species identification training reaches the level of competence which is achieved by the training it provides in other forms of wildlife identification. The biggest problem in achieving this level of competence involves the diversity of species covered by the Endangered Species Convention. However, if training is focused on those species having the greatest potential for commercial use, such problems could largely be overcome.

The U.S. Fish and Wildlife Service is presently compiling an inventory of forfeited wildlife products that may soon be made available to party countries for use as training or identification aids. The inventory includes such items as raw and finished products of ivory-bearing species, crocodiles, polar bears, a wide assortment of endangered Felidae, and sea turtles.

If a party country desires wildlife products in the aforementioned categories for use as training aids, please contact Chief, Division of Law Enforcement, P.O. Box 19183, U.S. Fish and Wildlife Service, Washington, D.C. 20036.

MANUALS, SAMPLES, AND OTHER MATERIALS USED BY INSPECTION OFFICERS TO IDENTIFY WILDLIFE

The Fish and Wildlife Service uses samples of material from wildlife as an identification aid (see the accompanying report on training of inspection officers). It also maintains a list of experts who may be called on to assist in identifying wildlife products. The list includes curators of United States zoos, scientists employed by the Service and other Government agencies, and experts employed by private institutions.

Law enforcement officers of the Service have various reference books at each port of entry to help them identify wildlife. However, the Service has no standard identification manual that can be used in enforcing the Convention.

GUIDELINES FOR THE PREPARATION AND SHIPMENT OF LIVE SPECIMENS

The United States presently has no detailed, comprehensive standards or regulations for the preparation and shipment of live wildlife or plants, which are intended to minimize the risk of injury, damage to health or cruel treatment. In this country, the legal basis for Federal regulation of animal care is the Act of August 23, 1966 (Pub. L. 89-544), commonly known as the Laboratory Animal Welfare Act, as amended by the Animal Welfare Act of 1970 (Pub. L. 91-579). (Copies of this legislation and its implementing regulations were attached. They are omitted in this reprinting of the material.)

The preparation of animals for shipment by zoos and wildlife dealers in this country is often guided by the standards of the International Air Transport Association. These standards do not have Federal endorsement and are strictly nongovernmental. However, they are the most detailed and specific guidelines available in the U.S.

The Fish and Wildlife Service recently held a public hearing on the subject of humane transport, and is reviewing the comments that were received. Several Federal agencies are concerned with the shipment of wildlife, but have not yet developed regulations to provide adequate guidelines.

The shipment of live plants is regulated by the U.S. Department of Agriculture. The primary goal of this regulation is to control the spread of plant pests and diseases. Consequently, any preparation that will minimize the risk of injury, damage to health or cruel treatment (if indeed the latter applies to plants) must be given secondary consideration. There are no Federal regulations that establish guidelines for humane transport of plants.

The Fish and Wildlife Service plans to assemble and present some detailed recommendations at the Special Working Session.

SPECIES IN APPENDICES I AND II THAT THE UNITED STATES WISHES TO CONSIDER FOR MOVEMENT TO A DIFFERENT APPENDIX

ANIMALS	
Mammals:	*Change recommended*
Mandrill (*Papio sphinx*)	From II to I.
Diana monkey (*Cercopithecus diana*)	Do.
Yellow-tailed wooley monkey (*Lagothrix flavicauda*)	Do.
Red-eared nose-spotted monkey (*Cercopithecus erythrotis*)	Do.
Fishes:	
Colorado squawfish (*Ptychocheilus lucius*)	Do.
Lake sturgeon (*Acipenser fulvescens*)	Do.
PLANTS	
Cactaceae	From II to I.
Ariocarpus agavoides	Do.
Ariocarpus scaphorostrus	Do.
Obregonia denegrii	Do.
Pelecyphora aselligormis	Do.
Aztekium ritteri	Do.
Echinocereus lindsayi	Do.
Lophophora williamsii	Do.
Encephalocarpus strobiliformis	Do.

REQUEST FOR INFORMATION

The Service is seeking information on each of the objectives of the session, in order to contribute effectively to the implementation of the Convention. Practical suggestions concerning the procedural issues and data on the biological and commercial status of species in the appendices are especially welcomed, and should be submitted in writing to the Federal Wildlife Permit Office by August 31, 1977.

An informal public meeting to exchange information and ideas concerning the session will be held at 9 a.m. on August 12, 1977, in Room 150, 1717 H Street NW., Washington, D.C.

Please note that the session is intended to be a meeting of experts in the fields of law enforcement, customs control, zoology, botany, and veterinary sciences. It is open to countries that are not parties to the Convention and to nongovernmental organizations. Organizations wishing to send observers should send requests to: The Secretariat, Convention on International Trade in Endangered Species of Wild Fauna and Flora, IUCN, 1110 Morges, Switzerland. A copy of each request should be sent to the Federal Wildlife Permit Office (see address above).

This notice was prepared by Dr. Richard L. Jachowski of the Federal Wildlife Permit Office.

Dated: August 4, 1977.

LYNN A. GREENWALT,
Director,
Fish and Wildlife Service.

[FR Doc.77-23028 Filed 8-9-77;8:45 am]

[50 CFR Part 32]

HUNTING

Arapaho National Wildlife Refuge, Colo.

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: Notice is hereby given that it is proposed to add Arapaho National Wildlife Refuge, Colo., to the lists of refuge areas open for the hunting of migratory game birds, upland game, and big game. The Director has determined that a harvestable surplus of game exists, that there is public demand for additional recreational opportunity, and that this action is compatible with the major purposes for which this refuge was established. The proposed hunting program will provide for the harvest of a renewable resource and for additional public recreational opportunity.

DATES: Comments must be received on or before September 15, 1977.

ADDRESS: Comments may be addressed to the Director, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Ralph H. Town, Division of National Wildlife Refuges, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone 202-343-4305.

SUPPLEMENTARY INFORMATION: Ralph H. Town is also the primary author of this proposed rule. Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), an environmental assessment has been prepared on the proposal, which is available for public inspection and copying at Room 2340, Department of the Interior, 18th and C Streets NW., Washington, D.C. 20240, or by mail, addressing the Director at the address given above. On the basis of this assessment, the Director has determined that this rulemaking does not constitute a major Federal action significantly affecting the human environment.

NOTE.—The U.S. Fish and Wildlife Service has also determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Accordingly, it is proposed to amend 50 CFR 32 by the addition of Arapaho National Wildlife to the following Sections:

§ 32.11 List of open areas: migratory game birds.

COLORADO

Arapaho National Wildlife Refuge.

§ 32.21 List of open areas: upland game.

COLORADO

Arapaho National Wildlife Refuge.

§ 32.31 List of open areas: big game.

COLORADO

Arapaho National Wildlife Refuge.

Dated: August 5, 1977.

LYNN A. GREENWALT,
Director, Fish and Wildlife Service.

EXPERT PANEL ON NITRITES AND NITROSAMINES

Correction in the Room Number for the Nitrites and Nirtosamines Meeting

Correction

In FR Doc. 77-22831 appearing on page 40007 in the issue for Monday, August 8, 1977, in the address in the second paragraph, 18th and Independence Avenue SW" should read "12th and Independence Avenue SW".

Forest Service

COUGAR LAKE WILDERNESS STUDY REPORT

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Cougar Lakes Wilderness Study Report, USDA-FS-DES (Adm) 77-04.

The environmental statement concerns a proposal for the future management of the Cougar Lakes Wilderness Study Area comprised of approximately 176,800 acres within the Gifford Pinchot and Snoqualmie National Forests in the counties of Lewis and Yakima in the State of Washington.

This draft environmental statement was transmitted to CEQ on August 4, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Building, Room 3210, 12th Street and Independence Avenue SW., Washington, D.C. 20013.

USDA, Forest Service, Pacific Northwest Region, 319 Southwest Pine Street, Portland, Oreg. 97204.

Wenatchee National Forest, P.O. Box 811, Wenatchee, Wash. 98801.

Gifford Pinchot National Forest, 500 West 12th Street, Vancouver, Wash. 98660.

Mount Baker-Snoqualmie National Forest, 1601 Second Avenue Building, Seattle, Wash. 98101.

A limited number of single copies are available upon request to John L. Rogers, Forest Supervisor, Wenatchee National Forest, P.O. Box 811, Wenatchee, Wash. 98801.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to John L. Rogers, Forest Supervisor, Wenatchee National Forest, P.O. Box 811, Wenatchee, Wash. 98801. Comments must be received by December 2, 1977, in order to be considered in the preparation of the final environamental statement.

EINAR L. ROGET,
Acting Deputy Chief.

PROPOSED RECONSTRUCTION OF THE BIG CREEK DAM IN THE SELWAY-BITTERROOT WILDERNESS WITH PROVISIONS FOR THE USE OF MOTORIZED EQUIPMENT

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Proposed Reconstruction of the Big Creek Dam in the Selway-Bitterroot Wilderness with Provisions for the Use of Motorized Equipment, Forest Service Report Number USDA-FS-R1(03)-FES-Adm-77-02.

The environmental statement concerns the proposed reconstruction of the existing Big Creek Dam located at the outlet of Big Creek Lakes in the Selway-Bitterroot Wilderness, Mont.

This final environmental statement was transmitted to CEQ on August 4, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA Forest Service, South Agriculture Building, Room 3210, 12th Street and Independence Avenue SW., Washington, DC. 20013.

USDA Forest Service, Northern Region, Federal Building, Missoula, Mont. 59807.

USDA Forrest Service, Bitterroot National Forest, 316 North Third Street, Hamilton, Mont. 59840.

A limited number of single copies are available upon request to:

USDA Forest Service, Bitterroot National Forest, 316 North Third Street, Hamilton, Mont. 59840.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

AUGUST 4, 1977.

ELMER L. ROGET,
Acting Deputy Chief.

SILVIES-MALHEUR PLANNING UNIT

Availability of Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a Draft Environmental Statement for the Silvies-Malheur Planning Unit Land Management Plant, USDA-FS-R6-DES(Adm)-77-6.

The environmental statement concerns a proposal to allocate some 956,850 acres of National Forest land in the Upper Malheur and Silvies River Basin to a pattern of land uses as follows:

It is proposed to establish two unroaded management units—Malheur River and the North Fork of the Malheur River (1 percent of the Planning Unit). Ten areas are proposed for resource production with fish and wildlife habitat emphasis (11 percent of the Planning Unit). All existing and two potential developed recreation sites, plus four potential impoundment sites will be maintained in their present state. The Stink Creek (Proposed) Research Natural Area will be maintained and protected until final designation. Visual quality will be managed over the entire Unit. Sensitivity Level One areas, however, are singled out because they have the greatest impact on outputs of the other resources (7 percent of the Planning Unit is in resource management with emphasis on visual quality). The majority of the Unit will be managed for optimum resource management with emphasis on timber and range under multiple use-sustained yield principles (81 percent of Planning Unit).

The final decision of the Monument Rock Unit will be delayed until the planning is completed on the Burnt-Powder Planning Unit of the Wallowa-Whitman National Forest.

The Draft Environmental Statement was transmitted to CEQ on August 3, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Building, Room 3210, 12th Street and Independence Avenue, S.W., Washington, D.C. 20250.

USDA, Forest Service, Pacific Northwest Region, 319 S.W. Pine Street, Portland, Oregon 97204.

USDA, Forest Service, Malheur National Forest, 139 N.E. Dayton Street, John Day, Oregon 97845.

USDA, Forest Service, Ochoco National Forest Federal Building, Prineville, Oregon 97754.

USDA, Forest Service, Wallowa-Whitman National Forest, Federal Building, Baker, Oregon 97814.

A limited number of single copies is available upon request to Forest Supervisor Dan E. Williams, Malheur National Forest, 139 N.E. Dayton Street, John Day, Oregon 97845.

Copies of the environmental statement have been sent to various Federal, State and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from the State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor Dan E. Williams, Malheur National Forest, 139 N.E. Dayton Street, John Day, Oregon 97845. Comments must be received by October 3, 1977, in order to be considered in the preparation of the Final Environmental Statement.

CURTIS L. SWANSON,
Regional Environmental Coordinator Planning, Programing and Budgeting.

AUGUST 3, 1977.

Office of the Secretary

COOPERATIVE FORESTRY RESEARCH ADVISORY COMMITTEE COOPERATIVE FORESTRY RESEARCH-ADVISORY BOARD

Intent To Re-establish and Provisional Notice of Meeting

Notice is hereby given that the Secretary of Agriculture proposes to re-establish the Cooperative Forestry Research Advisory Committee (Committee) for the purpose of advising the Secretary and other officials on all aspects of the administration of the Cooperative Forestry Research Program (also known as the McIntire-Stennis Program) established by Pub. L. 87-788. The Secretary has determined that re-establishment of this Committee is in the public interest in connection with the duties imposed on the Department by Law.

The Chairman of this Committee will be the Assistant Secretary for Conservation, Research and Education, U.S. Department of Agriculture.

This Committee will report directly to the Secretary. The Committee will meet annually at the call of the Chairman and will terminate two years from the date of its establishment.

This notice is given in compliance with the Federal Advisory Committee Act (Pub. L. 92-463). Views and comments of interested persons shall be made in writing and must be received by the Assistant Secretary for Conservation, Research and Education, USDA, Room 212-A, Administration Building, U.S. Department of Agriculture, Washington, D.C. 20250, on or before August 22, 1977, to be certain of consideration.

All written submissions made pursuant to this notice will be available for public inspection at the Office of the Assistant Secretary for Conservation, Research and Education during regular business hours (7 CFR 1.27(b)).

If the Committee is established and a charter timely filed, the Cooperative Forestry Research Advisory Board (Board) and the Committee will meet August 24-26, 1977, in Orono, Maine, beginning at 8:30 a.m., Nutting Hall, University of Maine.

The meetings are open to the public and will be held in Nutting Hall on August 24 and 26. A field trip is scheduled for August 25. The Board, meeting separately in Room 203, will consider recommenations for the allocation of research funds.

The Committee, meeting in Room 204, will evaluate forestry research requirements and make suggestions for cooperative research activities.

In joint session, in Room 204, the Board and Committee will review McIntire-Stennis research accomplishments and evaluate progress in planning systems to achieve coordinated, comprehensive forestry research programs.

The names of Board and Committee members and agenda are available upon request to the recording secretary of the Board, R. J. Aldrich, USDA, CSRS, Washington, D.C., 20250, or the recording secretary of the Committee, J. D. Sullivan, CSRS, Washington, D.C., 20250. Written statements may be filed with the Committee before or after the meeting.

Dated: August 5, 1977.

HOWARD W. HJORT,
Director of Economics, Policy Analysis and Budget.

Chicago-Midway Low-Fare Route Proceeding; Order on Reconsideration

AUGUST 2, 1977.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 2nd day of August, 1977

The Chicago-Midway Low-Fare Route Proceeding was instituted by Order 76-12-149, December 28, 1976, and its scope was framed, after comments were received from interested persons, by Order 77-5-81, May 17, 1977. Our principal rulings in the latter order were: (1) That only the six largest Midway markets would be in issue;[1] (2) that additional authority at O'Hare Airport would not be considered; (3) that the proceeding would not exclude applicants who did not propose low-fare service; (4) that the impact of granting any low-fare applications upon the standards and structure of the Domestic Passenger Fare Investigation (DPFI) should be explored, even though the *DPFI* would not itself be relitigated; and (5) that no procedural deadlines would be imposed though the case should be conducted as expeditiously as possible.

Petitions for reconsideration of several of these rulings have been filed by Midway Airlines, Midway (Southwest) Airway Co., Wright Air Lines, United Air Lines, the United States Department of Transportation (DOT), the City of Chicago and the Chicago Association of Commerce and Industry, the Louisville and Jefferson County Air Board, and the Iowa Department of Transportation. Answers to one or more of these pleadings were submitted by American Airlines, Trans World Airlines, Midway (Southwest) and the Cincinnati Parties. Finally, Allegheny Airlines has filed an application and motion to consolidate, which has been answered by Midway (Southwest) and North Central Airlines.

[1] The 15 markets proposed for inclusion were, in order of decreasing size, Minneapolis-St. Paul, Detroit, St. Louis, Cleveland, Kansas City, Pittsburgh, Cincinnati, Columbus, Indianapolis, Memphis, Des Moines, Louisville, Omaha, Dayton and Buffalo.

The Louisville and Iowa petitions were accompanied by motions for leave to file late. Good cause having been shown, these motions are granted.

[2] Allegheny requests nonstop authority in the five largest Midway markets in which authority is not now held. The carrier had previously applied in this case under the name of a subsidiary, Chicago Airlines. This new application is discussed below.

SUMMARY OF PETITIONS AND ANSWERS

1. DPFI ISSUES

Midway Airlines, Midway (Southwest) and DOT again contend that DPFI issues should be excluded from this proceeding. They argue that the case has become much more complicated than it need be and that expeditious processing will be impossible if the parties must explore all the DPFI ramifications. Midway (Southwest) and DOT recommend that DPFI issues simply be eliminated as not relevant Midway suggests that the fare proposals can be implemented through exemptions from DPFI requirements. In their answers, American and TWA maintain that rate issues play a crucial role in the case and must be aired thoroughly.

2. NUMBER OF MARKETS

Our determination to limit the case to the six largest Chicago markets is challenged by Midway (Southwest), Wright, Louisville and Iowa. Midway (Southwest) contends that the potential number of single plane markets was vastly overestimated in our prior order and that, as a practical matter, a maximum of 65 markets will need to be analyzed. The proponents of market expansion argue that the smaller Midway markets are the most in need of additional service and are underdeveloped; therefore, they reason, that the smaller markets will grow much more dramatically under the stimulus of new, low-fare service. This contention is supported by Cincinnati in its answer but opposed by American and TWA, who see the limitation to six markets as reasonable.

3. PROCEDURES

Midway, Midway (Southwest) and DOT want the Board to set firm dates for the issuance of the initial decision and the Board's final decision. They see no reason why the case cannot be completed within one year; they urge the Board to signify its concurrence by publishing projected dates. Chicago also advocates expedition but would omit the initial decision and have the administrative law judge certify the record to the Board pursuant to Rule 22(d) of the Rules of Practice. Because of the uncertain future of Midway Airport, Chicago states that it is necessary to know the Board's decision in this case by mid-1978. Chicago's petition is opposed by TWA.

4. CONSOLIDATION

Midway (Southwest) and DOT oppose consolidation of applications that are not predicated upon low-fare service. The consolidation of competing applications lacking this feature they view as unnecessary and as contributing importantly to delay and complexity.[4]

DISPOSITION OF THE PETITIONS

The Board has carefully evaluated the petitions for reconsideration and the premises of Order 77-5-81. It has become clear that, despite our intentions, this case would be far too protracted, and the evidentiary record would be far more extensive than necessary, unless it is restructured substantially; this can and must be done without compromising the Board's ability to reach a final decision on the record. We have also determined that the public interest requires a prompt disposition of this proceeding; we therefore commit ourselves to reaching a decision within 12 months.

This proceeding is unique for several reasons. First, the Board is under a statutory mandate to develop "as promptly as possible" the use of Midway Airport in order to relieve air traffic congestion at O'Hare Airport.[5] Second, the City of Chicago is facing a deadline on its decision whether to renew its lease for Midway Airport. Third, this case involves applications for new and innovative low-price services which call for prompt attention. Fourth, the case involves, in part applications for initial licenses by new airlines. Finally, it raises the possibility of substantial shifts of intercity traffic from surface to air.

In order to achieve the required degree of expedition, we have made three major decisions. First, we have decided to exclude consideration of the DPFI from the case. While we reject the arguments of some parties that the DPFI is irrelevant, we do believe that an alternative approach is available to deal with rates issues. Second, we will not expand the number of markets to be considered. Third, we have determined that the record will be certified directly to the Board at the end of the hearing, bypassing an initial decision.

1. CONSIDERATION OF THE DPFI

Contrary to the contentions of Midway, Midway (Southwest) and the DOT, the relationship between the various low-fare proposals in this investigation and the DPFI cannot be ignored. The institution of the proposed services will undoubtedly have ratemaking implications not only in these markets but in other markets as well, and may ultimately require some modification of our DPFI ratemaking standards and policies. Since our objective in order 77-5-81 was to strike a reasonable balance between the need to expedite this case and the need to obtain a fully developed record, we decided to limit the rate issues to an examination of the implications for the DPFI of the rate issues raised here, as opposed to a relitigation of our DPFI findings.

However, we are sympathetic to the argument that even consideration of these DPFI-related issues would complicate this route proceeding and delay its completion. As we announced in our order approving TWA's new low-fare service, "Super Coach,"[6] we intend to institute a rulemaking proceeding in which we will explore the relationship between the DPFI and low-fare services. The same DPFI-related questions in issue in this case will be examined in the rulemaking proceeding, so it will no longer be necessary to consider these issues here. Therefore, we are severing the DPFI-related issues from this case, including all issues under sections 404 and 1002 of the Act. We expect the rulemaking to move forward rapidly, and to be completed in advance of any decision in this case.[7]

2. NUMBER OF MARKETS

There is a clear trade-off between the number of markets included in the case and the amount of resources necessary to process it in 12 months. We have determined that the public benefits of adding additional markets are not as great as the public benefits of reaching an early decision. The Board could not process the proposals for 15 direct markets within a one-year time period without committing practically all of its most experienced staff to the Midway proceeding, which would substantially delay other route cases. On the other hand, if we were to commit to this case only the resources we could spare without seriously interfering with our other responsibilities, the case could not be completed within anything close to 12 months if all the markets were included.

In making the very difficult decision to limit the number of markets, we considered the fact that once the very fundamental issues involved are litigated in this case, subsequent low-fare cases, if any, both in Chicago markets and throughout the rest of the country, should be much less complicated to process. Our speedy resolution of these issues should have benefits extending far beyond the Midwest region. Thus we find that it is in the national interest to process this case promptly; accordingly, the scope must continue to be limited to six markets.

3. PROCEDURES

After careful consideration, we have determined that the most effective way to reach an early decision in this case is to have the record directly certified by the administrative law judge to the Board following the hearing, under section 302.29 of the Board's Procedural Regulations. In this way, we will be able to issue a tentative decision within 12 months. A notice setting a date for prehearing conference will be issued promptly and the staff's proposed statement of issues and requests for evidence will be revised and recirculated.

4. CONSOLIDATION

In Order 77-5-81, at 8, we said that "as a matter of discretion the Board has determined to grant consolidation of all competing applications and not limit the scope of the proceeding by imposing a pretrial low-fare restriction." DOT and Midway (Southwest) have asked us to reverse that ruling, claiming that consolidation is not legally required and will contribute to delay and complexity. We disagree and will deny these requests.

Although this will be a leading case in determining whether new entry should be granted on the basis of offers of lower fares, it is also concerned with the revitalization of Midway Airport. The Board wishes to hear the applications of all carriers willing to provide service at Midway, even at existing fare levels. This proceeding is an appropriate forum in which to do so. We wish to do so, also, in order to avoid the possibility of judicial challenge on the ground that certificating one or more new low-fare carriers would economically preclude the grant of future applications proposing normal fare service. Consolidation may make the proceeding more complex; but it need not cause untoward delay, if all the applicants and intervenors adhere to the principles set forth at pages 8 and 9 of Order 77-5-81.

Turning to Allegheny's motion to consolidate its application in Docket 31012, we are concerned that Allegheny did not offer to withdraw the application of Chicago Airlines in Docket 30407 contingent upon consolidation of its application in Docket 31012. If we accept Allegheny's explanation that it believed the case would be limited to low-fare applications, granting the motion would place the carrier in a position of competing against its wholly-owned subsidiary, Chicago Airlines, for new authority. It would also, we believe, afford Allegheny an advantage over all other applicants. Finally, allowing this kind of multiple pleading would contravene proper administrative practice. We have, therefore, decided to grant consolidation of the application in Docket 31012 and to dismiss the one in Docket 30407. Should Allegheny object to this disposition, it may file a petition for reconsideration under Rule 37. The petition must contain a complete justification, with administrative and judicial citation, if Allegheny wishes to prosecute both applications.

SUMMARY OF THE SCOPE

In order to avoid confusion at subsequent stages of this proceeding, we summarize in this section the operative rulings in this order and in Order 77-5-81.

The primary issue is whether the public convenience and necessity require the certification of an additional carrier or carriers to provide nonstop service between the terminal point Chicago (Midway Airport), on the one hand, and the coterminal points Cleveland, Detroit, Kansas City, Minneapolis St. Paul, Pittsburgh, and or St. Louis, on the other hand. If so, which applicant or applicants should be selected, what should be the duration of the authority, and what terms, conditions, and limitations, if any, should be attached to the authority. The issues include whether a term or condition should be placed in any certificate awarded to a carrier selected on the basis of its offer of lower fares assuring that lower fares will in fact be provided. We wish to consider also whether whatever authority we confer ought to be permissive and whether authority ought to be awarded to more than one applicant in any market.

Any authority granted shall be ineligible for federal subsidy.

New authority at Chicago's O'Hare International Airport shall not be in issue.

Mandatory joint fares (DPFI–Phase 4) between the points in issue and any other certificated point shall not be considered. There is no pretrial restriction precluding an applicant from offering through fares over Midway Airport which are less than the sum of the local fares. (E.g., if Pittsburgh-Midway-St. Louis service is proposed, either single plane or on-line connecting, a through fare lower than the sum of the Pittsburgh-Midway and Midway-St. Louis fares may be proposed.)

Section 404 and section 1002 issues will not be considered in this investigation.

The effect that the proposed low fares will have on traffic in the markets in issue and in other markets will be considered matters bearing on the public convenience and necessity.

Control and interlocking relationships that may arise if certificate authority is awarded to Midway (Southwest) should be examined.[8]

There is no pretrial restriction excluding proposals for route authority at DPFI fare levels. We consider the offer of lower fares, however, an important decisional factor in assessing the public convenience and necessity and the public interest.

Accordingly, it is ordered that:

1. Ordering paragraph (1) of Order 77-5-81 be amended to read as follows:

"1. This proceeding is instituted pursuant to the Federal Aviation Act of 1958, as amended, particularly sections 204, 401, 408, 409 and 416(b). The primary issues in this proceeding are: whether the public convenience and necessity require the certification of an additional carrier or carriers to engage in air transportation of persons, property and mail between the terminal point Chicago, Ill. (to be served through Midway Airport), and the coterminal points Cleveland, Ohio, Detroit, Mich., Kansas City and St. Louis, Mo., Minneapolis St. Paul, Minn., and/or Pittsburgh, Pa., if so, what should be the duration of any authority awarded; and, if so, what terms, conditions and limitations should be placed on such authority."[9]

2. The application of Allegheny Airlines, Inc., Docket 31012, be consolidated into Docket 30277;

3. The applications of Chicago Airlines, Inc., Docket 30407, and Allegheny Airlines, Inc. and Chicago Airlines, Inc., Docket 30443, which were consolidated into Docket 30277 by ordering paragraphs (3) and (4) of Order 77-5-81, be dismissed;

4. To the extent that they are not granted in this order, all petitions for reconsideration, motions and requests in response to Order 77-5-81 be denied; and

5. The motions of the Louisville and Jefferson County Air Board and the Iowa Department of Transportation for leave to file petitions for reconsideration be granted.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-23071 Filed 8-9-77;8:45 am]

[Docket 30277]

CHICAGO-MIDWAY LOW-FARE ROUTE PROCEEDING

Prehearing Conference

Notice is hereby given that a prehearing conference in the above-entitled matter is assigned to be held on August 30, 1977, at 9:30 a.m. (local time), in Room 1003, Hearing Room A, Universal North Building, 1875 Connecticut Avenue NW., Washington, D.C., before Administrative Law Judge Greer M. Murphy.

In order to facilitate the conduct of the conference, parties are instructed to submit one copy to each party and six copies to the Judge of (1) proposed statements of issues; (2) proposed stipulations; (3) proposed requests for information and for evidence; (4) statements of positions; and (5) proposed procedural dates. The Bureau of Operating Rights will circulate its material on or before August 12, 1977, and the other parties on or before August 24, 1977. The submissions of the other parties shall be limited to points on which they differ with the Bureau of Operating Rights, and shall follow the numbering and lettering used by the Bureau to facilitate cross-referencing.

All Members concurred.

---

[4] Certain other matters which have been raised by petitioners are not discussed specifically here. These matters have been fully considered but the Board has concluded that they do not present new or different facts warranting comment or changes in Order 77-5-81. The petition of United has not been discussed at all since it addresses itself only to the statement of issues appended to Order 77-5-81. This document was attached to the order for convenience but was not endorsed by the Board. United's objections should be addressed to the administrative law judge at the prehearing conference.

[5] 90 Stat. 1186, August 14, 1976.

[6] TWA Super Coach service will be offered in the Chicago-Los Angeles market at prices 37 percent below the normal coach fare level. It is based upon high seating density and the attainment of high load factors. See Order 77-7-29, July 11, 1977.

[7] We must emphasize that we are severing DPFI-related issues only. The question of the economic feasibility and public benefits of the proposed low-fare services, as well as the effect that these services may have on traffic stimulation and diversion, will still be considered as matters bearing on the public convenience and necessity.

[8] As noted above, the application of Chicago Airlines is being dismissed. If Allegheny decides to prosecute that application rather than the one filed in it's own name in Docket 31012, the control and interlocking relationships will be explored in accordance with Order 77-5-81, at 7.

[9] To the extent that the application of Midway (Southwest) Airway Co., Docket 30189, was not consolidated into Docket 30277, the remainder is dismissed.

Dated at Washington, D.C., August 4, 1977.

HENRY M. SWITKAY,
Acting Chief
Administrative Law Judge.

[Docket Nos. 31127 and 31162; Order 77-8-13]

DOMESTIC PASSENGER-FARE INCREASE PROPOSED BY VARIOUS CARRIERS

Order Dismissing Complaints

AUGUST 3, 1977.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 3rd day of August, 1977.

All trunkline and local service carriers propose, effective August 7–18, 1977, a general fare increase of 1.5 percent above the level of fares in effect before mid-July 1977 for transportation within the 48 contiguous States and the District of Columbia.[1] In addition, American Airlines, Inc. (American), Eastern Air Lines, Inc. (Eastern), Pan American World Airways, Inc. (Pan American), Trans World Airlines, Inc. (TWA), and Western Air Lines, Inc. (Western), propose a two-percent increase (an additional 0.5 percent) effective August 8–22, 1977.

In justification, the carriers allege that their proposals are consistent with the Board's ratemaking methodology, based on data for the year ended March 1977, as adjusted to the respective tariff-effective dates. A number of carriers have urged that the Board address the issue of anticipatory costs, and American and Western have submitted ROI projections to the mid-point of the quarter following the increase, in this case September 30, 1977.

The National Passenger Traffic Association (NPTA) has filed complaints stating that, in light of the recent 0.7-percent increase, no reasonable basis exists for a further increase as soon as August. NPTA further alleges that application of a cost-inflation factor beyond the tariff-effective date will result in overcharges to the public in periods of a decelerating trend in the rate of inflation.

Upon consideration of the proposals, the complaints and answers, and all relevant matters, the Board finds that the complaints do not set forth sufficient facts to warrant investigation and consequently the requests for suspension will be denied and the complaints dismissed.

Based upon data for the year ended March 1977, the industry's ratemaking ROI, adjusted for utilization, standard seating, the 55-percent load-factor standard, removal of discount fares, and annualization of past fare and cost increases to August 15 (the earliest tariff-effective date) is 10.2 percent.[2] Adjusting this ROI to reflect the proposed 1.5-percent increase produces a ratemaking ROI of 11.60 percent, well below the 12-percent standard. Adjustments to the same tariff-effective date to reflect the proposed 2.0-percent increase (in lieu of the 1.5-percent proposal, not compounded) raises the ROI to 12.07 percent. While this is above the standard, the deviation of 0.07 percent is too trivial to warrant suspension. In any event, it seems unlikely that the 2.0 percent increase will go into effect before September, since the proponents' major competitors have so far not filed to match, by which time inflation of costs will have reduced the ratemaking ROI to 11.85 percent.[3]

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404, and 1002.

It is ordered, That: 1. The complaints in Dockets 31127 and 31162 are hereby dismissed; and

2. Copies of this order be served upon all certificated scheduled carriers operating between points within the 48 contiguous States and the District of Columbia, and the National Passenger Traffic Association, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board: [4] [5]

PHYLLIS T. TAYLOR,
Secretary.

[Docket No. 29439; Order 77-7-162]

EASTERN AIR LINES, INC.

Order Setting Matter for Oral Argument

JULY 29, 1977.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 29th day of July, 1977.

In Docket 29439, Eastern Air Lines has requested that the Board authorize discussions between itself and other air carriers concerning what it has characterized as "possible agreements intended to bring about more efficient methods relating to * * * (the) * * * research, design and procurement of needed future commercial aircraft types." When it initially sought this discussion authority, Eastern indicated that the proposed discussions would include, inter alia, consideration of the establishment of an Air Transport Association procurement office, which would obtain carrier agreement "on the specifications and needs of the carriers for new aircraft."

In its initial pleading, Eastern submitted that the present generation of aircraft being flown by U.S. air carriers is rapidly becoming obsolete; that there is an urgent need for the development of a new aircraft type which is energy efficient and environmentally sound; that the cost to a single manufacturer to develop a new aircraft type may run as high as $1 billion; and that the manufacturers are unlikely to assume these costs unless there is a reasonable prospect of their finding a substantial market for the resulting aircraft.

Initially, Eastern's application was supported by Allegheny Airlines and Texas International Airlines.

By Order 76-8-134, August 25, 1976, the Board deferred action on Eastern's application and requested further comments. In taking this action, we noted that "decisions relating to the procurement of new or additional equipment by the carriers have traditionally been one of those sensitive competitive areas left to the discretion of individual airline management," and that we were concerned with the potential anticompetitive implications of both the proposed discussions and any agreements which might arise out of them. On the other hand, we noted that there was widespread concern about the need for aircraft which use fuel more efficiently and economically and which produce less noise and pollution emissions, and the enormous financial outlays which would be required to develop and manufacture such aircraft types.

Pursuant to Order 76-8-134, Eastern was instructed to more fully set out the specific items it believed warranted discussion; the nature of the circumstances which prompted it to request discussion authority; the reasons why the desired objectives of the proposed discussions could not be achieved through alternative, less anticompetitive means; and any other matters which would aid the Board in passing on its request. In addition, the Board indicated that it would entertain comments from other interested parties after Eastern had submitted its further filing.

Additional comments have been filed by Eastern and seven other air carriers [1] in support of the request for discussion authority. Another carrier, United Air Lines, has filed comments supporting the request for discussion authority insofar as the discussions would concern the research and design of new commercial aircraft.[2] On the other hand, two

[1] For most carriers this results in a net increase over present fares of 0.8 percent, since they put into effect a 0.7-percent increase on either July 18 or July 22, 1977.

[2] In the attached ROI analysis, the impact of the 0.7-percent increase authorized effective in mid-July is not shown as a past fare increase annualization (column 5) but is reflected in the annualization of the proposed 2.0-percent increase in the final column.

[3] In view of the differing proposed effective dates, and the fact that several carries propose either a 1.5- or 2.0-percent fare increase, we urge the carriers to make known their intentions as to both timing and the increase they propose to post as soon as possible in order to minimize public confusion.

[4] All Members concurred.

[5] Appendices filed as part of the original document.

[1] American Airlines, Trans World Airlines, Delta Air Lines, Northwest Airlines, Allegheny Airlines, Piedmont Aviation and Texas International Airlines. The comments which were filed by Delta Air Lines were accompanied by a motion for leave to file out of time, which shall be granted.

[2] United, however, is opposed to the single source or joint procurement of new commercial aircraft.

government agencies—the United States Department of Justice (DOJ) and the Council on Wage and Price Stability (the Council)—filed comments indicating opposition to a grant of discussion authority at the present time. No comments were filed by any of the major airframe or aircraft component manufacturers.

In its comments, and in further support of its request for discussion authority, Eastern contends that the U.S. air transportation industry is presently facing two major equipment problems, namely, (1) the need for the development of new aircraft for the 1980's with modest technological improvements; and (2) the need for the development of new aircraft for the 1990's with substantial evolutionary, and possibly revolutionary, advances in technology. With respect to the proposed 1980 generation of aircraft, Eastern submits that, altough the industry's requirement for these classes of aircraft is "widely recognized", and although there is no reason to doubt that the development of these aircraft is technically feasible, no such aircraft have been offered for sale or committed to production. Moreover, it says that there is some question as to whether the major U.S. aircraft manufacturers are capable of launching new 1980 aircraft given current circumstances. The circumstances which it alludes to, in its view, include: (1) The unimpressive financial condition and earning prospects of U.S. air carriers; (2) uncertainties over the future of continued economic regulation of airlines; (3) concern on the part of manufacturers over the threat of "market fragmentation" (i.e., the wasteful duplication of a single aircraft types); and (4) disenchantment on the part of the financial community with all of the above. Because of these circumstances, Eastern submits that the airlines are "in no position unilaterally, or in combinations of a limited number of carriers, to make the financial commitment needed for a manufacturer to launch a new aircraft program." In this regard, it notes that the cost of replacing current U.S. fleets with new 1980 aircraft through the 1980's has been estimated at some $45 billion, and that the aggregate net worth of the certificated U.S. scheduled air carriers is presently less than $4.5 billion.

Eastern does not believe the discussions it is proposing would be anticompetitive, but rather submits that the discussions will "stimulate competition in the design and development of several classes of new 1980 aircraft." It also submits that it is unaware of any alternative means for achieving the desired objectives of the proposed discussions; and that, in any event, it should not be required at the present time "to demonstrate the nonexistence of alternative, less anti-competitive approaches" in order to obtain authority to begin discussions.

In terms of a proposed agenda for the discussions, Eastern has listed three typical areas which it believes should be discussed; namely: (1) Organization Concept Development; (2) Aircraft Specification Development; and (3) Factory Contract Administration. More specifically, in addition to operating mechanics, in the area of organization concept development, Eastern believes the initial meeting should consider which airlines should be included in the discussions, what should be the respective roles of the Air Transport Association and the International Air Transport Association, and possible selections of consultants to assist in determining which technological advances will be attainable in a relevant time span. The purpose of the second topical area, aircraft specification development, Eastern submits, would be to look toward the "development of broad design goals with respect to the general classes of new generation aircraft that are deemed desirable in the reasonably near future." Eastern is of the view that this portion of the discussions should consider what contributions to fuel efficiency, environmental compatibility, and operating economy may be expected from new technology. Assuming consensus "on the need" for the development of new aircraft, it submits that the discussions should then turn to consideration of possible agreements relating to the standardization of specifications. Eastern states that the third topical area, factory contract administration, would be primarily concerned with the establishment of factory inspection procedures.

The comments which were filed by the seven air carriers in support of Eastern's request for discussion authority are essentially supportive in nature and provide little amplification of the problems associated with aircraft design, development, and procurement. Northwest, for instance, notes that inter-carrier exploration and consideration of technological factors could result in technological developments needed by the industry occurring in "a quicker and more responsive manner", and that the discussions would give an indication of "the size of demand" for various types of new technology.

In its comments, TWA submits that the proposed discussions, at least in their preliminary stages, would be primarily technical in nature, and, therefore, probably do not necessitate a grant of discussion authority.

In its comments, United supports Eastern's request for discussion authority insofar as the proposed discussions would concern matters relating to the research and design of new commercial aircraft, but it indicates that it is opposed to the single source or joint procurement of new commercial aircraft. United believes that the fundamental purpose of the discussions should be to establish a program "for objectively determining the optimum aircraft performance capabilities which will be technologically attainable in the next generation of transport aircraft, and the improvements in productivity and efficiency that can be achieved through technological advancement of the state of the aeronautical art." In United's view, these objectives can be best attained through the use of an independent expert technical consultant hired by the carriers on a shared-cost basis.

It is the position of DOJ that "the anticompetitive potential of the Eastern proposal is so broad" and "the alleged benefits so vague and insubstantial" that discussion authority should not be granted without a hearing. In essence, DOJ submits that the proposed discussions would adversely affect competition not only in air transportation but in other industries as well; that the discussions are as likely to slow innovation as to accelerate it; that Eastern's proposal has the potential for leading to a market structure in which a single buyer will confront a single seller; and that the primary benefit obtain from the discussions is "the quieter life" which would presumably follow from the elimination of competition in the purchase of new aircraft types. DOJ notes that it is not opposed to joint research, design, and procurement by competing firms where such activities do not substantially lessen competition or are justified by scale economies or other important public benefits. However, based on the present record, DOJ does not believe that the Board should authorize discussions which could lead to what it considers might be the monopsonistic development and procurement of new aircraft.

The Council is strongly opposed to a grant of discussion authority and submits that the Board should either deny Eastern's application or, alternatively, set the matter for a hearing, since it believes more substantial evidence is required should the Board consider authorizing the proposed discussions. It contends that both the proposed discussions and any possible agreements resulting therefrom concerning joint aircraft procurement would lessen competition, result in inefficiencies and increase infla-

Eastern responded to United's comments and specifically to its suggestion that the carriers consider hiring an independent consultant on a shared-cost basis. Essentially, Eastern believes that various research groups associated with the National Aeronautics and Space Administration, and the Air Transport Association, are capable of providing the necessary expertise, and that, therefore, there is no need to hire an outside consultant. Moreover, Eastern notes that the retention of an independent consultant could be duplicative of efforts already underway by the airlines themselves.

Eastern did not respond to United's statement indicating opposition to single source or joint procurement of new commercial aircraft. In its earlier comments, however, Eastern did state that, even though some carriers might be opposed to single source procurement, the discussions could still be valuable since they could result in uniform agreements on aircraft specifications and factory contract administration.

The reply which Eastern filed was accompanied by a motion to file an otherwise unauthorized document, which shall be granted

tion.[4] Moreover, it believes that competitive market forces can be depended upon to secure the development of an aircraft which would be suitable to the needs of the public and the industry. Also, it is concerned that, aside from the issue of joint aircraft procurement, the proposed discussions would offer an anticompetitive forum for the exchange of information concerning planned aircraft replacement, schedule changes, and marketing strategies.

Upon consideration of the present record in this proceeding, and all relevant facts, we have decided to set Eastern's application for oral argument. We continue to be concerned with the potential anticompetitive implications of both the talks Eastern has proposed and any possible agreements that may flow out of them. Moreover, the comments of Eastern and others have not provided sufficient clarification and detail in such areas as what types of information the participants to the proposed discussions would exchange, the nature of the circumstances which prompted Eastern to seek discussion authority, and why the objectives of the proposed discussions cannot be achieved through alternative, less anticompetitive means. We believe that an oral argument is a means to further explore these areas as well as the broader questions raised by Eastern's application concerning the problems the U.S. airline industry is likely to have in the coming years with respect to the design, development, and procurement of new commercial aircraft. We urge the entire airline industry, the major airframe and aircraft part manufacturers, and all other interested persons to take advantage of this opportunity to publicly develop their views on these matters.

With specific reference to Eastern's proposal, we would like the participants to the oral argument to address the following general issues:

1. Would a grant of discussion authority be in the public interest, and is such a grant mandated by a serious transportation need?;

2. What would be the severity of the potential anticompetitive implications of a grant of such authority?; and

3. Do any alternative, less anticompetitive means exist for achieving the desired objectives of the proposed discussions?

In addition, in preparing for the oral argument, we would like the participants to focus on the following questions as well.

1. Evaluate critically the implication of the request for discussions that the normal forces of competition among aircraft manufacturers and wholly independent purchase decisions by the individual carriers cannot be relied upon to produce aircraft suited to the industry's future needs;

2. Explain as precisely as possible how changes in the structure or the circumstances affecting the air transportation and airframe/engine manufacturing industries—domestic and foreign—justify (or do not justify) joint development and—if this is envisaged—procurement, when concerted action was not needed in previous generations. This should include an analysis of the role, past and prospective, of military research, development, and manufacturing facilities, and the changes, if any, in technological requirements, and how these bear on the case for joint action;

3. What advantages would joint research and development and, separately, joint procurement provide over individual efforts on both sides of the market? Would the joint effort (consider R&D and procurement separately) be open to all air carriers? Evaluate the danger that such an effort would undesirably cut down on the diversity of research and development efforts and of the kinds of aircraft developed. Would all aircraft manufacturers (existing and new, if any) participate in research, development, and procurement? Explain how such participation would work;

4. Evaluate the impact of the proposed joint efforts on competition—among aircraft manufacturers; among air carriers. Are there limited areas in which joint discussion can be authorized while avoiding a significant impairment of competition—e.g., research and design only; procurement only; factory contract administration only?; and

5. What would be the impact on the need for joint research, development, and/or procurement of a change in Federal airline regulatory policy in the direction of primary reliance on competition? If changed regulatory policy spurs the creation of new air carriers, would this enhance or reduce the anticompetitive effects of joint research, development, and procurement? Explain.

The participants to the oral argument are also welcome to address themselves to any other aspects or questions raised by the Eastern proposal.

A copy of this order will be served on all certificated route and supplemental air carriers, the Aerospace Industries Association, the three major U.S. airframe manufacturers—Boeing, Lockheed, and McDonnell Douglas—and parties of record. We request that those electing to participate in the oral argument file with the Board briefs, and/or statements of position, fourteen (14) days in advance of the date set for the oral argument.

Accordingly, it is ordered, That: 1. The application of Eastern Air Lines, Inc. in Docket 29439 for discussion authority be assigned for oral argument at a date to be set hereafter;

2. The participants to the oral argument shall file with the Board briefs, and/or statements of position, fourteen (14) days in advance of the oral argument; and

3. The motions of Delta Air Lines, Inc. to file late, and Eastern Air Lines, Inc. to file an otherwise unauthorized document be granted.

This order shall be served on all certificated route and supplemental air carriers, the Aerospace Industries Association, the Boeing Company, Lockheed Aircraft Corporation, McDonnell Douglas Corporation, and all parties of record.

In addition, this order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:[5]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-23072 Filed 8-9-77;8:45 am]

[Docket Nos. 26116; 26504; Agreements CAB 5044-A164; 24379; CAB 16874-A40; 12075-A5; Order 77-8-4]

MEMBERS OF THE AIR TRAFFIC CONFERENCE OF AMERICA

Order Dismissing Motions

AUGUST 1, 1977.

Issued under delegated authority.

Bon Voyage Travel (Bon Voyage), has filed motions to reopen the proceedings in the above-captioned dockets, as described more fully below.

By Order 75-6-41, June 9, 1975, the Board approved Agreements CAB 5044-A164 and CAB 24379 of the Air Traffic Conference of America (ATC) establishing a Travel Agent Testing Program. Under the terms of these agreements, all agencies seeking accreditation as ATC-approved agents are required to submit evidence that an owner, partner, officer, or manager of the agency is certified as having passed ATC's travel agency managerial examination, and that another employee with one year's ticketing and reservations experience has been certified as having passed ATC's travel agency technical examination. The approved testing program contained in these agreements applies to all agents regardless of prior business practices or history of operations, and as such, is applicable to presently accredited travel agencies, as well as prospective applicants. By its motion, Bon Voyage requests that the Board rescind its approval of Agreements CAB 5044-A164 and CAB 24379; reopen the proceeding for the purpose of reassessing the Board's position with respect to the grant of grandfather rights to currently accredited agents;[1] and thereafter condition approval of the agreements upon the grant of such grandfather rights to existing agents.

In its motion in Docket 26504 Bon Voyage requests that the Board modify the mechanized travel agency reporting procedures set forth in Agreements CAB 16874-A40 and CAB 12075-A5. These agreements, which were approved by Order 74-8-81, August 21, 1974, established an automated sales reporting system under which ATC-accredited travel agents are required to submit reports of ticket sales to ATC Area Settlement Banks on a weekly basis. According to Bon Voyage, such a requirement is burdensome to large agencies with a number of branch locations.[2] Thus the petitioner requests that these agreements be modified to reflect a ten-day reporting requirement for any agency with more than five branch offices, and a cut-off period for the gathering of sales data of five days prior to the due date of such reports.

Subsequent to the submission of these motions, Bon Voyage underwent bankruptcy proceedings in the United States Court, Northern District, Chicago (Docket No. 76B8014), and was placed into trusteeship. Since the time Bon Voyage was adjudicated bankrupt, the Board has not received any notice as to whether Bon Voyage's trustee intends to pursue the previously filed motions. Therefore, pursuant to authority duly delegated by the Board's regulations, 14 CFR 385.3, we intend to dismiss the motions in Docket 26116 and 26504, unless within 14 days Bon Voyage's trustee notifies the Board of its intention to pursue these matters.

Accordingly, *it is ordered*, That:

1. The motions of Bon Voyage Travel in Dockets 26116 and 26504 be dismissed, unless within 14 days after issuance of this order the trustee in bankruptcy of Bon Voyage Travel files a communication in the Board's Docket Section stating its intention to pursue the motions filed in Dockets 26116 and 26504; and

2. Except as indicated in the previous ordering paragraph, all other requests and motions in Dockets 26116 and 26504 be dismissed.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

---

[4] The Council states that its statutory mandate is to monitor inflationary activities in both the private and public sectors of the economy. Among other things, it notes it has been directed to study the effects of economic concentration and anticompetitive practices.

[5] All Members concurred.

[1] By the grant of "grandfather rights", travel agencies presently accredited by ATC would not be subject to these examination requirements.

[2] Bon Voyage is an ATC-accredited retail travel agency with headquarters in Des Plaines, Illinois, and operates 19 branch offices in the Midwest.

FOREIGN EXCESS PROPERTY

Proposal To Revise General Determination No. 1 (Revised)

Correction

In FR Doc. 77-22572, appearing at page 39693 in the issue of Friday, August 5, 1977, the following changes should be made:

1. The fifth line of the second full paragraph of column three on page 39693 should read, "publication in the FEDERAL REGISTER. The proposed provisions".

2. Between the fourth and fifth lines of "General Determination No. 1" on page 39693, third column, a line should be inserted reading, "country. Consequently, subject to the conditions of this".

DEPARTMENT OF DEFENSE

Defense Mapping Agency

DEFENSE MAPPING AGENCY HYDROGRAPHIC CENTER AND DEFENSE MAPPING AGENCY TOPOGRAPHIC CENTER CONSOLIDATION

Availability of Management Study and Negative Declaration

On 27 March 1977, VADM Shannon D. Cramer, Jr., USN, the Director, Defense Mapping Agency, Building 56, U.S. Naval Observatory, Washington, D.C. 20305, ordered the establishment of a Study Group under the Chairmanship of the DMA Comptroller, charged with the responsibility of developing an organization and management study of the feasibility and desirability of consolidating the operations of the Defense Mapping Agency Hydrographic Center (DMAHC) and the Defense Mapping Agency Topographic Center (DMATC). The Study Group completed its work and submitted its Consolidation Study to the Director, DMA, on 8 July 1977. On 5 August 1977, the Director, DMA, issued his determination, based upon the Consolidation Study, that, in view of the potential improvements in utilization of resources that will result from consolidation, the DMAHC (currently located in the Suitland Federal Center, Suitland, Prince Georges County, Md.) and the DMATC will be consolidated and collocated at Brookmont, Montgomery County, Maryland.

Notice is hereby given, pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and Department of Defense Regulation "Environmental Considerations in Department of Defense Action" (32 CFR Part 214), that an environmental impact statement is not being prepared for the proposed consolidation and collocation of the DMAHC and DMATC. The environmental assessment of this action indicates that this consolidation and collocation will not create any significant adverse impacts on the physical environment and that no significant controversy related to the natural environment is associated with this action. As a result of these findings, Vice Admiral Shannon D. Cramer, Jr., USN, the Director, Defense Mapping Agency, has determined that the preparation and review of an environmental impact statement is not required in this case.

This action concerns consolidation and collocation of the operations of the DMAHC and the DMATC at Brookmont, Montgomery County, Md.; the transfer to the consolidated Center of 29 civilian employees from the Defense Mapping Agency Aerospace Center, St. Louis, Mo.; and the removal from the consolidated Center of the U.S. Army Engineers Studies Group, to an, as yet, undetermined site.

The organization and management study, as well as the basic data developed during the environmental assessment are on file and may be reviewed by interested parties in the Facilities Engineering Office, HQ DMA, Building 56, U.S. Naval Observatory, Washington, D.C. 20305. A limited number of copies of the negative declaration are available from the same office to fill single copy requests.

The DMA invites public comment concerning the proposed consolidation action and this negative declaration. Interested persons are invited to submit written data, views and arguments to HQ DMA, ATTN: Facilities Engineering Office, Building 56, U.S. Naval Observatory, Washington, D.C. 20305, on or before September 9, 1977. Administrative action on implementation of the proposal will be deferred for thirty (30) days, until October 11, 1977, at which time implementation will begin unless comments are received which result in a contrary determination.

B. C. WIMBERLY,
Counsel.

MAURICE W. ROCHE,
Director, Correspondence and Directives OASD (Comptroller).

Office of the Secretary

DEFENSE SCIENCE BOARD TASK FORCE ON "ORGANIZATION OF TEST AND EVALUATION IN THE OFFICE OF THE SECRETARY OF DEFENSE"

Meeting

The Defense Science Board Task Force on "Organization of Test and Evaluation in the Office of the Secretary of Defense" will meet in closed session on 25-26 August 1977 at the Pentagon.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Director of Defense Research and Engineer[illegible] on overall research and engineering, and to provide long range guidance in these areas to the Department of Defense.

The Task Force will continue to examine, as part of the reorganization of the

Office of the Secretary of Defense, the organization and the functional responsibilities associated with the mission of Test and Evaluation, now the responsibility of the Deputy Director for Test and Evaluation, Office of the Director of Defense Research and Engineering. The discussion will involve classified information of national security concern throughout.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Task Force meeting concerns matters listed in Section 552b(c) of Title 5 of the United State Code, specifically Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

Dated: August 2, 1977.

MAURICE W. ROCHE,
Director, Correspondence and Directives, OASD (Comptroller).

[FR Doc.77-22958 Filed 8-10-77;8:45 am]

WAGE COMMITTEE

Closed Meetings

Pursuant to the provisions of section 10 of Public Law 92-463, the Federal Advisory Committee Act, effective January 5, 1973, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, October 4, 1977 Tuesday, October 11, 1977; Tuesday, October 18, 1977; and Tuesday, October 25, 1977 at 9:45 a.m. in Room 1E801, The Pentagon, Washington, D.C.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) concerning all matters involved in the development and authorization of wage schedules for Federal prevailing rate employees pursuant to Public Law 92-392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Public Law 92-463, the Federal Advisory Committee Act, meetings may be closed to the public when they are "concerned with matters listed in section 552b. of Title 5, United States Code." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency," (5 USC 552b.(c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 USC 552b.(c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy) hereby determines that all portions of the meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 USC 552 b. (c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 USC 552b. (4)).

However, members of the public who may wish to do so are invited to submit material in writing to the Chairman concerning matters believed to be deserving of the Committee's attention. Additional information concerning this meeting may be obtained by contacting the Chairman, Department of Defense Wage Committee, Room 3D281, The Pentagon, Washington, D.C.

Dated: August 2, 1977.

MAURICE W. ROCHE,
Director Correspondence and Directives OASD (Comptroller).

ENVIRONMENTAL PROTECTION AGENCY

[FRL 775-1]

NEW YORK DRINKING WATER

Approval of State Application for Primary Enforcement Responsibility

In accordance with the provisions of Section 1413 of the Safe Drinking Water Act (SDWA), (88 Stat. 1661; 42 U.S.C. 300f et seq.) and 40 CFR 142 (41 FR 918, January 20,1976), Dr. Robert P. Whalen, Commissioner of the New York State Department of Health, has submitted an application to assume primary enforcement responsibility under the SDWA to the Environmental Protection Agency (EPA) for approval.

Notice is hereby given that the Regional Administrator, EPA, Region II has approved this application for primary enforcement authority, to become effective July 22, 1977. This action is based on a thorough evaluation of the State's water supply supervision program in relation to the requirements of 40 CFR 142.10, including the adoption and implementation of:

(1) State primary drinking water regulations; (2) an inventory of public water systems; (3) a systematic program of sanitary surveys; (4) a State program for certification of laboratories; (5) State laboratory facilities certified by EPA; (6) a plan review program; (7) adequate statutory or regulatory enforcement authority; (8) record-keeping and reporting procedures; (9) a program for issuing variances and exemptions; (10) a plan for providing safe drinking water under emergency circumstances.

This evaluation has shown that the program which will be carried out by the State Health Department fulfills all requirements for obtaining primary enforcement authority.

Any interested person may request a public hearing to consider the Regional Administrator's determination on or before September 9, 1977. If a public hearing is requested and granted, this determination shall not become effective until such time, following the hearing, as the Regional Administrator issues an order affirming or rescinding the determination. Requests for hearing shall be addressed to:

Gerald M. Hansler, P.E., Regional Administrator, Region II, U.S. Environmental Protection Agency, Room 1009, 26 Federal Plaza, New York, New York 10007.

and shall include the following information:

(1) The name, address, and telephone number of the individual organization, or other entity requesting a hearing.

(2) A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such hearing.

(3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

A complete copy of the State Health Departments application for primary enforcement responsibility is available for public inspection during normal business hours at the Office of the Regional Administrator and at the following location in New York:

Joseph Salvato, Acting Assistant Commissioner, New York State Department of Health, Empire State Plaza, Tower Bldg., 4th Floor, Albany, New York 12237.

Dated: June 29, 1977.

GERALD M. HANSLER,
Regional Administrator, Region II.

[FR Doc.77-22967 Filed 8-9-77;8:45 am]

[FRL 775-3]

VIRGINIA

Determination of Primary Enforcement Responsibility

Public notice is hereby given in accordance with the provisions of Section 1413 of the Safe Drinking Water Act (Pub. L. 93-523, December 16, 1974) and 40 CFR 142 the National Interim Primary Drinking Water Regulations (41 FR 2918, January 20, 1976), that Mr. Oscar H. Adams, Director of the Division of Engineering of the Virginia Department of Health, has submitted an application requesting primary enforcement responsibility under the Safe Drinking Water Act to the Environmental Protection Agency (EPA) Region III office for concurrence and approval.

Alvin R. Morris, Ph. D., Acting Regional Administrator for EPA Region III, has approved the application from the Commonwealth of Virginia for primary enforcement responsibility, which shall become effective on September 9, 1977. This determination was concluded after a thorough evaluation of Virginia's water supply supervision program in relation to the requirements of 40 CFR 142.10 including the adoption and implementation of:

1. Drinking water standards and regulations.
2. An inventory of public water systems.
3. A systematic program for conducting sanitary surveys.
4. The establishment and maintenance of a program for the certification of laboratories.
5. Laboratory facilities certified by EPA.
6. A plan review program to assure the proper design and construction of new or modified public water systems.
7. Adequate statutory and regulatory authority.
8. Authority to sue in courts and to enjoin continuing violations.
9. Authority permitting right of entry and inspection of public water systems.
10. Authority to require suppliers of water to keep appropriate records and make appropriate reports to the State.
11. Authority to require public notification of violations.
12. Authority to assess civil or criminal penalties for violation of State regulations.
13. Record keeping and reporting procedures.
14. A system for issuing variances and exemptions.
15. Adoption of a plan for the provisions of safe drinking water under emergency circumstances.

Virginia's water supply supervision program, as presented and evaluated on the above noted points, has indicated that it is fully capable of carrying out all the areas required to attain primary enforcement responsibility.

Any interested parties are invited to submit written comments on this determination and may request a public hearing on or before September 9, 1977. If a public hearing is requested and granted, this determination shall not become effective until such time following the hearing, that the Regional Administrator issues an order affirming or rescinding the determination.

Requests for a public hearing shall be addressed to:

Alvin R. Morris, Ph.D., Acting Regional Administrator, Region III—3RA00, 6th and Walnut Streets, Philadelphia, Pa. 19106.

A request for public hearing shall include the following information:

1. The name, address, and telephone number of the individual(s), organization, or other entity requesting a hearing.
2. A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such a hearing.
3. The signature of the individual(s) making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made within thirty (30) days after this notice a public hearing will be held. The Regional Administrator will give further notice in the FEDERAL REGISTER and in a newspaper or newspapers of general circulation in the Commonwealth of Virginia of any hearing to be held pursuant to a request submitted by an interested person, or on his own motion. Notice of the hearing shall be given not less than fifteen (15) days prior to the time scheduled for the hearing. In addition to publication as described above, notice will be sent to the person requesting a hearing and to the Commonwealth. Notice of the hearing will include a statement of the purpose of the hearing, information regarding the time and location for the hearing, and the address and telephone number of an office at which interested persons may obtain further information concerning the hearing.

After receiving the record of the hearing the Regional Administrator will issue an order affirming or rescinding his determination. If the determination is affirmed, it shall become effective as of the date of this order.

If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become effective on September 9, 1977.

Please bring this notice to the attention of any persons known by you to have an interest in this determination.

A complete copy of Virginia's application for primary enforcement responsibility is available for public inspection during normal business hours at the office of the Regional Administrator and at the following location in Virginia:

Commonwealth of Virginia, Department of Health, Bureau of Water Supply Engineering, 109 Governor Street, Richmond, Va 23219.

Dated: June 23, 1977.

GREENE A. JONES,
Acting Regional Administrator, Region III, Environmental Protection Agency.

[FR Doc.77-22968 Filed 8-9-77;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[FCC 77-462 CSC-140 (CO0002)]

CABLE TV OF DURANGO, INC.

Memorandum Opinion and Order Regarding Show Cause Order

Adopted: June 30, 1977.

Released: July 28, 1977.

1. On March 16, 1976, XYZ Television, Inc. (XYZ), licensee of Station KREZ-TV (CBS/ABC/NBC, Channel 6), Durango, Colorado, filed the above-captioned "Request for Issuance of Cease and Desist Order" seeking Commission sanctions against Cable TV of Durango, Inc. (Cable TV), operator of a cable television system at Durango, Colorado, for failure to provide KREZ-TV with network program non-duplication protection. On April 19, 1976, Cable TV filed a "Motion to Dismiss" the instant request, which XYZ subsequently opposed. Thereafter, Cable TV filed an "Opposition" to the subject request and XYZ replied.

PROCEDURAL ISSUES

2. Before examining the parties' substantive contentions in this proceeding, we must address certain procedural arguments raised by Cable TV in its "Motion to Dismiss". Cable TV asserts three grounds upon which it bases its request for dismissal: (a) In seeking a cease and desist order rather than an order to show cause, XYZ's petition requests relief which is impermissible, since Section 312(c) of the Communications Act of 1934, as amended, explicitly precludes issuing a cease and desist order unless preceded by an order to show cause and an appropriate proceeding pursuant thereto.[1] (b) XYZ's petition fails to give adequate notice as to what provisions XYZ alleges to have been violated, since it discusses claimed violations by Cable TV of the Commission's network program nonduplication rules yet nowhere refers to those rules. Rather, the request refers to §§ 73.91 and 73.93 of the Rules which are clearly inapposite since they relate solely to Radio Broadcast Services. Moreover, even assuming the request intended to refer to §§ 76.91 and 76.93, the reference remains inaccurate since these provisions were revoked, effective May 23, 1975, in the First Report and Order in Docket 19995, FCC 75-413, 52 FCC 2d 519 (1975). (c) Certain exhibits appended to XYZ's petition were illegible, thus depriving Cable TV of its ability to analyze and respond to the allegations raised therein.

3. XYZ contends that none of the grounds for dismissal offered by Cable TV are viable. First, XYZ asserts that its request for a cease and desist order properly reflects the ultimate relief sought and that its failure to initially seek an order to show cause in no way renders the request deficient. Second, although XYZ concedes that it improperly numbered the rule sections to which it intended reference in its request, it claims this error has not prejudiced Cable TV nor deprived it of adequate notice as to the violations alleged. In this connection XYZ points out that the context of its request unequivocally indicated that the network program nonduplication rules were at issue. Finally, with regard to Cable TV's assertions concerning the illegibility of certain exhibits, XYZ admits that the original copies supplied were difficult to read, but contends they were, nonetheless, legible. Furthermore, XYZ notes that while Cable TV initially sought a twenty day extension of time in which to respond to the request for a cease and desist order, it did not seek any further extensions based on the alleged illegibility. In any event, XYZ appended new copies of certain exhibits as well as two retyped exhibit pages to its opposition "[in] the interest of affording counsel for Cable TV every opportunity to properly respond to the request * * *."

[1] Section 312(c) of the Communications Act of 1934 provides, in part:

Before * * * issuing a cease and desist order pursuant to subsection (b), the Commission shall serve upon the licensee, permittee, or person involved an order to show cause why * * * a cease and desist order should not be issued.

4. Cable TV's "Motion to Dismiss" will be denied. The requirement contained in Section 312(c) of the Act is a procedural constraint placed on the Commission to ensure that every party faced with a potential order to cease and desist will be afforded the opportunity to present evidence countering the Commission's initial, yet tentative, conclusion that such an order should issue. Clearly this requirement will be followed and the prospective respondent's rights will be protected regardless of the parties' pleadings. Moreover, it does not appear that XYZ's denomination of the relief it seeks has in fact misled Cable TV or otherwise prejudiced it. Dismissal of petitioner's request on this basis, therefore, is unwarranted.
